

GOLDLITE SUPPLIES
KCBE GRADE 10 QUICK REVISION SERIES 2026

APPLIED AGRICULTURE

SERIES 1-10

WE ALSO HAVE THE FOLLOWING

1. Grade 10 updates notes, schemes and lesson plans
2. All setbooks questions and answers
3. Top National Schools' Trials
4. Prediction series 2026
5. KCSE Replica Series 2026
6. Termly exams 2026
7. Senior school topical exams
8. Senior school updated notes
9. Senior school schemes of work
10. Senior school lesson plans
11. CBE updated notes all grades
12. CBE schemes of work all grades
13. CBE topical series all grades
14. CBE lesson plans all grades
15. CBE assessment report books all grades

SERIES 1

SECTION A (30 MARKS)

Answer ALL questions in this section.

1. (a) Match the following ways of accessing land in Kenya with their correct descriptions. (4 Marks)

Method of Access	Description
i. Leasing	A. Receiving land from a parent or relative after they pass away.
ii. Inheritance	B. Paying a specific fee to use land for a set period.
iii. Buying	C. Being given land for free by the government or a well-wisher.
iv. Donation	D. Acquiring permanent ownership through a financial transaction.

- (b) State two natural factors that determine the productivity of land in Mwea, Kirinyaga County. (2 Marks)

- i. _____
ii. _____

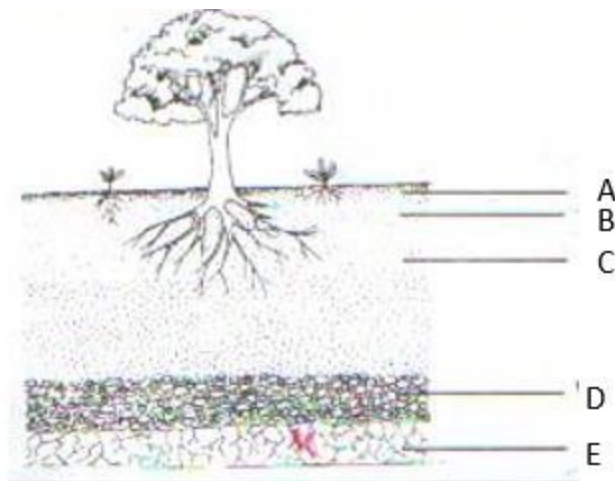

2. Define the following terms as used in Agricultural Technologies: (3 Marks)

a) **Value Addition:**

b) **Fallow Land:**

c) **Apiary:**

3. Study the diagram below of a soil profile observed by learners at Alliance Senior School during a field trip and answer the questions that follow.

- (a) Name the horizons labeled: A, B, C, D and E. (1 ½ mks)

- (b) State two characteristics of topsoil. (2mks)

- i. _____
- ii. _____

4. Distinguish between the following soil properties: (2 Marks)

Soil Texture and Soil Structure:

5. State whether the following statements regarding bee keeping are **True or False**. (4 Marks)

- a) An apiary should be sited near a busy road to allow bees to travel easily. [_____]
- b) Smoking is a method used to calm bees during honey harvesting. [_____]
- c) Water should be provided near the hive for the bees. [_____]
- d) A catcher box is used to transport honey to the market. [_____]

6. Grade 10 learners used some tools to restrain the animals in the farm. Mention three tools used for livestock restraining and safety at Nakuru Senior School farm. (3 Marks)

- i. _____
- ii. _____
- iii. _____

7. List three factors of production required by a Grade 10 learner to establish a poultry enterprise. (3 Marks)

- i. _____
- ii. _____
- iii. _____

8. Learners used the following tools while working in the school farm.

Q

R

S

T

Identify the tools labelled Q,R,S and T (4 Marks)

Q: _____ R: _____

S: _____

T: _____

9. Outline two maintenance practices carried out on a jembe or a panga. (2 Marks)

i. _____

ii. _____

SECTION B (50 MARKS)

(Answer all questions in this section)

10. Learners at Limuru Girls' School were preparing a seedbed for kales. They started by clearing the bush, then performed primary cultivation, followed by secondary cultivation.

a) Explain the importance of secondary cultivation in seedbed preparation. (4 Marks)

i. _____

ii. _____

b) Identify two conservation tillage practices the learners could use to conserve soil moisture. (2 Marks)

i. _____

ii. _____

c) Compare zero tillage and minimum tillage as used in crop production. (4 Marks)

Zero tillage	Minimum tillage

11. Study the images of the cattle below and answer the questions.

a) Identify the breeds above: (2 Marks)

M. _____

N. _____

b) Distinguish between the two breeds based on their primary use. (2 Marks)

M	N

c) A farmer in Kitale wants to start a commercial milk business. Which of the two breeds would you recommend? Give a reason. (2 Marks)

- i. _____
ii. _____

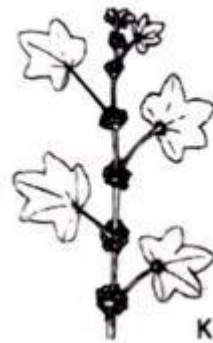

12. During an excursion to a farm in Narok, four learners (Kamau, Moraa, Fatuma, and Mutua) were describing a specific weed they found in a wheat field.

- i. *Kamau*: "This weed has a very short life cycle, completing it in one season."
ii. *Moraa*: "I noticed its leaves are very broad compared to the wheat."
iii. *Fatuma*: "It competes heavily with the wheat for nutrients and light."
iv. *Mutua*: "It can be controlled easily by uprooting it before it produces seeds."

a) Based on Kamau's description, classify the weed by its life cycle. (1 Mark)

b) Based on Moraa's description, classify the weed by its morphology. (1 Mark)

c) Timothy a Grade 10 learner came across the weeds shown below

Identify the weed labelled:

H _____ (1 mark)

J _____ (1 mark)

K _____ (1 mark)

d) Explain two economic importances of weeds to a farming household. (2 Marks)

- i. _____
ii. _____

e) Describe three cultural methods of weed control. (3 Marks)

- i. _____
- ii. _____
- iii. _____

13. A group of Grade 10 learners from Kenya Senior School visited a local resource person to discuss how to market their tomatoes. The resource person described several activities.

Activity 1: Sorting tomatoes into "Large", "Medium", and "Small".

Activity 2: Putting them into crates and labeling them with the school logo.

Activity 3: Calculating the cost of the pick-up truck and the market entrance fee.

a) Identify the specific marketing preparation process described in Activity 1. (1 Mark)

b) Mention two benefits of **branding** as mentioned in Activity 2. (2 Marks)

- i. _____
- ii. _____

c) Evaluate the expenses mentioned in Activity 3. Name two types of marketing expenses. (2 Marks)

- i. _____
- ii. _____

d) The learners decided to turn some tomatoes into tomato paste. Suggest two benefits of this value addition. (2 Marks)

- i. _____
- ii. _____

e) State three digital platforms the learners can use to market their produce in Kenya. (3 Marks)

- i. _____.
- ii. _____.
- iii. _____.

