

PERTINENT AND CONTEMPORARY ISSUES (PCIs)

A Presentation by:
KICD

Date: 02/12/2020

Introducing PCIs

- What are PCIs?
- *Open Discussions!!!!*

- Pertinent – having a clear decisive relevance to the matter at hand
- Contemporary – marked by characteristics of the present period; thus being, MORDEN, CURRENT

PCIs Explained

- Children are faced with a myriad of challenges and issues owing to the social-cultural and economic dynamics in the society.
- The Competence-Based-Curriculum calls them Pertinent and Contemporary Issues
- Previously being referred to as emerging issues and/or Cross-cutting issues.

Cont'd

- Learner-centered education goes beyond the **subject content**.
- It instills appropriate competencies the learner requires in order to effectively address the **PCIs of everyday life; thereby leading a fulfilled life as well as becoming a productive member of the society**

Examples of PCIs

- **Citizenship education** – includes Peace education, Integrity, Ethnic and racial relations, social cohesion, Patriotism and good governance, child's rights, child care and protection
- **Health education** – includes HIV and AIDS, Alcohol and Substance use, Life style diseases, personal hygiene, Communicable and chronic diseases e.g. COVID-19
- **Life Skills & Human sexuality** – includes Life skills education and human sexuality

Examples of PCIs – Cont'd

- **Education for Sustainable Development (ESD)** – includes Environmental Education, DRR, Safety and security Education (small arms, human trafficking, Poverty eradication, Countering terrorism, radicalization,) Gender and Animal Welfare Education.

Mainstreaming PCIs

- PCIs have been mainstreamed in the three dimensions of the curriculum, that is:
- The Formal;
- The Non-Formal; and
- The In-formal.

Note: The mainstreaming of PCIs has to be deliberate and based on a conscious effort. PCIs become apart of the content being delivered

Formal Dimension

- A relevant and suitable sub strand or sub theme in a learning area/subject is identified where PCIs can appropriately be **incorporated and taught alongside the subject matter**.

Example:

Learning area: Social Studies (Grade 4)

Strand: Natural and Built Environment

Sub strand: Physical features in the County

Learning Outcome: (c) adopt responsible behaviour to conserve the physical features.

PCIs: Promotion of environmental conservation as learners appreciate the natural and built environment in the County.

Non-formal

- These are organized, structured and systematic learning activities (NFPs) that take place in school. They support acquisition of knowledge, values and skills learnt in class.

Informal

- This refers to the Knowledge, Attitudes and Skills or behaviour acquired by learners from the social interaction with members of the school community. Exemplary behaviours and appropriate values can easily be emulated.

At the end.....

- *PCIs make learning relevant*
- *Our commitments to Lesson delivery*

**THE
END**
