

The Kenya National Examinations Council

ASSESSMENT OF CORE COMPETENCIES

Age-based Pathway

SESSION 1: OVERVIEW OF CORE COMPETENCIES

Outcomes

By the end of the session, the participant should be able to:

- a) Define competency as envisaged in learning;
- b) List the core competencies outlined in the BECF;
- c) Explain the role of core competencies in learning.

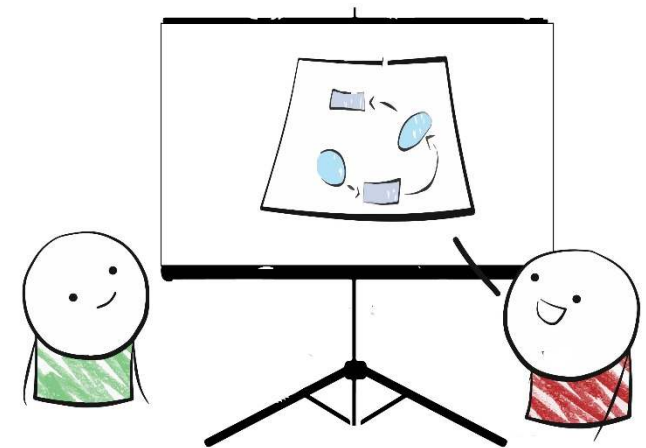

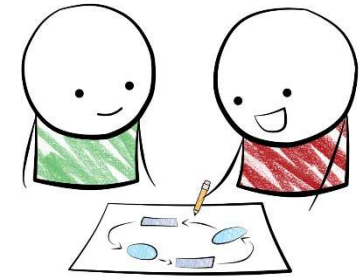

Suggested

Learning

Activities

1. In pairs, discuss the
 - a) meaning of competency.
 - b) benefits of core competencies.
2. Make a presentation to the plenary.

COMPETENCY

What is the meaning of competence

Competency is the ability to apply appropriate knowledge, skills, attitudes and values to successfully perform a task.

CBA therefore, focuses on the assessment of learner's ability to apply knowledge, skills, attitudes and values in real life situations.

Core Competencies in the BECF

1: Communication and Collaboration

A learner who is able to;

Listen

Critique

Ask questions

Show confidence

Pay attention

Speak clearly

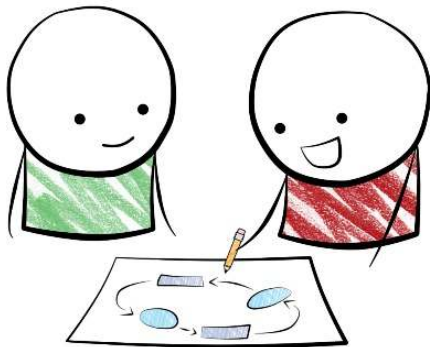

Write clearly

Communication and Collaboration

Suggested learning activities:

1. In pairs, discuss the
 - meaning of communication and collaboration;
 - linkage between communication and collaboration;
 - benefits of communication and collaboration;
 - teacher's role in developing communication and collaboration skills;
 - indicators of communication and collaboration.
2. Develop a task to assess communication and collaboration.

