INDIVIDUALISED EDUCATION PROGRAMME (IEP)

WHAT IS AN IEP?

An Individualised Educational Programme (IEP) is a written plan that describes what the teacher and other professionals will do to meet special needs of a learner.

WHO IS INVOLVED?

An IEP should be developed by a multidisciplinary team which may consist of;

the learner,

a regular teacher,

a special education teacher,

an assessment teacher and

other professionals such as psychologists, speech therapists, occupational therapists, physiotherapists, social workers and the parents.

WHY IS AN IEP IMPORTANT?

An IEP is important as it focuses on an individual learner's needs and allows each learner to acquire knowledge, skills, attitudes and values at his/her own pace.

COMPONENTS OF AN IEP

The following are the components of an IEP

a) The learner's present level of performance.

In this stage, the learner's current level of performance is assessed to identify those skills the learner has strengths in and those that he or she has weaknesses or challenges.

This can be done through observation, tests and interviews.

Assessment should take place during the lesson.

Assessment results may then be used in deciding what to teach and how to teach it.

IEP COMPONENTS CONTD....

b) Long term and short-term learning outcomes

After collecting information on the learner's strengths and weaknesses, a statement describing what is expected in each area of special learning needs is made. This statement is referred to as a long-term learning outcome. This is the overall aim of the IEP.

Long term learning outcomes in an IEP state what is expected to be achieved within a specified period for example one month.

The long-term outcome is then broken down into short term learning outcomes. These are competencies that should be developed to achieve the long-term learning outcome.

IEP COMPONENTS CONTD....

c) Evaluation procedure and criteria

This step describes how progress will be assessed and specifies how well the learner is expected to perform.

Evaluation criteria must define the standards that are to be used to assess the learner's progress or success.

It is always good to evaluate progress after a specific short-term learning outcome.

IEP COMPONENTS CONTD...

d) Special educational needs and related services

The IEP must be clear in listing special challenges the learner may be experiencing that call for an IEP.

The identified challenges may be addressed by a special needs education teacher in the resource room.

If the learner requires other related services in addition to the educational intervention, this should be specified as to whom, when and where these may be provided.

Related services may include physiotherapy, occupational therapy, speech therapy, guidance and counselling among others.

IEP COMPONENTS CONTD....

e) Implementation strategy

The IEP statement must give the date when the programme will start and the time duration it should take. It can be one year, a term or a month, depending on the skill area and the learner's level of ability. The review date should also be stated.

IEP CONTD...

Learning area/ /skill assessed	Present level of performance		
	Strengths	Weaknesses	Initial recommendation
Mathematics	The learner can subtract where there is no regrouping.	The learner is not able to subtract in questions involving regrouping.	The learner should be guided further to work out subtraction with regrouping.

IEP CONTD.....

After establishing the present level of performance of the learner, develop some long term and short-term learning outcomes.

Long term learning outcomes

There is usually one long term learning outcome. It describes what the learner is expected to achieve or learn by the end of the term. More specifically, it should reflect all the areas in which the learner is experiencing difficulties. They should be in line with the learner's present level of performance or functioning.

Short term learning outcomes

1...

2....

3...

These describe what the learner is expected to achieve or learn by the end of the lesson.
