

Week: _____

Lesson: _____

SCHOOL	GRADE	DATE	TIME	ROLL
	THREE			

STRAND/THEME/TOPIC: NUMBERS

SUBSTRAND/SUB-THEME/SUB-TOPIC: Number concept (Ordinal number names 1 to 20)

Specific lesson learning outcome.

By the end of the lesson, the learner should be to use ordinal number names to identify position from 1 to 20.

KEY INQUIRY QUESTION (s)

How do you identify position of rally cars in a competition?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Number cards.

Felt pens.

Books.

Playground.

Mathematics pupil's book 3 pg.191-192.

Mathematics teachers guide grade 3 pg. 167.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Learners to form groups and engage in a running competition.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Guide learners to form groups and then ask them to engage in a running activity outside school.

Step 2: Learners to form queues as they complete the race/activity at the finishing line.

Step 3: Learners to assign ordinal numbers to the competitors as first, second up to twentieth.

Step 4: Guide learners to read the ordinal number names first, second, third up to twentieth.

Step 5: Using the example in the learners book page 189, guide the learners to use ordinal number names to identify the position: first, second up to twentieth.

SUMMARY

Review the lesson on reading numbers

CONCLUSION (Assessment of Learning)

Learners to play digital games involving position.

EXTENSION OF ACTIVITIES

Learners to practice listening to stories of the elderly at home on how they used to count their possessions.

REFLECTION ON THE LESSON/SELF-REMARKS

Week: _____

Lesson: _____

SCHOOL	GRADE	DATE	TIME	ROLL
	THREE			

STRAND/THEME/TOPIC: NUMBERS

SUBSTRAND/SUB-THEME/SUB-TOPIC: Number concept (Ordinal Number Symbols Position 1st to 20th)

Specific lesson learning outcome.

By the end of the lesson, the learner should be to use ordinal number symbols to identify positions from 1st to 20th

KEY INQUIRY QUESTION (s)

How do you identify the positions of learners in an examination?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Books.

Felt pens.

Number cards

Mathematics pupil's book 3 pg.193.

Mathematics teachers guide grade 3 pg. 168.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Learners to form groups and engage in a running competition.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Guide learners in pairs or in groups to arrange 20 mathematics textbooks on their desks from left to right.

Step 2: Learners to replace number cards with ordinal number names, first, second up to twentieth on the books.

Step 3: Guide learners to turn over the number cards with ordinal number symbols 1st, 2nd, 3rd, up to 20th and read the symbols while placing emphasis on 16th, 17th, 18th, 19th, and 20th.

Step 4: Using the activity in the learners book page 191, guide the learners to use ordinal number symbols 1st, 2nd, up to 20th.

SUMMARY

Review the lesson on reading numbers.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving position.

EXTENSION OF ACTIVITIES

Learners to practice listening to stories of the elderly at home on how they used to count their possessions.

REFLECTION ON THE LESSON/SELF-REMARKS

.....

Week: _____

Lesson: _____

SCHOOL	GRADE	DATE	TIME	ROLL
	THREE			

STRAND/THEME/TOPIC: NUMBERS

SUBSTRAND/SUB-THEME/SUB-TOPIC: Whole Numbers (Counting in tens)

Specific lesson learning outcome.

By the end of the lesson, the learner should be to count in tens forward and backwards from 1 to 1000

KEY INQUIRY QUESTION (s)

How do you count in tens?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Number cards.

Number line.

Numbers charts.

Counters.

Mathematics pupil's book 3 pg. 194.

Mathematics teachers guide grade 3 pg. 170.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Learners to count objects in fives forward.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Guide learners in pairs or in groups to count in tens both forward and backward using objects.

Step 2: Learners in groups to place number cards on the groups objects formed in activity one.

Step 2: Using the example in the learner's book page 192, guide learners to count in tens forward and backwards from 1 to 1000.

SUMMARY

Review the lesson on counting numbers.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving counting

EXTENSION OF ACTIVITIES

Learners to arrange chairs on tables in rows and columns in community functions as a way of promoting learning outside the school.

REFLECTION ON THE LESSON/SELF-REMARKS

.....

.....

Week: _____

Lesson: _____

SCHOOL	GRADE	DATE	TIME	ROLL
	THREE			

STRAND/THEME/TOPIC: NUMBERS

SUBSTRAND/SUB-THEME/SUB-TOPIC: Place Value

Specific lesson learning outcome.

