PHYSICAL HEALTH EDUCATION SCHEME OF WORK GRADE 6 TERM 3

SCHOOL	GRADE	LEARNING AREA	TERM	YEAR
	GRADE 6	PHYSICAL HEALTH EDUCATION	3	

Week	Lesson	Strand	Sub Strand	Specific Learning Outcomes	Learning Experiences	Key Inquiry Questions	Learning Resources	Assessment	Reflection
1	1	Gymnastics	Elbow stand	By the end of the lesson, the learner should be able to: - Use digital device to watch a video clip on elbow stand and observe the placement of the hands. - Draw the picture on learner's book that show the elbow stand. - Discuss the benefits of an elbow. - Appreciate the benefits of an elbow.	The learner is guided individually or in groups to: -Use digital device to watch a video clip on elbow stand and observe the placement of the hands. -Draw the picture on learner's book that show the elbow stand. -Discuss the benefits of an elbow.	What is an elbow?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 198-199	Value based sports channels, Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
	2	Gymnastics	Elbow stand	By the end of the lesson, the learner should be able to: - Identify warm up activities. - Practice warm up and cool	The learner is guided individually or in groups to: -Identify warm up activities.	How do you perform warm up activity in elbow stand?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 199-201	Value based sports channels, Observation Peer assessment and feedback	

				down activities such as bear crawl and Cross-Body shoulder stretch. Appreciate the spirit of sports through dedication and commitment	-Practice warm up and cool down activities such as bear crawl and Cross-Body shoulder stretch.			Self - assessment and feedback Practical's Written Tests Portfolio	
	3	Gymnastics	Elbow stand	By the end of the lesson, the learner should be able to: - Describe the placement of the forearm during the elbow stand. - Demonstrate the elbow stand balance - Practice elbow stand kicks. - Have fun practising elbow stand.	The learner is guided individually or in groups to: -Describe the placement of the forearm during the elbow stand. -Demonstrate the elbow stand balance. -Practice elbow stand kicks.	What is the other name for the elbow stand?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 201-204	Value based sports channels, Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
	4	Gymnastics	Dive forward roll into squat stand	By the end of the lesson, the learner should be able to: - Explain the meaning of dive forward roll into squat stand. - Use digital device to watch a video clip and observe the body position, arm and leg movement. - Practice warm up activities.	The learner is guided individually or in groups to: -Explain the meaning of dive forward roll into squat stand. -Use digital device to watch a video clip and observe the body position, arm and leg movement. -Practice warm up activities	What is dive forward roll into squat stand?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 205-207	Value based sports channels, Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	

				Appreciate feedback from the teacher and others					
	5	Gymnastics	Dive forward roll into squat stand	By the end of the lesson, the learner should be able to: - Describe the dive forward roll squat stand. - Demonstrate a dive forward roll into squat stand. - Practice dive roll, tuck forward roll and handstand forward roll. - Have a desire to uphold integrity during sporting competitions.	The learner is guided individually or in groups to: -Describe the dive forward roll squat stand. -Demonstrate a dive forward roll into squat stand. -Practice dive roll, tuck forward roll and handstand forward roll.	When can you use the dive forward roll in real life situations?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 207-209	Value based sports channels, Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
2	1	Gymnastics	Fence vault	By the end of the lesson, the learner should be able to: - Define a fence vault. - Use digital device to watch a video clip on fence vault and observe the body position, arm and leg movement. - Practice the warm up and cool down activities.	The learner is guided individually or in groups to: -Define a fence vault. -Use digital device to watch a video clip on fence vault and observe the body position, arm and leg movement. -Practice the warm up and	What is a fence vault?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 210-211	Value based sports channels, Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	