14. A farmer in Mombasa noticed that his cows were dull, had rough coats, and had a drop in milk production.

a) Identify three signs of ill health from the description above. (3 Marks)

- i. _____
- ii. _____
- iii. _____

b) Explain three general preventative measures the farmer should take to maintain animal health. *(6 Marks)*

- i. _____.
- ii. _____.
- iii. _____.

c) Why is it important to wear Personal Protective Equipment (PPE) when handling livestock? *(1 Mark)*

15. A learner wants to start a bee-keeping project but has no money.

a) Propose four ways the learner can acquire capital to establish the enterprise. *(4 Marks)*

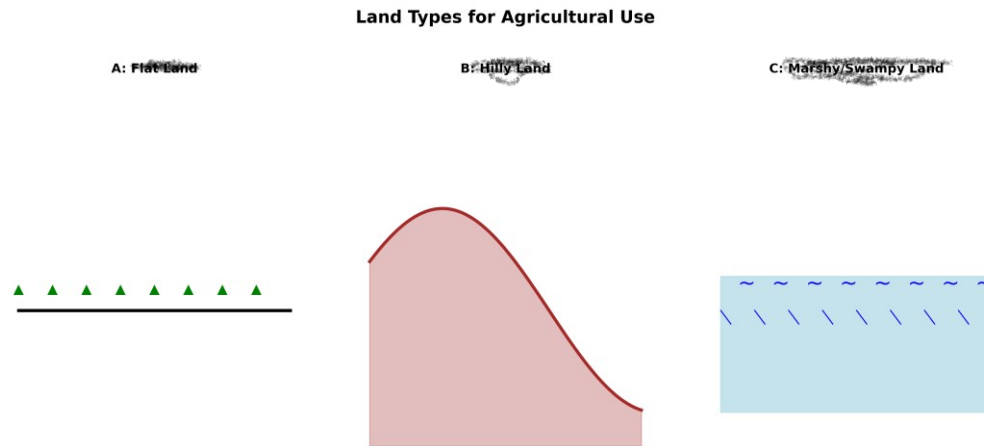

- i. _____.
- ii. _____.
- iii. _____.
- iv. _____.

b) State one factor to consider when selecting an agricultural enterprise. *(2 Marks)*

SERIES 2

SECTION A: (45 MARKS)

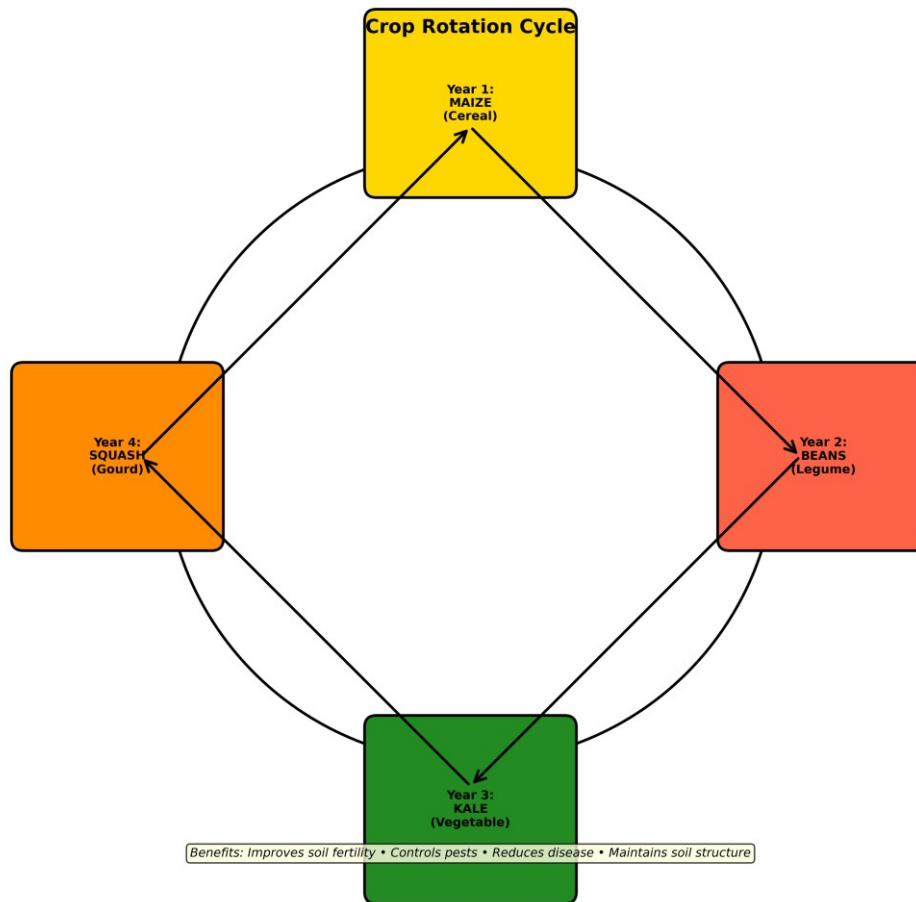

1. Define the term agricultural land. (2 marks)
2. State four ways of accessing agricultural land for farming. (4 marks)
3. Study the diagram below showing different land types and answer the questions that follow. (5 marks)

- a) Identify land type B and state its agricultural significance. (2 marks)
 - b) State two challenges of using land type C for farming. (2 marks)
 - c) Suggest one method to improve land type C for crop production. (1 mark)
4. Explain how each of the following factors affects land productivity: (6 marks)
 - a) Altitude:
 - b) Climate:
 - c) Biotic factors:
 5. Name four soil properties that affect crop growth. (4 marks)
 6. Explain three ways a farmer can improve soil productivity. (6 marks)