By the end of the lesson, the learner should be to identify place value up to thousands

KEY INQUIRY QUESTION (s)

How do you identify place value of numbers?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Abacus.

Place value tins.

Mathematics pupil's book 3 pg.195-195.

Mathematics teachers guide grade 3 pg. 170-171.

ORGANIZATION OF LEARNING.

Learners to work in pairs or groups.

INTRODUCTION

Learners to collect sticks in bundles for use in identifying place value..

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Guide learners in pairs or in groups to represent various numbers using abacus/place number tins

Step 2: Ask the learners in pairs or in groups to identify ones, tens, hundreds and thousands from the abacus/place value tins.

Step 3: Using the example in the learner's book page 193, guide learners to identify place value of ones, tens, hundred and thousands.

SUMMARY

Review the lesson on counting numbers

CONCLUSION (Assessment of Learning)

Learners to play digital games involving counting

EXTENSION OF ACTIVITIES

Learners to arrange chairs on tables in rows and columns in the school

REFLECTION ON THE LESSON/SELF-REMARKS

Week: _____

Lesson: _____

SCHOOL	GRADE	DATE	TIME	ROLL
	THREE			

STRAND/THEME/TOPIC: NUMBERS

SUBSTRAND/SUB-THEME/SUB-TOPIC: Reading numbers 1 to 1000 in symbols

Specific lesson learning outcome.

By the end of the lesson, the learner should be able to read numbers 1 to 1000 in symbols.

KEY INQUIRY QUESTION (s)

What do you consider when reading numbers?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Flash cards.

Number cards.

Number chart with number symbols.

Mathematics pupil's book 3 pg.197.

Mathematics teachers guide grade 3 pg. 171-172.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Learners to sing a song involving numbers.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Guide learners in pairs or in groups to read the numbers 1 to 1000 in symbols.

Step 2: Ask the learners in pairs or groups to read numbers 1 to 1000 in symbols using flash cards and number cards.

Step 3: Using the example in the learners book pg. 195, guide the learners in reading numbers 1 to 1000 in symbols.

SUMMARY

Review the lesson on counting numbers.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving counting.

EXTENSION OF ACTIVITIES

Learners to arrange chairs on tables in rows and columns in the school and at home.

REFLECTION ON THE LESSON/SELF-REMARKS

Week: _____

Lesson: _____

SCHOOL	GRADE	DATE	TIME	ROLL
	THREE			

STRAND/THEME/TOPIC: NUMBERS

SUBSTRAND/SUB-THEME/SUB-TOPIC: Reading and Writing Numbers in words

Specific lesson learning outcome.

By the end of the lesson, the learner should be able to read and write numbers 1 to 100 in words

KEY INQUIRY QUESTION (s)

What do you consider when reading and writing numbers in words?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Number charts with number symbols and number names.

Flash cards.

Mathematics pupil's book 3 pg.198.

Mathematics teachers guide grade 3 pg. 173.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Learners to sing a song involving numbers.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Guide learners in pairs or in groups to read and write numbers 1 to 100 in words.

Step 2: Ask learners in pairs or groups to match number words with number symbols (1 to 100)

Step 3: Learners in pairs or groups to read and write numbers 1 to 100 in words.

Step 3: Using the example in the learners book pg. 196, guide the learners in reading and writing whole numbers 1 to 100 in words.

SUMMARY

Review the lesson on counting numbers.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving counting

EXTENSION OF ACTIVITIES

Learners to arrange chairs on tables in rows and columns in the school and at home.

REFLECTION ON THE LESSON/SELF-REMARKS

Week: _____

Lesson: _____

SCHOOL	GRADE	DATE	TIME	ROLL
	THREE			

STRAND/THEME/TOPIC: NUMBERS

SUBSTRAND/SUB-THEME/SUB-TOPIC: Number patterns

Specific lesson learning outcome.

By the end of the lesson, the learner should be able to work out missing numbers in number patterns up to 1000.

KEY INQUIRY QUESTION (s)

How do you find missing numbers in number patterns?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Number cards.

A hundred chart.

Pocket boards.

Mathematics pupil's book 3 pg.192-200.

Mathematics teachers guide grade 3 pg. 173-174.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Learners to sing a song involving numbers using skipping rope.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Guide the learners in pairs or groups to use number cards, hundred chart and pocket boards to find missing numbers in number patterns.