				Appreciate the importance of following safety instructions.	cool down activities.				
	2	Gymnastics	Fence vault	By the end of the lesson, the learner should be able to: - Outline the drills used to practice the fence vault. - Demonstrate the fence vault. - Practice side vault, box top and fence vault. - Have fun and enjoy practising the fence vault gymnastic movement.	The learner is guided individually or in groups to: -Outline the drills used to practice the fence vault. -Demonstrate the fence vault. -Practice side vault, box top and fence vault.	When can you use a fence vault in everyday life?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 212-214	Value based sports channels, Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
	3	Gymnastics	Partner balances	By the end of the lesson, the learner should be able to: - Explain the meaning of partner balances. - Describe the physical activities taking place on learner's book. - Use digital device to watch a video clip on partner balances and observe the different types of partner balances. - Display the character of a sport person.	The learner is guided individually or in groups to: -Explain the meaning of partner balances. -Describe the physical activities taking place on learner's book. -Use digital device to watch a video clip on partner balances and observe the different types of partner balances.	What is partner balance?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 214-215	Value based sports channels, Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	

	4	Gymnastics	Partner balances	By the end of the lesson, the learner should be able to: • Explain the meaning of counter balance. • Practice warm up and cool down activities such as side reach and torso twists. • Display an attitude of receiving feedback positively from teachers and peers.	The learner is guided individually or in groups to: -Explain the meaning of counter balance. -Practice warm up and cool down activities such as side reach and torso twists.	What is counter balance?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 216-217	Sports channels, Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
	5	Gymnastics	Partner balances	By the end of the lesson, the learner should be able to: • State the safety measures to observe when performing the counter balance and the counter tension. • Demonstrate pair and trio balances. • Practise trio partner balances. • Display an attitude to work in a team	The learner is guided individually or in groups to: -State the safety measures to observe when performing the counter balance and the counter tension. -Demonstrate pair and trio balances. -Practise trio partner balances	What is counter tension?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 218-220	Sports channels, Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
3	1	Gymnastics	Six action sequence	By the end of the lesson, the learner should be able to: • Describe each of the six actions in the	The learner is guided individually or in groups to: -Describe each of the six	What is six action sequence?	KLB Visionary Physical and Health Education	Sports channels, Observation Peer assessment	

				sequence on learner's book. • Use digital device to watch a video clip on gymnastic sequences and observe the sequence of several gymnastics' actions. • Practice warm up and cool down activities. • Appreciate feedback from their partner	actions in the sequence on learner's book. -Use digital device to watch a video clip on gymnastic sequences and observe the sequence of several gymnastics' actions. -Practice warm up and cool down activities.		Learner's Book 6 Pg. 220-222	and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
	2	Gymnastics	Six action sequence	By the end of the lesson, the learner should be able to: • Outline the drills to perform six action sequence. • Demonstrate a six action sequence. • Have fun and enjoy practicing six action sequence.	The learner is guided individually or in groups to: -Outline the drills to perform six action sequence. -Demonstrate a six action sequence.	Which gymnastics actions are combined to come up with a six action sequence?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 222-223	sports channels, Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
	3	Health and Fitness	Speed	By the end of the lesson, the learner should be able to: • Define speed. • Use digital device to watch a video clip on how to improve speed. • Practice warm up and cool down activities such as collect tails. • Appreciate the benefits of speed.	The learner is guided individually or in groups to: -Define speed. -Use digital device to watch a video clip on how to improve speed. -Practice warm up and cool down activities such	What is speed?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 226-227	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	

					as collect tails.				
	4	Health and Fitness	Speed	By the end of the lesson, the learner should be able to: - Name the components of health fitness that are taken care of by activities for developing speed. - Demonstrate the drills to perform to enhance speed. - Have fun and enjoy performing different drills. - Display the character of a sport person.	The learner is guided individually or in groups to: -Name the components of health fitness that are taken care of by activities for developing speed. -Demonstrate the drills to perform to enhance speed.	Why is speed important in games?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 227-229	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
	5	Health and Fitness	Speed	By the end of the lesson, the learner should be able to: - List games and sports in which speed is very important. - Perform the interval sprints, jumping jacks and weight running. - Have fun and enjoy performing speed drill games.	The learner is guided individually or in groups to: -List games and sports in which speed is very important. -Perform the interval sprints, jumping jacks and weight running.	How do you improve speed?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 229-232	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
4	1	Health and Fitness	Power	By the end of the lesson, the learner should be able to: - Define power. - State the importance	The learner is guided individually or in groups to: -Define power	What is power? What is the importance of power in games	KLB Visionary Physical and Health Education	Observation Peer assessment and feedback Self -	