7. State three objectives of land preparation before planting. (3 marks)

8. Study the crop rotation cycle diagram and answer the questions. (5 marks)

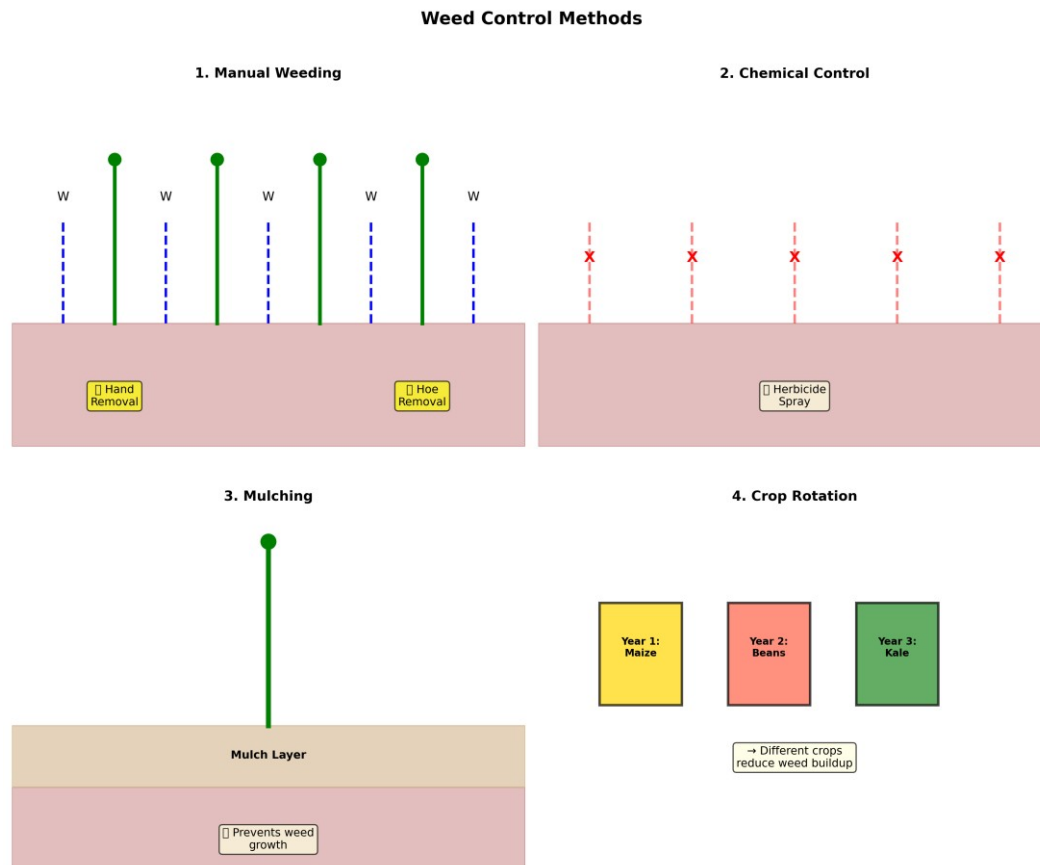

a) What is crop rotation? (1 mark)

b) State two benefits of crop rotation. (2 marks)

c) Name two crops that can be rotated with maize. (2 marks)

9. Study the weed control methods diagram and answer the questions. (4 marks)

a) Name two methods of weed control shown in the diagram. (2 marks)

b) Describe how mulching helps in weed control. (2 marks)

10. Explain three reasons why field management practices are important. (3 marks)

SECTION B:(30 MARKS)

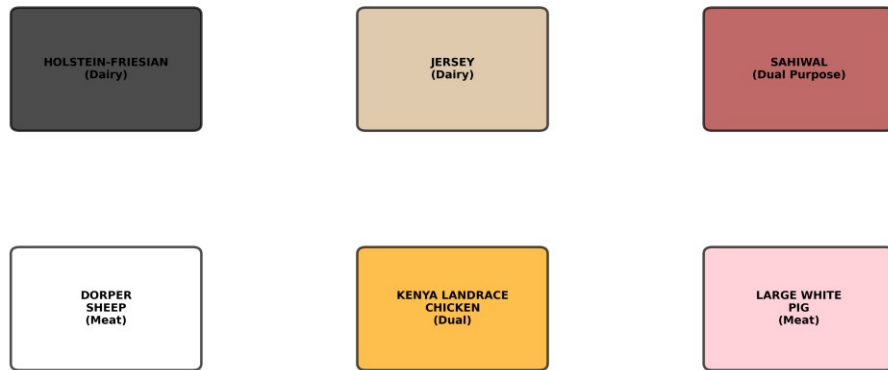

11. Define the following terms: (3 marks)

a) Livestock breed:

b) Animal production:

12. Study the livestock breeds diagram and answer the questions. (4 marks)

Common Livestock Breeds in Kenya

- a) Name one dairy cattle breed and one characteristic. (1 mark)
- b) State one advantage of raising indigenous breeds in Kenya. (1 mark)
- c) Name one poultry breed suitable for egg production. (1 mark)
- d) Explain one reason for keeping different livestock breeds. (1 mark)

13. State five safety measures to observe when handling livestock. (5 marks)

14. Explain four signs of disease in livestock. (4 marks)

15. Differentiate between vaccination and drenching in livestock health management. (3 marks)

Vaccination:

Drenching:

16. Explain three advantages of beekeeping as an agricultural enterprise. (3 marks)

17. Name four essential conditions for successful animal rearing. (4 marks)

SECTION C: (25 MARKS)

18. Define the following agricultural tools: (4 marks)

a) Hoe:

b) Panga:

c) Rake:

d) Mattock:

19. Explain three advantages of using improved agricultural equipment in farming. (3 marks)

20. Define value addition and give two examples of value-added agricultural products. (3 marks)

Example 1: _____

Example 2: _____

21. Explain three requirements for establishing a successful agricultural enterprise. (6 marks)

22. Name four marketing channels for agricultural produce. (4 marks)

23. Explain two advantages of composting in farming. (2 marks)

24. A farmer has 2 hectares of land and wants to plant maize. If the recommended plant spacing is 75 cm between rows and 30 cm between plants within a row, calculate the number of maize plants that can be planted.

25. Draw and label a soil profile diagram showing the five soil horizons (O, A, B, C, and R) with their names and contents.

SERIES 3

SECTION A (30 MARKS)

Answer ALL questions in this section.

1. Define the term Agriculture as used in crop and livestock production. (2 marks)

.....

.....

.....

.....

2. State FOUR branches of agriculture. (4 marks)

.....

.....

.....

.....

3. Give THREE reasons why agriculture is important in Kenya. (3 marks)

.....

.....

.....

.....

4. State FOUR factors that influence agriculture in Kenya. (4 marks)

.....

.....

.....

.....

5. Classify the following crops by giving ONE example of each: (3 marks)

(i) Beverage crops

.....

.....

(ii) Fibre crops

.....

.....

(iii) Fodder crops

.....

.....

6. Name the soil horizon that contains the highest concentration of organic matter. (2 marks)

.....

.....

.....

7. State FOUR properties of a good agricultural soil. (4 marks)

.....

.....

.....

.....

.....

8. List FOUR types of soil according to texture. (4 marks)

.....

.....

.....

.....

9. Identify FOUR farm tools used during primary land preparation. (4 marks)

.....

.....

.....

.....

10. State the function of the following farm tools: (4 marks)

(i) Jembe

.....

.....

(ii) Pruning saw

.....

.....

(iii) Wheelbarrow

.....

.....

(iv) Garden fork

.....

.....

SECTION B (40 MARKS)

Answer ALL questions in this section.

11. The diagram below represents a soil profile. Use it to answer the questions that follow. (0 mark)

Layer A	Dark coloured, rich in humus
Layer B	Lighter colour, less organic matter
Layer C	Weathered rock fragments
Layer D	Unweathered bedrock

(a) Name the layers labelled A, B, C and D on the soil profile diagram. (4 marks)

.....

.....

.....

.....

(b) State TWO characteristics of the layer labelled A. (2 marks)

.....

.....

(c) Explain why Layer D does not support plant growth. (2 marks)

.....

.....

(d) State TWO ways through which organic matter in the soil is replenished. (2 marks)

.....

.....

