Contents of this booklet:

Assessment tools (Kiswahili and English) : 3 samples each

Assessment data recording sheets: for baseline and endline

Attendance and progression sheets

Instructions for the Assessment Data Recording Sheet

This sheet should be filled by teachers during assessments. Use a different sheet for every grade. Any learner who comes after the baseline totals are completed, add his/her name in the sheet, assess him/her for grouping, but don't record the baseline result in this sheet. Record his/her data for midline and endline as you do for other learners.

How to cross check the results:

a) Check that you have marked every learner on each competency (Kiswahili and English)

b) Check the totals.

- Number of total tested learners should be equal to the sum of Beginner, Letter, Word, Paragraph and Story level (in Kiswahili) Learners.*
- Sum of Can and Cannot for each comprehension question should be equal to sum total of learners at Story level.*
- Number of total tested learners should be equal to the sum of Beginner, Letter, Word, Paragraph, and Story level (in English) Learners.*
- Sum of Can and Cannot under comprehension in English should be equal to sum total of learners at Storylevel.*

Tool sample number: *During each assessment cycle, rotate samples for different Learners. For example, use sample 1 for learner 1, sample 2 for learner 2 and so on. For a learner, use different sample numbers for different rounds of assessments. For example, if you used sample 1 during baseline, use sample 2 for midline and sample 3 for endline.*