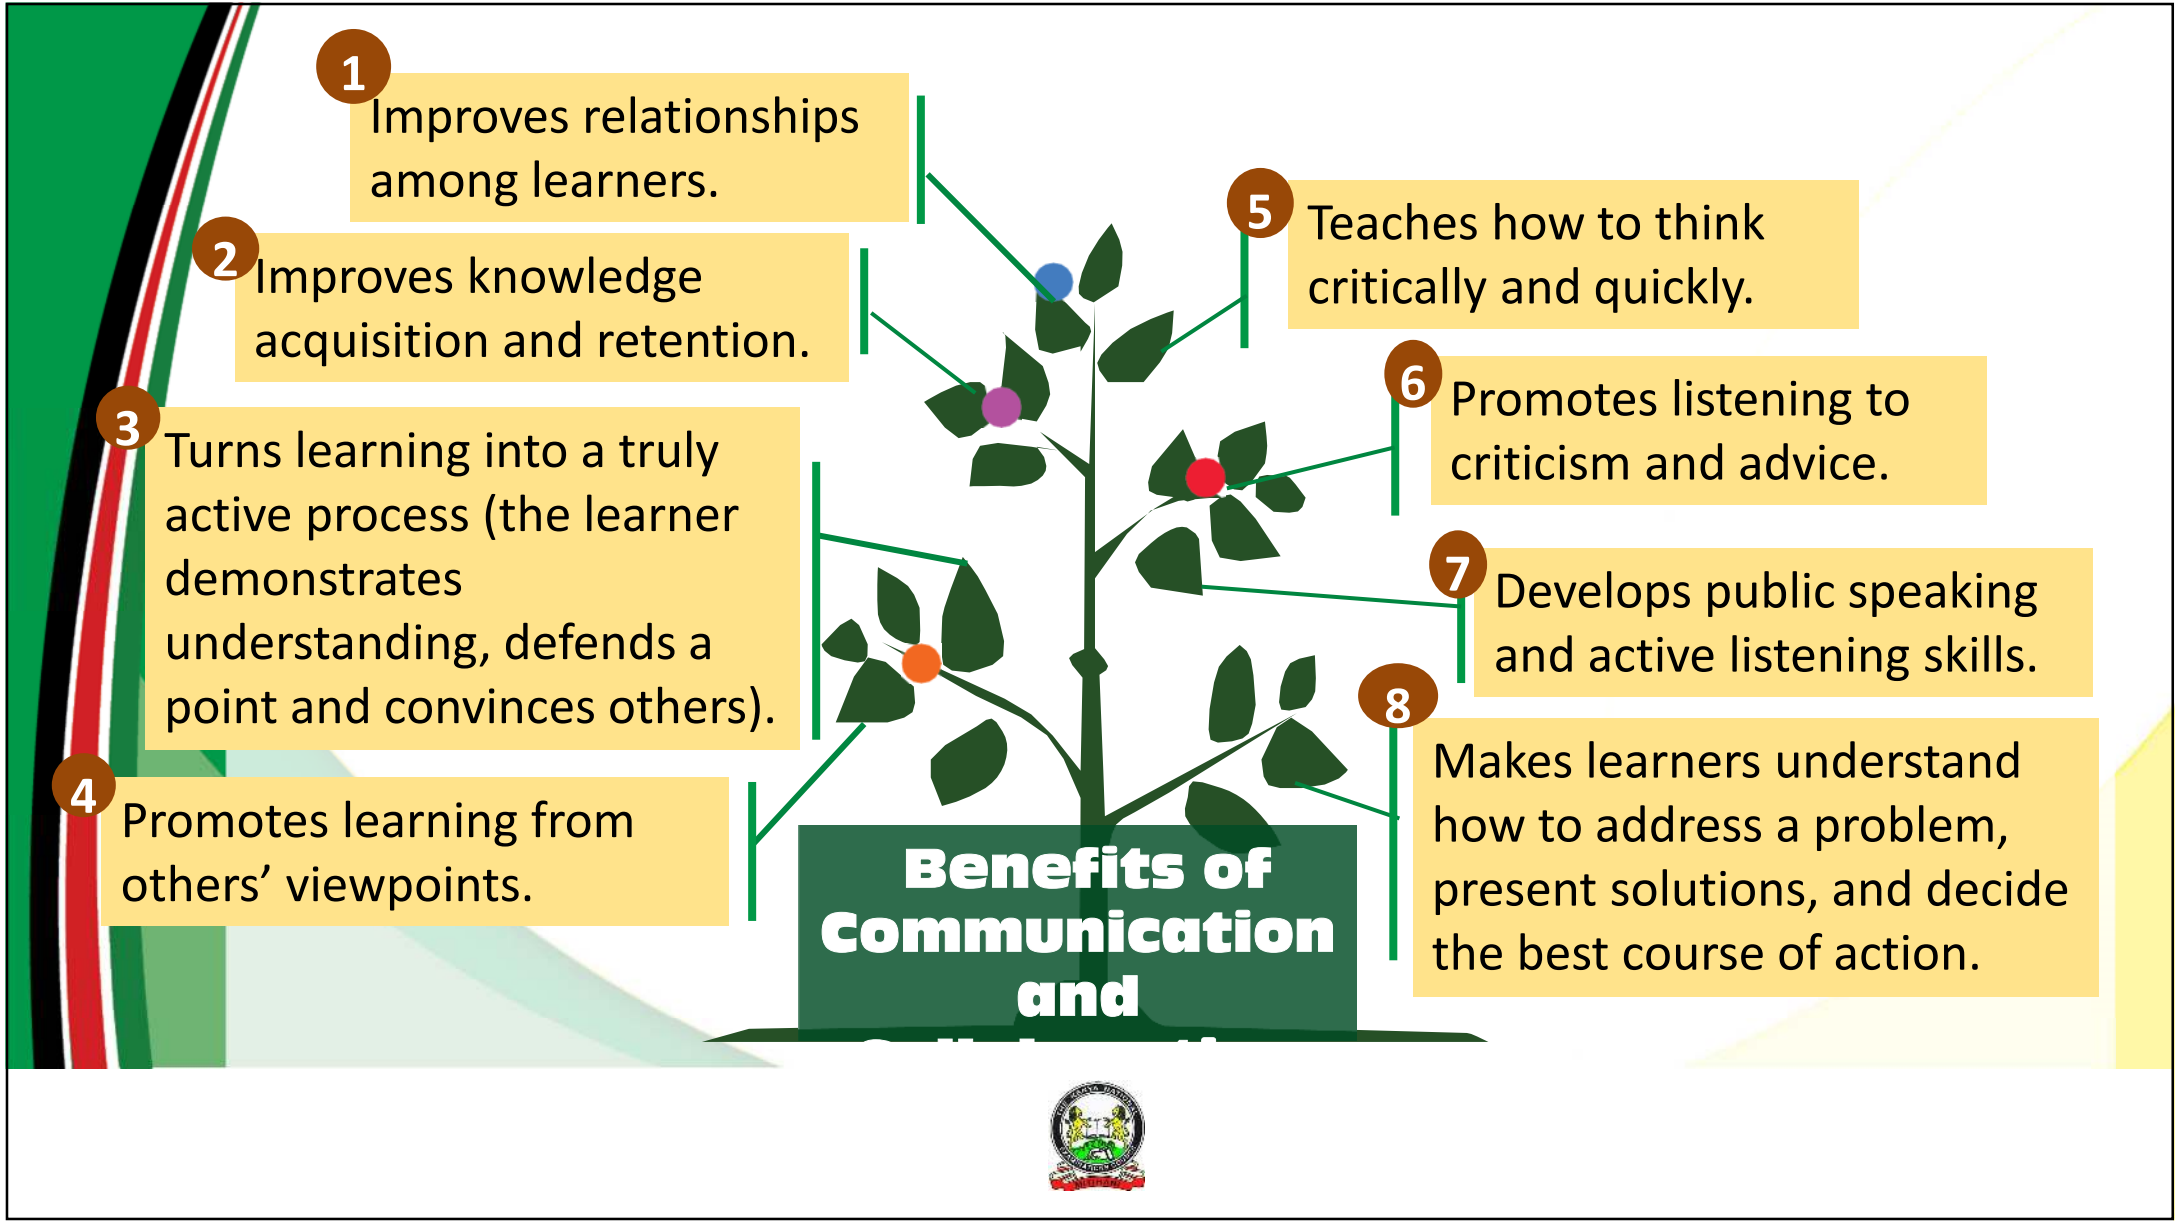

Communication and Collaboration

Communication is the process of transferring information from a sender to a recipient, whether verbally or non-verbally.

Collaboration is the process of two or more people working together to realize shared goals. Collaborative learning is designed to help learners learn from each other.

Benefits of Communication and

1

Improves relationships among learners.

2

Improves knowledge acquisition and retention.

3

Turns learning into a truly active process (the learner demonstrates understanding, defends a point and convinces others).

4

Promotes learning from others' viewpoints.

5

Teaches how to think critically and quickly.

6

Promotes listening to criticism and advice.

7

Develops public speaking and active listening skills.

8

Makes learners understand how to address a problem, present solutions, and decide the best course of action.

Skills of communication

There are four skills of communication:

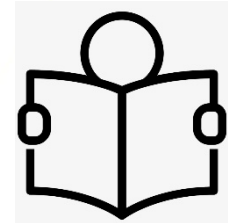

1. Listening

2. Speaking

3. Reading

4. Writing

Pays attention to the person who is speaking.

Asks questions for clarity.