12. The table below shows soil types and their properties. Study it and answer the questions that follow. (0 mark)

Soil Type	Water Retention	Aeration	Suitability for Farming
Sandy	Low	High	Poor – loses water fast
Clay	High	Low	Poor – waterlogged
Loam	Moderate	Moderate	Best for crops
Silt	Moderate-High	Low-Moderate	Moderate

(a) Which soil type is most suitable for growing crops? Give a reason for your answer. (2 marks)

.....

.....

(b) State TWO practices a farmer can do to improve sandy soil for crop production. (2 marks)

.....

.....

(c) Explain why clay soil is difficult to work with during cultivation. (2 marks)

.....

.....

(d) State FOUR factors that determine the type of soil in a given area. (4 marks)

.....

.....

.....
.....

13. Study the information below about two methods of land preparation and answer the questions. (0 mark)

Farmer X ploughed the land deeply, breaking up large clods, then harrowed to make the soil fine and suitable for planting. Farmer Y cleared the land of vegetation, then used a hand hoe to prepare shallow seedbeds without deep turning of the soil.

(a) Identify the PRIMARY tillage method used by Farmer X. (1 mark)

.....
.....

(b) Name the implement used by Farmer X to achieve a fine tilth. (1 mark)

.....
.....

(c) State THREE advantages of deep ploughing as practised by Farmer X. (3 marks)

.....
.....
.....
.....

(d) Give TWO disadvantages of the land preparation method used by Farmer Y. (2 marks)

.....
.....
.....

(e) State THREE factors that determine the choice of tillage method. (3 marks)

.....
.....
.....
.....

14. The following are statements about water and irrigation in agriculture. Indicate whether each statement is TRUE (T) or FALSE (F) in the space provided.(5 marks)

- (a) Drip irrigation delivers water directly to plant roots and minimises water loss.
- (b) Furrow irrigation is best suited for tree crops planted in rows.
- (c) Overhead (sprinkler) irrigation simulates rainfall and suits a wide variety of crops.
- (d) Flood irrigation is the most efficient method of irrigation in terms of water use.
- (e) Irrigation helps extend the crop growing season beyond the rainy period.
- (f) State TWO negative effects of over-irrigation on soil. (2 marks)

.....
.....
.....

(g) List THREE sources of water for agricultural use in Kenya. (3 marks)

.....
.....
.....
.....

SECTION C (30 MARKS)

Answer ALL questions in this section.

15. (a) Explain FIVE ways in which soil fertility can be maintained or improved on a farm. (10 marks)

.....

.....

.....

.....

.....

(b) Differentiate between organic and inorganic fertilisers under the following headings: (10 marks)

Aspect	Organic Fertiliser	Inorganic Fertiliser
Source		
Effect on soil structure		
Nutrient content		
Cost		
Speed of release		

16. (a) Describe the process of primary land preparation from bush clearing to seedbed preparation. (8 marks)

.....

.....

.....

.....

(b) Explain FOUR factors a farmer should consider when choosing the method of planting. (4 marks)

.....

.....

.....

(c) Name and briefly explain THREE methods used to plant crops. (6 marks)

.....

.....

(d) Explain how crop spacing affects crop growth and yield. (2 marks)

.....

.....

SERIES 4

ANSWER ALL THE QUESTIONS IN THE SPACES PROVIDED.

1. What is agricultural land?

(1 mark)

.....
.....

2. Before starting an apple orchard, a farmer in Kenya researched areas with specific cool temperature requirements. Which natural factor, often related to height above sea level, is crucial for such crops.

(1mark)

.....

3. A group of farmers in your community plans to start livestock farming project to supply the local market.

a. Explain four ways through which the group can legally access land for agricultural use.

(8 marks)

.....
.....

b. Before settling on a piece of land, the group evaluates different parcel of land in the area. Identify three factors they would consider when evaluating the utility of land for agricultural production

(3 marks)

.....

4. What is land leasing?

(1mark)

.....

5. Describe four climatic factors affecting the use of agricultural land

(8 marks)

.....
.....

6. Mr. Mkulima wanted to check if his title deed was genuine. Write down the information he could have looked at.

(6 marks)

7. What is relative humidity?

(1 mark)

.....

8. Explain five natural factors affecting the use of agricultural land (10 marks)

.....

.....

.....

.....

9. Write down the ways in which wind affects agriculture. (4marks)

.....

.....

10. Write down advantages of buying as a method of acquiring agricultural land (3marks)

.....

11. Describe three components of soil. (3marks)

.....

12. Grade 10 learners in Bidii junior school were asked to define tenure security. Which answer did they give? (1 mark)

.....

SERIES 5

SECTION A. (30 MARKS)

1.What is altitude? (1 mark)

.....

2.Moses is a farmer in Nakuru, he plans to plant some trees in his farm

(a) Name five natural factors that can affect his land productivity. (5 marks)

.....

.....

(b) State two benefits of planting trees in the farm. (2 marks)

.....

.....

3.What is soil profile? (1 mark)

.....

4.Explain four factors you would consider when evaluating the utility of the land for crop production. (8 marks)

.....

.....

5.State **TWO reasons** why land is important in agricultural production. (2 marks)

.....

.....

6.Write down two disadvantages of buying as a way of acquiring agricultural land (2 marks)

.....

.....

7. Judy was asked by her teacher to name the three types of soils. Which ones are they? (3 marks)

.....

.....

8.Describe three aspects of rainfall that should be considered when determining productivity of land in agriculture (6 marks)

.....

SECTION B (70 marks)

9.A group of students visited a farm and observed the farmer preparing the land. Write down six reasons why proper land preparation is important in agricultural production. (6 marks)

10.Describe three components of soil (6 marks)

.....

.....

11. A farmer wants to grow vegetables. Explain the following properties of soil and their importance to crop production: (6 marks)

(a) Physical properties

.....

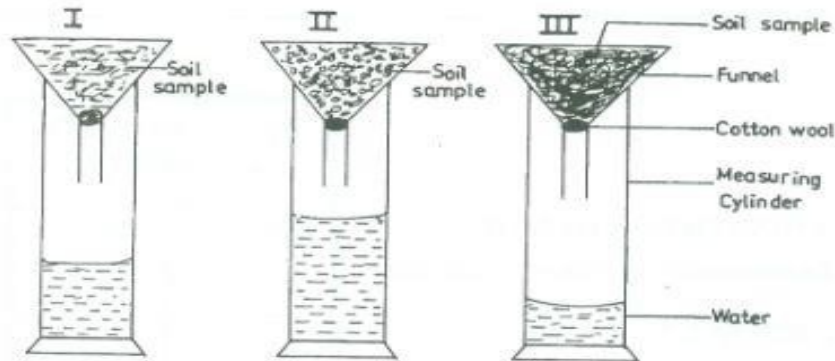

(b) Chemical properties

.....

(c) Biological properties

.....