Step 2: Ask learners in pairs or groups to discuss and come up with different ways of finding missing numbers.

Step 3: Using the example in the learner's book page 197, guide the learners in finding missing numbers in a number patterns.

SUMMARY

Review the lesson on number patterns.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving Numbers

EXTENSION OF ACTIVITIES

Learners to arrange chairs on tables in rows and columns in the school and at home.

REFLECTION ON THE LESSON/SELF-REMARKS

Week: _____

Lesson: _____

SCHOOL	GRADE	DATE	TIME	ROLL
	THREE			

STRAND/THEME/TOPIC: *NUMBERS*

SUBSTRAND/SUB-THEME/SUB-TOPIC: Fractions (Comparing $\frac{1}{2}$, $\frac{1}{4}$ and $\frac{1}{8}$ as part of a whole)

Specific lesson learning outcome.

By the end of the lesson, the learner should be able to compare $\frac{1}{2}$, $\frac{1}{4}$ and $\frac{1}{8}$ as part of a whole

KEY INQUIRY QUESTION (s)

How do we compare $\frac{1}{2}$, $\frac{1}{4}$ and $\frac{1}{8}$ as part of a whole?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Manilla cutouts.

Pair of scissors.

Mathematics pupil's book 3 pg.201.

Mathematics teachers guide grade 3 pg. 176.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Learners to prepare cut outs of different objects.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Guide learners in pairs or in groups to cut circular cut outs. Discuss the safety precautions when handling sharp objects.

Step 2: Ask the learners to find out how to get a $\frac{1}{2}$, $\frac{1}{4}$ and $\frac{1}{8}$ of circular cutouts.

Step 3: Ask learners to fold the circular cutouts into 2, 4 and 8 equal parts.

Step 4: Learners to identify $\frac{1}{2}$, $\frac{1}{4}$ and $\frac{1}{8}$ of a whole.

Step 5: Using the example in the learner's book page 199, guide learners to compare $\frac{1}{2}$, $\frac{1}{4}$ and $\frac{1}{8}$ as part of a whole.

SUMMARY

Review the lesson on fractions.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving fractions.

EXTENSION OF ACTIVITIES

Learners to practice sharing of items in eighths and quarters at home and at school with their friends.

REFLECTION ON THE LESSON/SELF-REMARKS

Specific lesson learning outcome.

By the end of the lesson, the learner should be able to compare $\frac{1}{2}$, $\frac{1}{4}$ and $\frac{1}{8}$ as part of a group.

KEY INQUIRY QUESTION (s)

How do we compare $\frac{1}{2}$, $\frac{1}{4}$ and $\frac{1}{8}$ as part of a group?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Bottle tops.

Sticks.

Mathematics pupil's book 3 pg.202-203.

Mathematics teachers guide grade 3 pg. 177.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Learners to prepare cut outs of different objects.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Guide learners to share bottle tops in two groups. Learner's to explain what fraction each group represents.

Step 2: Learners to share bottle tops into four equal groups. Learner's to explain what fraction each group represents.

Step 3: Learners to share bottle tops into eight equal groups. Learner's to explain what fraction each group represents.

Step 4: Guide learners to compare $\frac{1}{2}$, $\frac{1}{4}$ and $\frac{1}{8}$ of a group.

Step 5: Using the example in the learner's book page 200, guide learners to compare $\frac{1}{2}$, $\frac{1}{4}$ and $\frac{1}{8}$ as part of a group.

SUMMARY

Review the lesson on fractions.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving fractions.

EXTENSION OF ACTIVITIES

Learners to practice sharing of items in eighths and quarters at home and at school with their friends.

REFLECTION ON THE LESSON/SELF-REMARKS

SCHOOL	GRADE	DATE	TIME	ROLL
	THREE			

STRAND/THEME/TOPIC: NUMBERS

SUBSTRAND/SUB-THEME/SUB-TOPIC: Addition (Adding a 3-digit number to a 1- digit number)

Specific lesson learning outcome.

By the end of the lesson, the learner should be able to add a 3 digit number to a 1-digit number vertically and horizontally without regrouping vertically with a sum not exceeding 1000.

KEY INQUIRY QUESTION (s)

What do you consider when adding numbers vertically and horizontally?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Place value tins with sticks or straws.

Place value chart.

