

STATION

Figure shows a pictorial view of a hydraulic system paper filter.
On the drawing paper provided

(a) Sketch in good proportion the exploded view of the filter.

(8 marks)

Name Four parts marks

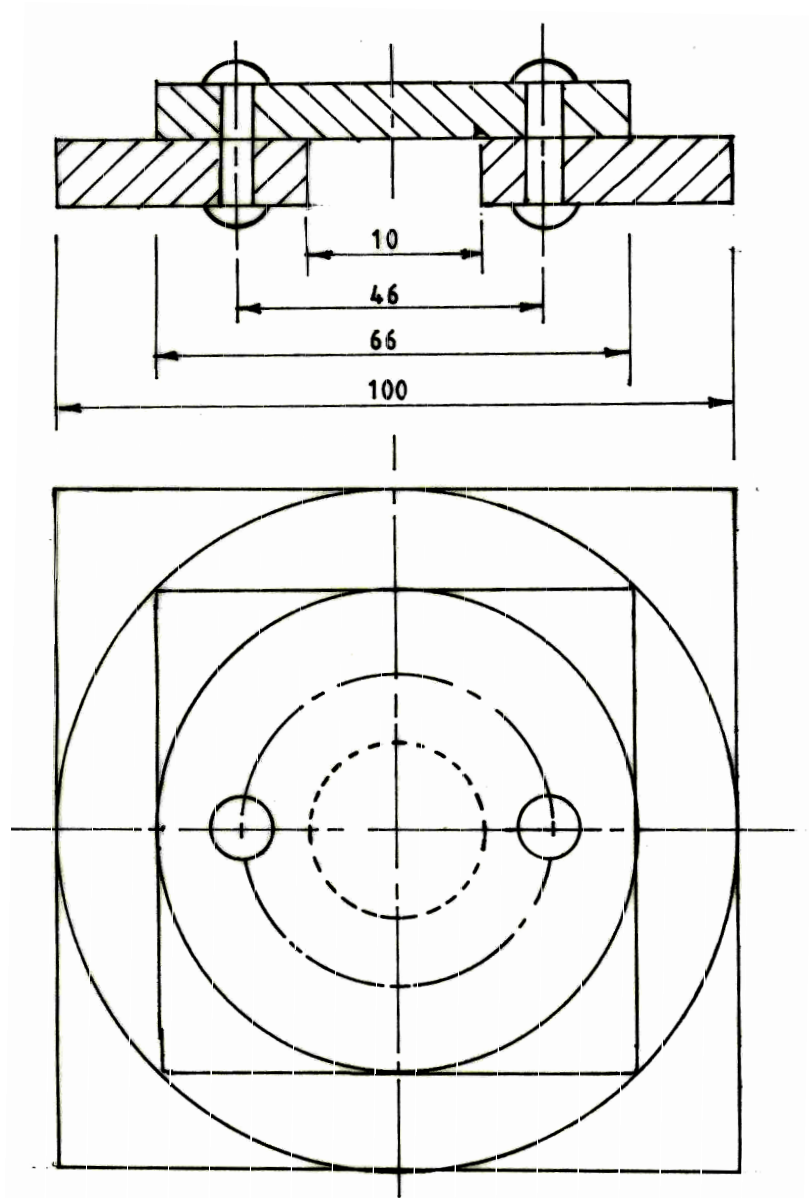

Figure

STATION

Using the tools, equipment and materials provided, make an overlap patch as shown in Figure.

marks

Figure

STATION

1

Identify the materials labelled A, B, C and D and state where each is used in the aircraft. marks

NAME

WHERE USED

A

B

C

D

Using the materials provided demonstrate to the examiner the correct procedure of carrying out the dye penetrant test on the part labelled marks

STATION

Using the tools and equipment provided carry out the tabulated tests on the materials labelled P and Q and record your observations in the table marks

1

Test	Material P	Material Q
Breaking		
Cutting		
Burning		
Bending		

Identify the materials P and Q and state one application of each in an aircraft marks

P

Application

Q

Application

STATION III

- a.iii** Study the instrument labelled **X** and identify the following
- i** principle of operation of the instrument
 - ii** aircraft system used
 - iii** starting requirement
- b.iii** Using the pump and instrument assemblies labelled **Y** and **Z** carry out the following tasks
- i** connect the pump to the instrument labelled **Y** pump slowly and state
 - ii** your observation
 - iii** the reason behind your observation
 - iv** one application in an aircraft
- c.iii** Repeat **b.i** above with instrument labelled **Y**
- d.iii** Repeat **b.i** above with instrument labelled **Z**
- e.iii** For the instruments labelled **Y** and **Z** state
- i** the principle of operation
 - ii** two maintenance tasks

STATION IV

- Using the tools, equipment and materials provided carry out the following tasks
- a.iii** strip one end of the cable provided to expose about 10mm of each layer
 - b.iii** Identify the type of cable
 - c.iii** State one application in an aircraft
 - d.iii** Sketch and label the four layers
 - e.iii** Solder the connector provided to the other end of the cable
- f.iii** Let the Examiner check your work

☐

STATION

☐

Using the tools provided carry out the following tasks

☐

a Remove the spark plug from the aeropiston cylinder provided and

☐

☐

i

measure and record the size of the gap

☐

☐

☐

3

marks

☐

☐

ii

state the condition of the gap

☐

☐

iii

state the function of the gap

☐

☐

☐
