

MOVEMENT SCHEME OF WORK GRADE 2 TERM 2

NAME	
TSC NO.	
SCHOOL	

SCHOOL	GRADE	LEARNING AREAS	TIME	YEAR

Week	Lesson	Strand	Sub Strand	Specific Learning Outcome	Key Inquiry Question	Learning Experiences	Learning Resources	Assessment	Remarks
1	1	Manipulative Skills	Stopping	By the end of the strand the learner should be able to: name the parts of the body that are in use when Stopping for body awareness	How can you stop a kicked ball? which body parts are used in kicking the ball	the parts of the body that are used for stopping • Learners to watch video clips of a ball being stopped	Field markers, field, bean bags, ropes, Digital devices such as computer and mobile phones Video clip of football players practicing to stop the ball	Signed questions and practical activities.	
	2	Manipulative Skills	Stopping	By the end of the strand the learner should be able to: name the parts of the body that are in use when Stopping for body awareness	How can you stop a kicked ball? which body parts are used in kicking the ball	the parts of the body that are used for stopping • Learners to watch video clips of a ball being stopped	Field markers, field, bean bags, ropes, Digital devices such as computer and mobile Phones Video clip of football players practicing to stop the ball	Signed questions and practical activities.	

3	Manipulative Skills	Stopping	By the end of the strand the learner should be able to: name the parts of the body that are in use when Stopping for body awareness	How can you stop a kicked ball? which body parts are used in kicking the ball	the parts of the body that are used for stopping • Learners to watch video clips of a ball being stopped	Field markers, field, bean bags, ropes, Digital devices such as computer and mobile phones Video clip of football players practicing to stop the ball	Signed questions and practical activities.	
4	Manipulative Skills	Stopping	By the end of the sub-strand the learner should be able to: perform stopping from different directions for strength, coordination, endurance and space awareness	How can you stop a kicked ball? which body parts are used in kicking the ball	Learners to practice stopping the ball from different directions such as - stop from front, - from the side - stop from the left - stop from the right • Learners to pair up and practice stopping	Field markers, field, bean bags, ropes, Digital devices such as computer and mobile phones Video clip of football players practicing to stop the ball	Signed questions and practical activities.	
5	Manipulative Skills	Stopping	By the end of the sub-strand the learner should be able to: perform stopping from different directions for strength, coordination,	How can you stop a kicked ball? which body parts are used in kicking the ball	Learners to practice stopping the ball from different directions such as - stop from front, - from the side - stop from the left - stop from the	Field markers, field, bean bags, ropes, Digital devices such as computer and mobile phones Video clip of football players	Signed questions and practical activities.	

				endurance and space awareness		right • Learners to pair up and practice stopping	practicing to stop the ball		
2	1	Manipulative Skills	Stopping	By the end of the sub-strand the learner should be able to: perform stopping from different directions for strength, coordination, endurance and space awareness	How can you stop a kicked ball? which body parts are used in kicking the ball	Learners to practice stopping the ball from different directions such as - stop from front, - from the side - stop from the left - stop from the right • Learners to pair up and practice stopping	Field markers, field, bean bags, ropes, Digital devices such as computer and mobile phones Video clip of football players practicing to stop the ball	Signed questions and practical activities.	
	2	Manipulative Skills	Stopping	By the end of the sub-strand the learner should be able to: establish relationships through stopping for self-esteem	How can you stop a kicked ball? which body parts are used in kicking the ball	learners in groups practice stopping • Learners to play games using kicking skill	Field markers, field, bean bags, ropes, Digital devices such as computer and mobile phones Video clip of football players practicing to stop the ball	Signed questions and practical activities.	
	3	Manipulative Skills	Stopping	By the end of the sub-strand the learner should be able to: appreciate stopping	How can you stop a kicked ball? which body parts are used	learners in groups practice stopping • Learners to play games using kicking skill	Field markers, field, bean bags, ropes, Digital devices such as computer	Signed questions and practical activities.	

