INTRODUCTION

The Kenya Institute of Curriculum Development (KICD) has also developed a Basic Education Curriculum Framework (BECF) which factors on regular education and special needs education to help educators and stakeholders get a better understanding of the curriculum reforms to enhance its efficient delivery. The BECF has adopted the Competency Based Curriculum (CBC). The CBC has been informed by various policy documents such as Kenya Vision 2030, Constitution of Kenya 2010, the Task Force report on the Re-alignment of the Education Sector and the Sessional Paper No. 2 of 2015 on 'Reforming Education and Training. Other documents that informed the curriculum reforms include documents on the 21st Century skills, the harmonization of curriculum for the East African Countries, the Sustainable Development Goals and KICD needs assessment report 2016 among other.

The Institute has developed curriculum designs for Early Years Education (EYE) and Middle school (Grade 4) for learners with special needs and disabilities as part of the curriculum reforms materials. To ensure effective delivery of The Institute has developed curriculum designs for Early Years Education (EYE) and Middle school (Grade 4) for learners with special needs and disabilities as part of the curriculum reforms materials. To ensure effective delivery of the curriculum, the Institute has organised elaborate trainings programmes for teacher of learners with special needs and disabilities.

KICD has developed this Training Manual to facilitate training for teachers of learners with special needs and disabilities for effective curriculum implementation.

AIMS OF THE TRAINING

The aims of the training are to:

- a) equip teachers of learners with SNE and disabilities with the necessary knowledge, skills and attitudes to effectively implement the Competency Based Curriculum;
- b) equip teachers of learners with SNE and disabilities with skills to facilitate differentiated inclusive learning to ensure that all learners are wholly engaged in the learning process.

FOCUS OF TRAINING

- The training will focus on the Basic Education Curriculum Framework which is the road map for the curriculum reforms.

- Interpretation of the adapted, specialized and specialist curriculum designs, integration of ICT and the preparation and use of professional documents.

HOW TO USE THE MANUAL

The Facilitators Manual guides the teacher on how to implement the curriculum designs for learners with special needs and disabilities. It provides the facilitators with a programme for training the teachers. It outlines; the different session to be covered and provides session outcomes, the key Areas to cover in each session and gives suggestion on strategies that can be employed. Also provided for the facilitator is the Facilitators Notes for each session to guide on what is expected to be covered in the training. The facilitator should plan where to plug-in questions during the training to ensure that participants are following the concepts being presented. Mainstream ICT in teaching and learning is emphasized in the manual. The facilitator should ensure he or she use ICT in his or her presentation. Highlighted also is the importance of preparing and use of professional documents.

The manual is an important reference material for facilitators. However, the facilitator will also have to use the Basic Education Curriculum Framework, the regular, adapted and specialized curriculum designs alongside this manual to effectively training. The facilitator is advised to read the manual before embarking into the training. The manual will help in preparation for the training and provides **suggestions** for activities that the facilitator can use. The facilitator is advised to choose the activities that he or she are able to carry out depending on his or her situation and environment. The facilitator **should** use competency based approaches to facilitate the trainings.

The facilitator should assign group activities to teachers of respective categories of learners with SNE. During the training sessions, participants can also be put in groups based on learning areas. These groups may remain until the end of the training.

A sample programme for training has been provided. The facilitator can adjust the programme depending on the amount of time available. Micro teaching should be carried out to give the participants opportunities to practice what is learnt.

Where charts, ICT devices and other resources are suggested in the manual, the facilitator should plan ahead of the session to have them available

during the session. The facilitator may use other relevant materials that are not mentioned in the manual

TRAINING PROGRAMME

TIME	ACTIVITY	SESSION CHAIR	FACILITATOR
	DAY 1		
8.00-8.30am	- Registration of participants - Introduction - Opening remarks - Ground rules - Workshop Objectives		
8.30-10.30am	Session 1: Basic Education Curriculum Framework		
10.30-11.00 am	TEA BREAK		
11.00 am – 1.00 pm	Competency based curriculum for learners with special needs		
1.00pm - 2.00pm	LUNCH BREAK		
2.00pm– 4.30pm	Interpretation of the curriculum designs - National Goals of Education - Level learning outcomes - Essence statements - Learning area general learning outcomes		
4.30pm -5.00 pm	TEA BREAK		
	DAY TWO		
8.00am-8.30 am	Registration of participants		
8.30 -10.30 am	Components of the curriculum designs (Cont.) - Strands and sub-strands. - Specific Learning Outcomes - Learning Experiences		

	• Key Inquiry Questions		
10.30-11.00 am	TEA BREAK		
11.00 -1.00 pm	Components of the curriculum designs (Cont.) • Core Competencies to be developed • Link to Pertinent and Contemporary Issues • Link to Values • Link to other learning areas/subjects • Non Formal Activities to support learning • Suggested Community Service Learning • Learning resources		
1.00 – 2.00pm	LUNCH BREAK		
2.00pm – 4.30 pm	Competency Based Assessment		
4.30pm	TEA BREAK		
	DAY THREE		
8.00am – 8.30am	Registration		
8.30am-10.30am	Competency Based Assessment		
10.30am-1.00am	TEA BREAK		
11.00 am -1pm	ICT integration		
1.00 -2.00pm	LUNCH BREAK		
2.00 – 4.30 pm	Professional Documents Individualized Education Programme		
4.30 – 5.00	TEA BREAK		
	DAY FOUR		
8.00 – 8.30 am	Preliminaries		
8.30 – 10.30 am	Professional Documents (cont.) Schemes of work		

10.30 – 11.00	TEA BREAK		
11.00 – 1.00 pm	Professional Documents (cont.) Lesson Plan		
1.00 – 2.00 pm	LUNCH BREAK		
2.00 4.30 pm	Professional Documents (cont.) Record of Work		
4.30 – 5.00 pm	TEA BREAK		
	DAY 5		
8.00am – 8.30am	Registration		
8.30am – 1.00 pm	Micro teaching		
1.00pm – 2.00pm	Lunch Break		
2.00pm – 3.00pm	Closing Ceremony		

SESSION 1: BASIC EDUCATION CURRICULUM FRAMEWORK

Session Outcomes

By the end of the session, the participant should be able to:

- a) Discuss the Basic Education Curriculum Framework as the road map to the implementation of the reformed curriculum.
- b) Appreciate the Basic Education Curriculum Framework for effective implementation of curriculum.

Key Areas to be covered

Basic Education Curriculum Framework

- Vision and Mission statements
- Pillars of the BECF
- Core competencies
- Organisation of Basic Education
- Learning areas for Early Years Education and foundation level
- Learning areas for grade 4 and intermediate level.

Suggested Learning Experiences

- Buzz on the Vision and Mission statements
- In groups discuss the Pillars of BECF
- Brainstorm on the importance of the Core Competencies
- Discuss the organisation of Basic Education
- Question and answer

Facilitator's Notes

Vision: Engaged, Empowered, and Ethical Citizen

This entails World Class Standards, Sustainable Visionary Curriculum, Resources, Excellent teaching and Excellent School Environment.

Mission: Nurturing Every Learner's Potential.

This involves identification and nurturing of potentials which will ensure the success of all learners.

