FOREWORD

The Government of Kenya is committed to ensuring that policy objectives for Education, Training and Research meet the aspirations of the Kenya Constitution 2010, the Kenya Vision 2030, National Curriculum Policy 2019, the United Nations Sustainable Development Goals (SDGs) and the Regional and Global conventions to which Kenya is a signatory. Towards achieving the mission of Basic Education, the Ministry of Education (MoE) has successfully and progressively rolled out the implementation of the Competency Based Curriculum (CBC) at Pre-Primary and Primary School levels. The roll out of Junior Secondary School (Grade 7-9) will subsequently follow as from 2023-2025.

The Grade 8 curriculum designs build on competencies attained by learners at the end of Grade 7. Further, they provide opportunities for learners to continue exploring and nurturing their potentials as they prepare to transit to Senior Secondary School.

The curriculum designs present National Goals of Education, essence statements, general and specific expected learning outcomes for the learning areas (subjects) as well as strands and sub strands. The designs also outline suggested learning experiences, key inquiry questions, core competencies, Pertinent and Contemporary Issues (PCIs), values, Community Service Learning (CSL) activities and assessment rubric.

It is my hope that all Government agencies and other stakeholders in Education will use the designs to plan for effective and efficient implementation of the CBC.

PROF. GEORGE A. O. MAGOHA, EGH
CABINET SECRETARY,
MINISTRY OF EDUCATION

PREFACE

The Ministry of Education (MoE) is implementing the second phase of the curriculum reforms with the national roll out of the Competency Based Curriculum (CBC) having been implemented in 2019. Grade 8 is the second level of the Junior Secondary School (JSS) in the new education structure.

Grade 8 curriculum furthers implementation of the CBC from Grade 7. The main feature of this level is a broad curriculum for the learner to explore talents, interests and abilities before selection of pathways and tracks at the Senior Secondary education level. This is very critical in the realisation of the Vision and Mission of the on-going curriculum reforms as enshrined in the Sessional Paper No. I of 2019 whose title is: *Towards Realizing Quality, Relevant and Inclusive Education and Training for Sustainable Development* in Kenya. The Sessional Paper explains the shift from a Content - Focused Curriculum to a focus on **Nurturing every Learner's potential**.

Therefore, the Grade 8 curriculum designs are intended to enhance the learners' development in the CBC core competencies, namely: Communication and Collaboration, Critical Thinking and Problem Solving, Creativity and Imagination, Citizenship, Digital Literacy, Learning to Learn and Self-efficacy.

The curriculum designs provide suggestions for interactive and differentiated learning experiences linked to the various sub strands and the other aspects of the CBC. The curriculum designs also offer several suggested learning resources and a variety of assessment techniques. It is expected that the designs will guide teachers to effectively facilitate learners to attain the expected learning outcomes for Grade 8 and prepare them for smooth transition to the next Grade. Furthermore, it is my hope that teachers will use the designs to make learning interesting, exciting and enjoyable.

JULIUS O. JWAN, PhD, CBS
PRINCIPAL SECRETARY
STATE DEPARTMENT FOR EARLY LEARNING AND BASIC EDUCATION
MINISTRY OF EDUCATION

ACKNOWLEDGEMENT

The Kenya Institute of Curriculum Development (KICD) Act Number 4 of 2013 (Revised 2019) mandates the Institute to develop curricula and curriculum support materials for basic and tertiary education and training. The curriculum development process for any level of education involves thorough research, international benchmarking and robust stakeholder engagement. Through a systematic and consultative process, the KICD conceptualised the Competency Based Curriculum (CBC) as captured in the *Basic Education Curriculum Framework* (BECF), that responds to the demands of the 21st Century and the aspirations captured in the Kenya Constitution 2010, the Kenya Vision 2030, East African Community Protocol and the United Nations Sustainable Development Goals (SDGs).

KICD receives its funding from the Government of Kenya to enable the successful achievement of the stipulated mandate and implementation of the Government and Sector (Ministry of Education (MoE) plans. The Institute also receives support from development partners targeting specific programmes. The Grade 8 curriculum designs have been developed with the support of the World Bank through the Kenya Secondary Education Quality Improvement Program (SEQIP) commissioned by the MoE. Therefore, the Institute is very grateful for the support of the Government of Kenya, through the MoE and the development partners for the policy, resource and logistical support. Specifically, special thanks to the Cabinet Secretary – MoE and the Principal Secretary – State Department of Early Learning and Basic Education,

We also wish to acknowledge the KICD curriculum developers and other staff, all teachers, educators who took part as panelists; the Semi-Autonomous Government Agencies (SAGAs) and representatives of various stakeholders for their roles in the development of the Grade 8 curriculum designs. In relation to this, we acknowledge the support of the –Chief Executive Officers of the Teachers Service Commission (TSC) and the Kenya National Examinations Council (KNEC) for their support in the process of developing these designs.

Finally, we are very grateful to the KICD Council Chairperson Prof. Elishiba Kimani and other members of the Council for very consistent guidance in the process. We assure all teachers, parents and other stakeholders that these curriculum designs will effectively guide the implementation of the CBC at Grade 8 and preparation of learners for Grade 9.

PROF. CHARLES O. ONG'ONDO, PhD, MBS
DIRECTOR/CHIEF EXECUTIVE OFFICER
KENYA INSTITUTE OF CURRICULUM DEVELOPMENT

NATIONAL GOALS OF EDUCATION

Education in Kenya should:

i) Foster nationalism and patriotism and promote national unity.

Kenya's people belong to different communities, races and religions, but these differences need not divide them. They must be able to live and interact as Kenyans. It is a paramount duty of education to help young people acquire this sense of nationhood by removing conflicts and promoting positive attitudes of mutual respect which enable them to live together in harmony and foster patriotism in order to make a positive contribution to the life of the nation.

ii) Promote the social, economic, technological and industrial needs for national development.

Education should prepare the youth of the country to play an effective and productive role in the life of the nation.

a) Social Needs

Education in Kenya must prepare children for changes in attitudes and relationships which are necessary for the smooth progress of a rapidly developing modern economy. There is bound to be a silent social revolution following in the wake of rapid modernization. Education should assist our youth to adapt to this change.

b) Economic Needs

Education in Kenya should produce citizens with the skills, knowledge, expertise and personal qualities that are required to support a growing economy. Kenya is building up a modern and independent economy which is in need of an adequate and relevant domestic workforce.

c) Technological and Industrial Needs

Education in Kenya should provide learners with the necessary skills and attitudes for industrial development. Kenya recognizes the rapid industrial and technological changes taking place, especially in the developed world. We can only be part of this development if our education system is deliberately focused on the knowledge, skills and attitudes that will prepare our young people for these changing global trends.

iii) Promote individual development and self-fulfilment

Education should provide opportunities for the fullest development of individual talents and personality. It should help children to develop their potential interests and abilities. A vital aspect of individual development is the building of character.

iv) Promote sound moral and religious values.

Education should provide for the development of knowledge, skills and attitudes that will enhance the acquisition of sound moral values and help children to grow up into self-disciplined, self-reliant and integrated citizens.

v) Promote social equality and responsibility.

Education should promote social equality and foster a sense of social responsibility within an education system which provides equal educational opportunities for all. It should give all children varied and challenging opportunities for collective activities and corporate social service irrespective of gender, ability or geographical environment.

vi) Promote respect for and development of Kenya's rich and varied cultures.

Education should instill in the youth of Kenya an understanding of past and present cultures and their valid place in contemporary society. Children should be able to blend the best of traditional values with the changing requirements that must follow rapid development in order to build a stable and modern society.

vii) Promote international consciousness and foster positive attitudes towards other nations.

Kenya is part of the international community. It is part of the complicated and interdependent network of peoples and nations. Education should therefore lead the youth of the country to accept membership of this international community with all the obligations and responsibilities, rights and benefits that this membership entails.

viii. Promote positive attitudes towards good health and environmental protection.

Education should inculcate in young people the value of good health in order for them to avoid indulging in activities that will lead to physical or mental ill health. It should foster positive attitudes towards environmental development and conservation. It should lead the youth of Kenya to appreciate the need for a healthy environment.

LEVEL LEARNING OUTCOMES FOR MIDDLE SCHOOL

By the end of Middle School, the learner should be able to:

1. Apply literacy, numeracy and logical thinking skills for appropriate self-expression
2. Communicate effectively, verbally and non-verbally, in diverse contexts
3. Demonstrate social skills, spiritual and moral values for peaceful co-existence
4. Explore, manipulate, manage and conserve the environment effectively for learning and sustainable development
5. Practise relevant hygiene, sanitation and nutrition skills to promote health
6. Demonstrate ethical behaviour and exhibit good citizenship as a civic responsibility
7. Appreciate the country's rich and diverse cultural heritage for harmonious co-existence
8. Manage pertinent and contemporary issues in society effectively
9. Apply digital literacy skills for communication and learning.

ESSENCE STATEMENT

Social Studies is an integrated subject including aspects of History, Geography and Citizenship. It is the study of change and development in society over time. It enables the learner to understand and evaluate how past human action has an impact on the present and how it influences the future. It also involves the study of the natural and historic built environments. It examines both physical and human processes over space and time. It encourages civic responsibility and responsible leadership, including raising current social and environmental concerns. It prepares the learner for local, regional, national, regional and global responsibility. The subject aims at providing the learner with knowledge, skills, values and attitudes necessary for good character formation to enable him or her to live harmoniously in the family and society. The main theme of Social Studies is „Living Together “Social Studies will enable the learner to be aware and be concerned about the welfare of others, protect the environment and be active at community, national, regional and global levels.