12. Mwangi set up an experiment below to investigate a certain soil property.

a). Identify the aim of the experiment. (1mk)

.....

b). Name soil labelled I, II, III (3 marks)

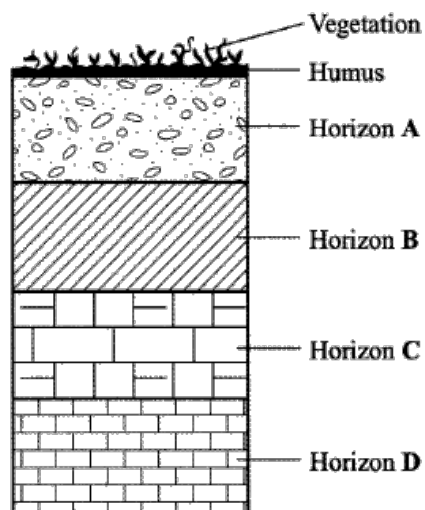

.....

13. Describe three physical properties of soil that influence crop production (6 marks)

.....

14. The diagram below shows soil profile.

(a) Label the horizons. (4 marks)

A: _____.

B: _____.

C: _____.

D: _____.

(b) Describe the characteristics of each horizon. (8 marks)

.....

.....

15.Explain how the following soil properties affect crop growth.(6 marks)

(a) Soil texture

(b) Soil fertility

(c) Soil porosity

16.Explain how the soil profile affects crop production. (4 marks)

.....

.....

17.Define soil pH and explain how it influences crop production (3 marks)

.....

.....

18.a) **Define** conservation tillage. (2marks)

.....

.....

b) Describe TWO conservation tillage practices used in crop production. (4 marks)

.....

.....

c)Write down FOUR benefits of conservation tillage to the farmer and the environment. (4 marks)

.....

.....

19.Describe two methods of clearing fallow land (4marks)

.....

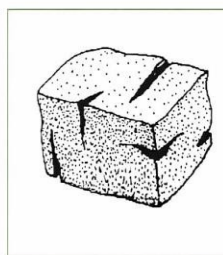

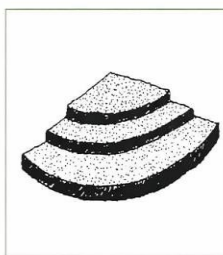

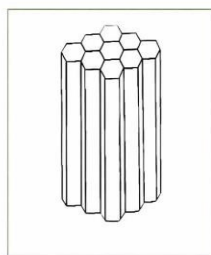

.....

20. Name the following soil structures (3 marks)

A

B

C

SERIES 6

SECTION A: (60 Marks)

Answer all questions in this section.

1. A farmer wants to start a maize farm but does not own land. Answer the following questions:

(a) Identify **one legal way** a farmer can access land for agricultural use. (2 marks)

(b) State **one advantage** of using this method. (2 marks)

(c) State **one disadvantage** of using this method. (2 marks)

(d) Give a **relevant example** where this method can be applied. (1 mark)

2. Susan has bought a land for a certain agricultural activity. Identify three uses of land for agricultural production and explain why each is important. (6 marks)

	Use	Importance
i		
ii		
iii		

3. Timothy is a farmer in Nyandarua, he plans to plant some trees in his farm

(a) Name three natural factors that can affect his land productivity. (3 marks)

- i.

- ii.

- iii.

(b) Explain three benefits of planting trees in the farm. (6 marks)

- i.

- ii.

iii. _____

(c) Suggest suitable crops for high altitude and low altitude regions. (4 marks)

High altitude crops	Low altitude crops

4. A group of students visited a farm and observed the farmer preparing the land. Explain three reasons why land is important in agricultural production. (6 marks)

i. _____

ii. _____

iii. _____

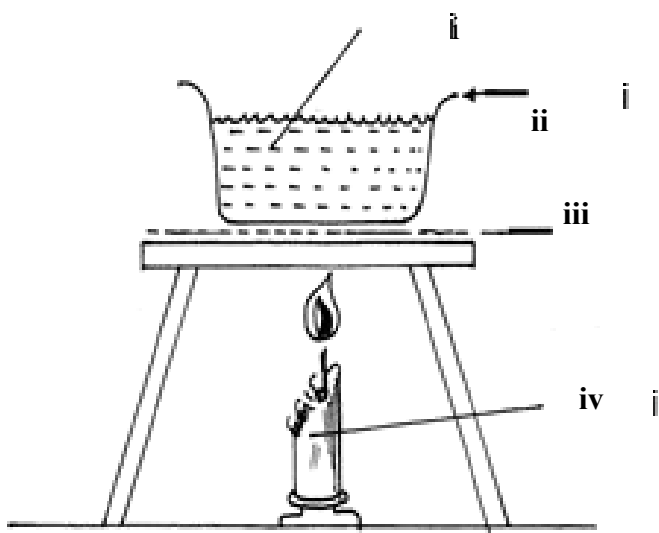

5. A farmer wants to grow vegetables. Explain the following properties of soil and their importance to crop production: (6 marks)

(a) Physical properties

(b) Chemical properties

(c) Biological properties

6. Mwangi set up of apparatus for finding the percentage of humus contents in a soil by ignition.

a. Label the apparatus. (4 marks)

i) _____

ii) _____

iii) _____

iv) _____

b. Outline the steps followed in carrying out the illustrated experiment. (8 marks)

i) _____

ii) _____

iii) _____

iv) _____

7. (a) Tamara was asked by her teacher to name the three types of soils. Which one are they? (3 marks)

i) _____

ii) _____

iii) _____

(b) Name two ways of determining soil texture (4 marks)

i) _____

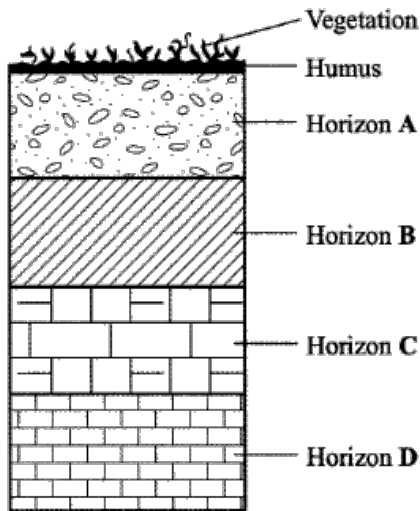

ii) _____

SECTION B: (40 Marks)

Answer all questions in this section.

8. The diagram below shows soil profile.

(a) Label the horizons. (4 marks)

A: _____ B: _____
C: _____ D: _____

(b) Describe the characteristics of each horizon. (8 marks)

Horizon	Characteristic
A	
B	
C	
D	

(c) Explain how the soil profile affects crop production. (4 marks)

- i) _____
- ii) _____

9. Explain how the following soil properties affect crop growth: (8 marks)

(a) Soil texture

(b) Soil structure

(c) Soil fertility

(d) Soil porosity

10. A farmer inherited a 5-acre land in a semi-arid region. He wants to practice mixed farming. Using your knowledge of land and soil properties: (6 marks)

(a) Suggest suitable crops and livestock for the region.

(b) Explain how soil and climate factors will influence his choice.