				of power in games and sports. - Practice warm up and cool down activities. - Appreciate the importance of power in games and sports.	State the importance of power in games and sports. -Practice warm up and cool down activities.	and sports?	Learner's Book 6 Pg. 232-233	assessment and feedback Practical's Written Tests Portfolio	
	2	Health and Fitness	Power	By the end of the lesson, the learner should be able to: - List three sports where athletes need a lot of power. - Create drills that improve power. - Practice and perform physical exercise to enhance muscular strength. - Appreciate the importance being physically fit.	The learner is guided individually or in groups to: -List three sports where athletes need a lot of power. -Create drills that improve power. -Practice and perform physical exercise to enhance muscular strength.	Which activities can help you develop power at home?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 233-238	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
	3	Health and Fitness	Co-ordination	By the end of the lesson, the learner should be able to: - Define co-ordination. - Discuss ways to improve co-ordination. - Practice warm up and cool down activities. - Respect each other's opinion.	The learner is guided individually or in groups to: -Define co-ordination. -Discuss ways to improve co-ordination. -Practice warm up and cool down activities.	What is co-ordination?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 238-239	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
	4	Health and Fitness	Co-ordination	By the end of the lesson, the learner should be able to:	The learner is guided individually or in groups	Why does an athlete need to be agile?	KLB Visionary Physical and	Observation Peer assessment	

				- Outline the drills to practice to improve co-ordination. - Practice and perform different drills that help improve co-ordination. - Appreciate feedback from the teacher and others.	to: -Outline the drills to practice to improve co-ordination. -Practice and perform different drills that help improve co-ordination.		Health Education Learner's Book 6 Pg. 239-240	and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
5	1	Outdoor Activities	Leadership styles	By the end of the lesson, the learner should be able to: - Identify types of leadership styles in sports. - State the qualities of a good leader. - Role play the scenario on learner's book. - Appreciate different kinds of leadership.	The learner is guided individually or in groups to: -Identify types of leadership styles in sports. -State the qualities of a good leader. -Role play the scenario on learner's book.	What are the qualities of a good leader?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 244-247	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
	2	Outdoor Activities	Lightning the camp fire	By the end of the lesson, the learner should be able to: - Define firewood. - Discuss importance of stones around a fire place. - State the precautions to observe when starting a camp fire. - Draw the picture on learner's book.	The learner is guided individually or in groups to: -Define firewood. -Discuss importance of stones around a fire place. -State the precautions to observe when starting a	What precautions should you take when starting a camp fire?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 247-248	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	

				Appreciate importance of observing precautions when starting a camp fire.	camp fire. -Draw the picture on learner's book.					
	3	Outdoor Activities	Lightning the camp fire	By the end of the lesson, the learner should be able to: - Identify the materials that can be used to light a camp fire. - Demonstrate how to arrange firewood for a better camp fire during a camping activity. - Appreciate the importance of lightning a camp fire.	The learner is guided individually or in groups to: -Identify the materials that can be used to light a camp fire. -Demonstrate how to arrange firewood for a better camp fire during a camping activity.	How can you manage a camp fire during an outdoor activity?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 248-250	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio		
	4	Outdoor Activities	Choosing and constructing shelter	By the end of the lesson, the learner should be able to: - Define shelter. - Discuss why it is necessary to know how to make a shelter during an outdoor activity. - Practice warm up and cool down activities such as jog on the spot. - Appreciate the importance of making a shelter during an outdoor activity.	The learner is guided individually or in groups to: -Define shelter. -Discuss why it is necessary to know how to make a shelter during an outdoor activity. -Practice warm up and cool down activities such as jog on the spot.	What is a shelter? Why is it necessary to know how to make a shelter during an outdoor activity?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 251-252	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio		
	5	Outdoor Activities	Choosing and constructing shelter	By the end of the lesson, the learner should be able to: Explain the factors needed	The learner is guided individually or in groups to:	What are the factors to consider when choosing a site	KLB Visionary Physical and Health	Observation Peer assessment and feedback		