Listening

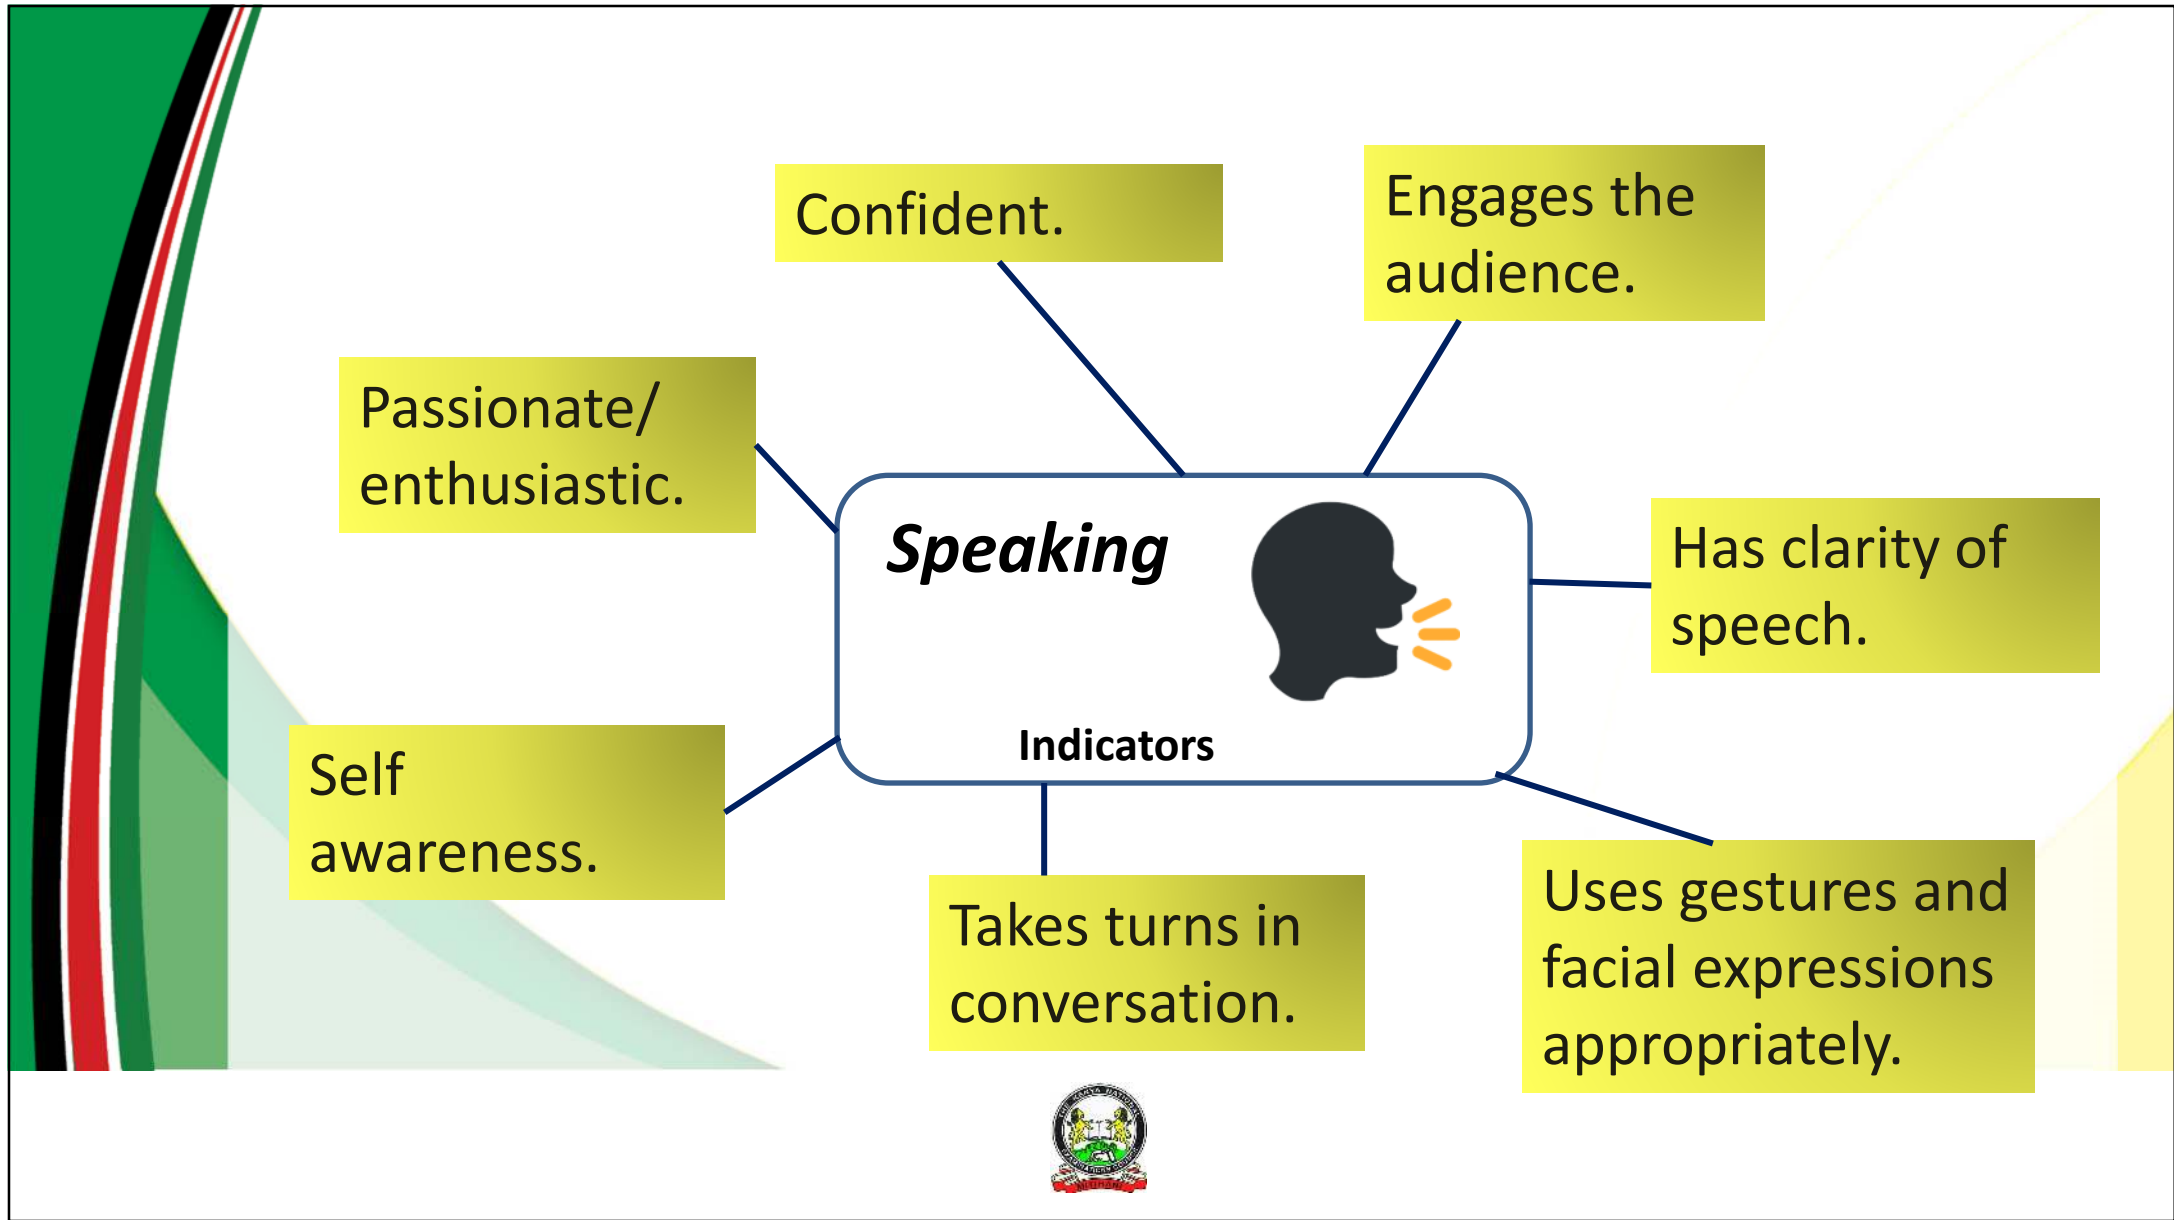