Social Studies highlights essential functions of education related to the formation of citizenship and promotion of social cohesion. It is a concern with the relevance of knowledge, skills and values for the participation of citizens in, and their

contribution to, dimensions of societal development, which are linked at local and global levels. It is directly related to the civic, social and political socialization function of education. The purpose of social studies is to enable the learner to make informed decisions for the public good as a citizen of a culturally diverse democratic society. It deals with people, interpersonal relationships, and their culture and how they relate to natural and historic built environments. The environment contains resources that enable people to survive. As people live together, they establish systems of governance. Social Studies enables the learner to gain understanding of basic principles of national values, democracy, social, economic and political developments. Further, Social Studies facilitate the learners to gain a realization of their place, privileges, rights and responsibilities as citizens, at local, national, regional and global levels.

Social Studies is anchored on the tenets of the Constitution of Kenya, Kenya Vision 2030, the National Goals of Education and the Kenya Sessional Paper No. 8 of 2013 on national values and principles of governance. It is also in line with Africa Agenda 2063 and the Strategic Objective 10, of the Continental Education Strategy for Africa 2016-2025 which envision “an integrated, prosperous and peaceful Africa. In addition, Social Studies addresses the 2017 AU Ministers of Education Decision to integrate General History of Africa in School Curricula and aspirations of SDG 4: target 7 and Goal 16.

Theories of learning such as Jean Piaget’s theory of cognitive development, Lawrence Kohlberg theory of moral development, Dewey’s social constructivism and Vygotsky’s socio- cultural development theory have informed the development of this design. Social Studies will prepare the learners for the social sciences pathway in senior school.

SUBJECT GENERAL LEARNING OUTCOMES

By the end of Junior Secondary School, the learner should be able to:

1. Demonstrate an understanding of historical concepts, historical sources and evidence for development of identity and sense belonging
2. Appreciate and be proud of the Kenyan cultural heritage and be willing to further develop, preserve and share it globally
3. Contribute to construction and advancement of the social, economic and political development necessary for learning and living
4. Develop and apply values and basic principles of democracy, governance, human rights and roles as a responsible citizen
5. Cultivate respect and appreciation for diversity and differences that contribute to international understanding for mutual social responsibility
6. Understand the value of environment, resources and their influence on human activities to use, manage and conserve for sustainable development
7. Contribute to the management of contemporary and pertinent issues as informed, engaged, ethical and responsive citizen
8. Develop and apply social research and digital literacy competencies to interpret phenomena for problem solving in society.

STRAND 1.0: NATURAL AND HISTORIC BUILT ENVIRONMENTS

Strand	Sub-strand	Specific Learning Outcomes	Suggested Learning Experiences	Key Inquiry Question(s)
1.0 Natural and Historic Built Environments	1.1 Map Reading and Interpretation (6 Lessons)	By the end of the sub strand, the learner should be able to: a) identify and use marginal information to interpret maps, b) outline types and uses of scales on maps, c) determine distances and areas of places on a map using scales, d) describe the different methods of representing relief on topographical maps, e) interpret physical features on a map, f) appreciate the use of marginal information to interpret maps.	Learners are guided to: • interact with a topographical map and point out the elements of a map and share in class • discuss in groups the marginal information on a map and present in class • link the marginal information to the features they represent on the map and present in class • brainstorm on types and uses of scales and do class presentations (<i>Statement scale, linear scale, and Representative fraction scale</i>) and present in class • do exercises on scale conversion and do peer	1. How do you calculate distances on a map? 2. How do you determine area of a place on a map?

			assessment • practice measuring distances on a topographical map and share in class • calculate area of different places on a topographical map and share in class • find out different methods of representing relief on topographical maps (<i>drainage, relief features and vegetation</i>) and share in class • practice in pairs to identify physical features on a topographical map	
Core Competencies to be developed: • Critical Thinking and Problem solving as learners determine distances and areas of places on a map using scales and present in class • Creativity and Imagination as they practice in pairs to identify physical features on a topographical map and share in class • Learning to Learn as they identify and use marginal information to interpret maps and present in class • Citizenship as they collaborate within diverse teams while discussing in groups the marginal information on a map and share in class				

**Values:**

- Integrity as learners measure distances and calculate area of places on a topographical map and present in class
- Unity as they work in groups to discuss the marginal information on a map and share in class
- Responsibility as they do exercises on scale conversion and do peer assessment and present in class

Pertinent and Contemporary Issues (PCIs):

- Creativity as they link the marginal information to the features they represent on the map and share in class
- Environmental Education as they practice in pairs to identify physical features on a topographical map share in class

Link to other subjects:

- Mathematics as learners calculate area of different places on a topographical map
- KSL, English and Kiswahili as learners brainstorm on types and uses of scales and do class presentations

Assessment Rubric

Indicator	Exceeds Expectations	Meets Expectations	Approaches Expectations	Below Expectations
Ability to identify and use marginal information to interpret maps	Skillfully identifies and uses marginal information to interpret maps	Identifies and uses marginal information to interpret maps	Partially identifies and uses some marginal information to interpret map	With assistance identifies and uses some marginal information to interpret maps
Ability to outline types and uses of scales on maps	Comprehensively outlines types and uses of scales on maps	Outlines types and uses of scales on maps	Partly outlines some types and uses of scales on maps	With guidance outlines some types and uses of scales on maps

Ability to determine distances and areas of places on a map using scales	Creatively determines distances and areas of places on a map using scales	Determines distances and areas of places on a map using scales	Partially determines distances and areas of places on a map using scales	With support determines distances and areas on a map using scales
Ability to describe the different methods of representing relief on topographical maps	Skillfully describes the different methods of representing relief on topographical maps	Describes the different methods of representing relief on topographical maps	Partly describes the different methods of representing relief on topographical maps	With support describes the different methods of representing relief on topographical maps
Ability to interpret physical features on a map	Creatively interprets physical features on a map	Interprets physical features on a map	Partially interprets some of the physical features on a map	With assistance interprets some of the physical features on a map

Strand	Sub-Strand	Suggested Learning Outcomes	Suggested Learning Experiences	Key Inquiry Question(s)
1.0 Natural and Historic Built Environments	1.2 Weather and Climate (6 Lessons)	By the end of the sub-strand, the learner should be able to: a) examine the factors influencing weather and climate in Africa b) illustrate the distribution and characteristics of climatic regions of Africa c) describe the causes and effects of climate change in the environment d) suggest possible solutions to the effects of climate change in the environment e) recognize the effects of weather and climate on human activities	Learners are guided to: • use print or digital resources to research on factors influencing weather and climate in Africa and share in class • draw an outline map of Africa and indicate the hot climates and display in class • view a video clip / film on the distribution and characteristics of climatic regions of Africa and make short notes • brainstorm in groups on causes and effects of climate change and share in class • debate in groups the possible solutions to the effects of climate change and write short notes • Engage with a resource person on the role of weather and climate on human activities	How does climate affect human activities?

**Core competencies to be developed:**

- Communication and Collaboration as learners brainstorm in groups on causes and effects of climate change and share in class
- Self-efficacy as learners draw an outline map of Africa and indicate the hot climates and display in class
- Digital literacy as learners use digital resources to research on factors influencing weather and climate in Africa and share in class
- Critical Thinking and Problem Solving as learners debate in groups the possible solutions to the effects of climate change and write short notes
- Creativity and Imagination as learners draw an outline map of Africa and indicate the hot climates and display in class

Values:

- Patriotism as learners draw a map of Africa and identify with it as African citizens and as they suggest possible solutions to the effects of climate change and share in class
- Respect as learners debate in groups the possible solutions to the effects of climate change and write short notes

Pertinent and Contemporary Issues (PCIs):

- Disaster and risk reduction as learners suggest possible solutions to the effects of climate change on the environment and share in class
- Environmental Education as learners discuss possible solutions to the effects of climate change and share in class

**Link to other subjects:**

- English, Kiswahili and the Kenyan Sign Language as learners brainstorm in groups on causes and effects of climate change
- Visual Arts as learners draw an outline map of Africa and indicate the hot climates and display in class
- Computer Studies as learners use digital resources to research on factors influencing weather and climate in Africa

Assessment Rubric

Indicator	Exceeds Expectations	Meets Expectations	Approaches Expectations	Below Expectations
Ability to examine factors influencing weather and climate in Africa	With examples examines all factors influencing weather and climate in Africa	Examines all factors influencing weather and climate in Africa	Partially examines some factors influencing weather and climate in Africa	With support examines some factors influencing weather and climate in Africa
Ability to illustrate the distribution and characteristics of climatic regions of Africa	creatively illustrates the distribution Ability to suggest possible solutions to the effects of climate change in the environment and characteristics of climatic regions of Africa	Illustrates the distribution and characteristics of climatic regions of Africa	Partly illustrates the distribution and characteristics of climatic regions of Africa	With assistance illustrates the distribution and characteristics of climatic regions of Africa

Ability to describe the causes and effects of climate change in the environment	With examples describes the causes and effects of climate change in the environment	Describes the causes and effects of climate change in the environment	Partially describes the causes and effects of climate change in the environment	With assistance describes the causes and effects of climate change in the Environment
Ability to suggest possible solutions to the effects of climate change in the environment	With examples suggest possible solutions to the effects of climate change in the environment	Suggests possible solutions to the effects of climate change in the environment	Partly suggests some possible solutions to the effects of climate change in the environment	With support suggests some possible solutions to the effects of climate change in the environment