(c) Suggest ways to improve soil fertility and water retention.

a) Grade 10 learners used the farm tool below for farm clearance activity

Name the farm tool. (1 mark)

b) Give **one** use of each of the following tools: (3 marks)

i. Wheelbarrow

ii. Rake

iii. Tape measure

c) State **two** maintenance practices for a wheelbarrow. (2 marks)

d) List **two** dangers of using farm tools incorrectly. (2 marks)

e) Explain **two** benefits of maintaining farm tools in good condition. (2 marks)

i.

ii.

SERIES 7

SECTION A: THEORY (70 Marks)

Answer all questions in this section.

1. A group of young farmers in your community plans to start a vegetable farming project to supply the local market.

a) Explain FOUR ways through which the group can legally access land for agricultural use. (4 marks)

- i. _____
- ii. _____
- iii. _____
- iv. _____

b) Before settling on a piece of land, the group evaluates different parcels of land in the area.

- i) Identify **THREE factors** they would consider when evaluating the **utility of land** for agricultural production. (3 marks)

- ii) Explain **TWO reasons** why some land may not be suitable for crop farming. (4 marks)

c) Describe FOUR natural factors that determine the productivity of land in agriculture. (4 marks)

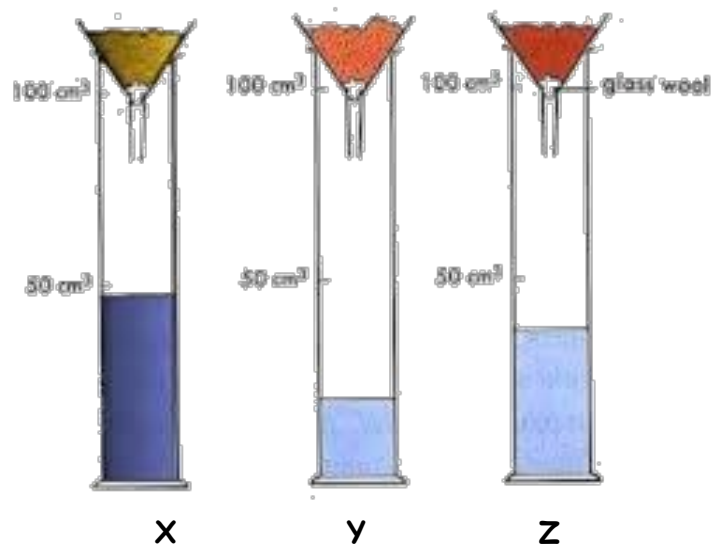

- i. _____
- ii. _____
- iii. _____
- iv. _____

2. During a field excursion, learners collect soil samples from different farms to test their suitability for crop production.

a) Describe ONE physical, ONE chemical, and ONE biological property of soil that affects crop production. (6 marks)

Property of soil	Description
Physical property	
Chemical property	
Biological property	

b) Agriculture learners from Precious Blood Senior School conducted the following experiment.

i) Identify the physical property of soil being investigated above. (1 mark)

ii) State two factors influencing the above factor. (2 marks)

iii) Identify the soils labelled XYZ. (3 marks)

X: _____.

Y: _____.

Z: _____.

c) Using a well-labeled diagram, illustrate a **soil profile** and explain the importance of **ANY TWO layers** to crop production. (3 marks)

3. A farmer leaves a piece of land fallow for three years before deciding to plant maize.

a) List FOUR activities carried out when preparing fallow land to achieve an appropriate seedbed. (4 marks)

- i. _____
- ii. _____
- iii. _____
- iv. _____

b) Different land preparation methods are used depending on soil condition.

i) Distinguish between primary cultivation and secondary cultivation. (4 marks)

c) State TWO reasons why proper land preparation is important in crop production. (2 marks)

- i. _____
- ii. _____

4. In areas prone to soil erosion, farmers are encouraged to adopt conservation tillage practices.

a) Define conservation tillage. (2 marks)

b) Describe TWO conservation tillage practices used in crop production. (2 marks)

- i. _____
- ii. _____

c) Explain FOUR benefits of conservation tillage to the farmer and the environment. (4 marks)

- i. _____
- ii. _____
- iii. _____
- iv. _____

5. A tomato farmer observes poor yields due to improper crop management.

a) Describe the process of pruning tomato plants. (3 marks)

- i. _____
- ii. _____
- iii. _____

b) State TWO benefits of pruning vegetables. (2 marks)

- i. _____
- ii. _____

b) Explain TWO reasons why perennial crops require pruning. (2 marks)

- i. _____
- ii. _____
- iii. _____

c) State TWO importance of top dressing crops using appropriate fertilizers. (2 marks)

- i. _____
- ii. _____

6. A school agriculture club decides to grow cabbages starting from a nursery bed.

a) Identify THREE crops that are commonly established through a nursery. (3 marks)

- i. _____
- ii. _____
- iii. _____

b) Describe THREE nursery bed management practices that ensure healthy seedlings. (3 marks)

- i. _____
- ii. _____
- iii. _____

c) Explain FOUR field management practices carried out after transplanting seedlings. (4 marks)

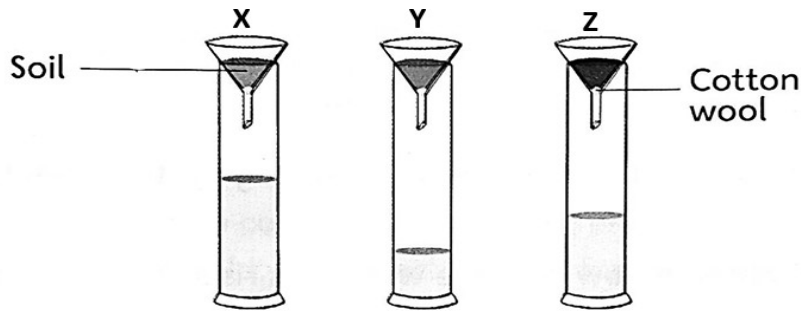

- i. _____
- ii. _____
- iii. _____
- iv. _____

SERIES 8

SECTION A (30 MARKS)

Answer ALL questions in this section.

1. Learners conducted an experiment to compare how different soils retain water.

Identify the soil types represented by the samples below. (3 marks)

- a) Clay soil - _____ b) Loam soil - _____ c) Sandy soil - _____

2. While watching an agricultural documentary, **Brian** saw a farmer removing excess seedlings that had grown in the farm.

The farmer was carrying out _____. (1 mark)

3. Domini brought the following planting material for a class project in crop production. (1 mark)

The planting material is known as? _____

4. Explain why pruning should not be done during rainy or wet conditions. (2 marks)

a. _____

b. _____

5. **Diana** was asked to list crops that are first raised in nursery beds before transplanting.

State three correct examples. (3 marks)

a. _____

b. _____

c. _____

6. During a field study in **Kapseret**, learners observed different farming practices on nearby farms.

a) Define agricultural land. (1 mark)

b) State two ways through which farmers can obtain land for agricultural use. (2 marks)

i. _____

ii. _____

c) Identify one factor to consider when selecting land for crop production. (1 mark)

7. A farmer named **Moses** signed an agreement to use land owned by another farmer in **Eldoret** for a specific number of years.