Abacus.

Mathematics pupil's book 3 pg. 204.

Mathematics teachers guide grade 3 pg. 178-179.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Learners to prepare count total number of desks in their class.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Guide learners in in pairs or groups in using place value apparatus to add a 3-digit number to a 1-digit number with a sum not exceeding 1000. Discuss the safety precautions when handling the resource materials.

Step 2: Ask learners in pairs or groups to discuss how to add a 3-digit number to a 1-digit number vertically and horizontally without regrouping with a sum not exceeding 1000

Step 3: Using the example in the learner's book page 202, guide the learners in working out examples.

SUMMARY

Review the lesson on addition by asking learners questions.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving addition.

Give an assessment.

EXTENSION OF ACTIVITIES

Learners to practice working out total number of different items in their homes.

SUBSTRAND/SUB-THEME/SUB-TOPIC: Addition (Number Patterns)

Specific lesson learning outcome.

By the end of the lesson, the learner should be able to fill in the missing numbers in number patterns up to 1000 involving addition.

KEY INQUIRY QUESTION (s)

How do find missing numbers in number patterns?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Number boards/numbers grids.

Number lines.

Hundred charts,

Mathematics pupil's book 3 pg.212.

Mathematics teachers guide grade 3 pg.86.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Learners to prepare count total number of desks in their class.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Guide learners in in pairs or groups to discuss how to find a missing number in order to create patterns using the hundred charts or number or number boards/number grids. Discuss the importance of social cohesion as learners work in groups.

Step 2: Discuss with Learners how to create number patterns involving addition up to 1000.

Step 3: Using the example in the learner's book page 210, guide the learners to create number patterns involving addition up to 1000.

SUMMARY

Review the lesson on addition by asking learners questions.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving addition

INTRODUCTION

Learners to prepare count missing students in their class.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Guide learners in pairs or in groups to use place value apparatus to subtract a 2-digit number from a 3-digit number without regrouping. Discuss safety precautions when handling resources and materials.

Step 2: Ask Learners in pairs or in groups how to subtract a 2-digit number from a 3-digit number vertically and horizontally without regrouping.

Step 3: Using the example in the learner's book page 211, guide the learners in subtracting 2-digit number from a 3-digit number without regrouping.

SUMMARY

Review the lesson on subtraction by asking learners questions.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving subtraction

Give an assessment.

EXTENSION OF ACTIVITIES

Learners to practice cleaning of the environment in their homes and at school.

REFLECTION ON THE LESSON/SELF-REMARKS

Week: _____

Lesson: _____

SCHOOL	GRADE	DATE	TIME	ROLL
	THREE			

STRAND/THEME/TOPIC: NUMBERS

SUBSTRAND/SUB-THEME/SUB-TOPIC: Subtraction (subtracting a 2-digit number from a 3-digit number)

Specific lesson learning outcome.

By the end of the lesson, the learner should be able to subtract a 2-digit number from a 3-digit number with regrouping.

KEY INQUIRY QUESTION (s)

What do you consider when subtracting numbers?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Place value tins with sticks or straws.

Place value chart.

Abacus.

Mathematics pupil's book 3 pg.215-216.

Mathematics teachers guide grade 3 pg. 188-189.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Learners to prepare count missing students in their class.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Guide learners in pairs or in groups to use place value apparatus to subtract a 2-digit number from a 3-digit number with regrouping at tens place. Discuss safety precautions when handling resources and materials.

Step 2: Ask Learners in pairs or in groups to discuss how to subtract a 2-digit number from a 3-digit number with regrouping at the tens place.

Step 3: Using the example in the learner's book page 213, guide the learners in subtracting 2-digit number from a 3-digit number with regrouping at the tens place.

SUMMARY

Review the lesson on subtraction by asking learners questions.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving subtraction.

Give an assessment.

EXTENSION OF ACTIVITIES

Learners to practice cleaning of the environment in their homes and at school.

REFLECTION ON THE LESSON/SELF-REMARKS

STRAND/THEME/TOPIC: NUMBERS

SUBSTRAND/SUB-THEME/SUB-TOPIC: Multiplication (Multiplying numbers 8, 9 and 10)

Specific lesson learning outcome.

By the end of the lesson, the learner should be able to multiply numbers 8, 9 and 10 by 1 to 10 using repeated addition.