Strand	Sub-strand	Specific Learning Outcomes	Suggested Learning Experiences	Key Inquiry Question(s)
1.0 Natural and Historic Built Environments	1.3 Vegetation in Africa (6 lessons)	By the end of the sub strand, the learner should be able to: a) explain factors influencing vegetation distribution in Africa b) describe the characteristics of major vegetation regions of Africa c) locate the major vegetation regions of Africa d) examine methods of conserving vegetation in the community e) appreciate vegetation conservation within the environment f) participate in conservation of vegetation in the environment	Learners are guided to: • Brainstorm in groups factors influencing vegetation in Africa and do a presentation in class • Explore the immediate environment to identify the different types of vegetation • Use digital resources to find out the vegetation regions in Africa • Use appropriate media to identify the characteristics of vegetation in Africa • Draw a map of Africa and indicate the vegetation regions • Create posters on ways of caring for vegetation in the community • Write essays on ways of caring for vegetation in the	How should we care for vegetation in our environment?

			school community • Debate on importance of vegetation in the community and make short notes	
--	--	--	--	--

Core competencies to be developed:

- Communication as learners write essays on ways of caring for vegetation in the community
- Creativity and Imagination as learners create a poster on ways of caring for vegetation in the community
- Learning to Learn as learners explore the immediate environment to identify the different types of vegetation and present in class
- Citizenship as learners draw a map of Africa and indicate the vegetation regions

Values:

- Responsibility as learners create a poster on ways of caring for vegetation in the community and present in class

- Unity as learners brainstorm in groups factors influencing vegetation in Africa and do a presentation in class
- Respect as learners debate on importance of vegetation in the community and make short notes

Pertinent and Contemporary Issues (PCIs):

- Environmental Education as learners debate on importance of vegetation in the community and make short notes ·
- Social Cohesion as learners brainstorm in groups factors influencing vegetation in Africa and do a presentation in class

**Link to other subjects:**

- Agriculture as learners participate in conservation of vegetation in the environment
- Integrated Science as they explore the immediate environment to identify the different types of vegetation
- English, Kiswahili, Indigenous languages and Kenyan Sign Language as learners debate on importance of vegetation in the community
- Visual Arts as they create a poster to inform the school community on importance of caring

Assessment Rubric

Indicator	Exceeds Expectations	Meets Expectations	Approaches Expectations	Below Expectations
Ability to explain factors influencing vegetation distribution in Africa	With examples explains all factors influencing vegetation distribution in Africa	Explains most factors influencing vegetation distribution in Africa	Partially explains some factors influencing vegetation distribution in Africa	With support correctly explains some factors influencing vegetation distribution in Africa
Ability to describe the characteristics of major vegetation regions of Africa	Skillfully describes the characteristics of major vegetation regions of Africa	Describes the characteristics of major vegetation regions of Africa	Partly describes characteristics of major vegetation regions of Africa	With assistance describes the characteristics of major vegetation regions of Africa
Ability to locate the major vegetation regions of Africa	Skillfully locates the major vegetation regions of Africa	Locates the major vegetation regions of Africa	Partially locates the major vegetation regions of Africa	With support locates the major vegetation regions of Africa

Ability to examine methods of conserving vegetation in the community	With examples examines methods of conserving vegetation in the community	Examines methods of conserving vegetation in the community	Partly examines methods of conserving vegetation in the community	With assistance examines methods of conserving vegetation in the community
--	--	--	---	--

Strand	Sub- Strand	Specific Learning Outcomes	Suggested Learning Experiences	Key Inquiry Question(S)
1.0 Natural and Historic Built Environments	1.4 Historical Sites and Monuments in Africa (4 Lessons)	By the end of the sub - strand, the learner should be able to: a) locate selected historical sites and monuments in Africa b) examine the importance of historical sites and monuments for preservation of cultural heritage c) explore ways of conserving historical sites and monuments in Africa d) conserve historical sites and monuments in the locality e) appreciate the conservation of historical sites and	Learners are guided to: • use digital or print resources to trace selected historical sites and monuments in Africa (Fort Jesus, Kilwa, Great Zimbabwe, Giza pyramids, Meroe, Timbuktu, Robben Island) and present in class • draw a map of Africa and locate the selected historical sites and monuments and share in class • brainstorm in groups on the importance of historical sites and monuments in Africa and share in class • find out from relevant sources ways of conserving the historical sites and monuments and present in class • collect pictures and photographs and create an album of historical sites and monuments and share in	Why should we conserve and protect the historical sites and monuments?

		monuments in the locality	class	
Core Competencies to be developed: • Creativity and Imagination as learners collect pictures and photographs and develop an album of historical sites and monuments and share in class • Digital Literacy as learners use digital resources to trace historical sites and monuments in Africa and share in class • Self-Efficacy as learners draw a map of Africa and locate the selected historical sites and monuments and peer assess • Critical Thinking and Problem Solving as learners brainstorm in groups on the importance of historical sites and monuments in Africa and share in class • Citizenship as learners preserve the historical sites and monuments within the locality and share in class				
Values: • Integrity as learners use digital resources resourcefully and responsibly to trace historical sites and monuments in Africa and share in class • Unity as learners work in groups to draw a map of Africa and locate the selected historical sites and monuments and peer assess • Patriotism as learners preserve and protect historical sites and monuments in the local environment and share in class • Responsibility as learners learn how to preserve the historical monuments and share in class				

**Pertinent and Contemporary Issues (PCIs):**

- Social Cohesion as learners brainstorm in groups on the importance of historical sites and monuments in Africa and present in class
- Environmental Education as learners learn about preservation and conservation of the environment and share in class
- Self-Awareness as learners work in groups to draw a map of Africa and trace the selected historical sites and monuments and peer assess

Link to other subjects:

- English/Kiswahili/Kenyan Sign Language as learners brainstorm in groups on the importance of historical sites and monuments in Africa
- Visual Arts as learners draw a map of Africa and trace the selected historical sites and monuments
- Christian Religious Education as learners learn about preservation and protection of historical monuments
- Computer Science as learners use digital resources to trace historical sites and monuments in Africa

Assessment Rubric

Indicator	Exceeds Expectation	Meets Expectation	Approaching Expectation	Below Expectation
Ability to locate selected historical sites and monuments in Africa	Skillfully locates selected historical sites and monuments in Africa	Locates selected historical sites and monuments in Africa	Partly locates selected historical sites and monuments in Africa	With support locates selected historical sites and monuments in Africa

Ability to examine the importance of historical sites and monuments for preservation of cultural heritage	With examples examines the importance of historical sites and monuments for preservation of cultural heritage	Examines the importance of historical sites and monuments for preservation of cultural heritage	Partially examines the importance of historical sites and monuments for preservation of cultural heritage	With assistance examines the importance of historical sites and monuments for preservation of cultural heritage
Ability to explore ways of conserving historical sites and monuments in Africa	Elaborately explores ways of conserving historical sites and monuments in Africa	Explores ways of conserving historical sites and monuments in Africa	Partly explores ways of conserving historical sites and monuments in Africa	With support explores ways of conserving historical sites and monuments in Africa
Ability to conserve and protect historical sites and monuments in the locality	Demonstrates conserving and protecting historical sites and monuments in the locality	Demonstrates conserving and protecting historical sites and monuments in the locality	Demonstrates conserving and protecting historical sites and monuments in the locality	With guidance Demonstrates a conserving and protecting historical sites and monuments in the locality

STRAND 2.0: PEOPLE AND POPULATION

Strand	Sub-Stand	Specific Learning Outcomes	Suggested Learning Experiences	Key Inquiry Question (s)
2.0 People and Population	2.1 Scientific Theory about Human Origin (4 Lessons)	By the end of the sub strand, the learner should be able to: a) explore the scientific theory about human origin, b) explain the importance of fossil records of human evolution in Africa, c) locate when and where pre historic human remains were discovered in Africa, d) illustrate changes which took place in humans as a result of evolution, e) apply knowledge on human origin to develop a sense of common humanity and interdependence of humans, f) recognize Africa as the	Learners are guided to: • discuss in groups how scientific theory is used to explain human origin and present in class • draw charts showing the different stages of human evolution and share in class • use digital or print resources to find out the importance of fossil records of human evolution in Africa and present in class • brainstorm in groups on the differences between various species of early humans, when they existed and where their remains were discovered and share in class • use print or digital resources to get pictures of different fossils, dates and places and	Why is Africa the cradle of humanity?

		cradle of humanity.	draw a chart to show when and where pre historic human remains were discovered in Africa and present in class • Engage with a resource person to discuss the preservation of remains of early humans and take notes • Carry out library research on changes which took place in humans as a result of evolution and draw an evolutionary tree and display in class • debate on the scientific theory of human origin and Africa as the cradle of humanity	
Core Competencies to be developed: • Communication and Collaboration as learners brainstorm in groups on the differences between various species of early humans, when they existed and where their remains were discovered and present in class • Digital Literacy as learners use digital devices to get pictures of different fossils, dates and places where they were discovered and present in class • Creativity and imagination as learners draw charts showing the different stages of human evolution and present in class				

**Values:**

- Respect as learners discuss in groups how scientific theory is used to explain human origin and present in class
- Responsibility as learners use print or digital resources to get pictures of different fossils, dates and places where they were discovered and present in class
- Integrity as learners use print or digital resources to get pictures of different fossils, dates and places where they were discovered

Pertinent and Contemporary Issues (PCIs):

- Social cohesion as learners brainstorm in groups on the differences between various species of early humans, when they existed and where their remains were discovered
- Self-awareness as learners draw charts showing the different stages of human evolution

Link to other Subjects:

- English, Kiswahili, Kenyan Sign Language as learners brainstorm in groups on the differences between various species of early humans, when they existed and where their remains were discovered
- Computer Science as learners use digital devices to search for information about human origin
- Integrated Science as the learners use digital or print resources to find out the importance of fossil records of human evolution in Africa · Visual Arts as learners draw charts showing the different stages of human evolution