The three pillars of CBC

Values	Guiding Principles	Theoretical Approaches
• Love • Responsibility • Respect • Unity • Peace • Patriotism • Social Justice • Integrity	• Opportunity • Excellence • Diversity and Inclusion • Parental Empowerment and Engagement • Community Service Learning • Differentiated Curriculum & Learning	• The Instructional Design Theory • Vygotsky's Social-Cultural Theory • Gardner's Multiple Intelligences Theory • Piaget's Theory of Cognitive Development

Values

Values are standards that guide people on how to respond or behave in each situation. They influence how someone feels, acts and makes choices in life. The responsibility for **nurturing values** rests with parents, school and the community. Everybody in the school has a role to play in helping the learner to nurture values. This approach is referred to as 'The whole school approach to value based education'. The overall goal of values-based education is 'To nurture values in learners to become empowered, engaged and ethical citizens for positive and holistic transformation of society'. The teacher therefore has an important role to play in nurturing values through teaching.

Core Values

According to the Competency-Based Curriculum there are eight core values to be nurtured in the learner namely:

Love

Love is generally defined as strong feelings and expressions of affection towards a person or a thing. Love enables the learner to possess and exhibit virtues such as compassion, self- sacrifice, generosity, selflessness and empathy.

Responsibility

Responsibility refers to recognition of one's role and function.

Responsibility involves caring for personal property, engaging in assigned roles and duties at home, school and in the wider community. A responsible person exhibits qualities such as accountability, hard work, resilience, diligence, self-drive, persistence, determination, excellence and doing their best always.

Respect

Respect is having positive regard towards self, others and property without bias. This value is nurtured through humility, patience, acceptance, open mindedness, etiquette and delayed gratification.

Unity

Unity is the ability to live together harmoniously regardless of social, cultural, racial, religious, economic and political differences. This value can be nurtured through cooperation, respect, equity, equality, non-discrimination, fairness, inclusion and responsibility.

Peace

Peace is a state of tranquillity and harmony with oneself and among people. One can model peace by creating an atmosphere of love, respect, tolerance, justice and solidarity. Peace enhances virtues such as compassion, care, responsibility, love and empathy.

- **Patriotism**

Patriotism refers to loyalty, love and devotion to one's country or nation.

Patriotism calls for readiness to defend one's country, obey its laws, respect fellow citizens and speak well of it.

- **Social Justice**

Social justice refers to fair treatment of each other and promotion of equity.

Social justice promotes other virtues such as human dignity, equity, solidarity and elimination of inequalities.

- **Integrity**

Integrity refers to the ability of a person to demonstrate acceptable behaviour. A person of integrity exhibits commitment, courage, honesty and ethical conduct. Thus, integrity is wholeness of character, uprightness of one's actions, speech and their totality of life.

Guiding Principles

The Competency Based Curriculum is based on the following core competencies:

Opportunity

In order to achieve the reform vision and mission, the curriculum provides learners with a variety of opportunities to enable them to identify their needs, talents and potential. This enables them to participate in the world of work and the development of the nation. The emphasis is on equal access to education for all that enables learners to enjoy learning and reduce wastage in terms of dropping out of school because the curriculum is not relevant to their needs.

Excellence

Learners are nurtured to excel in their areas of greatest interest and ability. The Framework values excellence and competitiveness rather than raw competition for examination grades, thereby reducing the challenge of malpractice in examinations because learners are guided to excel in their areas of interest and ability.

Diversity and Inclusion

Differentiated learning recognizes that learners learn differently and benefit from differentiated learning techniques in the classroom. It shifts focus from the “one-size-fits-all” approach to learning. The teacher, therefore, should employ varied learning experiences to cater for the different learning styles among learners. Ultimately, this will lead to improved learning outcomes.

Parental Empowerment and Engagement

There is great recognition that parents play a pivotal role in determining the success of a child’s education. They are expected to be the first and best nurturers, stimulators and educators of their children. They have a shared responsibility with schools to provide an enabling environment that is conducive to learning and which motivates the child to achieve their full potential. Home should provide a platform for the learner to practice what was learnt in school.

The new dimension focuses in learning of the learner as opposed to teaching. Learning should continue wherever the learner is. A learner is a natural explorer and the parents should therefore provide moral support, resources required for stimulation, exploration and development of competencies. Parents need to know that the focus is more on formative as

opposed to summative assessment. Learners will not be competing against each other but against themselves so as to reach their highest potential. They should support learners in identification and nurturing of talents and in determining the learner's career identification and progression.

KICD has developed P E & E Framework which will provide further guidance on how schools can empower parents to contribute to the learning outcomes of their children and to be engaged at all levels of Basic Education.

Community Service Learning

These are learning experiences where learners are given opportunities to apply the acquired knowledge and skills to solve an identified problem within the community while at the same time improving own learning outcomes e.g. learners identify struggling readers in the family/ neighbourhood and teach them how to read.

Differentiated Curriculum and Learning

Learning Approach based on the fact that students differ in their:

- Learning styles
- Needs and interests
- Strengths and abilities
- Learning pace
- Classroom activities should be adapted to meet these differences.

Core Competencies

Competency is conceptualized as the ability to apply appropriate knowledge and skills to successfully perform a function. Kenya has adopted seven Core Competences which will enable the learner acquire and the 21st Century skills. Seven core Competences have been identified in Basic Education Curriculum Framework. They include:

Learning to learn

The individual develops skills for self- development through exploration, collaboration and interaction with peers and the immediate environment, at their operational levels and pace.

Communication and collaboration

An individual who responds to sensory stimuli appropriately and expresses self verbally and / or non-verbally in varied contexts. The individual interacts with peers and significant others in solving intra and inter personal problems within the immediate environment.

Imagination and creativity

An individual who engages in imaginative and creative activities for self-reliance.

Digital literacy

An individual who uses technology safely and legally for enjoyment, entertainment and socialization to enhance learning.

Self-efficacy

An individual who spontaneously construct self-confidence leading to internal motivation capable of performing tasks and manage situations in the environment.

