Date: _____

Instructions to the Computer Science Teacher

- 1. Make copies of this document for each learner*
- 2. Maximum score for each item has been provided, award scores as guided in the indicator column.*
- 3. Provide comments on each learner's score for each item in the teacher's comments column.*
- 4. Compute learner's total and enter in the total section.*

This paper consists of 12 printed pages.

S/No	Criteria	Indicators	Maximum Score	Learner's Score	Teacher's Comments
1. (a)	Categorising of physical parts of a computer	a) Categorises all physical parts of a computer into input devices and output devices. (2) b) Categorises physical parts of a computer into input devices or output devices (1) c) Does not categorise physical parts of a computer into input devices or even output devices (0)	2		
(b)	Using labelling materials to label the physical parts of a computer in each category	a) Labels two or more physical parts of a computer in each category. (2) b) Labels one physical part of a computer. (1) c) Does not label any physical part of a computer. (0)	2		
2.	Connecting physical parts of a computer	a) Connects three or more physical parts of a computer. (3) b) Connects two physical parts of a computer. (2) c) Connect only one physical part of a computer. (1) d) Does not connect any physical part of a computer. (0)	3		
	Adhering to safety precautions and practices while connecting physical parts of a computer	a) Adheres to two or more safety precautions while connecting physical parts of a computer. (1) b) Adheres to less than two precautions while connecting physical parts of a computer. (0)	1		
	Recording a video clip of the connection process	a) Records a video clip of the connection process. (1) b) Does not record a video clip of the connection process. (0)	1		
	Saving the video clip as 'my connection'	c) Saves the video clip as 'my connection'. (1) d) Does not save the video clip as 'my connection' or does not save the video clip. (0)	1		
	Powering on the computer	a) Power on the computer. (1) b) Does not power on the computer. (0)	1		
	Following the correct procedure to start up a computer	a) Follows the correct procedure to start up a computer. (1) b) Does not follow the correct	1		

Computer Science Scoring Guide/ Scoring Rubric/**Instructions****School Based Assessment****Grade 7**

S/No	Criteria	Indicators	Maximum Score	Learner's Score	Teacher's Comments
		procedure to start up a computer. (0)			
3. (a)	Launching a word processing application	a) Launches a word processing application. b) Does not launch a word processing application. (0)	1		
	Typing the two categories in a word processing application	a) Types the two categories in a word processing application. (2) b) Types only one category in a word processing application. (1) c) Does not type any category in word processing application. (0)	2		
	Typing the physical parts of a computer in each category	a) Types the physical parts of a computer in the two categories. (2) b) Types the physical parts of a computer in only one category. (1) c) Does not type the physical parts of a computer in any category. (0)	2		
	Saving the document in the specified name	a) Saves the document in the name specified. (2) b) Saves the document in a different name. (1) c) Does not save the document. (0)	2		
(b)	Launching a drawing/paint application	a) Launches the paint application. (1) b) Does not launch the paint application. (0)	1		
	Drawing a graphical representation of functional relationship between physical parts of a computer	a) Draws a graphical representation of functional relationship between three or more physical parts of a computer. (3) b) Draws a graphical representation of functional relationship between two physical parts of a computer. (2) c) Draws a graphical representation of one physical part of a computer.	3		

S/No	Criteria	Indicators	Maximum Score	Learner's Score	Teacher's Comments
		(1) d) Does not draw any graphical representation of the physical parts of a computer or functional relationship between the physical parts of a computer. (0)			
	Show the relationship between the physical parts of a computer	a) Shows logical flow of instructions/controls and data between the physical parts of a computer. (2) b) Show the flow of instructions/controls and data between the physical parts of a computer that is not logical. (1) c) Does not show the flow of data/instructions/controls between physical parts of a computer. (0)	2		
	Saving the document in the specified name	a) Saves the document in the name specified. (2) b) Save the document in a different name. (1) c) Does not save the document. (0)	2		
(c)	Creating a folder and renaming it	a) Creates a folder and rename it. (1) b) Does not create or rename a folder. (0)	1		
	Copying the two documents into the created folder	a) Copies one or both documents into the created folder. (1) b) Does not copy any document into the created folder. (0)	1		
(d)	Shutting down the computer	a) Shuts down the computer following the right procedure. (1) b) Does not shut down the computer or shuts down the computer procedurally. (0)	1		
		Total Score	30

THE KENYA NATIONAL EXAMINATIONS COUNCIL

SCHOOL BASED ASSESSMENT

COMPUTER SCIENCE

Grade 7

Year 2023

INSTRUCTIONS TO THE SCHOOL

- 1. Each school offering Computer Science as a subject should produce two copies of the instructions. One copy of the instructions for the headteacher and the other copy for the teacher of Computer Science.*
- 2. The headteacher and the teacher of Computer Science should each read the instructions carefully. Relevant information should then be conveyed to the learners as soon as possible to enable them carry out the project in good time.*
- 3. There is only one project. It is necessary for the teacher of Computer Science to discuss the requirements of the project with the learners and the headteacher so as to understand what is required.*

This advance instruction has 12 printed page.