Assessment Rubric				
Indicators	Exceeds Expectation	Meets Expectation	Approaches Expectation	Below Expectation
Ability to explore the Scientific theory about human origin	With examples, explores the scientific theory about human origin	Explores the Scientific theory about human origin	Partially explores aspects of the Scientific theory on human origin	With assistance explores the Scientific theory about human origin
Ability to explain the importance of fossil records of human evolution in Africa	With examples, explains the importance of fossil records of human evolution in Africa	Explains the importance of fossil records of human evolution in Africa	Partly explains the importance of fossil records of human evolution in Africa	With assistance explains importance of fossil records of human evolution in Africa
Ability to locate when and where pre historic human remains were discovered in Africa	With illustrations locates when and where pre historic human remains were discovered in Africa	Locates when and where pre historic human remains were discovered in Africa	Partially locates when and where pre historic human remains were discovered in Africa	With support locates when and where pre historic human remains were discovered in Africa
Ability to illustrate changes which took place in humans as result of evolution	Creatively illustrates changes which took place in humans as result of evolution	Illustrates changes which took place in humans as result of evolution	Partly illustrating changes which took place in humans as result of evolution	With guidance illustrating changes which took place in humans as result of evolution

Strand	Sub-Strand	Specific Learning Outcomes	Suggested Learning Experiences	Key Inquiry Questions
2.0 People and Population	2.2 Early Civilization (8 Lessons)	By the end of the sub-strand, the learner should be able to: a) explore factors that led to growth of the selected Ancient Kingdoms in Africa and contribution to the modern world, b) trace the places of origins of early visitors to the East African Coast, c) describe the Swahili civilization along the East African coast, d) apply best practices from early civilizations to the development of modern world, e) appreciate the contribution of early civilization to the development of modern world.	Learners are guided to: • brainstorm in groups on factors which led to growth of ancient Egypt, Great Zimbabwe, and Kingdom of Kongo • draw and locate the selected Ancient Kingdoms on a map of Africa • view an audio-visual documentary on the contribution of early African civilization to the modern world • in groups, brainstorm on the origin of early visitors to East African Coast up to 1500 and use digital or print resources to locate on a map of Europe and Asia places of origin of early visitors to the East African Coast (<i>Asia, Europe</i>) • brainstorm on the Swahili civilization along the East	1. Why is it necessary to study the contribution of early African civilization to modern world? 2. Why is cultural heritage important to a society?

			African coast and discuss factors which led to growth of East African city states • discuss the best practices from early civilizations to the development of modern world • debate on the contribution of early civilization to the development of modern world	
Core Competencies to be developed: • Citizenship as learners debate on the contribution of early civilization to the development of modern world • Communication and Collaboration as learners brainstorm in groups on factors which led to growth of ancient Egypt, Great Zimbabwe and Kingdom of Kongo • Digital Literacy as learners use digital resources to locate on a map of Europe and Asia places of origin of early visitors to the East African Coast				
Values: • Respect as learners discuss the effects of the interaction between East Africa and the outside world up to the 15th Century • Unity as learners in groups, brainstorm in groups on the origin of early visitors to East African Coast up to 1500				

**Pertinent and Contemporary Issues (PCIs):**

- Social Cohesion as learners brainstorm in groups on the origin of early visitors to East African Coast up to 1500
- Self-Esteem as learners outline the contribution of early African civilization to the modern world
- Good Governance as learners brainstorm on factors which led to growth of ancient Egypt, Great Zimbabwe, East African city states and Kingdom of Kongo

Link to other Subjects:

- Computer Science as learners use digital resources to locate on a map of Europe and Asia places of origin of early visitors to the East African Coast · English, Kiswahili and Kenyan Sign Language as learners discuss the effects of the interaction between East Africa and the outside world up to the 15th Century

Assessment Rubric

Indicator	Exceeds Expectation	Meets Expectation	Approaches Expectation	Below Expectation
Ability to explore factors that led to growth of ancient Egypt and Great Zimbabwe	Comprehensively explores factors that led to growth of ancient Egypt and Great Zimbabwe	Explores factors that led to growth of ancient Egypt and Great Zimbabwe	Explores some factors that led to growth of ancient Egypt and Great Zimbabwe	With support explores factors that led to growth of ancient Egypt and Great Zimbabwe
Ability to trace the origin of early visitors to the East African Coast	With illustrations, traces the origin of early visitors to the East African Coast	Traces the origin of early visitors to the East African Coast	Traces the origin of some of the early visitors to the East African Coast	With support traces the origin of early visitors to the East African Coast

Ability to describe the Swahili civilization along the East African coast	With examples, describes the Swahili civilization along the East African coast	Describes the Swahili civilization along the East African coast	Partly describes the Swahili civilization along the East African coast	With assistance describes the Swahili civilization along the East African coast

Strand	Sub Strand	Specific Learning Outcomes	Suggested Learning Experiences	Key Inquiry Question (S)
2.0 People and Population	2.3 Socio-Cultural Diversity and Inclusion (4 lessons)	By the end of the sub-strand, the learner should be able to: a) explore various socio cultural diversities in Kenya, b) illustrate ways of celebrating various socio cultural diversities in the community, c) participate in promoting respect for socio-cultural diversities and inclusion in society, d) embrace various socio cultural diversities and inclusion in the society for harmonious living.	Learners are guided to: • Brainstorm in groups on the terms “Socio- Cultural Diversity” and “Inclusion” in society • Use digital or print resources to research on various socio-cultural diversities in Kenya • Role play on ways of celebrating various socio-cultural diversities in the community • Participate in drama, music and intercultural fares • Organize school cultural week • Debate on ways of promoting respect for socio-cultural diversities and inclusion in society • Compose and recite poems on socio cultural diversities and inclusion in society • Engage a resource person on	1. What makes people different from each other? 2. How does respect for socio-cultural diversity and inclusion promote harmonious living in society?

			ways of promoting socio-cultural diversities and inclusion for harmonious living	
Core Competencies to be developed: • Citizenship as learners debate on ways of promoting respect for socio-cultural diversities and inclusion in society · Self-Efficacy as learners compose and recite poems on socio-cultural diversities and inclusion in society • Communication and Collaboration as learners brainstorm in groups on the terms “Socio- Cultural Diversity” and “Inclusion” in society · Digital Literacy as learners use digital or print resources to research on various socio-cultural diversities in Kenya • Learning to Learn as learners engage a resource person on ways of promoting socio-cultural diversities and inclusion for harmonious living				
Values: • Respect as learners“ debate on ways of promoting respect for socio-cultural diversities and inclusion in society • Unity as learners compose and recite poems on socio-cultural diversities and inclusion in society • Social Justice as learners participate in drama, music and intercultural fares				

**Pertinent and Contemporary Issues (PCIs):**

- Social Cohesion as learners compose and recite poems on socio-cultural diversities and inclusion in society
- Ethnic Relations as learners role play on ways of celebrating various socio-cultural diversities in the community
- Self-Esteem as learners compose and recite poems on socio-cultural diversities and inclusion in society
- Effective Communication as learners debate on ways of promoting respect for socio-cultural diversities and inclusion in society

Link to other subjects:

- Computer Science as learners use digital resources to research on various socio-cultural diversities in Kenya
- Kenyan Sign Language, Kiswahili and English as learners debate in class on ways through which socio-cultural diversity promote social cohesion and harmony
- Performing Arts as learners compose and recite poems on socio-cultural diversities and inclusion in society

Assessment Rubric

Indicator	Exceeds Expectation	Meets Expectation	Approaches Expectation	Below Expectation
Ability to explore various socio-cultural diversities in Kenya	Comprehensively explores various socio-cultural diversities in Kenya	Explores various socio-cultural diversities in Kenya	Explores some of the various socio-cultural diversities in Kenya	With assistance explores various socio-cultural diversities in Kenya

Ability to illustrate ways of celebrating various socio-cultural diversities in the community	With examples, illustrates ways of celebrating various socio-cultural diversities in the community	Illustrates ways of celebrating various socio-cultural diversities in the community	Illustrates some ways of celebrating various socio cultural diversities in the community	With support illustrates ways of celebrating various socio-cultural diversities in the community

Strand	Sub Strand	Specific Learning Outcomes	Suggested Learning Experiences	Key Inquiry Questions
2.0 People and Population	2.4 Peaceful Conflict Resolution in the family (4 Lessons)	By the end of the sub strand, the learner should be able to: a) explore situations that may lead to conflicts in a family, b) describe characteristics of a peaceful family for harmonious living, c) examine non-violent methods of resolving family conflicts d) apply methods of non-violent conflict resolution to promote peace, e) appreciate the contribution of family peace to harmonious living in society, f) embrace family agreements as a means of maintaining trust and unity for peaceful living.	Learners are guided to: • brainstorm in groups on the meaning of the word conflict using metaphors or proverbs from their communities • discuss situations that could lead to conflict at family level and share in class • In panels, discuss on non-violent methods of resolving family conflicts and compose peace poems to share in class • In groups debate and come up with methods of non-violent conflict resolution to promote peace • Role play non-violent methods of resolving family conflicts • Initiate and organize family outings to discuss peace and family agreements as a means of maintaining trust and unity for peaceful living	How can we promote peaceful conflict resolution at the family level?