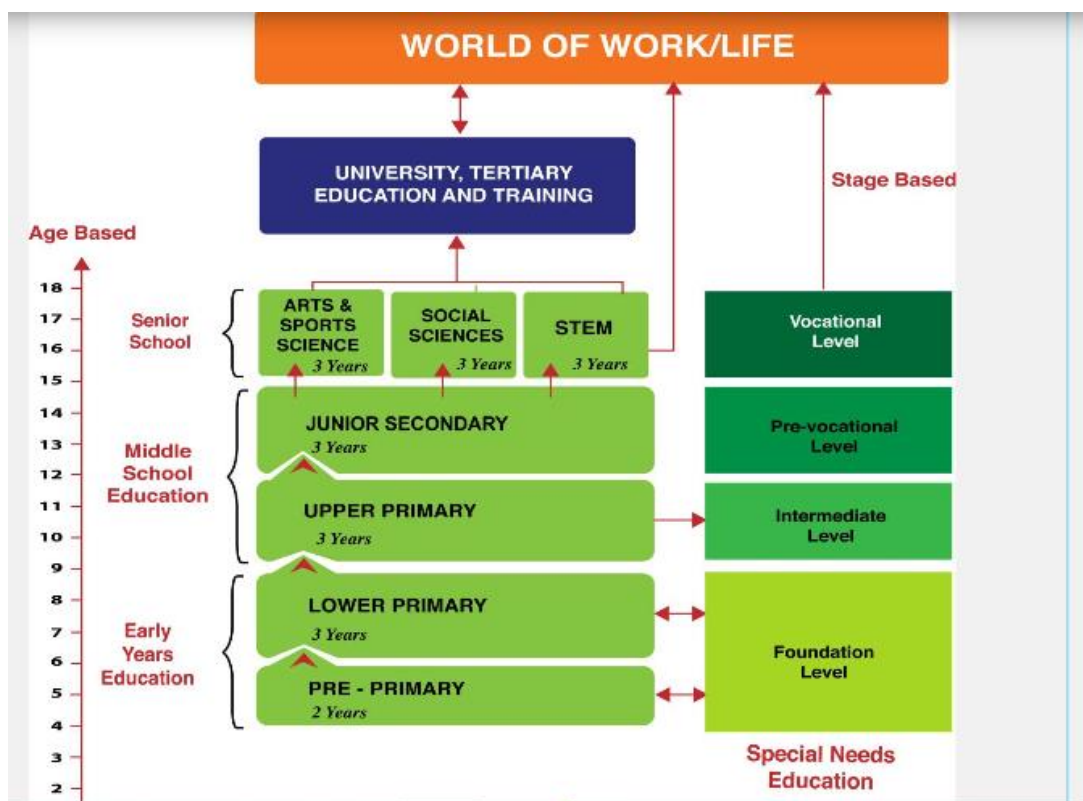

Citizenship

An individual who is continuously mentored to be ethical and responsible to respect diversity for adaptation in the environment.

Critical thinking and problem solving

An individual who attempts to apply reasoning to solve problems at their own and immediate environments.

Organization of Basic Education

Early Years Education

The Early Years Education Level comprises two years of pre-primary and three years of lower primary school education for the regular curriculum and the foundation level for the stage based curriculum for learners with special needs.

This is illustrated in figure 3.

EARLY YEARS EDUCATION

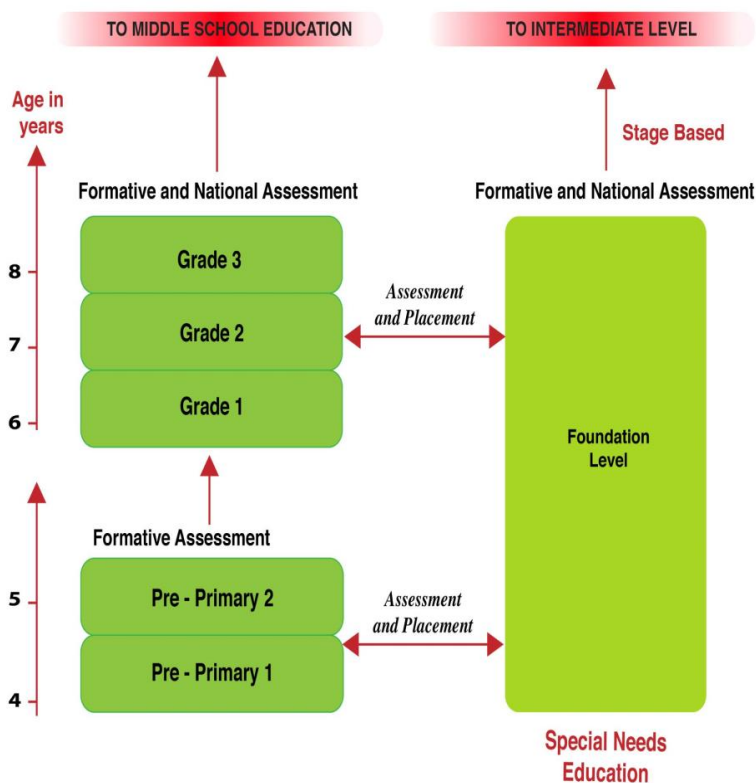

Figure 3:

Learning Outcomes for Early Years Education

By the end of Early Years Education, the learner should be able to:

1. Demonstrate basic literacy and numeracy skills for learning.
2. Communicate appropriately using verbal and/or non-verbal modes in a variety of contexts.
3. Demonstrate appropriate etiquette in social relationships.
4. Apply creativity and critical thinking skills in problem solving.
5. Explore the immediate environment for learning and enjoyment.
6. Practice hygiene, nutrition, sanitation and safety skills to promote health and wellbeing.
7. Develop emotionally, physically, spiritually, morally and aesthetically for balanced living.
8. Appreciate the country's rich and diverse cultural heritage for harmonious co-existence.
9. Apply digital literacy skills for learning and enjoyment.

Pre-primary Education

All learners are expected to begin their education at this level. It is a two-year programme.

Learning areas for Pre-primary

1. Language Activities
2. Mathematical Activities
3. Environmental Activities
4. Psychomotor and Creative Activities
5. Religious Education Activities
6. Pre Braille Activities

NB: Digital literacy and pertinent and contemporary issues are integrated across all learning areas.

Learning areas for the lower primary

The learners from pre-primary 2 will join lower primary in grade 1 at about 6 years of age and spend 3 more years in this part of Early Years Education before exiting to middle school at the end of grade 3.

Learning areas for Lower Primary

The learning areas in lower primary are:

1. Literacy Activities/ Braille Literacy Activities
2. Kiswahili Language Activities/Kenya Sign Language for learners who are deaf
3. English Language Activities
4. Mathematical Activities
5. Environmental Activities
6. Hygiene and Nutrition Activities
7. Religious Education Activities
8. Movement and Creative Activities

Note

- ICT serves as a learning tool in all areas.
- Pertinent and contemporary issues are mainstreamed in all learning areas.

Learning Outcomes for the Foundation Level

By the end of the Foundation Level, the learner should be able to:

- a) demonstrate basic literacy and numeracy skills for learning;
- b) communicate appropriately using verbal and or non-verbal modes in varied contexts;
- c) demonstrate appropriate etiquette in social relations;
- d) apply basic creativity and critical thinking skills in problem solving;
- e) explore the immediate environment for learning and enjoyment;
- f) practice hygiene, nutrition and sanitation to promote health and wellbeing;
- g) demonstrate the acquisition of emotional, physical, spiritual aesthetic and moral development for balanced living;
- h) demonstrate appreciation of the country's rich and diverse cultural heritage for harmonious co-existence;

Learning Areas for the Foundation Level

The following learning areas will be offered at the foundation level:

- 1. Communication, Social and Pre-Literacy Skills
- 2. Activities of Daily Living Skills and Religious Education
- 3. Sensory Motor and Creative Activities
- 4. Orientation and Mobility
- 5. Pre-Numeracy Activities

Middle School Education

This level comprises three years of upper primary and three years of junior secondary education. The corresponding levels for the stage-based curriculum for learners with special needs are the intermediate and pre-vocational levels. This is illustrated in Figure 4.