				for strength, endurance and creativity	in kicking the ball		and mobile phones Video clip of football players practicing to stop the ball		
	4	Manipulative Skills	Stopping	By the end of the sub-strand the learner should be able to: appreciate stopping for strength, endurance and creativity	How can you stop a kicked ball? which body parts are used in kicking the ball	Learners to play games using kicking skill • Learners observe safety when playing games	Field markers, field, bean bags, ropes, Digital devices such as computer and mobile phones Video clip of football players practicing to stop the ball	Signed questions and practical activities.	
	5	Manipulative Skills	Stopping	By the end of the sub-strand the learner should be able to: play games that involve stopping for enjoyment	How can you stop a kicked ball? which body parts are used in kicking the ball	Learners to play games using kicking skill • Learners observe safety when playing games	Field markers, field, bean bags, ropes, Digital devices such as computer and mobile phones Video clip of football players practicing to stop the ball	Signed questions and practical activities.	
3	1	Manipulative Skills	Stopping	By the end of the sub-strand the learner should be able to: play games that	How can you stop a kicked ball? which body parts are used	Learners to play games using kicking skill • Learners observe safety when	Field markers, field, bean bags, ropes, Digital devices such as computer	Signed questions and practical activities.	

				involve stopping for enjoyment	in kicking the ball	playing games	and mobile phones Video clip of football players practicing to stop the ball		
	2	Manipulative Skills	Stopping	By the end of the sub-strand the learner should be able to: Observe rules when Stopping for own and others safety.	How can you stop a kicked ball? which body parts are used in kicking the ball	Learners to play games using kicking skill • Learners observe safety when playing games	Field markers, field, bean bags, ropes, Digital devices such as computer and mobile phones Video clip of football players practicing to stop the ball	Signed questions and practical activities.	
	3	Swimming	Water Safety: Signs of drowning	By the end of the sub-strand, the learner should be able to: Name some items that sink and float in water for floating awareness	Name items that sink in water	Learners to answer questions on items that sink and float in water. • Learners to watch a clip of people drowning and role play	Swimming pool • Floatation devices • Digital devices such as computer and mobile phones • video clips of people drowning	Signed questions and practical activities	
	4	Swimming	Water Safety: Signs of drowning	By the end of the sub-strand, the learner should be able to: a) Name some items that sink and float in water for	Name items that sink in water	Learners to answer questions on items that sink and float in water. • Learners to watch a clip of people drowning and role	Swimming pool • Floatation devices • Digital devices such as computer and mobile phones	Signed questions and practical activities	

				floating awareness		play	• video clips of people drowning		
	5	Swimming	Water Safety: Signs of drowning	By the end of the sub-strand the learner should be able to: identify a drowning person for rescue;	Name items that sink in water	Learners to watch a clip of people drowning and role play. • Learners to answer questions on why a person may get into trouble in water: a person may get into trouble in water because of. – not knowing how to swim – becoming tired in the water	Swimming pool • Floatation devices • Digital devices such as computer and mobile phones • video clips of people drowning	Signed questions and practical activities	
4	1	Swimming	Water Safety: Signs of drowning	By the end of the sub-strand the learner should be able to: identify a drowning person for rescue;	Have you ever seen a person swimming in the river or swimming pool?	Learners to watch a clip of people drowning and role play. • Learners to answer questions on why a person may get into trouble in water: a person may get into trouble in water because of. – not knowing how to swim – becoming tired in	Swimming pool • Floatation devices • Digital devices such as computer and mobile phones • video clips of people drowning	Signed questions and practical activities	

						the water			
	2	Swimming	Water Safety: Signs of drowning	By the end of the sub-strand the learner should be able to: role play a person drowning for rescue awareness	Have you ever seen a person swimming in the river or swimming pool?	Learners to watch a clip of people drowning and role play. • Learners to answer questions on why a person may get into trouble in water: a person may get into trouble in water because of. – not knowing how to swim – becoming tired in the water – becoming suddenly sick – getting a muscle cramp	Swimming pool • Floatation devices • Digital devices such as computer and mobile phones • video clips of people drowning	Signed questions and practical activities	
	3	Swimming	Water Safety: Signs of drowning	By the end of the sub-strand the learner should be able to: role play a person drowning for rescue awareness	Have you ever seen a person swimming in the river or swimming pool?	Learners to watch a clip of people drowning and role play. • Learners to answer questions on why a person may get into trouble in water: a person may get into trouble in water because of.	Swimming pool • Floatation devices • Digital devices such as computer and mobile phones • video clips of people drowning	Signed questions and practical activities	