			• Develop sample rules and agreements to maintain peace in the family	
Core Competencies to be developed: • Citizenship as learners develop sample rules and agreements to maintain peace in the family • Collaboration as learners brainstorm in groups on the meaning of the word conflict using metaphors or proverbs from their communities · Self-Efficacy as learners role play non-violent methods of resolving family conflicts • Critical Thinking and Problem Solving as learners develop sample rules and agreements to maintain peace in the family				
Values: • Peace as learners role play non-violent methods of resolving family conflicts				
• Love as learners initiate and organize family outings to discuss peace and family agreements as a means of maintaining trust and unity for peaceful living • Unity as learners initiate and organize family outings to discuss peace and family agreements as a means of maintaining trust and unity for peaceful living • Patriotism as the learners in groups debate and come up with methods of non-violent conflict resolution to promote peace · Respect as learners develop sample rules and agreements to maintain peace in the family				

**Pertinent and Contemporary Issues (PCIs):**

- Social Cohesion as learners initiate and organize family outings to discuss peace and family agreements as a means of maintaining trust and unity for peaceful living
- Safety and Security as learners initiate and organize family outings to discuss peace and family agreements as a means of maintaining trust and unity for peaceful living
- Conflict Resolution as learners role play peaceful conflict resolution approaches at the family level

Link to other subjects:

- Life Skills Education as learners initiate and organize family outings to discuss peace and family agreements as a means of maintaining trust and unity for peaceful living
- Performing Arts as learners role play peaceful conflict management approaches at the family level
- Indigenous Language, Kiswahili, English and Kenyan Sign Language as learners use metaphors or proverbs on conflict from their communities and compose peace poems to recite in school

Assessment Rubric

Indicator	Exceeds Expectation	Meets Expectation	Approaches Expectation	Below Expectation
Ability to explore situations that may lead to conflicts in a family	Elaborately explores situations that may lead to conflicts in a family	Explores situations that may lead to conflicts in a family	Fairly explores situations that may lead to conflicts in a family	With assistance explores situations that may lead to conflicts in a family

Ability to describe characteristics of a peaceful family for harmonious living	With examples, describes characteristics of a peaceful family for harmonious living	Describes characteristics of a peaceful family for harmonious living	Partially describes characteristics of a peaceful family for harmonious living	With support describes characteristics of a peaceful family for harmonious living
Ability to examine non violent methods of resolving family conflicts	Critically examines non-violent methods of resolving family conflicts	Examines non violent methods of resolving family conflicts	Examines some non-violent methods of resolving family conflicts	With prompt examines non-violent methods of resolving family conflicts

Strand	Sub-Strand	Specific Learning Outcomes	Suggested Learning Experiences	Key Inquiry Question(s)
2.0 People and Population	2.5 Trans Saharan Slave Trade (4 Lessons)	By the end of the sub-strand, the learner should be able to: a) identify factors that led to b) development of Trans-Saharan c) slave Trade in Africa, d) describe the organization of Trans Saharan slave trade in Africa, e) examine the effects of Trans-Saharan slave trade in Africa, f) participate in promotion of social justice in the society, g) advocate for eradication of slave trade in society, h) develop desire to promote social justice in a society.	Learners are guided to: • Brainstorm on factors that led to • Development of Trans-Saharan and write a report • Debate on factors that led to development of Trans-Saharan • Slave trade in Africa • Use digital or print resources to research on the organization of • Trans-Saharan slave trade in Africa • Discuss the effects of Trans Saharan slave trade in Africa • Draw a map of Africa and locate regions where slaves were • Sourced during the Trans-Saharan slave trade	Why do people subject others to slave trade?

**Core Competencies to be developed:**

- Digital Literacy as learners use digital resources to research on the organization of Trans-Saharan slave trade in Africa
- Communication and Collaboration as learners debate on factors that led to development of Trans-Saharan slave trade in Africa
- Learning to Learn as learners use digital or print resources to research on the organization of Trans-Saharan slave trade in Africa
- Creativity and Imagination as learners draw a map of Africa and locate regions where slaves were sourced during the Trans-Saharan slave trade

Values:

- Unity as learner debate on factors that led to development of Trans-Saharan slave trade in Africa
- Social Justice as learners discuss the effects of Trans-Saharan slave trade in Africa

Pertinent and Contemporary Issues (PCIs):

- Human Rights as learners debate on factors that led to development of Trans-Saharan slave trade in Africa
- Effective Communication as learners debate on factors that led to development of Trans-Saharan slave trade in Africa

Link to other subjects:

- English, Kiswahili and Kenyan Sign Language as learners debate on factors that led to development of Trans-Saharan slave trade in Africa
- Visual Arts as learners draw a map of Africa and locate regions where slaves were sourced during the Trans-Saharan slave trade

- Computer Science as learners use digital resources to research on the organization of Trans-Saharan slave trade in Africa

Assessment Rubric

Indicator	Exceeds Expectation	Meets Expectation	Approaches Expectation	Below Expectation
Ability to identify factors that led to development of Trans Saharan slave Trade in Africa	With examples, identifies factors that led to development of Trans Saharan slave Trade in Africa	Identifies factors that led to development of Trans-Saharan slave Trade in Africa	Identifies some factors that led to development of Trans Saharan slave Trade in Africa	With assistance identifies factors that led to development of Trans Saharan slave Trade in Africa
Ability to describe the organization of Trans Saharan slave trade in Africa	With illustrations, describes the organization of Trans-Saharan slave trade in Africa	Describes the organization of Trans Saharan slave trade in Africa	Partially describes the organization of Trans Saharan slave trade in Africa	With guidance describes the organization of Trans Saharan slave trade in Africa
Ability to examine the effects of Trans Saharan slave trade in Africa	Critically examines the effects of Trans Saharan slave trade in Africa	Examines the effects of Trans-Saharan slave trade in Africa	Partly examines the effects of Trans-Saharan slave trade in Africa	With support examines the effects of Trans-Saharan slave trade in Africa

Strand	Sub Strand	Specific Learning Outcomes	Suggested Learning Experiences	Key Inquiry Question (S)
2.0 People and Population	2.6 Population Growth in Africa (4 lessons)	By the end of the sub-strand, the learner should be able to; a) explore causes and effects of population growth in Africa, b) examine types and effects of migration in Africa, c) illustrate demographic trends in Kenya, d) create awareness on the effects of population growth in the community, e) acknowledge the impact of migration on population growth in Africa.	Learners are guided to: • Brainstorm in groups causes of population growth in Africa • Use digital and print resources to research effects of population growth in Africa • Draw demographic trends in Kenya using recent census data • Brainstorm in groups on types of migration • Research on factors that influence migration in Africa and share in class · engage a resource person on effects of migration in Africa • Develop posters to create awareness on effects of population growth in the community	1. Why do people migrate from one place to another? 2. Why is it important to study demographic changes?

**Core Competencies to be developed:**

- Critical Thinking and Problem Solving as learners research on factors that influence migration in Africa and share in class · Communication and Collaboration as learners debate on factors influencing migration in Africa
- Self-Efficacy as learners illustrate demographic trends in Kenya and display in the classroom
- Creativity and Imagination as learners develop posters to create awareness on effects of population growth in the community

Values:

- Responsibility as learners use digital and print resources to research effects of population growth in Africa
- Unity as learners develop posters to create awareness on effects of population growth in the community brainstorms and discuss in groups
- Respect as the learners debate on factors influencing migration in Africa

Pertinent and Contemporary Issues (PCIs):

- Social cohesion as learners brainstorm in groups causes of population growth in Africa

Link to other Subjects:

- Kenyan Sign Language, Kiswahili and English as learners debate on factors influencing migration in Africa
- Computer Science as learners use digital resources to research effects of population growth in Africa

Assessment Rubric				
Indicator	Exceeds Expectation	Meets Expectation	Approaches Expectation	Below Expectation
Ability to explore causes and effects of population growth in Africa	Elaborately explores causes and effects of population growth in Africa	Explores causes and effects of population growth in Africa	Partially explores causes and effects of population growth in Africa	With assistance explores causes and effects of population growth in Africa
Ability to examine types and effects of migration in Africa	Skillfully examines types and effects of migration in Africa	Examines types and effects of migration in Africa	Examines some types and effects of migration in Africa	With guidance examines types and effects of migration in Africa
Ability to illustrate demographic trends in Kenya	Creatively illustrates demographic trends in Kenya	Illustrates demographic trends in Kenya	Partly illustrates demographic trends in Kenya	With assistance illustrates demographic trends in Kenya

Strand	Sub Strand	Specific Learning Outcomes	Suggested Learning Experiences	Key Inquiry Question (S)
2.0 People and Population	2.7 Photograph Work (4 lessons)	By the end of the sub strand, the learner should be able to: a) identify types of photographs used in social studies, b) explain the uses of photographs for interpretation of human and physical activities, c) describe the various parts of a photograph in social studies, d) interpret physical features and human activities in a photograph, e) appreciate the use of photographs in social studies.	Learners are guided to: • classify various types of photographs • brainstorm in groups on uses of photographs for interpretation of human and physical activities • draw a sketch of a photographs or use digital devices to take photographs and describe the different parts • practice reading different types of photographs as used in Social Studies	Why are photographs important in interpreting human activities and physical features?