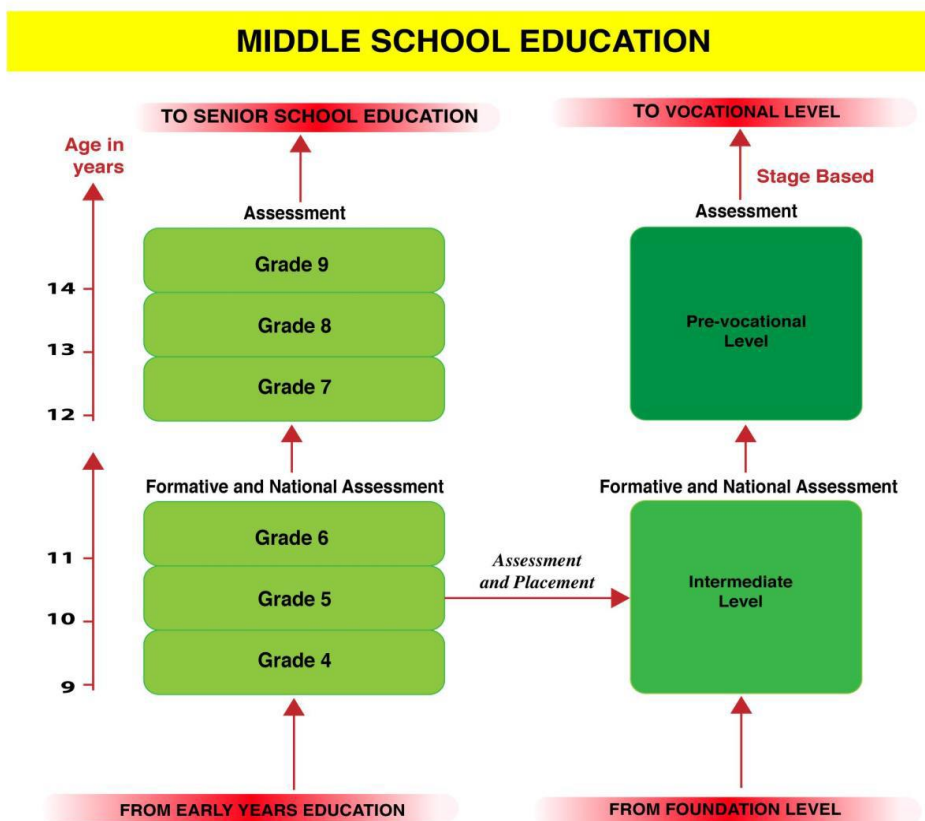

Figure 4:

Learning Outcomes for Middle School

By the end of middle school, the learner should be able to:

1. Apply literacy, numeracy and logical thinking skills for appropriate self-expression.
2. Communicate effectively, verbally and non-verbally, in diverse contexts.
3. Demonstrate social skills, spiritual and moral values for peaceful co-existence.
4. Explore, manipulate, manage and conserve the environment effectively for learning and sustainable development.
5. Practice relevant hygiene, sanitation and nutrition skills to promote health.
6. Demonstrate ethical behaviour and exhibit good citizenship as a civic responsibility.
7. Appreciate the country's rich and diverse cultural heritage for harmonious co-existence.
8. Manage pertinent and contemporary issues in society effectively.

9. Apply digital literacy skills for communication and learning.

Learning areas for Upper Primary

1. English
2. Kiswahili or Kenya Sign Language
3. Home Science
4. Agriculture
5. Science and Technology
6. Mathematics
7. Religious Education (CRE/IRE/HRE)
8. Creative Arts
9. Physical and Health Education
10. Social Studies

Optional

11. Foreign Languages (Arabic, French, German, Mandarin)
12. Indigenous languages
13. Sign Language
14. Braille literacy

NB

- ICT is cross cutting in all learning areas.
- Pertinent and contemporary issues and life skills are mainstreamed in all learning areas.
- A pastoral program of instruction is conducted once a week.

Learning Outcomes for The Intermediate Level

By the end of the Intermediate Level, the learner should be able to:

- a) communicate appropriately using verbal and/or non-verbal modes in a variety of contexts;
- b) demonstrate literacy and numeracy skills for learning;
- c) demonstrate appropriate etiquette in social relationships;
- d) apply creativity and critical thinking skills in problem solving;
- e) explore the immediate environment for learning and enjoyment;
- f) practice hygiene, nutrition, sanitation, safety skills to promote health and wellbeing;
- g) demonstrate the acquisition of emotional, physical, spiritual, aesthetic and moral development for balanced living;
- h) demonstrate appreciation of the country's rich and diverse cultural heritage for harmonious co-existence;
- i) apply digital literacy skills for learning and enjoyment.

Learning Areas for the Intermediate Level

The Intermediate Level Curriculum covers the following learning areas:

1. Communication, Social and Literacy Skills
2. Daily Living Skills and Religious Education
3. Sensory Motor Integration
4. Environmental Activities
5. Numeracy Activities
6. Creative Activities
7. Psychomotor Activities

SESSION 2: COMPETENCY BASED CURRICULUM FOR LEARNERS WITH SPECIAL NEEDS

Session Outcomes

By the end of the session, the participant should be able to discuss the curricular that has been developed and adapted for learners with special needs

Key Areas to be Covered

Competency Based Curriculum for learner with special needs.

Curriculum provisions for learners with special needs.

Curriculum that has been adapted for learners with special needs.

The stage based curriculum

Suggested Learning Experiences

1. Discuss different types of curricular for learners with special needs.
2. Brainstorm on the adapted curriculum of learners with special needs.
3. Brainstorm on the stage based curriculum for learners with special needs.
4. Question and answer.

Facilitator's Notes

Competency-Based Curriculum for Learners with Special Needs

The special needs education curriculum model illustrated below indicates curriculum provision for learners with special needs.

Special Needs Education Curriculum Model

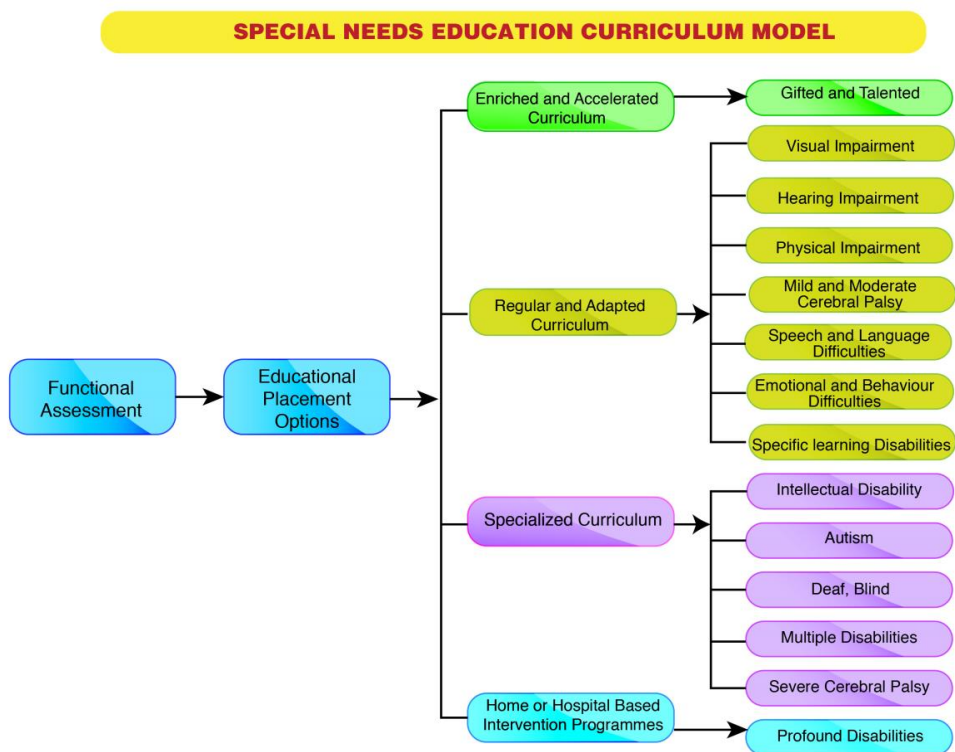

Figure 5

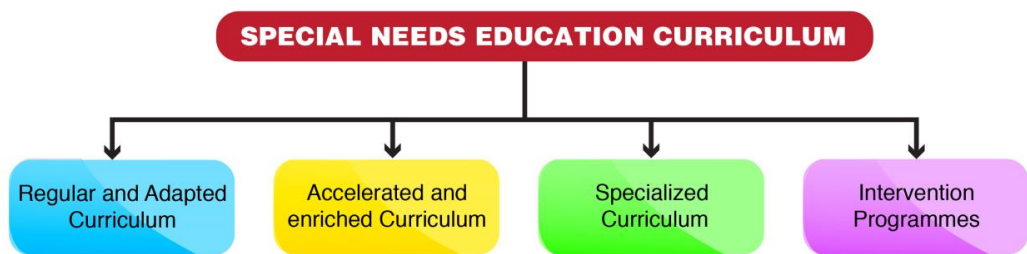

Learners with special needs are a heterogeneous group. Even within each disability there are intra-group differences. These differences are as a result of differences in;

- Type of disability
- Severity of the disability
- Age of onset of the disability
- Learning ability of the learner

Curriculum Provisions For Learners With Special Needs.