						– not knowing how to swim – becoming tired in the water – becoming suddenly sick – getting a muscle cramp			
	4	Swimming	Water Safety: Signs of drowning	By the end of the sub-strand the learner should be able to: observe pool rules for own and others safety	Have you ever seen a person swimming in the river or swimming pool?	Learners to watch a clip of people drowning and role play. • Learners to answer questions on why a person may get into trouble in water: a person may get into trouble in water because of. – not knowing how to swim – becoming tired in the water – becoming suddenly sick – getting a muscle cramp	Swimming pool • Floatation devices • Digital devices such as computer and mobile phones • video clips of people drowning	Signed questions and practical activities	
	5	Swimming	Water Safety: Rescuing a drowning person	By the end of the sub strand, the learner should: name a floating technique for self -	What would you do if you saw a person drowning	Signs of a person in trouble in water: • May be holding onto a floating			

				esteem;		object without moving. • May be trying to swim to safety but does not seem to be moving forward. • The person is calling for help. • The person is struggling to remain afloat. • Learners to obey the swimming pool rules.			
5	1	Swimming	Water Safety: Rescuing a drowning person	By the end of the sub strand, the learner should: name a floating technique for self - esteem;	What would you do if you saw a person drowning	Signs of a person in trouble in water: • May be holding onto a floating object without moving. • May be trying to swim to safety but does not seem to be moving forward. • The person is calling for help. • The person is struggling to remain afloat. • Learners to obey the swimming pool rules.	Swimming pool • Floatation devices • Five litre Jerri-can • A short rope • Long ropes • One litre plastic bottle, • A piece of timber • Digital devices such as computer and mobile phones • Video clip of rescue items	Signed questions and practical activities	

	2		Water Safety: Rescuing a drowning person	By the end of the sub-strand the learner should be able to: name the items that may be used to rescue a drowning person for rescue awareness	What would you do if you saw a person drowning	Signs of a person in trouble in water: • May be holding onto a floating object without moving. • May be trying to swim to safety but does not seem to be moving forward. • The person is calling for help. • The person is struggling to remain afloat. • Learners to obey the swimming pool rules.	Swimming pool • Floatation devices • Five litre Jerri-can • A short rope • Long ropes • One litre plastic bottle, • A piece of timber • Digital devices such as computer and mobile phones • Video clip of rescue items	Signed questions and practical activities	
	3		Water Safety: Rescuing a drowning person	By the end of the sub-strand the learner should be able to: name the items that may be used to rescue a drowning person for rescue awareness	What items are used to rescue drowning people from your local environment	Learners to draw and colour pictures of the items that can be used to reach out to a person in trouble in water. • Learners to carry out a project of making homemade, devices that could be thrown to a drowning person	Swimming pool • Floatation devices • Five litre Jerri-can • A short rope • Long ropes • One litre plastic bottle, • A piece of timber • Digital devices such as computer	Signed questions and practical activities	

						such as a five litre Jerri-can attached to a short rope at the handle for use, a long rope attached to a one litter plastic bottle, use a small piece of timber and attach a rope to it pool rules.	and mobile phones • Video clip of rescue items		
	4		Water Safety: Rescuing a drowning person	By the end of the sub-strand the learner should be able to: design homemade rescuing devices for use in rescuing a drowning person	What items are used to rescue drowning people from your local environment	Learners to name floating techniques that they know. • Learners to name some of the items that can be used to rescue a drowning person. • Learners to watch picture or clips of various rescue items that can be thrown to a person who is drowning.	Swimming pool • Floatation devices • Five litre Jerri-can • A short rope • Long ropes • One litre plastic bottle, • A piece of timber • Digital devices such as computer and mobile phones • Video clip of rescue items	Signed questions and practical activities	
	5		Water Safety: Rescuing a drowning person	By the end of the sub-strand the learner should be able to: design homemade	What items are used to rescue drowning people from	Learners to name floating techniques that they know. • Learners to name some of the items	Swimming pool • Floatation devices • Five litre Jerri-can	Signed questions and practical activities	

				rescuing devices for use in rescuing a drowning person	your local environment	that can be used to rescue a drowning person. • Learners to watch picture or clips of various rescue items that can be thrown to a person who is drowning. the swimming pool rules.	• A short rope • Long ropes • One litre plastic bottle, • A piece of timber • Digital devices such as computer and mobile phones • Video clip of rescue items		
6	1		Water Safety: Rescuing a drowning person	By the end of the sub-strand the learner should be able to: role play rescuing a person who is drowning for safety	What items are used to rescue drowning people from your local environment	Learners to name floating techniques that they know. • Learners to name some of the items that can be used to rescue a drowning person. • Learners to watch picture or clips of various rescue items that can be thrown to a person who is drowning.	Swimming pool • Floatation devices • Five litre Jerri-can • A short rope • Long ropes • One litre plastic bottle, • A piece of timber • Digital devices such as computer and mobile phones • Video clip of rescue items	Signed questions and practical activities	
	2		Water Safety: Rescuing a drowning	By the end of the sub-strand the learner should be able to:	What items are used to rescue drowning	Learners to name floating techniques that they know. • Learners to name	Swimming pool • Floatation devices • Five litre Jerri-	Signed questions and practical	