KEY INQUIRY QUESTION (s)

How do you multiply using repeated addition?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Counters.

Mathematics pupil's book 3 pg.223-224.

Mathematics teachers guide grade 3 pg. 193-194.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Learners to prepare bundles of counters.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Guide learners how to work out multiplication of 8, 9 and 10 using concrete objects. Discuss the safety precautions when handling resources and materials.

Step 2: Discuss with Learners how to work out multiplication using repeated addition.

Step 3: Using the example in the learner's book page 221, guide the learners on how to work out multiplication using repeated addition

SUMMARY

Review the lesson on multiplication by asking learners questions.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving multiplication

Give an assessment.

EXTENSION OF ACTIVITIES

Learners to practice arranging items in groups of equal numbers.

REFLECTION ON THE LESSON/SELF-REMARKS

Week: _____

STRAND/THEME/TOPIC: NUMBERS

SUBSTRAND/SUB-THEME/SUB-TOPIC: Division (Dividing numbers up to 90)

Specific lesson learning outcome.

By the end of the lesson, the learner should be able to divide numbers up to 90 by numbers 1 to 9

KEY INQUIRY QUESTION (s)

How do we use multiplication table to work out division questions?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Counters.

Multiplication table.

Mathematics pupil's book 3 pg.229-230.

Mathematics teachers guide grade 3 pg. 196-197.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Draw a number line on the blackboard.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Learners to use the multiplication table to work out multiplication and write corresponding division sentences.

Step 2: Guide learners on how to divide using multiplication table.

Step 4: Learners write horizontal questions in long division form.

Step 3: Using the example in the learner's book page 227, guide learners to divide numbers up to 90.

SUMMARY

Review the lesson on division by asking learners questions.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving division

Give an assessment.

EXTENSION OF ACTIVITIES

Learners to practice by visiting children’s homes and share fruits.

REFLECTION ON THE LESSON/SELF-REMARKS

STRAND/THEME/TOPIC: NUMBERS

SUBSTRAND/SUB-THEME/SUB-TOPIC: Division (Word questions involving division)

Specific lesson learning outcome.

By the end of the lesson, the learner should be able to work out word questions involving division up to 81.

KEY INQUIRY QUESTION (s)

What do you consider when dividing numbers in word questions?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Counters.

Multiplication table.

Mathematics pupil's book 3 pg.231.

Mathematics teachers guide grade 3 pg. 197-198.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Draw a number line on the blackboard.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Learners to discuss what to consider in working out division word questions.

Step 2: Guide learners on how to work out word questions.

Step 3: Using the example in the learner's book page 229, guide learners to work out word questions in division.

SUMMARY

Review the lesson on division by asking learners questions.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving division

Give an assessment.

EXTENSION OF ACTIVITIES

Learners to practice by visiting children's homes and share fruits.

STRAND/THEME/TOPIC: MEASUREMENT

SUBSTRAND/SUB-THEME/SUB-TOPIC: Length (Adding Length in Metres)

Specific lesson learning outcome.

By the end of the lesson, the learner should be able to add length in metres in real life situations.

KEY INQUIRY QUESTION (s)

How do we add length in metres?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Metre rule.

Metre sticks.

5 metre Strings.

Mathematics pupil's book 3 pg.232-233.

Mathematics teachers guide grade 3 pg. 200.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Learners to prepare straight sticks in length.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Learners in pairs or in groups to measure lengths of the four walls of their classroom and record. Learners to record the measurements in their exercise books. Discuss the safety precautions when using resources and materials.

Step 2: Discuss with learners how to add two of the lengths at a time.

Step 3: Using examples in the learner's book page 230, guide learners how to add length in metres.

SUMMARY

Review the lesson on length by asking learners questions.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving length.

Give an assessment.

EXTENSION OF ACTIVITIES

Learners to practice measuring by assisting neighbours to measure length during building/rabbit cage, among others.

REFLECTION ON THE LESSON/SELF-REMARKS

KEY INQUIRY QUESTION (s)

How do we subtract length in metres?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Metre rule.

Metre sticks.

5 metre Strings.

Mathematics pupil's book 3 pg.234-235.

Mathematics teachers guide grade 3 pg. 201.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Learners to prepare straight sticks in length.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Guide Learners in pairs or in groups to measure lengths of the chalkboard on which it is fixed
Learners to record the measurements in their exercise books. Discuss the safety precautions when using resources and materials.

