- *Write the **date** of examination in the spaces provided.*
- *Answer **all** questions in the spaces provided.*
- *You are required to spend the first 15 minutes of the **1** ¾ to read the questions*
- *Candidates should answer the questions in **English.***

FOR EXAMINER'S USE ONLY:

QUESTION	MAXIMUM SCORE	CANDIDATE'S SCORE
1	16	
2	12	
3	12	
TOTAL	**40**	

1. You are provided with three sets of seedlings labelled A, B and C.

Examine them and answer the questions that follow:

(a) State the conditions under which seedling A and B were grown. **(2marks)**

A ………………………………………………………………………………………

B.……………………………………………………………………………………

(b) (i) Name the type of germination exhibited by the seedlings. **(1mark)**

………

(ii) Give a reason for your answer in b (i) above. **(1mark)**

………

………

(c) List two observable differences between seedlings A and B. **(2marks)**

A	**B**

(d) Name the term used to describe the phenomenon exhibited by specimen **B** **(1mark)**

………

(e) (i) Name the response exhibited by the seedlings labelled **C**. **(1mark)**

………

(ii) Explain how the response named in (e) (i) above occurred. **(2marks)**

………

………

………

……………………………………………………………………………………………………

(f) Separately, pluck, cut and crush the leaves from seedling **A** and **B.**

Place the crushed extract into separate test-tubes labelled $\mathbf{A_1}$ and $\mathbf{B_2}$.

Add 2ml of water to form solutions A_1 and B_1 respectively.

(i) Using the reagent provided, carry out food test on $\mathbf{A_1}$ and $\mathbf{B_1}$. **(4 marks)**

Test for	Procedure	Observation	Conclusion

(ii) Account for the results obtained (f) (i) above. **(2marks)**

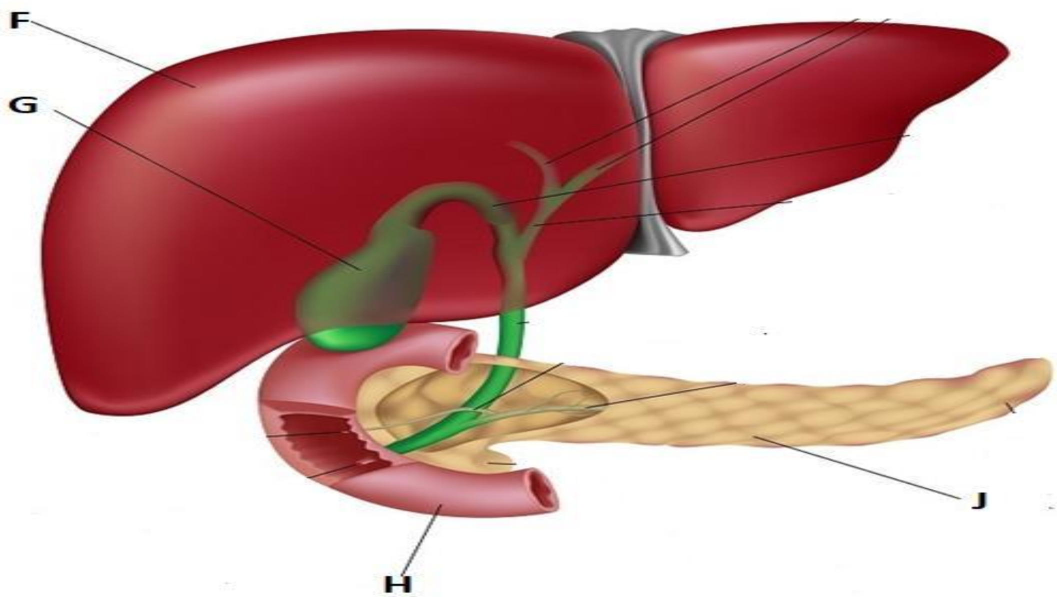
……………………………………………………………………………………………………

……………………………………………………………………………………………………

……………………………………………………………………………………………………

……………………………………………………………………………………………………

2. Study the photographs below and answer the questions that follow.



(a) Identify the following parts. **(2mks)**

F ……………………………………………………………………………………

G…………………………………………………………………………………

(b) (i) Identify the secretion stored in the part labelled G. **(1mk)**

……………………………………………………………………………………………………

(ii) Give two functions of the secretion you have identified in b (i) above. **(2mks)**

……………………………………………………………………………………………………

……………………………………………………………………………………………………

……………………………………………………………………………………………………

(c) (i) Give two major roles of the part labelled J. **(2mks)**

……………………………………………………………………………………………………

……………………………………………………………………………………………………

(ii) State the hormone secreted by the part labelled H. **(1mk)**

……………………………………………………………………………………………………

(d) Study the photograph below and answer the questions that follow.

(i) Identify the following part. **(2mks)**

K ……………………………………………………………………………

L ……………………………………………………………………………

(ii) Give two adaptations of the part labelled M. **(2mks)**

……………………………………………………………………………………………………

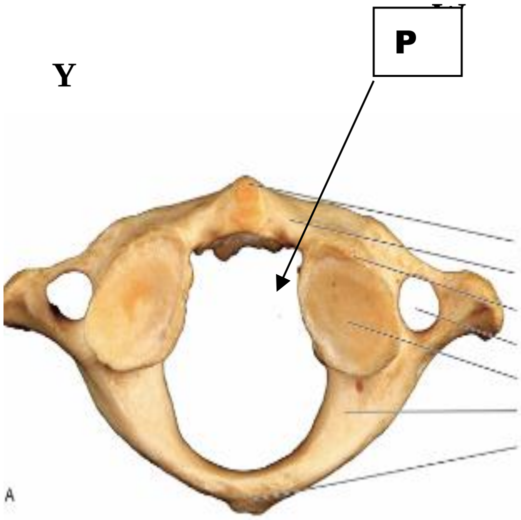
……………………………………………………………………………………………………

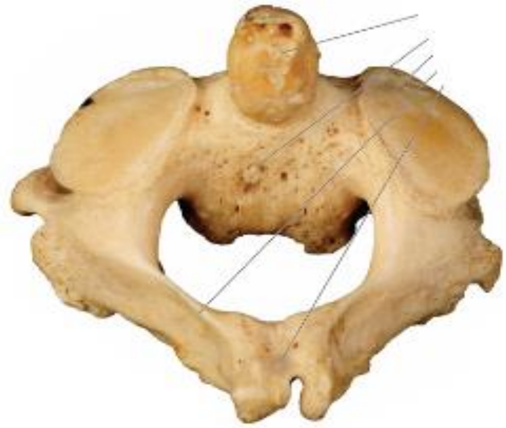
……………………………………………………………………………………………………

……………………………………………………………………………………………………

3. You are provided with photograph of specimen W, Y and Z.

Y





Z

(a) Name the region from which bones W and Y were obtained. **(1mk)**

………

(b) Identify the bones **3mks)**

W………………………………………………………………………………………

Y………………………………………………………………………………………

Z ………………………………………………………………………………………………

(c) State three characteristics features of the bone labelled W. **(3mks)**

………………………………………………………………………………………………………

………………………………………………………………………………………………………

………………………………………………………………………………………………………

………………………………………………………………………………………………………

(d) Which structures fit in the opening labelled P in the photographs of specimen W. **(2mks)**

………………………………………………………………………………………………………

………………………………………………………………………………………………………

………………………………………………………………………………………………………

(e) Name the parts S and T on photograph Z. **(2mks)**

S……………………………………………………………………………………………………

T……………………………………………………………………………………………………

f) On the photographs label orbutrator foramen

(1mk)