**Core Competencies to be developed:**

- Communication and Collaboration as learners brainstorm in groups on uses of photographs for interpretation of human and physical activities · Digital Literacy as learners use digital devices to take photographs and describe the different parts
- Critical Thinking as learners practise reading different types of photographs as used in Social Studies
- Creativity and Imagination as learners draw a sketch of a photographs or use digital devices to take photographs and describe the different parts

Values:

- Unity as learners brainstorm in groups on uses of photographs for interpretation of human and physical activities

Pertinent and Contemporary Issues (PCIs):

- Self-Esteem as learners draw a sketch of a photographs or use digital devices to take photographs and describe the different parts · Critical Thinking as learners classify various types of photographs
- Social Cohesion as learners brainstorm in groups on uses of photographs for interpretation of human and physical activities

Link to other Subjects:

- Kenyan Sign Language, Kiswahili and English as learners brainstorm in groups on uses of photographs for interpretation of human and physical activities
- Computer Science as learners use digital devices to take photographs and describe the different parts
- Visual Arts as learners draw a sketch of a photographs or use digital devices to take photographs and describe the different parts

Assessment Rubric				
Indicator	Exceeds Expectation	Meets Expectation	Approaches Expectation	Below Expectation
Ability to identify types of photographs in Social Studies	With examples, identifies types of photographs in Social Studies	Identifies types of photographs in Social Studies	Identifies some types of photographs in Social Studies	With support identifies types of photographs in Social Studies
Ability to explain uses of photographs for interpretation of human and physical activities	With examples, explains uses of photographs for interpretation of human and physical activities	Explains uses of photographs for interpretation of human and physical activities	Explains some uses of photographs for interpretation of human and physical activities	With guidance explains uses of photographs for interpretation of human and physical activities
Ability to describe the various parts of a photograph in Social Studies	Comprehensively describes the various parts of a photograph in Social Studies	Describes the various parts of a photograph in Social Studies	Partially describes the various parts of a photograph in Social Studies	With assistance describes the various parts of a photograph in Social Studies

Ability to interpret physical features and human activities in a photograph	Creatively interprets physical features and human activities in a photograph	Interprets physical features and human activities in a photograph	Partly interprets physical features and human activities in a photograph	With support interprets physical features and human activities in a photograph

STRAND 3.0: RESOURCES AND ECONOMIC ACTIVITIES

Strand	Sub-Strand	Specific Learning Outcomes	Suggested Learning Experiences	Key Inquiry Questions
3.0 Resources and Economic	3.1 Agriculture Activities (8 Lessons)	By the end of the sub strand the learner should be able to; a) distinguish types of Agriculture practiced in Africa, b) describe pastoralism practices in Africa, c) explore establishment of settler agriculture during the colonial period in Kenya, d) describe plantation agriculture and cash crop growing in Kenya and their contribution to economic development, e) apply consumer awareness in agricultural practices, f) appreciate agricultural practices for food security.	Learners are guided to: • use print or digital resources to find out different types of Agriculture (<i>Subsistence farming, pastoralism and settler farming</i>) • brainstorm in groups on pastoralism practices in Africa (<i>Maasai and Fulani</i>) • use digital or print resources to locate places where pastoralism is practiced by the <i>Maasai and Fulani</i> in Africa • draw a map of Africa and locate areas where pastoralism is practiced by <i>Maasai and Fulani</i> • research on plantation agriculture and cash crop growing in Kenya and their	How has subsistence farming developed in the community?

			contribution to economic development and present in class (<i>Tea growing in Kenya, Maize in Tanzania and Cocoa in Ghana</i>) • engage with a resource person on the effects of settler farming in Kenya and do a write up • discuss best agricultural practices that protect consumers health • debate on the consumer concerns on farm inputs for the selected crops in Africa • develop communication messages on consumer concerns on farm inputs and share with the community	
--	--	--	---	--

**Core competencies to be developed:**

- Digital Literacy as learners use digital resources to locate places where pastoralism is practiced by the *Maasai and Fulani* in Africa
- Communication and Collaboration as learners brainstorm in groups on pastoralism practices in Africa
- Self-Efficacy as learners draw a map of Africa and locate areas where pastoralism is practiced by *Maasai and Fulani*
- Creativity and Imagination as learners develop communication messages on consumer concerns on farm inputs and share with the community
- Learning to learn as learners engage with a resource person on the effects of settler farming in Kenya and do a write up

Values:

- Responsibility as learners develop communication messages on consumer concerns on farm inputs and share with the community
- Unity as learners develop communication messages on consumer concerns on farm inputs and share with the community

Pertinent and Contemporary Issues (PCIs):

- Social Cohesion as learners brainstorm in groups on pastoralism practices in Africa
- Self-Awareness as learners draw a map of Africa and locate areas where pastoralism is practiced by *Maasai and Fulani* · Food Security as learners develop talking walls on the role of subsistence farming in the community
- Financial Literacy as learners research on plantation agriculture and cash crop growing in Kenya and their contribution to economic development and present in class
- Consumer Education as learners discuss best agricultural practices that protect consumers health

**Link to other subjects:**

- English, Kiswahili and Kenyan Sign Language as learners brainstorm in groups on pastoralism practices in Africa
- Agriculture as learners discuss best agricultural practices that protect consumers health
- Visual Arts as learners develop draw a map of Africa and locate areas where pastoralism is practiced by *Maasai and Fulani*
- Business Studies as learners research on plantation agriculture and cash crop growing in Kenya and their contribution to economic development and present in class

Assessment Rubric

Indicator	Exceeds Expectation	Meets Expectation	Approaches Expectation	Below Expectation
Ability to distinguish types of Agriculture practiced in Africa	With examples, distinguishes types of Agriculture practiced in Africa	Distinguishes types of Agriculture practiced in Africa	Partially distinguishes types of Agriculture practiced in Africa	With support distinguishes types of Agriculture practiced in Africa
Ability to describe pastoralism practices in Africa	Skillfully describes pastoralism practices in Africa	Describes pastoralism practices in Africa	Partly describes pastoralism practices in Africa	With assistance describes pastoralism practices in Africa

Ability to explore establishment of settler agriculture during the colonial period in Kenya	Elaborately explores establishment of settler agriculture during the colonial period in Kenya	Explores establishment of settler agriculture during the colonial period in Kenya	Fairly explores establishment of settler agriculture during the colonial period in Kenya	With guidance explores establishment of settler agriculture during the colonial period in Kenya
Ability to describe plantation agriculture and cash crop growing in Kenya and their contribution to economic development	Exhaustively describes plantation agriculture and cash crop growing in Kenya and their contribution to economic development	Describes plantation agriculture and cash crop growing in Kenya and their contribution to economic development	Partially describes plantation agriculture and cash crop growing in Kenya and their contribution to economic development	With support describes plantation agriculture and cash crop growing in Kenya and their contribution to economic development

Strand	Sub-Strand	Specific Learning Outcomes	Suggested Learning Experiences	Key Inquiry Questions
3.0. Resources and Economic Activities	3.2 Sustainable Resource Utilization (4 Lessons)	By the end of the sub strand the learner should be able to: a) distinguish between b) renewable and non-renewable resources for sustainability, c) explore practices that reflect mismanagement of resources in society, d) examine methods of reducing, reusing and recycling available resources for e) responsible and sustainable lifestyle, f) apply prudent utilization of resources to socio-economic development, g) appreciate management of available resources for safe and secure future.	Learners are guided to: • use digital resources to identify renewable and non-renewable resources • in pairs find out how resources can be used efficiently and report in class • in groups, research on practices that reflect mismanagement of resources in society and present in class • discuss in groups methods of reducing, reusing and recycling available resources for responsible and sustainable lifestyle • write topical issues on reducing, reusing and recycling in the school magazine or school notice board	How can we use resources for sustainable development?

			• debate on the relationship • between resource utilization and socio-economic development in Kenya, • develop talking walls on how to manage available resources for safe and secure future	
Core competences to be developed: • Critical thinking and problem solving as learners develop talking walls on how to manage available resources for safe and secure future. • Creativity and imagination as learners write topical issues on reducing, reusing and recycling in the school magazine or school notice board • Communication and collaboration as learners debate on the relationship between resource utilization and socio-economic development in Kenya · Citizenship as learners discuss in groups methods of reducing, reusing and recycling available resources for responsible and sustainable lifestyle				
Values: • Responsibilities as learners research on practices that reflect mismanagement of resources in society and present in class • Unity as learners write topical issues on reducing, reusing and recycling in the school magazine or school notice board • Respect as learners debate on the relationship between resource utilization and socio-economic development in Kenya				

**Pertinent and Contemporary Issues (PCIs):**

- Poverty reductions as learners discuss in groups the methods of reducing, reusing and recycling available resources for responsible and sustainable lifestyle
- Social cohesion as learners develop topical issues on resources utilization and the implication on political and social - economic development
- Environmental Education discuss the methods of reducing, reusing and recycling available resources for responsible and sustainable lifestyle

Link to other subjects:

- Computer Studies as learners use digital resources to identify renewable and non-renewable resources
- Integrated Science as learners discuss the methods of reducing, reusing and recycling available resources for responsible and sustainable lifestyle
- English, Kiswahili and Kenyan Sign Language as learners discuss in groups the methods of reducing, reusing and recycling available resources for responsible and sustainable lifestyle

Assessment Rubric				
Indicator	Exceeds expectation	Meets expectation	Approaches expectation	Below expectation
Ability to distinguish between renewable and non-renewable resources for sustainability	With examples, distinguishes between renewable and non-renewable resources for sustainability	Distinguishes between renewable and non-renewable resources for sustainability	Partially distinguishes between renewable and non renewable resources for sustainability	With support distinguishes between renewable and non renewable resources for sustainability
Ability to explore practices that reflect mismanagement of resources in society	With illustrations, explores practices that reflect mismanagement of resources in society	Explores practices that reflect mismanagement of resources in society	Explores some practices that reflect mismanagement of resources in society	With assistance explores practices that reflect mismanagement of resources in society
Ability to examine methods of reducing, reusing and recycling available resources for responsible and sustainable lifestyle	Critically examines methods of reducing, reusing and recycling available resources for responsible and sustainable lifestyle	Examines methods of reducing, reusing and recycling available resources for responsible and sustainable lifestyle	Examines some methods of reducing, reusing and recycling available resources for responsible and sustainable lifestyle	With guidance examines methods of reducing, reusing and recycling available resources for responsible and sustainable lifestyle