Figure 5 below shows the curriculum provisions for learners with special needs.

Competency-based Curriculum will be provided to learners with special needs in the following modalities.

- 1) Adapted Curriculum
- 2) Specialized Curriculum
- 3) Specialist Curriculum
- 4) Accelerated and enriched curriculum
- 5) Intervention programmes

Adapted Curriculum

This refers to modification of the regular curriculum designs to meet the needs of a specific category of learners with special needs.

The modifications include adaptation of:

- the specific learning outcomes
- the content
- the learning experiences
- the learning resources
- modes of assessment

Specialized Curriculum

This is a curriculum that is totally different from the regular curriculum designed to meet the unique needs of specific categories of learners with special needs who may not follow the regular curriculum. This curriculum targets learners with severe intellectual disability, deafblindness, severe autism, severe cerebral palsy and those with multiple disabilities.

Specialist Curriculum

This is a curriculum meant to support specific categories of learners with special needs to access the curriculum. Examples of this curriculum include braille skills for learners with visual impairments and Sign Language for learner who are deaf.

Enriched and Accelerated Curriculum

Curriculum enrichment entails providing additional or advanced content, resources and assessment to learners who are gifted and talented.

Acceleration on the other hand is a strategy that allows a learner who is gifted and talented to progress through school at a faster than usual rate and/or younger than typical age. Forms of acceleration include subject acceleration, grade skipping, early entry, telescoping and radical acceleration for the highly gifted.

Intervention Programmes

Intervention Programmes are developed to guide teachers, parents and caregivers in providing appropriate training and care for learners with profound disabilities who are usually homebound, bed-ridden or hospitalized. These programmes also address learners with severe disabilities living in the slums, rural areas and arid and semi-arid areas with the view that they will be enrolled by the school in the long run.

Curriculum that has been Adapted for Learners with Special Needs.

The following learning areas have been adapted for learners with Visual Impairment, Hearing Impairment and Physical Impairments.

Category of Learners	Pre-Primary	Lower Primary
Visual Impairment	Mathematic activities	Mathematic activities
	Environmental activities	Environmental activities
	Psychomotor activities	Movement and Creative activities
Hearing Impairment	Environmental activities	Environmental activities
	Psychomotor activities	Movement and Creative activities
		English Language activities
Physical Impairment	Mathematic activities	Mathematic activities
	Environmental activities	Environmental activities
	Psychomotor activities	Movement and Creative activities

Note: The following learning areas have not been adapted and therefore will be taken by learners with special needs without adaptation

Category of Learners	Pre-Primary	Lower Primary
Visual Impairment	Language activities	English language Activities
	Religious education activities	Kiswahili Language Activities
		Religious Education activities
		Hygiene and Nutrition
		Literacy Activities
Hearing Impairment	Mathematic activities	Hygiene and Nutrition
	Religious education activities	Mathematic Activities
	Language Activities	Religious education activities
		Movement and Creative activities
		Literacy activities
Physical Impairment	Language activities	English language activities
	Religious education activities	Kiswahili language activities
		Hygiene and nutrition
		Religious Education Activities
		Literacy activities

Specialist Curriculum that has Been Developed for Learners with Special Needs.

Specialist curriculum has been developed for learners who are blind and those who are deaf in the following learning areas.

Category of learners	Pre-primary	Lower primary	Grade 4
Visual impairment	Pre Braille activities	Braille Literacy	Braille skills
Hearing impairment	Kenyan Sign Language	Kenyan Sign Language	Kenyan sign language

The Stage Based Curriculum for Learners with Special Needs

Learners with special needs who may not follow the regular curriculum include those with intellectual disability, deafblindness, autism, severe cerebral palsy, multiple and profound disabilities. The Basic Education Curriculum Framework provides a different pathway for these learners which is stage-based rather than age-based. The Curriculum is organised into 4 levels namely Foundation, Intermediate, Pre-vocational and Vocational levels.

Specialized curriculum has been developed for the foundation and intermediate levels in the following learning area.

Category of learners	Foundation Level	Intermediate Level
Intellectually Difficulties (Intellectual disabilities, deaf blindness, severe autism, cerebral palsy and multiple disabilities.)	• Communication, social and pre-literacy skills • Sensory integration and creative activities • Activities of daily living skills • Pre numeracy skills • Orientation and mobility skills	• Communication, social and pre-literacy skills • Daily Living Skills and Religious Education • Sensory motor and creative Activities • Orientation and Mobility Skills • Pre-numeracy Activities • Environmental Skills • Psychomotor Activities

Note: During group activities, teachers of learners with special needs should be put in groups as per the categories of learners they teach in order to be taken through the adapted and specialist curriculum designs.

SESSION 3: INTERPRETATION OF THE CURRICULUM DESIGNS

Session Outcomes

By the end of the session, the participants should be able to:

- a) identify the components of the curriculum designs for appropriate implementation of the curriculum.
- b) interpret the curriculum designs for effective implementation.

Key Areas to be covered

Components of the curriculum design

- National Goals of Education
- Level Learning Outcomes
- General Learning Outcomes
- Essence Statements

Suggested Learning Experiences

1. Brainstorm on the meaning of curriculum designs.
2. Discuss different components of the curriculum designs.
3. Question and answer.

Facilitators Notes

Curriculum Designs

Curriculum designs refer to a document that outlines what is to be learnt in a given learning area.

The components of the curriculum designs are as discussed below.

National Goals of Education

The Competency- Based Curriculum is anchored on the National Goals of Education in Kenya. There are 8 national goals as discussed below.

1. Foster nationalism, patriotism, and promote national unity

Kenya's people belong to different communities, races and religions and should be able to live and interact as one people. Education should enable the learner acquire a sense of nationhood and patriotism. It should also promote peace and harmonious co-existence.

2. Promote social, economic, technological and industrial needs for national development

Education should prepare the learner to play an effective and productive role in the nation.

a) Social Needs

Education should instill social and adaptive skills in the learner for effective participation in the family, community, national, regional and international development.

b) Economic Needs

Education should prepare a learner with requisite competencies that support a modern and independent growing economy. This should translate into high standards of living for every individual.

c) Technological and Industrial Needs

Education should develop in the learner necessary competencies for technological and industrial development for the nation in tandem with global trends.

3. Promote individual development and self-fulfillment

Education should provide opportunities for the learner to develop to the fullest potential. This includes development of one's interests, talents and character for positive contribution to the society.