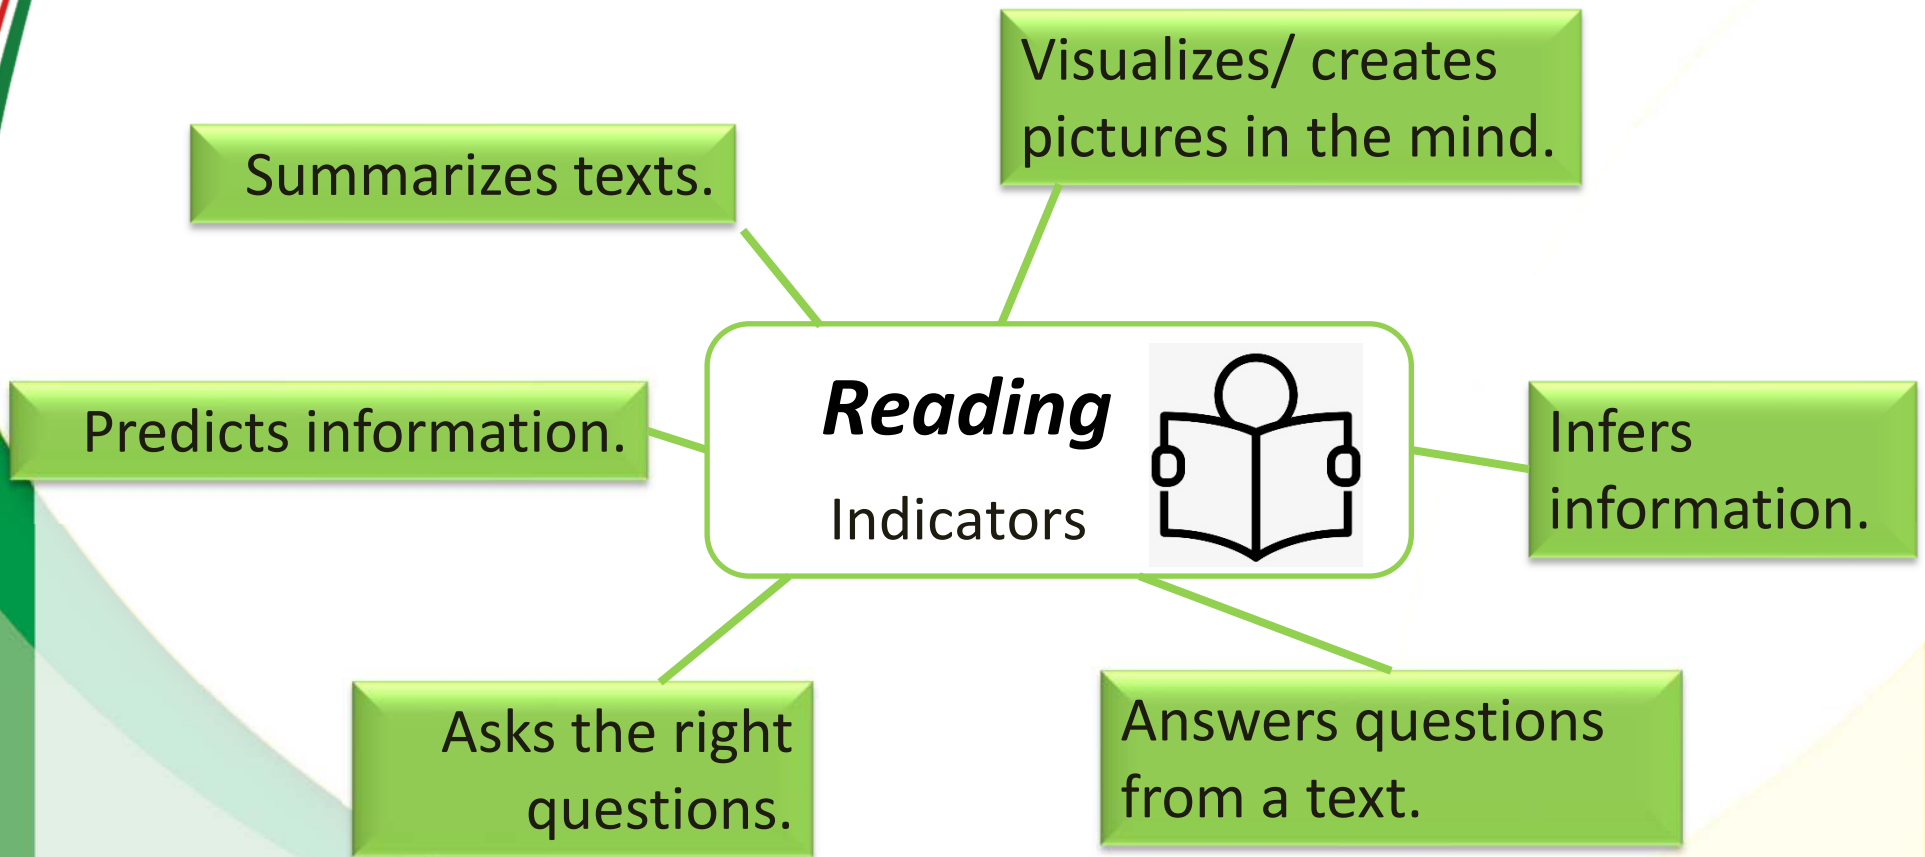

Repeats what is communicated.

