

SELECTING LEARNING EXPERIENCES

KICD

What are learning experiences?

Learning experiences refer to the **activities or tasks** that the learner should carry out in order to develop desired **knowledge, skills, values** and **attitudes**

Learning experiences focus on developing the learner's **cognitive, physical and emotional domains.**

How can the teacher select learning experiences?

- Selection of learning experiences should be based on **specific learning outcomes**. The learner should achieve the intended specific learning outcomes after active engagement in the selected learning experiences.
- **Flexibility**- Other than the **suggested learning experiences** in the designs, the teacher is free come up with other learning experiences according to the unique needs of their learners and the school.
- Learning outcomes are achieved through **learner-centred activities**.

Contd.

The teacher should make appropriate choices when selecting learning experiences for the achievement of given curriculum outcomes by:

Breaking the learning outcomes into teachable units according to ;

- Allocated **number of lessons**
- The **learning outcomes** stated in the sub-strand
- Available **resources** (both materials, tools, equipment & resource persons)
- **Integration of ICTs** as a learning tool is critical to build digital literacy

Contd.

- Innovative approaches to cater for needs of all learners
 - individual/ group activities
- Teaching strategies:
 - cooperative learning
 - peer tutoring
 - team teaching
 - activity based teaching etc.
- The **core competency** to be developed in the lesson
- The **value(s)** to be developed in the lesson

All these strategies help in achieving the targets set for the learners.

Example of Learning Outcomes and Suggested Learning Experiences in Art and Craft Grade 4

Strand	Sub Strand	Learning Outcomes	Suggested Learning Experiences
Picture making	Crayon etching Pictorial composition in crayon etching (2 Lessons)	By the end of the sub strand, the learner should be able to: a) Observe actual or virtual pictorial compositions created using crayon etching technique. b) Create a pictorial composition using crayon etching techniques for self-expression. c) Talk about own and others' crayon etching composition.	Learners are guided to: • Observe actual or virtual pictorial compositions created using crayon etching technique. • Identify and name materials and tools used in crayon etching compositions in groups. • Individually, create pictorial compositions using crayon etching technique. • Display and talk about own and others crayon etching compositions.

Learning experiences that enable the learner to acquire **Digital Literacy** competencies include:

- a) Guided use of the internet
- b) Manipulating ICT devices eg camera, laptop etc.
- c) Watching recommended video clips
- d) Using digital devices to back-up their work

Learning experiences that can enable the learner to acquire **knowledge**

- a) Peer work
- b) Individual work
- c) Field trips

Learning experiences enable the learner to acquire skills

- a) Project work /practical work
- b) Field work
- c) Small group discussions
- d) Case studies

Learning experiences enable the learner to acquire desired **values /attitudes**

- Interaction with others during the learning experiences –so that the learner **can model** the value(s)

Learning Experiences and Methodologies

In the Competency-Based Curriculum, different methods are suggested to facilitate learning. These methods include:

- a) Question and answer
- b) Group discussions
- c) Problem solving
- d) Experiments
- e) Dramatization
- f) Role play
- g) Debates
- h) Reflection
- i) Practical activities
- j) Research
- k) E-Learning

Types Of Learning Experiences

- Formal learning experiences
- Non-formal learning experiences
- Informal learning experiences

Formal learning experiences

- Organized within classroom or other school contexts (e.g. the field, school garden etc.)
- The learning experiences are **dictated by learning outcomes in the curriculum design**
- Below is an example showing the link between the **specific learning outcome** and the **learning experiences**

NOTE: The learning experiences **must** address each one of the stated specific learning outcomes

Non-formal Learning Experiences

- These are critical for the learner to continue applying what s/he has learnt in scenarios outside the classroom.
- This include clubs and societies. The learner is able to apply **knowledge/skills/values and attitudes** they have learnt formally outside the class in club activities eg
 - Speaking skills in debate clubs
 - Drawing/painting/modelling skills in Art club
 - Singing/dancing skills in Music club
 - Performing skills in Drama club

Informal learning experiences

- Entails **general social interactions** at school, home and in the wider community.
- The community plays a key role in shaping the moral nature/compass of the learner
- These experiences offer the learner a forum to **model values**
- How can members of the community help the learner to model values?
 - Being role models in behaviour moderation in the learner
 - Mass media (print & audio-visual) should vet the content available to the youth

In summary....

In CBC, the teacher **should not** take centre stage in the learning process. The role of the teacher is to facilitate learning by giving the learner an opportunity **to take responsibility** for their learning.

Learning experiences enable the learner to:

- a) acquire and apply knowledge and develop skills, values and attitudes
- b) Acquire and apply the intended core competences
- c) Model the core values
- d) self-regulate and evaluate their learning
- e) engage deeply in the learnt concepts
- f) reflect on the learning process
- g) interact with others during the learning process