3 Promote sound moral and religious values

Education should promote acquisition of national values as enshrined in the Constitution of Kenya. It should be geared towards developing a self-disciplined and ethical citizen with sound moral and religious values.

5. Promote social equity and responsibility

Education should promote social equity and responsibility. It should provide inclusive and equitable access to quality and differentiated education; including for learners with special educational needs and disabilities. Education should also provide the learner with opportunities to develop and practise shared responsibility and accountability through community service learning.

5. Promote respect for and development of Kenya's rich and varied cultures

Education should instill in the learner appreciation of Kenya's rich and diverse cultural heritage. The learner should value own culture while at the same time respect other people's cultures. In this way, the learner will embrace positive cultural practices in a dynamic society.

6. Promote international consciousness and foster positive attitudes towards other nations

Kenya is part of the interdependent network of diverse peoples and nations. Education should empower the learner to respect, appreciate and participate in the opportunities within the international community. Education should also enable the learner to operate within the international community with full knowledge of the obligations, responsibilities, rights and benefits that this membership entails.

7. Promote positive attitudes towards good health and environmental protection

Education should inculcate in the learner the value of physical and psycho-social well-being for self and others. It should promote environmental preservation and conservation, including animal welfare, for sustainable development.

Level learning outcomes

Learning outcomes indicate the expected observable behavioural changes in the learner after a learning experience. Outcomes are usually expressed through the application of knowledge, skills, attitudes and values. Learning outcome should have:

- Action verb
- The object
- The context

Level Learning outcomes are the demonstrable end results expected in the learner after having gone through a **specific level** of CBC education for example Early Years, Middle School and Senior School Education. They are stated in general terms. (Refer to session 1 for Early years, Middle school level education, foundation and Intermediate level)

Examples of level learning outcomes for various levels of education

Early Years Education Level

- demonstrate basic literacy and numeracy skills for learning;
Middle school level
- Communicate effectively, verbally and non-verbally, in diverse contexts.
Foundation level
- explore the immediate environment for learning and enjoyment;
Intermediate level

- practice hygiene, nutrition, sanitation, safety skills to promote health and wellbeing;

General Learning outcome of a Learning Area

These learning outcomes indicate what the learner is expected to achieve in a given learning area.

Examples of General learning outcomes for various learning areas

Grade 2: Hygiene and Nutrition

General Learning Outcome; The learner should be able to practice hygiene, proper sanitation and safety to promote health and well-being.

Grade 4: Social Studies

General Learning Outcome; The learner should be able to participate in Community Service Learning to manage pertinent and contemporary issues in society effectively

Foundation Level: Communication social and pre-literacy skills

General Learning Outcome; The learner should be able to use cues, signs and common signals in communication for effective social interaction;

Essence Statements

An essence statement gives a general overview of a Learning Area. It summarizes the fundamental ideas of each learning area. It also explains the **rationale and justification** of inclusion of the Learning Area in the curriculum.

(Refer to the curriculum designs for a learning area of your choice and analyse the essence statement)

SESSION 4: INTERPRETATION OF THE CURRICULUM DESIGNS CONT'D

Session Outcomes

By the end of the session, the participant should be able to:

- a) discuss the components of the curriculum designs for appropriate implementation;
- b) illustrate interrelationship between national goals of education, level learning outcomes, general learning outcomes, strands, sub-strand, specific learning outcomes and key inquiry questions.

Key Areas to be Covered

- Strand and Sub Strand
- Specific Learning Outcome
- Suggested Learning Experiences
- Key Inquiry Question(s)
- interrelationship between national goals of education, level learning outcomes, general learning outcomes, strands, sub-strand, specific learning outcomes and key inquiry questions.

Suggested Learning Experiences

1. Participants brainstorm in pairs on meaning of strand and sub-strand and identify how they are different from topic and sub-topics.
2. In pairs, participants identify components of a specific learning outcome.
3. In groups learners develop specific learning outcomes.
4. Participants identify specific learning outcomes in the designs and highlight the action verb, the object and the context.
5. Brainstorm on the suggested learning experiences and how they can be adapted to suit learners with hearing, visual and physical impairment.
6. In pairs brainstorm on the meaning and importance of Key Inquiry Questions.
7. Pick a learning area from the designs and identify level learning outcomes, general learning outcome for the learning area, strand, sub-strand, specific learning outcomes, learning experiences and key inquiry questions. Establish the linkage between the various components.

Facilitator's Notes

Strand and Sub-Strand

A Strand is a broad area of study within a specific learning area. It is a consistent idea or concept that runs through the learning area and across various levels of education.

A sub-strand represents smaller concepts within the Strand.

Specific Learning Outcomes

Specific learning outcomes indicate the expected observable changes in the learner after covering a sub-strand or a lesson. They specify what the learner should know, is able to do and demonstrate after participating and completing a given sub-strand or lesson.

A specific learning outcome should have the following components:

1. Action Verbs such as *identify, name, list*.

Example:

By the end of the sub-strand, the learner should be able to:

- a) **identify** types of waste in the school environment
- b) **collect** waste in the school to care for the environment
- c) **appreciate** cleanliness in the school environment

The verbs represent the three domains of learning including knowledge, skills and attitudes.

2. Object of the verb

The outcome should also have an object, which answers the question "what"

Example

- identify **types of waste** in the school environment
- collect **waste in the school** to care for the environment
- appreciate **cleanliness** in the school environment

3.The Context

The outcome also has a context, which answers the questions "why", "where", "how" and "when"

Example

- identify types of waste **in the school environment**
- collect waste in the school **to care for the environment**
- appreciate cleanliness **in the school environment**

Suggested Learning Experiences

Learning refers to a **relative permanent change** of behaviour as a result of interactions with the environment.

Learning Experiences refers to interaction between the learner and the environment to facilitate learning. A learner is exposed to situations and activities so as to develop desired knowledge, skills, values and attitudes. The learning experiences could be:

- **Formal:** Experiences the learner is engaged in during the lesson.
- **Non-formal:** these are structured activities taking place in or outside the school to reinforce what is learnt during the lesson.
- **Informal** which entails general school and home social interactions.

Learning experiences enable the learner to:

- acquire knowledge and develop skills, values and attitudes
- develop the intended core competencies
- self-regulate and evaluate
- engage deeply in the learnt concepts
- reflect on the learning process
- interact with others during the learning process.

Factors to consider when selecting learning experiences

- Relevance to the learning outcomes
- Developmental age level
- Learning resources available
- Safety
- Size of the class
- Time required for the experience

Examples of adapted learning experiences

Grade 4

Learning area: Mathematics
Strand: Measurement
Sub-strand: Length

Learning outcomes

By the end of the sub-strand, the learner should be able to:

a) use the kilometre (km) as a unit of length in real life.

Learning Experiences adapted for learners with visual impairments

- In pairs or groups learners with visual impairment could be guided to explore a calibrated ruler for familiarization
- in pairs or groups, learners with low vision to identify the symbol of the kilometre (km) as a unit of distance by first guiding them to write the symbol in their square exercise books with bold rule lines while learners with blindness could be guided to write the symbol in Braille
- in pairs or groups, learners with low vision could be guided to relate kilometres to metres using conversion tables with appropriate colour contrast and font size while learners with blindness to do so by using Braille work cards.
- Learners with visual impairment could be guided to write symbols representing the metre and centimetre in both print and Braille

Activity:

1. Refer to the adapted curriculum designs and identify adapted learning experiences for learners with hearing and physical impairments.
2. Refer to the Foundation Level and Intermediate Level and identify learning experiences.