			person	observe caution while near water bodies for own and others safety	people from your local environment	some of the items that can be used to rescue a drowning person. • Learners to watch picture or clips of various rescue items that can be thrown to a person who is drowning. remain afloat.	can • A short rope • Long ropes • One litre plastic bottle, • A piece of timber • Digital devices such as computer and mobile phones • Video clip of rescue items	activities	
	3		Basic Swimming skills: Treading water	By the end of the sub-strand, the learner should be able to: identify ways in which to move in water for water confidence;	State some pool rules		Swimming pool • Floatation devices	Signed questions and practical activities	
	4		Basic Swimming skills: Treading water	By the end of the sub-strand, the learner should be able to: identify ways in which to move in water for water confidence;	State some pool rules Mention the parts of the body that are used for treading	Learners to answer question on ways of moving in water. • Learners to watch video clips of people treading water. • Learners to practice treading water individually and in groups.	Swimming pool • Floatation devices	Signed questions and practical activities	
	5		Basic	By the end of the	State some	Learners to answer	Swimming pool	Signed	

			Swimming skills: Treading water	sub-strand, the learner should be able to: identify ways in which to move in water for water confidence;	pool rules Mention the parts of the body that are used for treading	question on ways of moving in water. • Learners to watch video clips of people treading water. • Learners to practice treading water individually and in groups.	• Floatation devices	questions and practical activities	
7	1		Basic Swimming skills: Treading water	By the end of the sub-strand the learner should be able to: perform treading in water for endurance, buoyancy and for self-esteem	State some pool rules Mention the parts of the body that are used for treading	Learners to play water games while treading. • Observe pool rules for own and others safety	Swimming pool • Floatation devices	Signed questions and practical activities	
	2		Basic Swimming skills: Treading water	By the end of the sub-strand the learner should be able to: perform treading in water for endurance, buoyancy and for self-esteem	State some pool rules Mention the parts of the body that are used for treading	Learners to play water games while treading. • Observe pool rules for own and others safety	Swimming pool • Floatation devices	Signed questions and practical activities	
	3		Basic Swimming skills: Treading water	By the end of the sub-strand the learner should be able to: practice treading in	State some pool rules Mention the parts of the body that	Learners to practice treading water individually and in groups. • Learners to play	Swimming pool • Floatation devices	Signed questions and practical activities	

				water for endurance, buoyancy and for creativity	are used for treading	water games while treading. • Observe pool rules for own and others safety			
	4		Basic Swimming skills: Treading water	By the end of the sub-strand the learner should be able to: practice treading in water for endurance, buoyancy and for creativity	State some pool rules Mention the parts of the body that are used for treading	Learners to practice treading water individually and in groups. • Learners to play water games while treading. • Observe pool rules for own and others safety	Swimming pool • Floatation devices	Signed questions and practical activities	
	5		Basic Swimming skills: Treading water	By the end of the sub-strand the learner should be able to: appreciate treading water for endurance and buoyancy;	State some pool rules Mention the parts of the body that are used for treading	Learners to practice treading water individually and in groups. • Learners to play water games while treading. • Observe pool rules for own and others safety	Swimming pool • Floatation devices	Signed questions and practical activities	
8	1		Basic Swimming skills: Treading water	By the end of the sub-strand the learner should be able to: appreciate treading water for endurance and buoyancy;	State some pool rules Mention the parts of the body that are used for treading	Learners to practice treading water individually and in groups. • Learners to play water games while treading. • Observe pool	Swimming pool • Floatation devices	Signed questions and practical activities	

						rules for own and others safety			
	2		Basic Swimming skills: Treading water	By the end of the sub-strand the learner should be able to: play water games while treading water for enjoyment	State some pool rules Mention the parts of the body that are used for treading	Learners to practice treading water individually and in groups. • Learners to play water games while treading. • Observe pool rules for own and others safety	Swimming pool • Floatation devices	Signed questions and practical activities	
	3		Basic Swimming skills: Treading water	By the end of the sub-strand the learner should be able to: play water games while treading water for enjoyment	State some pool rules Mention the parts of the body that are used for treading	Learners to practice treading water individually and in groups. • Learners to play water games while treading. • Observe pool rules for own and others safety	Swimming pool • Floatation devices	Signed questions and practical activities	
	4		Basic swimming Skills: Horizontal float (Back float)	By the end of the sub-strand the learner should be able to: name some objects that can float in water	Name different positions for floating in water. Why is it important to float in water?	Learners to name objects that can float in water; • Learners to watch video clips of the horizontal float; • Learners individually and in pairs to practice the horizontal float	Swimming pool • Floatation devices • Digital devices such as computer and mobile phones • Video clips of the horizontal float • Pebbles	Signed questions and practical activities	