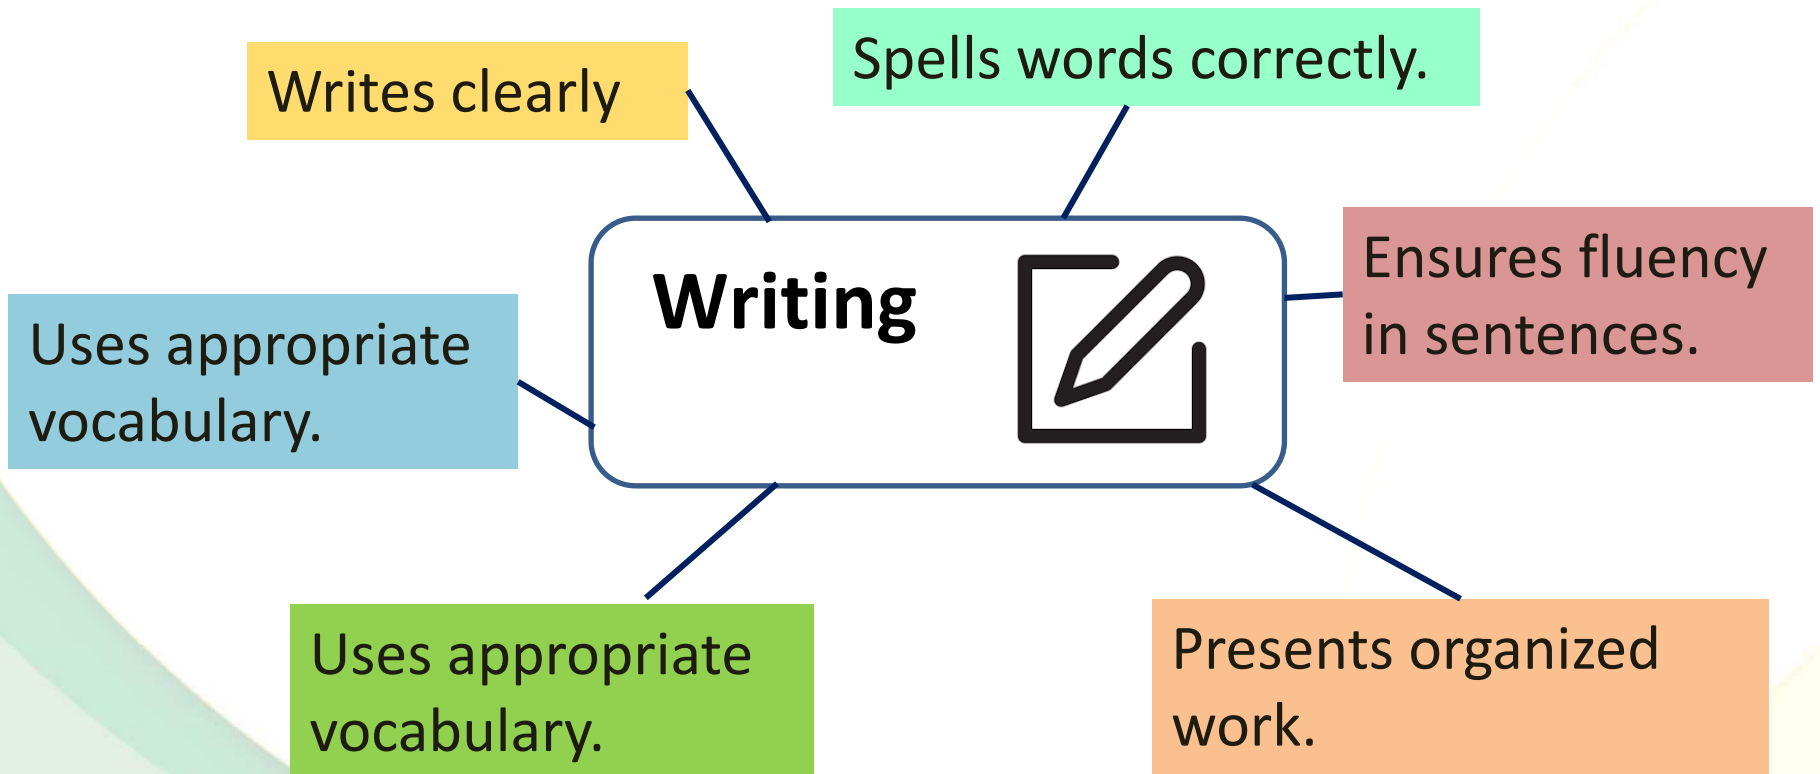

Keeps eye contact/turns to face the direction of the communicator.

Shows interest by nodding or by smiling at appropriate times.

Collaboration

Indicators

Shares information with others.

Appreciates efforts of others.

Listens to others.

Cooperates with others.

Shows respect towards others.

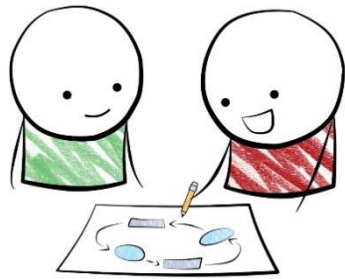

Is self-motivated.

Asks the right questions.

Shows interest in working together with others to achieve a common goal.

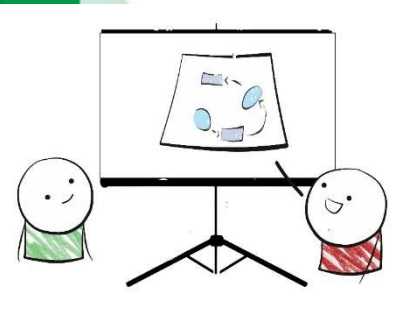

Sample Assessment of communication and collaboration

1. *In your groups, click on the link and discuss the [Sample tool for assessing communication and collaboration skills](#).*

2. Select a learning area of your choice in the curriculum design, identify a suggested learning experience and develop a tool for assessing communication and collaboration.

3. Present in the plenary.

2: Critical Thinking and Problem Solving

A learner who is able to;

Be Creative

Work well
with people

Ask questions

Pay attention

Solve Problems

Come up with
alternative solutions

Generate ideas

SESSION 2: Critical Thinking and Problem Solving

Session Outcomes:

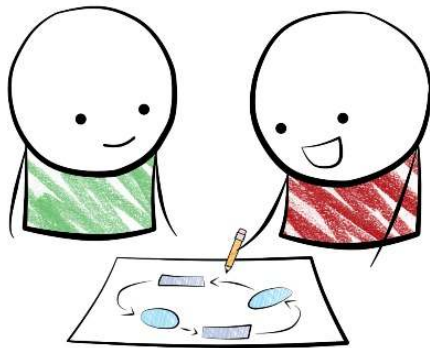

By the end of the session, the participant should be able to:

- ✔ explain the meaning of Critical Thinking and Problem Solving as a competency;
- ✔ explore the benefits of Critical Thinking and Problem Solving in learning;
- ✔ Outline the indicators of critical thinking and problem solving;
- ✔ develop a task to assess Critical Thinking and Problem Solving.

Suggested Learning Activities

In groups

1. explain the meaning of Critical Thinking and Problem Solving;
2. explore the benefits of Critical Thinking and Problem Solving;
3. outline the indicators of Critical Thinking and Problem Solving;
4. develop a task to assess Critical Thinking and Problem Solving.

Critical Thinking and Problem Solving

What is Critical Thinking and Problem Solving

Critical thinking refers to ability to come up with solutions for problems or issues faced in real life situations. This is done by defining the problem, gathering information, sorting, organizing, classifying and analysing materials and data.

Problem-solving is the ability to identify and describe problems, cope with complexities, reason, argue and make sound decisions.

This core competency enables learners to:

look at both
sides of an issue;

work well with
other people;

think of the
fastest method
to reach a goal;

be creative as
they solve
problems.

**Benefits of critical
thinking and problem
solving**

Indicators of critical thinking and problem solving

identifies a problem
or challenge;

tries alternative ways
to solve a problem;

seeks clarification
from the teacher,
peers,
guardians/parents;

accepts alternative
views from other
learners;

shows flexibility and
adapts to different
situations;

reflects and
assesses self.

Assessing critical thinking and problem solving

1. Select a learning area of your choice in the curriculum design, identify a suggested learning experience and develop a tool for assessing critical thinking and problem solving.
2. Present in the plenary.
3. Click the link and discuss [an example of a tool for assessing critical thinking and problem solving](#)

3: IMAGINATION AND CREATIVITY

A learner who ;

Shows Curiosity

Is able to Focus

Improvises

Solves problems

Generate ideas

Makes things

SESSION 3: IMAGINATION AND CREATIVITY

Session outcomes:

By the end of the session, the participant should be able to:

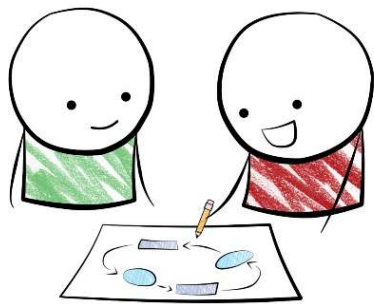

1. explain the meaning of Creativity and Imagination as a competency;
2. explore the benefits of Creativity and Imagination in learning;
3. discuss teacher's role in Creativity and Imagination;
4. outline the indicators of Creativity and Imagination;
5. develop a task to assess Creativity and Imagination.