Key Inquiry Question(s)

These are questions that the teacher poses and models to help the learner focus on the subject matter. The foundation of the key inquiry questions is Inquiry-Based Learning which is associated with the idea 'involve me and I understand'. Key inquiry questions are important to the lesson since they are used to probe for deeper meaning through questioning that fosters critical thinking and problem solving skills.

Writing Key Inquiry Questions

In writing the key inquiry questions, the teacher should utilize Why and How question?

A key inquiry question should:

- be clear, relevant and suitable for the level
- focus on the specific learning outcomes as given in the curriculum designs

- enable the learner to think critically

Characteristics of Key Inquiry Questions

Key Inquiry Questions should:

- be open ended, non-judgmental, meaningful and purposeful with an aim to allow the learner to explore ideas.
- Elicit varied responses from the learners (there is no one correct answer)
- be used to explore the environment
- be used to help learners construct knowledge by themselves
- encourage collaboration amongst learners
- integrate technology to support the learning process
- be thought provoking and intellectually engaging, often sparking discussion and debate among learners.
- call for higher-order thinking, such as analysis, inference, evaluation, prediction and critique.
- point towards important, transferable ideas within and across learning areas.
- raise additional questions, debate, discussion and spark further inquiry.
- support and justify an idea, not just giving an answer.
- address an authentic problem or issue.
- stimulate ongoing thinking.

A key enquiry question is not:

- A question that can be answered with a “yes” or a “no”
- A question that can be answered without support.
- Blurry (undefined/unclear)

Examples of key inquiry questions

GRADE 4: Science and Technology

Strand: Living Things

Sub-Strand: Plants

Key Inquiry Question: Why are plants classified as living things?

Foundation Level: Activities of daily living skills and Religious Education

Strands: Personal items

Sub-strand: Storage of personal items

Key inquiry question: how do you keep your personal items?

Interrelationship between national goals of education, level learning outcomes, general learning outcomes strands, sub-strands, specific learning outcomes, learning experiences and key inquiry question.

Example:

Foundation Level: Activities of daily living skills and Religious Education

National Goal of Education ↓	Promote positive attitudes towards good health and environmental protection.
Level Learning Outcome ↓	Practice hygiene, nutrition, sanitation to promote health and wellbeing; ↓
Learning Area ↓	Activities of Daily Living Skills and Religious Education ↓
General Learning Outcome ↓	Identify personal items for independent living ↓
Strand ↓	Personal Items ↓
Sub-strand ↓	Grooming items ↓
Specific Learning Outcome ↓	Classify own grooming items according to their use ↓
Key inquiry question ↓	how should we keep ourselves neat? ↓
Learning experiences ↓	Learner could be guided to sort and group their grooming items according to use such as; those used for bathing, brushing teeth, combing hair, controlling drooling. ↓
Assessment Mode	Use observation to assessment learner's ability to sort and group their grooming items according to use

Activity: In groups, use the adapted or specialised curriculum to develop charts showing the Interrelationship between National goals of education, Level learning outcomes, General learning outcomes, strands, sub-strands, specific learning outcomes, learning experiences and key inquiry question(s).

SESSION 5: INTERPRETATION OF CURRICULUM DESIGNS CONT'D

(Core Competencies to be developed, Link to Pertinent and Contemporary Issues, Link to Values, Link to other learning areas/subjects, Non Formal Activities to support learning, Suggested Community Service Learning)

Session Outcomes

By the end of the session, the participant should be able to:

- a) integrate Core Competencies, Values, Pertinent and Contemporary Issues in the learning process.
- b) identify appropriate non-formal and community service activities that support learning.
- c) identify appropriate learning resources for curriculum implementation.

Key Areas to be Covered

- Core Competencies
- Link to Pertinent and Contemporary Issues
- Link to Values
- Link to other learning areas/subjects
- Non Formal Activities to support learning
- Suggested Community Service Learning
- Learning resources

Suggested Learning Experiences

- In groups, participants brainstorm on how to develop the core competencies within the lesson.
- In pairs participants to identify values, PCIs in the curriculum designs and practice mainstreaming them in the learning experiences.
- In groups, participants select a sub-strand in a learning area and identify suitable non-formal and community service activities learners may be engaged in.
- In groups, participants to select a sub-strand in a learning area of choice and identify the learning resources they can use to facilitate achievement of the learning outcomes of that sub-strand.

Facilitators Notes

Core Competencies

The seven core competencies outlined in the Basic Education Curriculum Framework include: Learning to learn, Communication and collaboration, Imagination and creativity, Digital literacy, Self-efficacy, Citizenship, Critical thinking and problem solving. The teacher is expected to use suitable learning experiences to develop these core competencies. The curriculum designs have suggested core competences to be developed in every sub strand.

Example

Grade 4: Music

Strand: PERFORMING

Sub-strand: Songs

Core-competencies to be developed:

Communication and Collaboration: Learners work together as they sing in groups.

Digital literacy: Learners use digital devices to research and record performances.

Self-efficacy: Learners express themselves by singing individually and in groups.

Creativity and Imagination: Learners creatively express feelings, ideas and emotions in singing.

Pertinent and Contemporary Issues (PCIs)

Pertinent and Contemporary Issues (PCIs) are issues that affect people in their everyday life. These issues are categorized as follows:

Health Related Issues: HIV and AIDS, alcohol and drug abuse prevention and lifestyle diseases

Life Skills and values Issues: Life skills, Values and human sexuality

Social Economic Issues: Environmental awareness, disaster risk reduction, safety and security, countering terrorism, violent extremism and radicalization, poverty eradication, gender and animal welfare

PCIs have been mainstreamed in the curriculum designs in all the learning areas. The teacher is expected to make conscious and deliberate effort to bring out PCIs during the learning experiences through formal, non-formal and informal dimensions of learning. In the process learners will be given an opportunity to develop and apply both cognitive and psychosocial competencies that enable them to deal with realities and challenges of everyday life.

Examples

Science and Technology: grade 4

- Health Education: Taking care of the body.
- Environmental Conservation: Recycling used materials, and planting trees.
- Animal welfare: Care for animals and observation of safety when handling animals.

Link to Value.

Nurturing of values will enhance achievement of the curriculum reforms' vision, especially in molding ethical citizens. There are eight core- values identified in the Basic Education Curriculum Framework. These include:

- Love
- Responsibility
- Respect
- Unity
- Peace
- Patriotism
- Social Justice
- Integrity

These values have been mainstreamed in specific learning areas and developed through the suggested learning experiences. The teacher should make a conscious and deliberate effort to bring out the values through the learning experiences in every lesson.

Examples

Grade 4: Art and Craft

Strand: Presentation and Exhibition

Sub-strand: Mounting and Display of Artwork

Values to be nurtured

Love: This is nurtured as learners share available resources.

Respect: This is enhanced as learners appreciate opinions of each other in artwork.

Peace: This is developed as learners work together in harmony.

Link to other Learning Areas

This implies **transfer** of knowledge, skills and attitudes learnt in one learning area to another. The linkages give learners a **holistic perception** of learning by allowing them to see inter-relationships in different learning areas.