Step 2: Learners in pairs or groups to discuss how to work out the difference of the lengths measured in activity one. Learners to share their experiences with other groups.

Step 3: Using examples in the learner's book page 232, guide learners how to subtract length in metres.

SUMMARY

Review the lesson on length by asking learners questions.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving length

Give an assessment.

STRAND/THEME/TOPIC: MEASUREMENT

SUBSTRAND/SUB-THEME/SUB-TOPIC: Mass (Adding and subtracting mass in Kilograms)

Specific lesson learning outcome.

By the end of the lesson, the learner should be able to measure add and subtract mass in kilograms in real life situations.

KEY INQUIRY QUESTION (s)

What do we use to measure mass?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Items of different masses in the classroom shop.

Mathematics pupil's book 3 pg.236-237.

Mathematics teachers guide grade 3 pg. 203.

ORGANIZATION OF LEARNING

Learners to collect objects of different masses.

INTRODUCTION

Review the previous lesson.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Provide learners in pairs or groups with different items whose masses are indicated. Let learner's discuss how to get the total mass of the items. Discuss the safety precautions when handling resources and materials.

Step 2: Guide learners on how to work out the total mass of any two items

Step 3: Learners in pairs or groups are provided with sand or soil packets of 1kg. Ask learners to form groups of 1kg.

Step 4: Learners in pairs or groups are guided to take away some packets from the group formed.

Step 5: Using examples in the learner's book page 234, guide learners to add and subtract mass in kilograms in real life situations.

SUMMARY

Review the lesson on mass by asking learners questions.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving mass.

Give an assessment.

EXTENSION OF ACTIVITIES

Learners to practice measuring mass of items in their homes in kilograms.

STRAND/THEME/TOPIC: MEASUREMENT

SUBSTRAND/SUB-THEME/SUB-TOPIC: Capacity (Measuring capacity in Litres)

Specific lesson learning outcome.

By the end of the lesson, the learner should be able to measure capacity in litres.

KEY INQUIRY QUESTION (s)

What can we use to measure capacity?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

1 litre containers.

Water.

Containers of different capacities.

Mathematics pupil's book 3 pg.238.

Mathematics teachers guide grade 3 pg.204-205.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Review the previous lesson.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Provide learners in pairs or groups with water and containers of different capacities. Ask learners in pairs or in groups to discuss and come up with different ways of finding capacities of the containers

Step 2: Guide learners in pairs or groups to measure capacity of various containers in litres using water. Discuss safety precautions when handling resources and materials.

Step 3: Learners to measure the amount of water in containers in activity two and record. Let learners share their experiences.

Step 3: Using the activity in the learner's book page 236, guide learners to measure the capacity of containers.

SUMMARY

Review the lesson on capacity by asking learners questions.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving capacity

Give an assessment.

EXTENSION OF ACTIVITIES

Learners to practice measuring capacity of containers used for storing liquids at home.

STRAND/THEME/TOPIC: MEASUREMENT

SUBSTRAND/SUB-THEME/SUB-TOPIC: Capacity (Estimating capacity)

Specific lesson learning outcome.

By the end of the lesson, the learner should be able to estimate capacity up to 5 litres.

KEY INQUIRY QUESTION (s)

How do we tell the capacity of a container without measuring?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

1 litre containers.

Water.

Container of different capacities.

Mathematics pupil's book 3 pg.240.

Mathematics teachers guide grade 3 pg.206-207.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Review the previous lesson.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Provide learners in pairs or in groups with water and containers of different capacities. Ask learners to estimate capacity of the containers and record their estimation.

Step 2: Guide learners in pairs or groups to measure the capacity of containers in activity 2 and record alongside the estimation. Discuss safety precautions when handling resources and materials.

Step3: Learners in groups identify the difference between the estimates and the actual capacity

Step 3: Using examples in the learner's book page 238, guide learners to estimate the capacity in litres.

SUMMARY

Review the lesson on capacity by asking learners questions.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving capacity

Give an assessment.

EXTENSION OF ACTIVITIES

Learners to practice measuring capacity of containers used for storing liquids at home.

SUBSTRAND/SUB-THEME/SUB-TOPIC: Time (Adding Time in Hours and Minutes)

Specific lesson learning outcome.

By the end of the lesson, the learner should be able to add time involving hours and minutes without conversion in real life situations.