Suggested learning activities

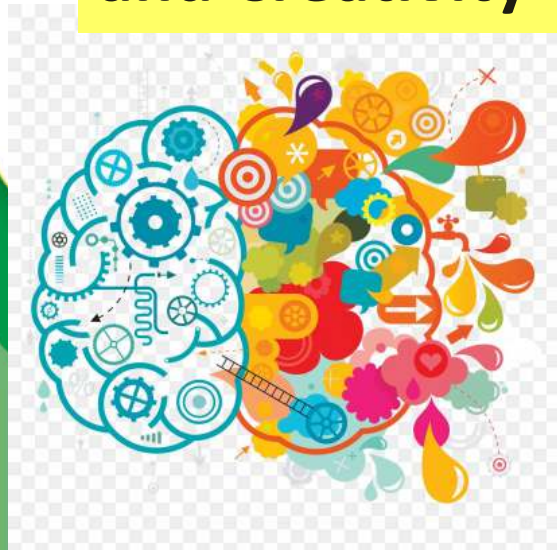

In pairs,

- a) discuss meaning of Creativity and Imagination.
- b) explore the benefits of Creativity and Imagination.
- c) outline indicators of Creativity and Imagination.
- d) develop a task to assess Creativity and Imagination.

Imagination and Creativity

**What is
Imagination
and Creativity**

Imagination is the ability to form mental picture of something that one has not seen or experienced while creativity is the ability to come up with new ways of solving problems or doing things.

1.

makes learners curious.

2.

Improves ability to focus on an issue.

3.

Reinforces problem solving ability.

4.

Promotes independence.

5.

Improves one's self-esteem.

6.

It is a life skill.

**Benefits of
Imagination and
creativity in learning**

Indicators of imagination and creativity

spends time outdoors for discovery;

observes the sky and explains what is seen;

comes up with new ways of doing things;

makes drawings on various surfaces;

develops new skills.

models clay into a variety of objects;

Improvise materials for different functions

Create using locally available materials

Assessing imagination and creativity

1. Select a learning area of your choice in the curriculum design, identify a suggested learning experience and discuss the indicators that exhibit imagination and creativity.

Assessing imagination and creativity

1. Select a learning area of your choice in the curriculum design, identify a suggested learning experience and discuss the indicators that exhibit imagination and creativity.

2. Click the link below:

[Sample tool for assessing imagination and creativity](#)

4: CITIZENSHIP

A learner who;

Promotes
nationalism

Follows rules

Cares for
environment

Participates in
community
Service

Appreciates
culture

SESSION 4: CITIZENSHIP

**What is
Citizenship**

Citizenship is the state of being vested with the rights, privileges, and duties of a citizen. It also implies being a member of a country and behaving in a manner that is expected of you by people living in the same country.

1.

deal with situations of conflict in a rational way;

2.

understand the consequences of their actions, and those of the adults around them;

3.

develop **self-confidence in dealing with** challenges in life;

4.

be conscious of their social and moral duties and responsibilities in the society.

**Benefits of
Imagination and
creativity in learning**

✓ adheres to regulations/respects authority/adults.

✓ is sensitive to environmental conservation.

✓ exhibits love for own country.

✓ Participates in community activities

✓ is familiar with the immediate environment.

Indicators of Citizenship

A learner with the competency of citizenship

✓ accommodates others.

✓ Appreciates diverse cultures.

✓ Identifies symbols of unity.

Assessing Citizenship

1. You are taking learners for a visit to the National Museum of Kenya. In your group,
 - a) discuss the indicators of citizenship that are likely to be exhibited by learners during the visit.
 - b) prepare a tool to assess citizenship during the visit
2. Present in the plenary.
3. Click on the link below

[Sample tool for assessing citizenship](#)

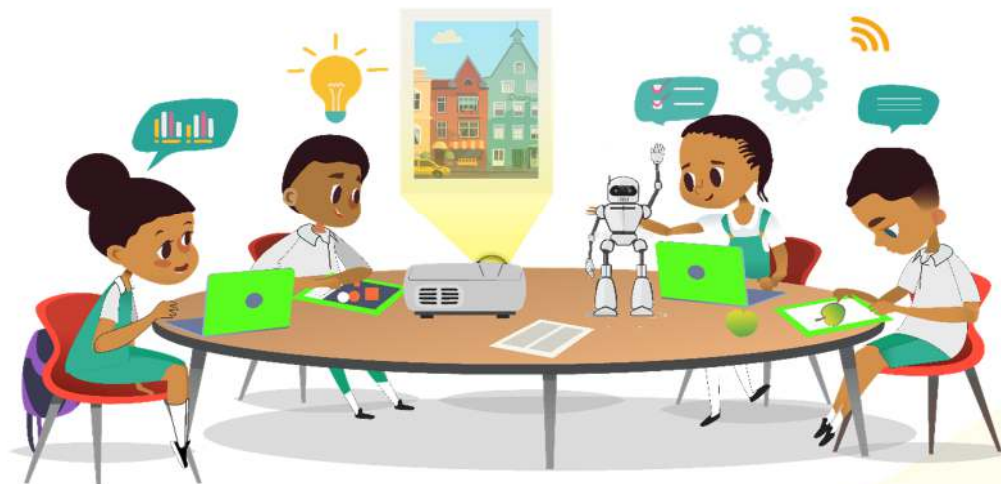

5: Digital Literacy

A learner who;

Uses digital devices

Takes photos

Accesses the internet

SESSION 5: Digital Literacy

Session outcomes

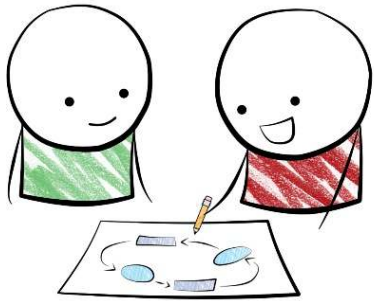

By the end of the session, the participants should be able to:

1. define Digital Literacy as a competency;
2. explain the benefits of Digital Literacy in learning;
3. explain teacher's role in developing Digital Literacy skills;
4. outline the indicators of Digital Literacy;
5. develop a task to assess Digital Literacy.

Suggested Learning Activities

1. In pairs, brainstorm the meaning of Digital Literacy.
2. In pairs, discuss benefits of Digital Literacy.
3. In pairs, discuss teacher's role in developing Digital Literacy skills.
4. In pairs, discuss indicators of Digital Literacy.
5. In groups, develop a task to assess Digital Literacy.

Digital Literacy

What is
Digital
Literacy

Digital literacy can be described as having the knowledge, skills and behaviours which are necessary to effectively and safely use a wide range of digital content and devices. Such devices include mobile phones, smart phones, tablets, laptops and desktops among others.

Indicators of digital literacy

A learner with the competency of digital literacy

✓ operates digital devices;

✓ creates patterns and drawings with digital devices;

✓ takes photographs and records videos;

✓ observes safety when using digital devices.

✓ plays digital games;

✓ communicates and collaborates using digital devices;

✓ uses the internet;

Assessing Digital literacy

1. Click the link below for the [Sample tool for assessing digital literacy](#)
2. Below is a suggested learning experience:
In groups, learners are guided to use digital devices and visual aids to observe and identify parts of the digestive system.
3. Using the suggested learning experience, prepare a tool for assessing digital literacy.