STRAND 4.0: POLITICAL DEVELOPMENTS AND GOVERNANCE

Strand	Sub-Strand	Specific Learning Outcomes	Suggested Learning Experiences	Key Inquiry Questions
4.0. Political Developments and Governance	4.1 Colonization and Liberation Struggle in Africa (6 Lessons)	By the end of the sub strand, the learner should be able to: a) analyze responses to the establishment of colonial rule in Africa, b) examine the colonial systems of administration in Africa, c) explore the role played by key personalities in the struggle for independence in Kenya, d) adopt best practices from the key personalities to defend independence of Kenya, e) illustrate the wave of independence in Africa using a map, f) value self-determination and independence from	Learner is guided to: - brainstorm in groups on the African responses to the establishment of colonial rule (<i>Nandi, Menelik I and Lobengula</i>) - use digital or print resources to research on the colonial systems of administration in Africa - use flash cards to display in class the roles played by the key personalities in the struggle for independence in Kenya (<i>Dedan Kimathi and Priscilla Ingashani Abwao</i>) - create portraits of the selected key personalities	- How best should Africans have reacted to colonization? - How can we participate in defending our independence and building African Unity?

		foreign rule in Africa.	in the struggle for independence in Kenya as a short memoir • Debate on ways of defending Kenya's independence • Draw a map of Africa and show the year each country attained self- rule	
Core Competencies to be developed: • Citizenship as learners draw a map of Africa and show the year each country attained self- rule • Self-Efficacy as learners create portraits of the selected key personalities in the struggle for independence in Kenya as a short memoir • Learning to Learn as learners use relevant digital or print resources to research on the colonial systems of administration in Africa · Creativity and Imagination as learners create portraits of the selected key personalities in the struggle for independence in Kenya as a short memoir				
Values: • Patriotism as learners draw a map of Africa and show the year each country attained self- rule • Unity as learners brainstorm in groups on the African responses to the establishment of colonial rule • Responsibility as learners create portraits of the selected key personalities in the struggle for independence in Kenya as a short memoir				

**Pertinent and Contemporary Issues (PCIs):**

- Social Cohesion as learners create portraits of the selected key personalities in the struggle for independence in Kenya as a short memoir.
- Self-Awareness as learners draw a map of Africa and show the year each country attained self- rule

Link to other subjects

- English, Kiswahili and Kenyan Sign Language as learners brainstorm in groups on the African responses to the establishment of colonial rule · Computer Science as learners use digital resources to research on the colonial systems of administration in Africa
- Visual Arts as learners draw a map of Africa and show the year each country attained self- rule

Assessment Rubric

Indicators	Exceeds Expectation	Meets Expectation	Approaches Expectation	Below Expectation
Ability to analyze responses to the establishment of colonial rule in Africa	Critically analyses responses to the establishment of colonial rule in Africa	Analyses responses to the establishment of colonial rule in Africa	Analyses some of the responses to the establishment of colonial rule in Africa	With assistance analyses responses to the establishment of colonial rule in Africa
Ability to examine the colonial systems of administration in Africa	Critically examines the colonial systems of administration in Africa	Examines the colonial systems of administration in Africa	Partially examines the colonial systems of administration in Africa	With guidance examining the colonial systems of administration in Africa

Ability to explore the role played by key personalities in the struggle for independence in Kenya	With examples, explores the role played by key personalities in the struggle for independence in Kenya	Explores the role played by key personalities in the struggle for independence in Kenya	Partly explores the role played by key personalities in the struggle for independence in Kenya	With support explores the role played by key personalities in the struggle for independence in Kenya
Ability to illustrate the wave of independence in Africa using a map	Artistically illustrates the wave of independence in Africa using a map	Illustrates the wave of independence in Africa using a map	Partially illustrates the wave of independence in Africa using a map	With assistance illustrating the wave of independence in Africa using a map

Strand	Sub-Strand	Specific Learning Outcomes	Suggested Learning Experiences	Key Inquiry Questions
4.0 Political Development and Governance	4.2 The Constitution of Kenya (3 Lessons)	By the end of the sub-strand, the learner should be able to: a) explore the components of the Constitution of Kenya, b) illustrate the roles of the three arms of government in reference to the relevant chapters in the Constitution, c) examine the guiding principles of leadership and integrity in the Constitution of Kenya, d) apply constitutional principles of leadership and integrity in daily interactions with each other, e) exhibit good leadership intended in chapter six of the Constitution of Kenya, f) develop desire to promote obedience to the Constitution.	Learners are guided to: • Discuss the components of the Constitution of Kenya • Create manila paper charts showing the three arms of Government, their roles and • Interrelationships and display in the classroom and school notice boards • Brainstorm in groups on the guiding principles of • Leadership and integrity in the Constitution of Kenya • Debate on whether or not leaders in Kenya adhere to their constitutional responsibilities	1. Why do we need a constitution? 2. How does integrity matter in national leadership?

**Core competences to be developed:**

- Communication and Collaboration as learners brainstorm in groups on the guiding principles of leadership and integrity in the Constitution of Kenya
- Learning to Learn as learners debate on whether or not leaders in Kenya adhere to their constitutional responsibilities
- Creativity and Imagination as learners create manila paper charts showing the three arms of government, their roles and interrelationships and display in the classroom and school notice boards
- Citizenship as learners“ debate on whether or not leaders in Kenya adhere to their constitutional responsibilities.

Values:

- Integrity as learners put into practice and apply constitutional principles of leadership and integrity in daily interactions with each other
- Respect as learners create charts using manila paper showing the three arms of government, their roles and interrelationships and display in the classroom and school notice boards.
- Social Justice as learners debate on whether or not leaders in Kenya adhere to their Constitutional responsibilities
- Responsibility as learners work in groups, and conduct research in the community on adherence of local leaders to the principles of leadership and integrity found in the Constitution

Link to other subjects:

- Kenyan Sign Language, English and Kiswahili as learners debate on whether or not leaders in Kenya adhere to their Constitutional responsibilities
- Visual Arts as learners create manila paper charts showing the three arms of government, their roles and interrelationships and display in the classroom and school notice boards

Assessment Rubric				
Indicators	Exceeds Expectation	Meets Expectation	Approaches Expectation	Below Expectation
Ability to explore the components of the Constitution of Kenya	Comprehensively explores the components of the Constitution of Kenya	Explores the components of the Constitution of Kenya	Partially explores of the components of the Constitution of Kenya	With guidance explores the components of the Constitution of Kenya
Ability to illustrate the roles of the three arms of government in reference to the relevant chapters in the Constitution of Kenya	Artistically illustrates the roles of the three arms of government in reference to the relevant chapters in the Constitution of Kenya	Illustrates the roles of the three arms of government in reference to the relevant chapters in the Constitution of Kenya	Partly illustrates the roles of the three arms of government in reference to the relevant chapters in the Constitution of Kenya	With assistance illustrates the roles of the three arms of government in reference to the relevant chapters in the Constitution of Kenya
Ability to examine the guiding principles of leadership and integrity in the Constitution of Kenya	Critically examines the guiding principles of leadership and integrity in the Constitution of Kenya	Examines the guiding principles of leadership and integrity in the Constitution of Kenya	Fairly examines of the guiding principles of leadership and integrity in the Constitution of Kenya	With support examines the guiding principles of leadership and integrity in the Constitution of Kenya

Strand	Sub-Strand	Specific Learning Outcomes	Suggested Learning Experiences	Key Inquiry Questions
4.0 Political Developments and Governance	4.3 Democratic Principles and Practices (4 Lessons)	By the end of the sub-strand, the learner should be able to: a) identify the principles of b) democracy in society, c) describe the characteristic features of democratic d) governance, e) explore how people exercise democratic principles in society, f) explain the various types of elections in Africa, g) apply democratic principles in the student council and day to day interactions, h) appreciate and promote i) democratic principles in society.	Learners are guided to: • brainstorm in groups on the principles of democracy • use print or digital resources to research on characteristic features of democratic governance and make notes • brainstorm in groups on how people exercise democratic principles in society • view a video clip on election campaigns, voting or parliamentary debates write a report and share • discuss on the types of elections in Africa and share • develop simple guidelines on how democratic principles can be enshrined in Student Councils and in day today interactions • create posters containing democratic principles and	Why is democracy the most preferred form of governance?

			display	
Core Competencies to be developed: • Citizenship as learners brainstorm on how people exercise democratic principles in the society and debate on how democratic principles are or should be enshrined in Student Councils and in day today interactions • Communication and Collaboration as learners brainstorm in groups on the principles of democracy • Learning to Learn as learners view a video clip on elections campaigns, voting or parliamentary debates and writing and sharing a report · Digital Literacy as learners use digital resources to research on characteristic features of democratic governance • Critical Thinking and Problem Solving as learners discuss how democratic principles are or should be enshrined in Student Councils.				
Values: • Patriotism as learners discuss how democratic principles are or should be enshrined in Student Councils • Social Justice as learners discuss on the types of elections in Africa and share • Unity as learners brainstorm on how people exercise democratic principles in the society • Peace as learners debate on how democratic principles are or should be enshrined in Student Councils and in day today interactions • Responsibility as learners debate on how democratic principles are or should be enshrined in Student Councils and in day today interactions • Integrity as learners develop simple guidelines on how democratic principles can be enshrined in Student Councils and in day today interactions				

**Pertinent and Contemporary Issues (PCIs):**

- Social Cohesion as learners discuss on the types of elections in Africa and share
- Self-Awareness as learners create posters containing democratic principles and display
- Good governance as learners develop simple guidelines on how democratic principles can be enshrined in Student Councils and in day today interactions

Link to other subjects:

- English, Kiswahili and Kenyan Sign Language as learners brainstorm in groups on how people exercise democratic principles in society
- Visual Arts as learners create posters containing democratic principles and display
- Computer Science as learners use digital resources to research on the characteristic features of democratic governance

Assessment Rubric

Indicators	Exceeds Expectation	Meets Expectation	Approaches Expectation	Below Expectation
Ability to identify the principles of democracy in society	With examples, identifies the principles of democracy in society	Identifies the principles of democracy in society	Partially identifies the principles of democracy in society	With support identifies the principles of democracy in society

Ability to describe the characteristic features of democratic governance	With examples, describes characteristic features of democratic governance	Describes characteristic features of democratic governance	Describes some characteristic features of democratic governance	With guidance describes characteristic features of democratic governance
Ability to explore how people exercise democratic principles in society	With illustrations, explores how people exercise democratic principles in society	Explores how people exercise democratic principles in society	Partly explores how people exercise democratic principles in Society	With guidance explores how people exercise democratic principles in society
Ability to explain the various types of elections in Africa	With examples, explains the various types of elections in Africa	Explains the various types of elections in Africa	Explains some types of elections in Africa	With assistance explains the various types of elections in Africa

COMMUNITY SERVICE LEARNING PROJECT

Introduction

CSL in Grade 8 builds on the experiences in Grade 7. Learners will be expected to carry out only one CSL project with Grade 8 focusing on making preparations to undertake the CSL project. The preparations will entail the following steps: identifying a community problem through research, planning and coming up with solutions to solve the identified problem. The preparations will be carried out in groups. Learners will build on CSL knowledge, skills and attitudes acquired during Life Skills Education as well as other subjects.

