

Ms-PowerPoint.

Exercise 1.

1. Create a new blank presentation.
2. Using the 'Title Only' slide, type "**The Power of a Great Idea**".
3. Format the title as follows:
 - ~ Enlarge the font size to 54.
 - ~ Put a shadow effect on the title.
 - ~ Format the text color to light green.
4. Move the title to the center of the slide.
5. Insert another slide using the '**Text and Clipart**' AutoLayout.
6. In the Title placeholder, type "**Most Convenient**".
7. In the Text placeholder, type:
 - Reliable
 - Effective
 - Time Saving.
8. Format the bullets into an asterisk (*) symbol.
9. In the Picture placeholder, insert the picture that has the keywords "**Technology, Office, Light, Bulbs**". Use the keywords **Light bulb** to search for the picture.
10. Format the picture as follows:
 - ~ Line color -Automatic
 - ~ Dashed line with round dots.
 - ~ Style - 6pt.
11. Apply the following Custom Animations:

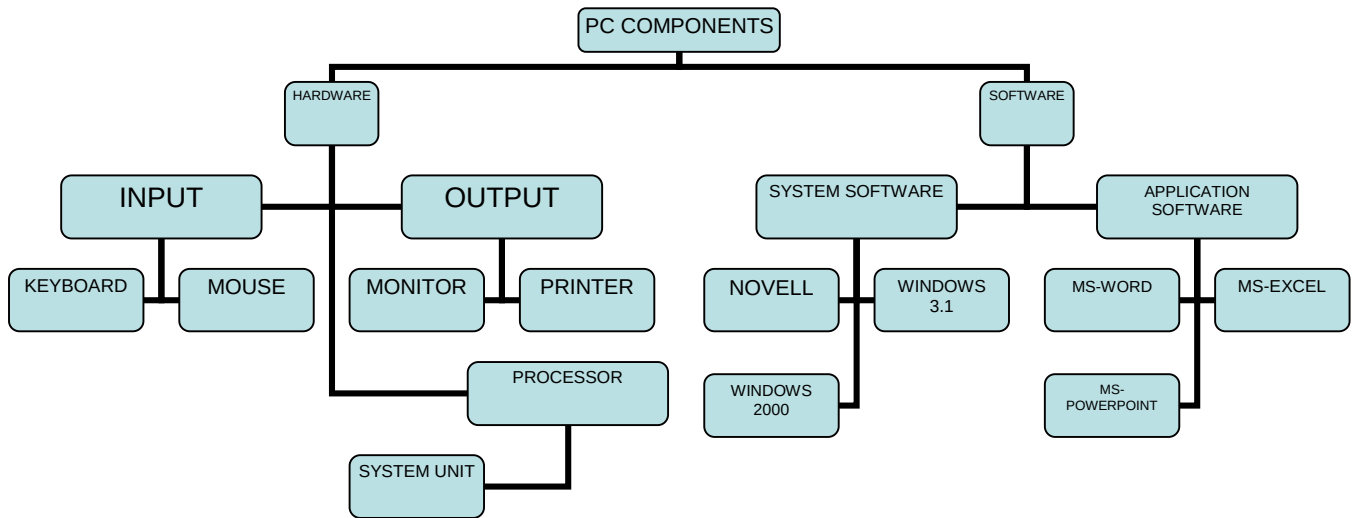

<u>Timings</u>	<u>Effects</u>
Title – automatically after 1 sec	Title – Fly from Top Left
Text – automatically after 5 sec	Introduce text by word
Object – automatically after 2 sec	Text – Checkerboard Across
	Introduce text all at once
	Should not be grouped
	Object - Spiral

12. Resize the **Text** placeholder and center it.
13. Insert a new blank slide.
14. Create a Textbox and type in the following: "**The Way Out to all Your Problems**".
15. Format the text as follows:
 - ~ Center align the text.
 - ~ Put a shadow effect on the text.
 - ~ Draw a rectangle over the text and order the objects appropriately.
16. Find the word "**all**" and replace it with "**Solve**".
17. Use Word Art to type the following "**Help Us Help You**".
18. Format the Word Art text as follows: **Comic Sans Ms, Font Size 48, Italics**.
19. Put appropriate effects and spell-check all your slides.
20. Set the Slide Transition as **Checkerboard Down**, and the timing as **Automatically After 2 seconds**.
21. Rehearse the timings.
22. Set up the show to **Loop Continuously until 'Esc'**.
23. Format the Background of All your slides to '**White Marble**'.
24. Run the Slide Show. Then save the presentation as "**Getting There**".

Exercise 2.

1. Open a new presentation and create the following Organization Chart. Arrange it appropriately and add transition effects to it as desired.

THE COMPONENTS OF A PC

2. Add a mouse action button on the right side of the slide to enable you to move to the next slide.
3. Insert a new slide, using the Title Slide layout and type the following title and subtitle:

The Components of a Computer

The Parts that enable a Person to Use the Computer

4. Save the presentation as '**PC Components**'.
5. Pack the presentation in your class folder.