Assessing Digital literacy

3. *Using the suggested learning experience, prepare a tool for assessing digital literacy.*

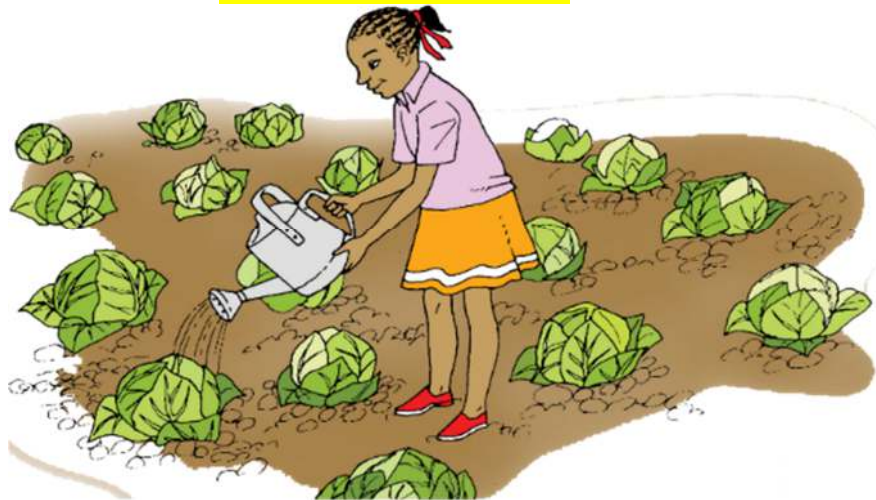

6: LEARNING TO LEARN

A learner who;

Is self
disciplined

Organizes

Is creative

SESSION 6: LEARNING TO LEARN

Session outcomes

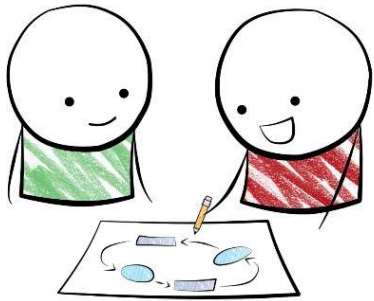

By the end of the session, the participant should be able to:

1. explain the meaning of Learning to Learn as a competency;
2. discuss the benefits of Learning to Learn in the learning process;
3. explain teacher's role in developing Learning to Learn;
4. outline the indicators of Learning to Learn;
5. develop a task to assess Learning to Learn.

Suggested Learning Activities

1. In pairs, discuss the meaning of Learning to Learn.
2. In pairs, discuss the benefits of Learning to Learn.
3. In pairs, discuss teacher's role in developing Learning to Learn.
4. In pairs, outline indicators of Learning to Learn.
5. In groups, develop a task on Learning to Learn.

Learning to Learn

Learning to Learn

Learning to learn is the ability to pursue and persist in learning, to organise one's own learning by the effective management of time and information, both individually and in groups.

Learning to Learn

Benefits

1. It engages learners to build on prior learning and life experiences.
2. It enables learners to apply knowledge and skills in a variety of contexts at home, at work, in education and training.
3. It allows learners to become more effective, flexible and self-organized in a variety of contexts.

**What is
Learning to
learn**

Learning to Learn

Learning to learn is the ability to pursue and persist in learning, to organise one's own learning by the effective management of time and information, both individually and in groups.

1. It engages learners to build on prior learning and life experiences.

2. It enables learners to apply knowledge and skills in a variety of contexts at home, at work, in education and training.