KEY INQUIRY QUESTION (s)

How do we add time in hours and minutes?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Clock face.

Mathematics pupil's book 3 pg.241-242.

Mathematics teachers guide grade 3 pg.208-209.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Learners to sing a song involving time

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Guide learners in pairs or group to discuss the different activities that they engage in and time taken to complete them.

Step 2: Learners in pairs or groups discuss how to work out time taken to carry out different activities.

Step 3: Discuss with learners how to work out time durations involving hours and minutes without conversion in real life situations.

Step 4: Using the example in the learner's book page 239, guide learners to work out time durations involving hours and minutes without conversion in real life situations.

SUMMARY

Review the lesson on time by asking learners questions.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving time

Give an assessment.

EXTENSION OF ACTIVITIES

Learners to practice assisting their neighbours in keeping their compounds clean during holidays.

Specific lesson learning outcome.

By the end of the lesson, the learner should be able to relate money to goods and services up to sh. 1000.

KEY INQUIRY QUESTION (s)

How do we acquire goods and services?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

Kenyan currency notes and coins.

Assorted items from the classroom shop.

Mathematics pupil's book 3 pg. 245.

Mathematics teachers guide grade 3 pg. 210-211.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Learners to sing a song involving money.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: learners in pairs or groups to share experiences on the prices of common goods and services

Step 2: Guide learners in pairs or groups in placing price tags on assorted goods from the classroom shop.

Step 3: Discuss with learners the difference between goods and service.

Step 4: Using the activity in the learner's book page 243, guide learners to discuss and relate money to goods and services up to sh. 1000

SUMMARY

Review the lesson on money by asking learners questions.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving money

Give an assessment.

EXTENSION OF ACTIVITIES

Learners to practice assisting in counting money during school functions, harambees, churches etc.

STRAND/THEME/TOPIC: GEOMETRY

SUBSTRAND/SUB-THEME/SUB-TOPIC: Position and Direction (Turning to right and to the left from a point)

Specific lesson learning outcome.

By the end of the lesson, the learner should be able to turn to the right and to the left from a point.

KEY INQUIRY QUESTION (s)

What do you do when you get to a road junction?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

School compound.

Mathematics pupil's book 3 pg.248.

Mathematics teachers guide grade 3 pg. 214-215.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Learners to sing a song involving direction: *when I reach the junction I turn turn....*

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Guide learners in pairs or groups to discuss the direction take after reaching a road junction. Learners to write possible directions to take at a road junction.

Step 2: The teacher to take learners for an outdoor activity involving turning right or left. Discuss safety precautions when performing the activity.

Step 3: Using the picture in the learner's book page 246, guide learners to turn right or left from a point in real life situations.

SUMMARY

Review the lesson on position and direction y by asking learners questions.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving positions and directions

Give an assessment.

EXTENSION OF ACTIVITIES

Learners to practice assisting in arranging seats in straight lines during school and community functions.

STRAND/THEME/TOPIC: GEOMETRY

SUBSTRAND/SUB-THEME/SUB-TOPIC: Shapes (Geometric patterns)

Specific lesson learning outcome.

By the end of the lesson, the learner should be able to turn to make patterns using geometric shapes.

KEY INQUIRY QUESTION (s)

What shapes can you identify in your school?

Core competencies	Values	PCIs
• Learning to learn • Communication and collaboration • Imagination and creativity • Problem solving	• Unity • Respect • Patriotism • responsibility	Self-awareness Self-esteem

LEARNING RESOURCES

School compound.

Mathematics pupil's book 3 pg.249.

Mathematics teachers guide grade 3 pg. 216.

ORGANIZATION OF LEARNING

Learners to work in pairs or groups.

INTRODUCTION

Learners to sing a song while making patterns.

LESSON DEVELOPMENT (Assessment as learning)

Step 1: Learners in pairs to identify different shapes.

Step 2: Learners to draw different shapes.

Step 3: Learners in pairs to make patterns using different shapes.

Step 3: Using the picture in the learner's book page 247, guide learners to make patterns using different shapes.

SUMMARY

Review the lesson on shapes by asking learners questions.

CONCLUSION (Assessment of Learning)

Learners to play digital games involving shapes

Give an assessment.

EXTENSION OF ACTIVITIES

Learners to practice assisting in arranging seats in straight lines during school and community functions.