Turn Over

INSTRUCTIONS TO THE HEADTEACHER

1. The school presenting learners for School Based Assessment on Computer Science is required to provide each group of learners with the following:

(a) Regular learners

- (i) A disassembled desktop computer system comprising of various peripheral devices.
- (ii) Sufficient work areas to enable the learners carry out the project comfortably.
- (iii) Materials for labelling the physical parts of a computer. The materials can be made from locally available resources.

(b) Learners with physical impairment

- (i) A disassembled desktop computer system comprising of various peripheral devices.
- (ii) Sufficient work areas to enable the learners carry out the project comfortably.
- (iii) Materials for labelling the physical parts of a computer. The materials can be made from locally available resources and technological interventions.
- (iv) Assistive devices where applicable such as:
 - Universal communication board, text to speech software or lip-readers for learners with speech difficulties
 - Universal cuffs, wrist/arm braces and arm holders for learners with manipulation difficulties. The learners can also use alternative functional body parts.
 - Adjustable work areas to accommodate learners with varied heights.

(c) Learners with visual impairment

- (i) A disassembled desktop computer system comprising of various peripheral devices.
- (ii) Sufficient work areas to enable the learners carry out the project comfortably.
- (iii) Materials for labelling the physical parts of a computer. The materials can be made from locally available resources.
- (iv) Instructions in large print for those with low visual challenges.
- (v) Assistive devices and technological interventions where applicable such as:
 - Magnifying lenses, screen readers and magnifiers for learners with low vision.
 - Braille keyboards for blind learners.

(d) Learners with hearing impairment

- (i) A disassembled desktop computer system comprising of various peripheral devices.
- (ii) Sufficient work areas to enable the learners carry out the project comfortably.
- (iii) Materials for labelling the physical parts of a computer. The materials can be made from locally available resources.
- (iv) Assistive devices such as hearing aids to be allowed for the Hard of Hearing.

2. Facilitate learners with any form of video recording devices.
3. Provide means of electronic storage to the teacher of Computer Science to store learners' activities.
4. The project should be carried out by learners in one week in the month of July 2023.
5. The scoring guide for the project will be uploaded on the KNEC portal together with other relevant documents. Each school should download all the relevant documents from the portal. The supervisor should make enough copies of the scoring guide and the learner's declaration form for all the learners. The supervisor should accurately assess the learners' projects using the scoring

Computer Science Scoring Guide/ Scoring Rubric/

Instructions

School Based Assessment

Grade 7

- guide provided.
6. The total score of each group of learners at the end of the project shall be transferred from the scoring guide to individual learner's assessment sheet. The overall score for each learner will be transferred to the manual marksheet. The list in the manual marksheet shall be entered in an ascending order of assessment numbers.
 7. It is the responsibility of the headteacher to ensure that the learners projects are marked, and the scores uploaded in the KNEC CBA portal at the stipulated time.

This is the last printed page.

THE KENYA NATIONAL EXAMINATIONS COUNCIL

JUNIOR SECONDARY SCHOOL SCHOOL BASED ASSESSMENT COMPUTER SCIENCE GRADE 7 YEAR : 2023

INSTRUCTIONS TO THE TEACHER OF COMPUTER SCIENCE

- (e) *Organise learners into groups of not more than seven. Each group to have a team leader.*
- (f) *For a learner with special needs, provide appropriate assistive devices and technological interventions needed for the project and the following assistance:*

Visual Impairment (VI)

- i. *Pair learners with blindness with sighted or low vision learners to guide them through the project activities.*
- ii. *Regulate computer screen resolution for learners with photophobia.*

Physical Impairment (PI)

- i. *Assist learners on positioning devices to be appropriately positioned.*

Hearing Impairment (HI)

- i. *Assist learners with Hearing Impairment in the interpretation of instructions.*
- (g) *Avail a disassembled computer system to each group of learners in their identified work area.*
- (h) *The teacher should guide the learners while carrying out the task.*
- (i) *The teacher should ensure that learners observe / safety measures and precautions while handling the computer parts.*
- (j) *The teacher will use the scoring guide provided to assess individual or group of learners during*

the cause of the project.

- (k) The teacher to enter the project's marks in the score sheet provided.*
- (l) All electronic files for the project should be stored by the school.*

This advanced instruction has 12 printed page.