X

LAND LEASE AGREEMENT FORM	
I Mr./Mrs..... of Id	
No:.....(Land owner) I have agreed without any alterations to lease my	
land to Mr./Mrs.....Of Id	
No:.....[Leaser] Located In.....	
That the Leaser shall pay the sum of Ksh.....per	
a year Amount in words.....	
Today the leaser has paid Ksh.....amount in words	
For a period ofyears.	
This agreement is made in this day ofmonth.....	
year.....And will expire in the day of.....month.....	
year.....which is a period of.....years	
CONDITIONS	
1. Whoever breaches this agreement before the expiry period will pay three times(3x) the incurred	
costs in either party.	
2. This agreement is binding both parties	
WITNESSES	
1.....	Id No:.....sign.....
2.....	Id No:.....sign.....
3.....	Id No:.....sign.....
4.....	Id No:.....sign.....

This agreement is made in the presence of Area chief/	
Assistant Chief	
sign.....and stamp.....Date.....	

Y

Identify the methods of acquiring agricultural land labelled X and Y. (2 marks)

X: _____.

Y: _____.

8. During a prolonged dry spell, **Achieng'** noticed variation in moisture levels across her farm. She planned to grow different crops depending on the conditions.

a) Name two natural factors that influence crop selection. (2 marks)

- i. _____.
- ii. _____.

b) State one soil factor that can lower productivity in dry areas. (1 mark)

- i. _____.

c) Explain how the size of land affects the method of farming chosen. (1 mark)

9. At **Cheptais Senior School**, agriculture students dug soil pits to study soil characteristics before planting crops.

a) Soil supports plant growth by anchoring roots and also by _____. (1 mark)

b) Name one component found in the topsoil layer. (2 marks)

c) State one importance of organic matter in soil. (1 mark)

10. While inspecting her farm, **Naomi** noticed both harmful insects and beneficial insects such as bees.

Explain how these organisms influence farm productivity. (2 marks)

- i. _____.
- ii. _____.

11. During a farm visit, students at **Kibwezi Senior School** identified several farm tools. Name the tools shown below. (3 marks)

a) _____

b) _____

c) _____

12. _____ is a farming method that minimizes or avoids disturbance of the soil. (1 mark)

SECTION B (50 MARKS)

Answer ALL questions in the spaces provided.

13. Kevin and Musa studied soil composition and identified key components.

Explain the importance of each component in crop production. (8 marks)

a) Water

- i. _____.
- ii. _____.

b) Air

- i. _____.
- ii. _____.

c) Mineral particles

- i. _____.
- ii. _____.

d) Organic matter

- i. _____.
- ii. _____.

14. During a practical lesson at Nakuru Senior School, students prepared land that had been left uncultivated for a long time.

Describe the process of land clearing. (6 marks)

- i. _____.
- ii. _____.
- iii. _____.
- iv. _____.
- v. _____.
- vi. _____.

15. Farmers are encouraged to adopt conservation tillage practices such as minimum tillage and zero tillage.

Explain four benefits of conservation tillage in crop production. (8 marks)

- i. _____.
- ii. _____.
- iii. _____.
- iv. _____.

16. Daniel, a coffee farmer, practised pruning on his crop.

a) Describe how single stem pruning is carried out in coffee plants. (4 marks)

- i. _____.
- ii. _____.
- iii. _____.
- iv. _____.

b) State four benefits of pruning coffee plants. (4 marks)

- i. _____.
- ii. _____.
- iii. _____.
- iv. _____.

17. Seedlings in nursery beds require proper management for healthy growth.

Explain how the following practices are carried out. (6 marks)

a) Mulching

- i. _____.
- ii. _____.

b) Shading

- i. _____.
- ii. _____.

c) Weed control

- i. _____.
- ii. _____.

d) Thinning

- i. _____.
- ii. _____.

e) Pest and disease control

- i. _____.
- ii. _____.

18. Land plays a key role in agriculture but its usefulness varies depending on different conditions.

Explain three factors that influence the suitability of land for agricultural production. (6 marks)

- i. _____.
- ii. _____.
- iii. _____.

19. The **Mutiso family** purchased land in **Machakos** and obtained full ownership rights.

a) Identify the method of land acquisition used. _____ (1 mark)

b) State two advantages of this method. (2 marks)

- i. _____.
- ii. _____.

c) Give one disadvantage of this method. (1 mark)

- i. _____.
- ii. _____.

d) Explain how this method differs from leasing land. (4 marks)

- i. _____.
- ii. _____.
- iii. _____.

SERIES 9

SECTION A: THEORY (80 Marks)

Answer all questions in this section.

1. A school agriculture club plans to start a **vegetable farming project** within the local community.

- a) Identify **THREE** ways through which the club can access land for agricultural use. (3 marks)

- i. _____.
- ii. _____.
- iii. _____.

- b) Explain **THREE** factors you would consider when evaluating the suitability of the land for crop production. (3 marks)

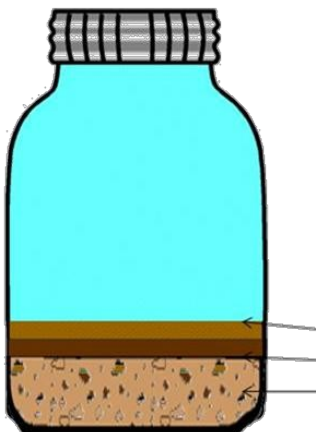

- i. _____.
- ii. _____.
- iii. _____.

- c) State **TWO** reasons why land is important in agricultural production. (2 marks)

- i. _____.
- ii. _____.

2. During a field excursion, learners observed different soil layers in a farm.

- a) Name the **types of soil** labelled QRS. (3 marks)

- Q: _____.
- R: _____.
- S: _____.

b) Name any **two main categories of soil properties** important in crop production. (2 marks)

- i. _____.
- ii. _____.

c) Identify the soil activity below. (1 mark)

_____.

d) Describe **ONE test** used to determine each of the following soil properties:(3 marks)

- i) Soil texture: _____.
- ii) Soil pH: _____.
- iii) Soil porosity: _____.

e) Explain **THREE ways** in which the soil profile influences crop production. (3 marks)

- i. _____.
- ii. _____.
- iii. _____.

3. A farmer wants to prepare a fallow piece of land for planting maize as shown below.

a) Outline **FOUR activities** carried out during land preparation to obtain a good seedbed. (4 marks)

- i. _____.
- ii. _____.
- iii. _____.

iv. _____.

b) Differences between **primary cultivation** and **secondary cultivation**. (4 marks)

	Primary cultivation	Secondary cultivation
i		
ii		

c) Explain **TWO conservation tillage practices** used in crop production. (4 marks)

i. _____.

ii. _____.