				to consider when choosing a site for setting up a shelter. - Model a simple shelter they would use in a camp. - Have fun and enjoy modelling a simple shelter.	-Explain the factors needed to consider when choosing a site for setting up a shelter. -Model a simple shelter they would use in a camp.	for setting up a shelter?	Education Learner's Book 6 Pg. 252-255	Self - assessment and feedback Practical's Written Tests Portfolio	
6	1	Sports related injuries	Fainting	By the end of the lesson, the learner should be able to: - Define fainting. - Identify causes of fainting. - Practise warm up and cool down activities. - Appreciate positive ways of coping with stress in daily life.	The learner is guided individually or in groups to: -Define fainting. -Identify causes of fainting. -Practise warm up and cool down activities.	Have you ever felt dizzy? What are the causes of fainting?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 256-257	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
	2	Sports related injuries	Fainting	By the end of the lesson, the learner should be able to: - State the safety procedures to observe when attending to a person who has fainted. - Practise how to assist a person who has fainted. - Appreciate the importance of learning first aid of fainting.	The learner is guided individually or in groups to: -State the safety procedures to observe when attending to a person who has fainted. -Practise how to assist a person who has fainted.	What should you do if you start experiencing the signs and symptoms of fainting?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 257-259	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
	3	Sports related injuries	Insect bites and stings	By the end of the lesson, the learner should be able to: - Explain how an insect bite occurs. - Practice the warm up and cool down activities of an	The learner is guided individually or in groups to: -Explain how an insect bite occurs.	How does an insect bite occurs?	KLB Visionary Physical and Health Education Learner's Book	Observation Peer assessment and feedback Self - assessment and feedback	

				insect bites and stings. • Appreciate the teacher's feedback.	-Practice the warm up and cool down activities of an insect bites and stings.		6 Pg. 259-260	Practical's Written Tests Portfolio	
	4	Sports related injuries	Insect bites and stings	By the end of the lesson, the learner should be able to: • Identify the signs and symptoms of insect bites and sting. • Draw insects that are common in their locality. • Have fun discussing the observations with their classmates.	The learner is guided individually or in groups to: -Identify the signs and symptoms of insect bites and sting. -Draw insects that are common in their locality.	What are the signs and symptoms of insects bites and stings?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 260-262	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
	5	Sports related injuries	Insect bites and stings	By the end of the lesson, the learner should be able to: • State the difference between an insect bite and a sting. • Demonstrate how to take care of an insect bite. • Practise first aid procedure for insect bite and stings. • Appreciate importance of learning first aid of bites and stings.	The learner is guided individually or in groups to: -State the difference between an insect bite and a sting. -Demonstrate how to take care of an insect bite. -Practise first aid procedure for insect bite and stings.	What is the difference between an insect bite and a sting?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 269-263	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	

7	1	Sports related injuries	Snake bite	By the end of the lesson, the learner should be able to: • Define poisonous and non-poisonous snakes. • List down traditional ways in their locality that were used to care for snakes. • Demonstrate how to care for a snake bite. • Practise how to assist a casualty of a snake bite. • Advocate the importance of learning first-aid.	The learner is guided individually or in groups to: -Define poisonous and non-poisonous snakes. -List down traditional ways in their locality that were used to care for snakes. -Demonstrate how to care for a snake bite. -Practise how to assist a casualty of a snake bite.	How would you tell if you have been bitten by a snake?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 263-265	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
	2	Sports related injuries	Bandages and dressings	By the end of the lesson, the learner should be able to: • Explain the meaning of dressing a wound. • Define bandage. • Identify the different types of bandages and dressing first aid. • Draw the things found in a first aid box. • Appreciate the use of a first aid box.	The learner is guided individually or in groups to: -Explain the meaning of dressing a wound. -Define bandage. -Identify the different types of bandages and dressing first aid. -Draw the things found in a first aid box.	What is a bandage? How to identify different types of bandages?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 266-267	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
	3	Sports related injuries	Bandages and dressings	By the end of the lesson, the learner should be able to: • Define a triangular bandage. • List the materials used to make a triangular bandage.	The learner is guided individually or in groups to: -Define a triangular bandage. -List the materials used to	How do you use a triangular bandage?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 268-270	Observation Peer assessment and feedback Self - assessment and feedback Practical's	