CSL Skills to be covered:

- i) **Leadership:** Learners develop leadership skills as they undertake various roles during preparation.
- ii) **Financial Literacy and Entrepreneurship Skills:** Learners will gain skills on wise spending, saving and investing for sustained economic growth. They could consider ways of generating income as they undertake the CSL project through innovation ways. Moreover, they could identify business ideas and opportunities as well as resources to meet the needs of the community.
- iii) **Research:** Learners will be expected to identify a problem or pertinent issue in the community and indicate how the problem will be solved. They will also acquire skills on how to report their findings.
- iv) **Communication:** Learners indicate reporting mechanisms to be used during the actual project e.g., how they intend to communicate with members of the community, either online or offline.
- v) **Citizenship:** As learners engage in the CSL activities for this Grade, they will be vested with the rights, privileges and duties of a citizen, hence giving them a sense of belonging and attachment to the nation. They will also be empowered to engage and assume active roles in shaping a more peaceful, tolerant and inclusive society.
- vi) **Life Skills Education:** Learners will be equipped with life skills including decision making, assertiveness, effective communication, problem solving and stress management. This will enable them to manage interpersonal relationships, develop leadership skills as well as discover and grow their talents.
- vii) **Community Development:** Learners will be empowered with skills necessary to effect relevant change including building stronger and more resilient communities.

Suggested PCIs	Specific Learning Outcomes	Suggested Learning Experiences	Key Inquiry Questions
• Environmental degradation • Life style diseases • Communicable and non-communicable diseases • Poverty • Violence in community · Food security issues · Conflicts in the community Note: The suggested PCIs are only examples. Teachers should allow learners to identify PCIs as per their context and reality.	By the end of the CSL project, the learner should be able to: a) identify a problem in the community through research, b) plan to solve the identified problem in the community, c) design solutions to the identified problem, d) appreciate the need to belong to a community.	The learner is guided to: • brainstorm on pertinent and contemporary issues in their community that need attention in groups • choose a PCI that needs immediate attention and explain why in groups • carry out research using digital devices print media/interactions with members of the community/resource persons in identifying a community problem to address in groups • discuss possible solutions to the identified issue in groups · propose the most appropriate solution to the problem in groups · discuss ways and instruments they can use to collect data on the problem (questionnaires, interviews, observation schedule, etc) • develop instruments for data collection • identify resources needed for the CSL project (human, technical, financial) • discuss when the project will begin and end • prepare a programme/timetable of the entire project execution · assign roles to be carried	1. How does one determine community needs? 2. Why is it necessary to make adequate preparations before embarking on a project?

		by all group members • reflect on how the project preparation enhanced learning.	
Key Component of CSL developed a) Identification of a problem in the community through research b) planning to solve the identified problem c) designing solutions to the identified problem			
Core competencies to be developed • Communication and collaboration: Learners will make the preparations in groups and conduct discussions on best ways of carrying out the project. · Self efficacy: Learners develop the skills of self awareness and leadership as they undertake the CSL project • Creativity and Imagination: Learners will come up with creative ways of solving the identified community problem • Critical Thinking and Problem Solving: Learners will demonstrate autonomy in identifying a community need, exploring plausible solutions and making necessary preparations to address the problem. • Digital Literacy: Learners can use technology when as they research on a community problem that they can address. • Learning to Learn: Learners gain new knowledge and skills as they identify a community problem to be addressed and make preparations to carry out the project. • Citizenship: This is enhanced as learners choose a PCI that needs immediate attention in the community.			

- **Critical Thinking and Problem Solving:** Learners will demonstrate autonomy in identifying a community need, exploring plausible solutions and making necessary preparations to address the problem.
- **Digital Literacy:** Learners can use technology when as they research on a community problem that they can address.
- **Learning to Learn:** Learners gain new knowledge and skills as they identify a community problem to be addressed and make preparations to carry out the project.
- **Citizenship:** This is enhanced as learners choose a PCI that needs immediate attention in the community.

Pertinent and contemporary Issues

- Social cohesion as learners discuss possible solutions to the identified issue.
- Critical thinking as learners discuss possible solutions to the identified issue.

Values

- Integrity as learners carry out research using digital devices and print media as they identify a community problem to address.
- Respect as learners brainstorm on pertinent and contemporary issues in their community that need attention

Assessment Rubric

Indicator	Exceeds Expectation	Meets Expectation	Approaches Expectation	Below Expectation
Ability to identify a problem in the community through research	Critically identifies a problem in the community through research	Identifies a problem in the community through research	Identifies a problem in the community, employs some aspects of research	With support to identifies a problem in the Community
Ability to plan to solve the identified problem	Comprehensively plans to solve the identified problem	Plans to solve the identified problem	Plans to solve the identified problem, leaves out some details	Plans to solve the identified problem but leaves out many details
Ability to design solutions to the identified problem	Demonstrates a nuanced ability to design solutions to the identified problem	Designs solutions to the identified problem	Demonstrates a shaky ability to design solutions to the identified problem	With guidance designs solutions to the identified problem

APPENDIX 1: SUGGESTED ASSESSMENT METHODS, SUGGESTED LEARNING RESOURCES AND NON FORMAL ACTIVITIES

Strand	Sub Strand	Suggested Assessment methods	Suggested Learning Resources	Non formal activities
1.0 Social Studies	1.1 Map Reading and Interpretation	a) Oral Questions b) Teacher made tests c) Observation d) Portfolio e) Anecdotal Records f) Checklist	• Approved textbooks and other printed resources • Photographs, pictures • Vetted digital resources • Library • TV/video/films/slides/Internet sources • Display boards	• Develop class and rules that discourage gender stereotypes in clubs. • Hold peer led symposia on careers and entrepreneurial opportunities in Social Studies. • Participate in talks by resource persons about prevention of gender stereotypes associated with careers. • Participate in mentorship and job shadowing sessions on Social Studies careers and entrepreneurial opportunities in Social Studies. • Participate in sensitization

				sessions on career choices during career education weeks in schools • develop simple guidelines on expecting gender identity during clubs and societies meetings • develop communication messages and have talking walls with slogans on gender equity and careers • Initiate and develop class and club rules that discourage gender stereotypes in career choices.
--	--	--	--	---

1.0 Natural and Built Environments in Africa	1.1 Maps and Map work	a) Oral Questions b) Teacher made tests c) Observation d) Portfolio e) Anecdotal Records f) Checklist	• Local and extended environment • Realia • Maps/Globe • Photographs, pictures and paintings • Vetted digital resources, educational computer games • Approved textbooks and other printed resources • Library • TV/video/films/slides/ Internet sources • Display boards	• Drawing a sketch map of the school compound
---	------------------------------	---	---	---

	1.2 Weather and Climate	a) Oral Questions b) Teacher made tests c) Observation d) Portfolio e) Project Work	• Local and extended environment • Realia • Maps/globe • Photographs, pictures and paintings • Internet sources • Vetted digital resources, educational computer games • Approved textbooks and other printed resources	• Making a model of the internal structure of the earth
	1.3 Vegetation in Africa	a) Oral Questions b) Teacher made tests c) Observation d) Project Work e) Portfolio f) Anecdotal records g) Checklists	• Local and extended environment • Realia • Maps • Photographs, pictures and paintings • Vetted digital resources, educational computer games • Approved textbooks and other printed resources • TV/video/films/slides/ Internet source	• Working in groups to construct a weather instrument of their choice using the available local materials and display in class.

			• Display boards	
2.0 People And Population	2.1 Scientific Theory about Human Origin	a) Oral questions b) Written tests c) Project work d) Observation	• Resource persons • Maps • Digital resources • Charts, marker pens • Approved text books and other printed resources • Internet • Library resources • Museums • Artefacts	• Composing and singing songs about human origin • Creating posters or communication messages or videos on human origin and share with the school community.
	2.2 Early Civilization	a) Oral questions b) Observations c) Written tests	• Digital resources • Map of Africa • Marker pens • Manilla papers • Stickers/Flash cards • Internet resources • Approved text books and other printed resources	• Singing a song on the importance of cultural diversity in Africa. • Drawing and displaying charts on migration routes.

	2.3 Human Diversity	a) Oral questions b) Observations c) c) Written tests	• Digital resources • Approved text books and other printed resources • Museums • Artefacts • Resource person	• Reciting poems on importance of social organisation of the (Okiek, Shona and Asante) • Modelling aspects of social organization of selected • communities in Africa upto 1900 (Okiek, Shona and Asante)