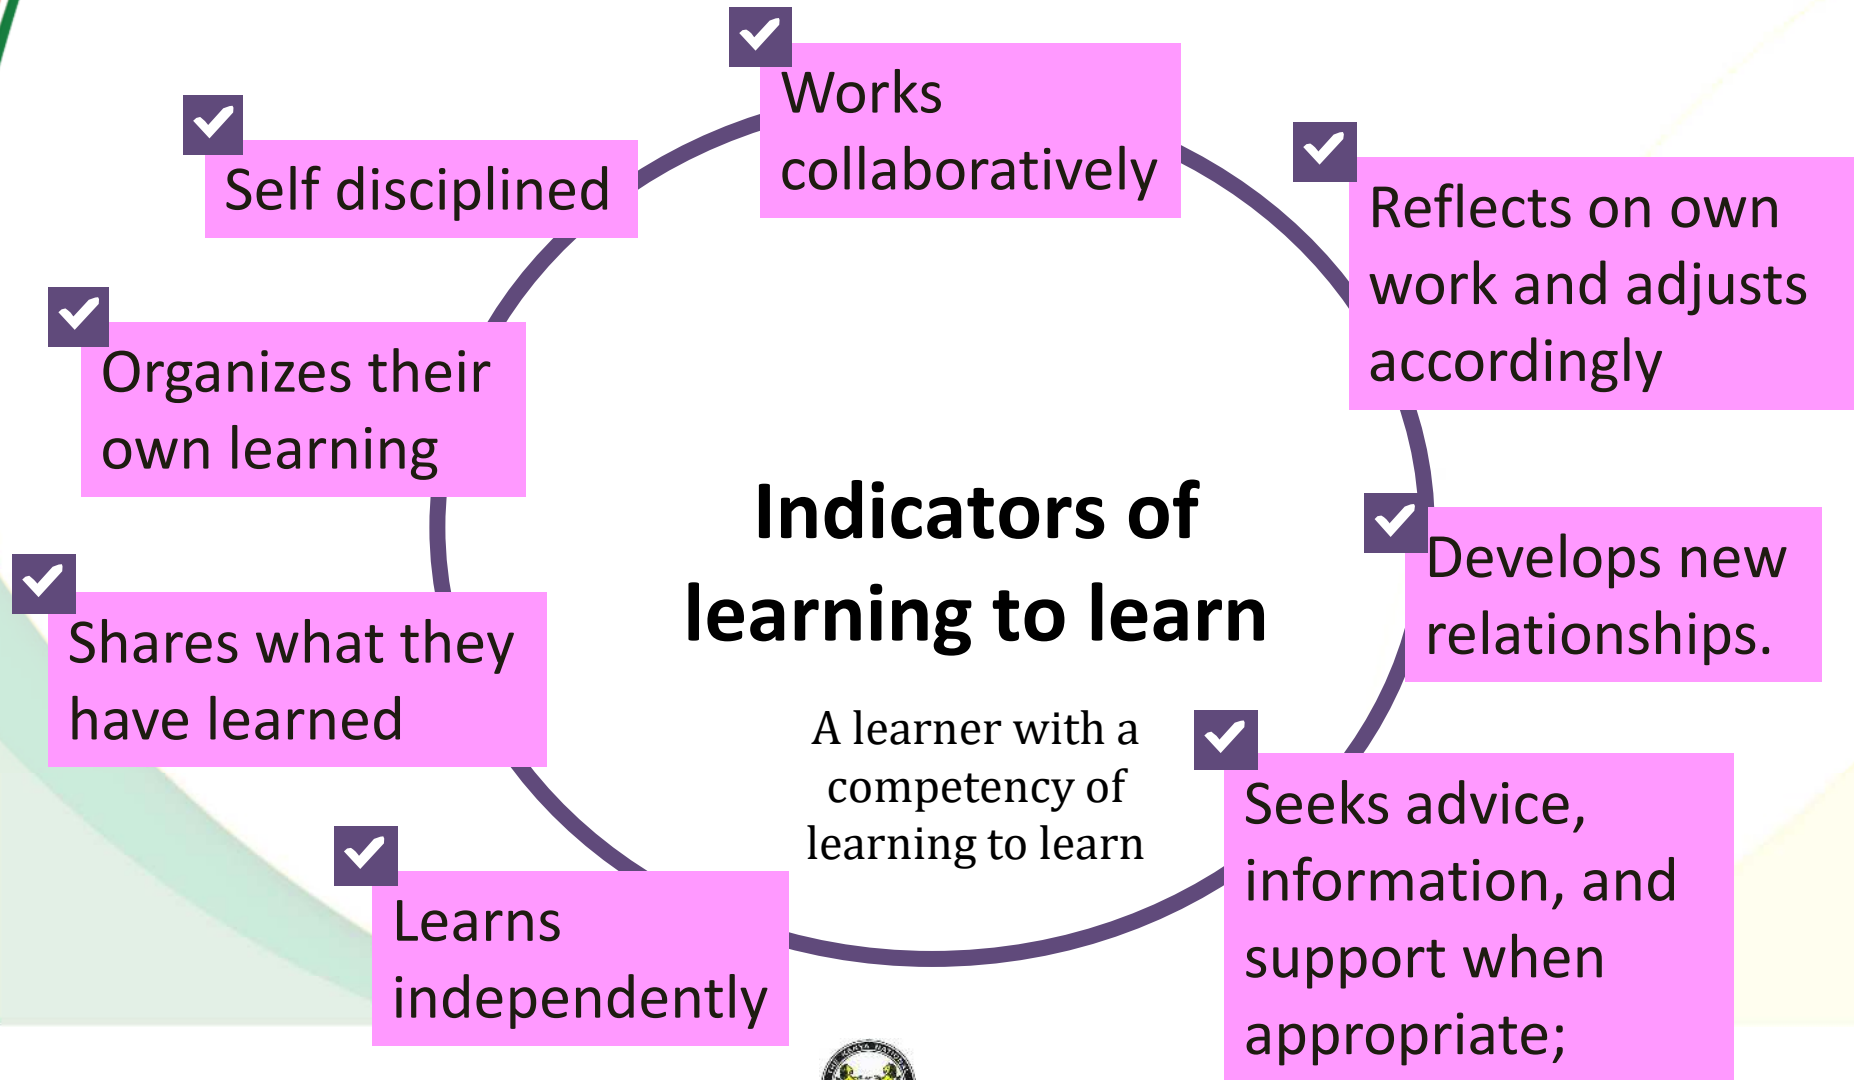

3. It allows learners to become more effective, flexible and self-organized in a variety of contexts.

Benefits of Learning to learn

Indicators of learning to learn

A learner with a competency of learning to learn

Assessing learning to learn

1. Click the link below

[Sample tool for assessing leaning to learn.](#)

2. The following are some indicators of leaning to learn:

- a) Self disciplined
- b) Works collaboratively
- c) Organizes their own learning
- d) Shares what they have learnt

Assessing learning to learn...cont'd

- e) Reflects on own work and adjusts accordingly
- f) Learns independently
- g) Motivated to learn continuously
- h) Seeks advice, information and support as appropriate

Assessing learning to learn

1. Click the link below

[Sample tool for assessing leaning to learn.](#)

2. The following are some indicators of leaning to learn:

- | | |
|----------------------------------|---|
| a) Self disciplined | a) Reflects on own work and adjusts accordingly |
| b) Works collaboratively | b) Learns independently |
| c) Organizes their own learning | c) Motivated to learn continuously |
| d) Shares what they have learned | d) Seeks advice, information and support as appropriate |

Assessing learning to learn.....cont'd

3. In your groups, create a learning experience you can use to develop the above attributes of learning to learn in learners.
4. Using the learning experience created, develop a tool for assessing the core competency of learning to learn.

7: Self efficacy

A learner who is a;

A leader

confident

persistent

SESSION 7: Self efficacy

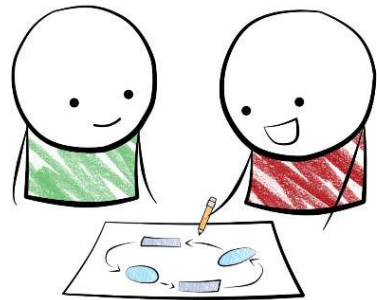

Session outcomes:

By the end of the session, the participant should be able to:

1. define self-efficacy as a competency;
2. explain the benefits of self-efficacy in learning;
3. explain teacher's role in developing self-efficacy;
4. explain the indicators of self-efficacy;
5. develop a task to assess self-efficacy;

Suggested learning activities

1. In pairs, participants discuss definition of self-efficacy.
2. In pairs, participants explore benefits of self-efficacy.
3. In pairs, participants discuss teacher's role in developing self-efficacy in the learners.
4. In pairs, participants outline indicators of self-efficacy.
5. In groups, participants develop a task to assess self-efficacy.

**What is
Self-efficacy?**

Self-efficacy

Self-efficacy is a person's belief about his or her capabilities to perform tasks or assignments that can change and transform his or her life.

1.

undertake
difficult
tasks;

2.

deeply
engross in
activities;

3.

set themselves
challenging
goals and
maintain a
strong
commitment to
them;

Benefits of Self-efficacy

Indicators of self-efficacy

A learner with a competency of Self-efficacy

✓ believes in own capabilities;

✓ shows interest in learning activities;

✓ has self-esteem and confidence;

✓ has developed self-awareness;

✓ portrays a sense of self-worth;

✓ demonstrate persistence, commitment, and resilience;

✓ improves in the level of achievement;

✓ embraces challenging tasks;

✓ demonstrates assertiveness;

✓ recovers quickly from disappointments and setbacks.

Assessing self-efficacy

1. Click the link below

[Sample tool for assessing self-efficacy](#)

2. Select a learning area of your choice in the curriculum design, identify a suggested learning experience and discuss the indicators that exhibit self efficacy.
3. Using the learning experience identified, develop a tool for assessing self efficacy.

PERTINENT AND CONTEMPORARY ISSUES (PCIS)

Pertinent

relating to the matter at hand; relevant.

Contemporary

living or occurring in the present

Issue

important topic or problem for debate or discussion.

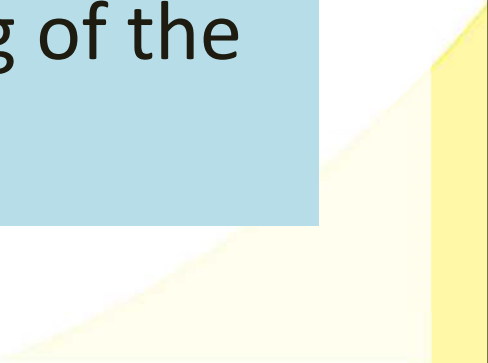

Pertinent And Contemporary Issues (PCIs) are problems currently affecting people or places and are unresolved. PCIs are designed and addressed in CBC to ensure that education is relevant.

Children like adults, are faced with legal, technological, social, cultural, political and economic challenges in society.

It is important that these challenges are addressed for the overall wellbeing of the child.

5. From the curriculum design,
- a) identify a strand or learning experience that addresses a PCI(s);
 - b) develop an assessment tool to assess the learners on the PCI(s).

Assessment of PCIs

1. Identify the target PCI
2. Define the indicators of PCI(s) as per the learning experience or task
3. Infuse the PCI(s) in the learning experience or task taking into consideration the local contexts.

Suggested learning activity

From the curriculum design,

- a) *identify a strand or learning experience of your choice;*
- b) *identify and infuse the target PCI(s) in the learning experience or task.*