				- Practice how to use the triangular bandage. - Appreciate the importance of using a triangular bandage.	make a triangular bandage. -Practice how to use the triangular bandage.			Written Tests Portfolio	
	4	Sports related injuries	Slings and splints	By the end of the lesson, the learner should be able to: - Define slings and splints. - State the functions of a splints and a sling in first aid. - Practice warm up and cool down activities. - Appreciate the functions of a splints and a sling in first aid.	The learner is guided individually or in groups to: -Define slings and splints. -State the functions of a splints and a sling in first aid. -Practice warm up and cool down activities.	What are the functions of a splints and a sling in first aid?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 270-271	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
	5	Sports related injuries	Slings and splints	By the end of the lesson, the learner should be able to: - List the materials required to improvise a sling. - Practise how to tie the reef knot on a triangular bandage. - Have fun and enjoy practising tie the reef knot.	The learner is guided individually or in groups to: -List the materials required to improvise a sling. -Practise how to tie the reef knot on a triangular bandage.	What materials do you require to improvise a sling at home?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 272-273	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
8	1	Sports related injuries	Two and four-handed seat	By the end of the lesson, the learner should be able to: - Explain two-handed seat carry. - Differentiate between the	The learner is guided individually or in groups to: -Explain two-handed seat carry.	What is two and four handed seat carry?	KLB Visionary Physical and Health Education Learner's Book	Observation Peer assessment and feedback Self - assessment	

				two-handed seat carry and four handed seat carry. • Demonstrate the two and four handed seat carry method. • Display positivity in accepting feedback from the teacher.	-Differentiate between the two-handed seat carry and four handed seat carry. -Demonstrate the two and four handed seat carry method.		6 Pg. 274-276	and feedback Practical's Written Tests Portfolio	
	2	Sports related injuries	Two and four-handed seat	By the end of the lesson, the learner should be able to: • Identify situations whereby the two-handed seat carry may be used. • Outline the steps to carry two and four-handed seat. • Practise the four handed seat carry. • Advocate social justice by respecting and appreciating the abilities of others.	The learner is guided individually or in groups to: -Identify situations whereby the two-handed seat carry may be used. -Outline the steps to carry two and four-handed seat. -Practise the four handed seat carry.	How do you perform two-and four handed seat?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 276-278	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
	3	Sports related injuries	Bone fractures and dislocation	By the end of the lesson, the learner should be able to: • Define a bone fracture. • Identify causes of fractures. • Practice warm up and cool down activities such as tag game. • Display respect for others opinion when discussing bone fractures and dislocation.	The learner is guided individually or in groups to: -Define a bone fracture. -Identify causes of fractures. -Practice warm up and cool down activities such as tag game.	What is a bone fracture? How do you identify a broken bone?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 279-280	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	

	4	Sports related injuries	Bone fractures and dislocation	By the end of the lesson, the learner should be able to: - Identify the signs and symptoms of fractures. - Draw human skeleton and the areas prone to dislocation. - Appreciate the teacher's feedback	The learner is guided individually or in groups to: -Identify the signs and symptoms of fractures. -Draw human skeleton and the areas prone to dislocation.	Where do dislocation occur in the human body?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 280-282	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio	
	5	Sports related injuries	Bone fractures and dislocation	By the end of the lesson, the learner should be able to: - Define dislocation. - Identify symptoms of dislocation. - Demonstrate how to splint a fractures arm for first aid. - Appreciate the importance of learning bone fracture and dislocation first aid.	The learner is guided individually or in groups to: -Define dislocation Identify symptoms of dislocation. -Demonstrate how to splint a fractures arm for first aid.	What is the difference between a fracture and a dislocation?	KLB Visionary Physical and Health Education Learner's Book 6 Pg. 282-284	Observation Peer assessment and feedback Self - assessment and feedback Practical's Written Tests Portfolio
