

THE KENYA NATIONAL EXAMINATIONS COUNCIL

SCHOOL BASED ASSESSMENT ART AND CRAFT PROJECT

Grade 6-2022

This project must be completed by 26th August, 2022

This document consists of 8 printed pages.

NOTE TO THE TEACHER:

Included in this document are:

1. Guidelines for administration
2. Suggested Timelines
3. Assessment task
4. Scoring rubric
5. Assessment score sheet

1. Guidelines for administration

The School Based Assessment task has been developed as a step by step guideline to learners.

- This assessment is an individual performance.
- The activity is to be done in class during the term.
- It is important that you guide the learners through the various steps of the task to ensure active and creative participation by all learners.
- Review the scoring rubrics with the learners before they begin the assessment so that they understand what will be expected of their final art work.
- Ensure the completed work is carried out by each learner to completion.
- The assessment task has been provided on page 4.
- Provide the learners with the assessment task and scoring rubrics on page 4 and 5 (this can be printed, downloaded in the learners' digital devices or written on the blackboard).
- When you are administering the assessment, learners may ask questions to clarify the process. You should encourage them to ask questions at any time throughout the execution of the task.

Preparation for Administering the Assessment

Tools & Materials required for this performance assessment:

- Old carton boards, newspaper, magazines, exercise books (*reuse of materials is encouraged and to be collected/ assembled by each learner*)
- Old wires, sisal twine or thread,
- Tempera paints or watercolours,
- Paint brushes or sponge or old rags,
- Glue (this *can be extracted from plants*), or masking tape or cello tape.

All these materials can be improvised where applicable. Schools are encouraged to reuse materials.

2. Timelines for the project

Learners may have as much time as they need to complete the task. The timelines suggested here are meant only as a guide, and you may shorten or lengthen them depending on individual learner's.

The following is a **four-week** suggested timeline:

FROM THE DAY PROJECT IS RECEIVED AS PER KNEC GUIDELINES	
WEEK 1	
	- The teacher provides the learners with the task and reads it aloud. The learners may ask questions. The teacher answers any questions. - The learners are guided to begin making sketches on the task as they familiarize with the task requirements. The teacher further guides the learners on how to carry out the task, collect and store all the materials and tools required.
WEEK 2	
	- The learners continue making sketches and improving on their pieces. - The teacher ensures all the learners clearly label their sketches as they progress to include name and date; each should place every sketch in their assessment portfolios. (<i>These can also be photographed and stored in an e portfolio</i>) - The learners begin assembling their pieces NOTE: Do not buy portfolios/folders; improvise with materials that are locally available.
WEEK 3 - 4	
	- The learners continue working until they complete their artworks, document (<i>take photographs and short videos</i>) the learners work as they progress. - The teacher collects the final artworks and scores using the rubrics, record the performance levels e.g. 4, 3, 2, 1 in the project assessment score sheet provided at the end of this document before keying the scores in the KNEC CBA portal. Once the scores are uploaded, handover the project score sheet, documented evidence together with the all the learners work to the Head teacher/Senior teacher for secure storage as evidence for future reference.

NOTE:

- Some of the learners may require more time to complete the task than others; you may give these learners time to finish.
- While some may experience difficulties, break the tasks down into manageable steps.
- Ensure that all learners have an opportunity to complete the tasks.
- Learners with visual impairment could do the same tasks using touch to determine the different textures and shapes.

3. ASSESMENT TASK:

“Puppets are used for storytelling and role playing. Puppets may be used for entertainment, to teach, and highlight pertinent issues in society”.

You are required to give a talk to your classmates on the best practices on the forthcoming school elections. Construct a marionette to be used to pass the message.

- a. The marionette should take the shape of a human form,
- b. It should have a height of between 20 cm or 30 cm,
- c. The height excludes the strings that will be used for moving the marionette,
- d. Make sketches of the marionette that will guide on how the final piece will look like,
- e. Using old cardboards, newspapers, wrapped around wires or twined sisal or thread construct the marionette,
- f. Attach the manipulation strings and holder,
- g. Finish the marionette by painting and dress it up.

4. Scoring rubric for marionette construction

CRITERIA	EXCEEDING EXPECTATION 4	MEETING EXPECTATION 3	APPROACHING EXPECTATION 2	BELOW EXPECTATION 1
A. Sketching skill <i>-clear illustrations/ sketches</i>	Sketches, clearly and accurately show development of the idea.	Sketches clearly show development of the idea.	Avails a sketch that shows limited development of the idea.	The sketches made are inaccurate and or do not show development of the idea.
B. Execution skill <i>- Parts/shape - size (height) -gluing -wiring</i>	Accurately assembles the parts/shapes, to the correct size, evenly applies adhesive/tape and correctly wires the marionette.	Assembles the parts/shapes, to the correct size, applies adhesive/tape and correctly wires the marionette.	Assembles some parts/shapes, to the correct size, unevenly applies adhesive/tape and correctly wires the marionette.	Assembles some parts/shapes, to the incorrect size, unevenly applies adhesive/tape and incorrectly wires the marionette.
C. Finishing skill <i>-Painting and dressing -attached strings to holder -Manipulation</i>	Creatively painted and dressed with correctly attached strings to holder, puppet parts are easily manipulated.	Painted and dressed with correctly attached strings to holder, puppet parts can be manipulated.	Painted and or dressed with loosely attached strings to holder, puppet manipulation is confusing or difficult.	Roughly painted and or dressed with strings falling off, puppet cannot be manipulated.