	5		Basic swimming Skills: Horizontal float (Back float)	By the end of the sub-strand the learner should be able to: name some objects that can float in water	Name different positions for floating in water. Why is it important to float in water?	Learners to name objects that can float in water; • Learners to watch video clips of the horizontal float; • Learners individually and in pairs to practice the horizontal float	Swimming pool • Floatation devices • Digital devices such as computer and mobile phones • Video clips of the horizontal float • Pebbles	Signed questions and practical activities	
9	1		Basic swimming Skills: Horizontal float (Back float)	By the end of the sub-strand the learner should be able to: use the Horizontal float to float in water in different directions for self-awareness	Name different positions for floating in water. Why is it important to float in water?	Learners to name objects that can float in water; • Learners to watch video clips of the horizontal float; • Learners individually and in pairs to practice the horizontal float	Swimming pool • Floatation devices • Digital devices such as computer and mobile phones • Video clips of the horizontal float • Pebbles	Signed questions and practical activities	
	2		Basic swimming Skills: Horizontal float (Back float)	By the end of the sub-strand the learner should be able to: use the Horizontal float to float in water in different directions for self-awareness	Name different positions for floating in water. Why is it important to float in water?	Learners individually and in pairs to practice the horizontal float; • Learners to cooperate while playing simple water games;	Swimming pool • Floatation devices • Digital devices such as computer and mobile phones • Video clips of the horizontal float • Pebbles	Signed questions and practical activities	

	3		Basic swimming Skills: Horizontal float (Back float)	By the end of the sub-strand the learner should be able to: appreciate floating on water in different directions using the Horizontal float for creativity	Name different positions for floating in water. Why is it important to float in water?	Learners individually and in pairs to practice the horizontal float; • Learners to cooperate while playing simple water games;	Swimming pool • Floatation devices • Digital devices such as computer and mobile phones • Video clips of the horizontal float • Pebbles	Signed questions and practical activities	
	4		Basic swimming Skills: Horizontal float (Back float)	By the end of the sub-strand the learner should be able to: appreciate floating on water in different directions using the Horizontal float for creativity	Name different positions for floating in water. Why is it important to float in water?	Learners individually and in pairs to practice the horizontal float; • Learners to cooperate while playing simple water games;	Swimming pool • Floatation devices • Digital devices such as computer and mobile phones • Video clips of the horizontal float • Pebbles	Signed questions and practical activities	
	5		Basic swimming Skills: Horizontal float (Back float)	By the end of the sub-strand the learner should be able to: play simple water games while floating using the Horizontal float for enjoyment	Name different positions for floating in water. Why is it important to float in water?	Learners individually and in pairs to practice the horizontal float; • Learners to cooperate while playing simple water games;	Swimming pool • Floatation devices • Digital devices such as computer and mobile phones • Video clips of the horizontal float • Pebbles	Signed questions and practical activities	

10	1		Basic swimming Skills: Horizontal float (Back float)	By the end of the sub-strand the learner should be able to: play simple water games while floating using the Horizontal float for enjoyment	Name different positions for floating in water. Why is it important to float in water?	Learners to cooperate while playing simple water games Learners to obey swimming pool rules.	Swimming pool • Floatation devices • Digital devices such as computer and mobile phones • Video clips of the horizontal float • Pebbles	Signed questions and practical activities	
	2		Basic swimming Skills: Horizontal float (Back float)	By the end of the sub-strand the learner should be able to: play simple water games while floating using the Horizontal float for enjoyment	Name different positions for floating in water. Why is it important to float in water?	Learners to cooperate while playing simple water games Learners to obey swimming pool rules	Swimming pool • Floatation devices • Digital devices such as computer and mobile phones • Video clips of the horizontal float • Pebbles	Signed questions and practical activities	
	3		Basic swimming Skills: Horizontal float (Back float)	By the end of the sub-strand the learner should be able to: obey swimming pool rules while floating on water for own and others safety	Name different positions for floating in water. Why is it important to float in water?	Learners to cooperate while playing simple water games Learners to obey swimming pool rules	Swimming pool • Floatation devices • Digital devices such as computer and mobile phones • Video clips of the horizontal float • Pebbles	Signed questions and practical activities