4. A learner is managing tomatoes and capsicum in the school farm as shown below.

X

Y

a) Identify the fruits X and Y. (2 marks)

X: _____ Y: _____.

b) Describe **THREE pruning practices** carried out on vegetable crops. (3 marks)

i. _____.

ii. _____.

iii. _____.

c) Explain **THREE reasons** why top dressing is important in crop production. (3 marks)

i. _____.

- ii. _____.
- iii. _____.

d) Identify four management practices carried out to tomato seedling in the farm. (4 marks)

- i. _____.
- ii. _____.
- iii. _____.

5. A Grade 10 class established tomatoes using a nursery bed.

a) Identify the activity shown above.(1 mark)

_____.

b) Identify **FOUR crops** that are established through a nursery. (4 marks)

- i. _____.
- ii. _____.
- iii. _____.
- iv. _____.

c) Describe **FOUR management practices** carried out in a nursery bed. (4 marks)

- i. _____.
- ii. _____.
- iii. _____.
- iv. _____.

d) Justify **TWO reasons** why nursery establishment is preferred in vegetable production. (4 marks)

- i. _____.
- ii. _____.

6. Learners noticed weeds growing among crops on the school farm.

a) Identify the activity shown below. (1 mark)

b) Classify weeds based on **life cycle**. (3 marks)

- i. _____.
- ii. _____.
- iii. _____.

c) Identify the name of the weed shown below. (2 marks)

U

V

U: _____.

V: _____.

d) Describe **FOUR methods** used to control weeds in a crop field. (4 marks)

- i. _____.
- ii. _____.
- iii. _____.
- iv. _____.

e) State **TWO economic effects** of weeds on farming household. (2 marks)

- i. _____.
- ii. _____.
- iii. _____.

7. A farmer is harvesting some farm produce.

a) Identify the crops being harvested below: (2 marks)

E

F

E: _____.

F: _____.

b) Explain **FOUR factors** that determine the harvesting time of a crop. (4 marks)

- i. _____.
- ii. _____.
- iii. _____.
- iv. _____.

b) State **FOUR post-harvest practices** carried out to reduce losses. (4 marks)

- i. _____.
- ii. _____.
- iii. _____.
- iv. _____.

SERIES 10

SECTION A (30 MARKS)

Answer ALL questions in this section.

1. A youth group in Bomet County wants to start a vegetable farming project but does not own land.

a) Identify **two legal ways** the group can access land. (2 marks)

- i. _____.
- ii. _____.

b) State **two advantages** of having a secure land ownership for farming. (2 marks)

- i. _____.
- ii. _____.

2. During a practical lesson, learners collected soil from a farm and separated its components.

a) Name **two components of soil** observed. (2 marks)

- i. _____.
- ii. _____.

b) State **one role of each component** named in (a) in crop production. (2 marks)

Component of soil	Role of the component in crop production

3. A farmer noticed that water drains very quickly in his sandy soil.

a) Identify the soil property responsible for this observation. (1 mark)

b) State **two disadvantages** of this soil property to crop production. (2 marks)

- i. _____.
- ii. _____.

c) Suggest **one way of improving the soil condition**. (1 mark)

4. A school agriculture club is preparing a plot that has been left fallow for two years.

a) State **two activities carried out during land clearing**. (2 marks)

- i. _____.

ii. _____.

b) Identify **two operations done during secondary cultivation**. (2 marks)

i. _____.

ii. _____.

5. A farmer in Kirinyaga County is growing tomatoes.

a) Name **two management practices** carried out on tomatoes. (2 marks)

i. _____.

ii. _____.

b) State **one benefit of each practice**. (2 marks)

_____.

6. A maize farmer observed that weeds were competing with crops for nutrients.

a) Identify **two types of weeds** that may be present in the farm. (2 marks)

i. _____.

ii. _____.

b) State **two methods of controlling weeds**. (2 marks)

i. _____.

ii. _____.

7. A farmer harvested maize too early and experienced low yields.

a) State **one factor that determines the correct harvesting time**. (1 mark)

_____.

b) Give **two signs that maize is ready for harvesting**. (2 marks)

i. _____.

ii. _____.

8. A student plans to start a poultry farming business.

a) Name **one factor of production required**. (1 mark)

_____.

b) State **two sources of capital** for the enterprise. (2 marks)

i. _____.

ii. _____.

SECTION B (50 MARKS)

Answer all questions provided in this section.

1. A farmer in Uasin Gishu County owns a 5-acre piece of land. He wants to grow wheat but is unsure about the suitability of his land.

a) Explain **four natural factors** he should consider before planting wheat. (8 marks)

- i. _____.
- ii. _____.
- iii. _____.
- iv. _____.

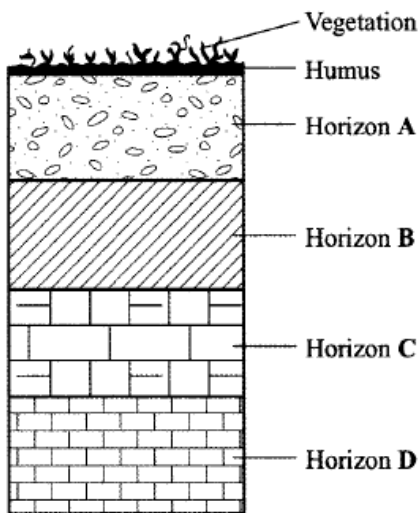

b) Explain **two ways the farmer can improve land productivity**. (2 marks)

- i. _____.
- ii. _____.

2. During a field trip, learners observed the following soil profile:

a) What is soil profile? (2mks)

b) Below is a diagram of soil profile, label the parts A to D. (4 marks)

- A. _____.
- B. _____.
- C. _____.
- D. _____.

c) Describe **three characteristics of the topsoil layer**. (3 marks)

- i. _____.
- ii. _____.
- iii. _____.

d) Explain **two importance of soil profile in crop production**. (2 marks)

- i. _____.
- ii. _____.

11. A farmer in Machakos County practices **minimum tillage** due to frequent droughts.

a) Describe **three activities involved in primary cultivation**. (3 marks)

- i. _____.
- ii. _____.
- iii. _____.

b) Explain **three advantages of conservation tillage**. (6 marks)

- i. _____.
- ii. _____.
- iii. _____.

c) State **one tertiary operation** carried out before planting. (1 mark)

_____.

_____.

12. The diagram below shows a tomato plant undergoing pruning.

Before pruning

After pruning

a) Explain **three reasons for pruning tomato plants**. (6 marks)

- i. _____.
- ii. _____.
- iii. _____.

b) Describe **two methods of top-dressing fertiliser application**. (4 marks)

- i. _____.
- ii. _____.

13. A group of learners established a cabbage nursery and later sold the produce in a local market in Nakuru.

a) Describe **four steps followed in preparing a nursery bed**. (4 marks)

- i. _____.
- ii. _____.

- iii. _____.
- iv. _____.

b) Explain **two advantages of raising crops in a nursery**. (4 marks)

- i. _____.
- ii. _____.

c) Outline **two ways of preparing agricultural produce for marketing**. (2 marks)

- i. _____.
- ii. _____.