Example

Grade 4: Agriculture

Strand: Conserving our Environment

Sub strand: Soil

Link to other learning areas

Science and Technology: As learners carry out experiments on soil drainage and capillarity

Mathematics: As learners measure the amount of water and soil during the experiment

Community Service Learning

Community Service Learning (CSL) is experiential learning which reinforces what is learnt in the school. It is through community service learning experiences that learners are given opportunities to apply the acquired knowledge, skills, attitudes and values to solve an identified problem within the community, thus improving their own learning outcomes.

Examples

Grade 4: Science and Technology

Strand: Environment

Sub-strand: Air pollution

Suggested community service learning:

Learners could plant trees and grass to reduce dust and practice proper disposal of waste at home and their community.

Non Formal Learning Activities

Non-Formal learning experiences are organized, structured and systematic learning activities, which support acquisition and application of knowledge, skills, attitudes and values as envisaged in the competency-based curriculum. Some of the non-formal activities may include: singing, dancing, reciting poems, clubs and societies' activities, cultural festivals, music and drama festivals, science fairs, games and debates.

Example

Grade 4: Social Studies

Strand: Citizenship

Sub-strand: Human Rights - Forms of Child abuse

Suggested non-formal activities

The learner could participate in commemorating the day of the African Child

Learning Resources

Learning resources are materials used to facilitate the achievement of expected learning outcomes. Such materials include text books, ICTs, realia, models and the immediate environment. Resource persons may also be used to share their experiences and expertise to reinforce various concepts and skills. Use of learning resources is important in stimulating learning as well as enhancing acquisition and application of knowledge, skills, attitudes and values. Learning resources prompt the learners' reasoning and facilitate the development of the core competencies.

Learning resources are instrumental in meeting the expected learning outcomes, which are achieved through the learning experiences. The teacher and the learners are encouraged to source for relevant learning resources before the lesson. Parents should be encouraged to support the teacher in obtaining cost-effective learning resources.

Characteristics of good learning resources

A good learning resource should:

- a) Be relevant to the subject matter
- b) Contain accurate information
- c) Be appropriate to the level of the learner
- d) Be capable of capturing the interest of the learner
- e) Depict proper use of colour (conventional)
- f) Be of reasonable size so that all learners can use with ease
- g) Be safe
- h) Be sufficient for the learners
- i) Allow learners to apply new knowledge and skills
- j) Promote retention of concepts
- k) Conforms to social, cultural and religious beliefs of the learners
- l) Cater for the diverse needs of the individual learners

SESSION 6: INTEGRATION ICT IN THE LEARNING PROCESS

Session Outcomes

By the end of the session, the participant should be able to:

- a) identify digital resources and assistive technologies used in the learning process
- b) Plan an ICT integrated lesson for learners with special needs.
- c) Implement an ICT Integrated Lesson to facilitate learning
- d) appreciate ICT as an enjoyable tool for learning.

Key areas to be covered

- Digital resources and assistive technologies used in the learning process
- Planning an ICT Integrated Lesson
- Implementing an ICT Integrated Lesson

Suggested Learning Experiences

- Participants in groups identify the various digital resources and assistive technologies used during the learning process by learners with special needs.
- In groups, participants prepare an ICT Integrated Lesson plan.
- In groups, participants model an ICT integrated lesson.

Facilitators Notes

Meaning of ICT Integration

ICT integration refers to the seamless infusion of Information Communication Technologies the learning process. ICT integration in meant to support and enhance acquisition and application of knowledge, skills, attitudes and values.

Digital resources used in the learning process include.

- Phone
- Camera
- Computer
- Projector
- Power cables, data cables
- DVDs/CDs
- Flash discs
- Memory cards
- External hard discs
- Radios

- Televisions

The following are some of the assistive technologies (both hardware and software) available for various categories of learners with special needs:

(a) Hearing Impairment

- **Translation software** (available in American Sign Language) can be customized to Kenyan Sign Language – KSL.
- **Light-signaler** is a hardware device that is plugged into a computer's speaker port. When sound output is detected it signals the user by producing a bright, flashing light.

(b) Visual Impairment

(i) Low Vision

- **Colour Contrast** e.g. Magic (magnification in colour)
- **Screen magnifiers** work like a magnifying glass for the computer by enlarging chosen portions of the screen increasing visibility of items and legibility of text.

Handheld Video Magnifier: This allows full colour, high brightness video screen which makes it outstanding for reading text. With only one button, you can adjust the screen from full colour for viewing pictures to any of four high contrast text modes.

The magnified image or text appears in the display window.

(ii) The Blind

Screen Readers are used to “speak” everything on the screen including text, graphics, control buttons, and menus into voice that is spoken aloud via system speakers.

Examples:

- **Dolphin Easy Reader** is a software digital talking book player, allowing users to read and listen to content through a combination of text, speech and images
- **JAWS** (Job Access with Speech) and **Non Visual Desktop Access (NVDA)**:
 - Read out all that is on the computer's screen through your computer's sound card.
 - **Talking typer** – for keyboard orientation
 - **Digital Access Information System (DAISY)** – converts text in soft copy into audio
 - **Open Book** – works with Pearl Camera, scans and converts text into audio.
 - **Pearl camera** is connected to a computer, it scans hard copy text/document and with OPEN BOOK software converts text in soft copy into audio.
 - **Scanning and reading appliance (SARA)** – converts text into audio
 - **Focus Braille Display** – converts soft text into Braille and can be used by both Blind and Deafblind
 - **Smart Brailier** – provides a visual display and text-to-speech output to make Braille more accessible to non-braille readers. It makes learning Braille easier.
 - **PAC Mate** – This is a Pocket/mini PC which converts objects and text to speech so that blind users can hear documents, images and Web content. It can run pocket word, excel, power point etc. Screen reading and voice recognition software can run in it.

- **Optical Character Recognition** is software used to convert scanned print material into digital text that can then be read aloud by screen readers or translated and sent to a Braille Embosser for printing.
- **Closed Circuit Television (CCTV) systems** are used to magnify printed materials and other objects by placing them under a camera and displaying via a visual display unit such as a monitor or a projector.
- **Braille Embosser** – prints text from soft copy into Braille
- **Refreshable Braille devices** lift small rounded plastic or metal pins as needed to form Braille characters which can refresh the display to read the next line.

Note: Most screen readers have speech recognition abilities.

(c)Physical and Multiple Disabilities

Examples include chording keyboards, miniature and track balls among others (See sub module 2: ICT devices)

(d)Autism Spectrum Disorders

1. **Keyboard filters** are typing aids such as word prediction utilities and add-on spelling checkers that reduce the required number of keystrokes E.g. Predictive typing and key board short cuts.
2. **Text-to-speech (TTS) or speech synthesizers (Discussed above).**

(e) Emotional and Behavioural Difficulties

Keyboard filters

- **Text-to-speech (TTS)**

(f) Learning Disabilities

- **Phonetic spelling software** – this software renders phonetic

spelling into correctly spelled words

- **Keyboards filters**
- **Text-to-speech (TTS)**

(g) Mentally Challenged

- Touch screens with audio
- Keyboard filters
- Text to audio converters

Note: The following devices cut across many categories of learners with special needs and disabilities.

1. Text-to-speech (TTS) or speech synthesizers
2. Keyboard filters
3. Key guards

NOTE: The following digital resources accessible from KICD can be used for ICT integration in the learning process:

- **Radio** - includes audio programmes disseminated through radio or other electronic devices.
- **E-learning** - electronic learning materials disseminated through computer technologies. Interactive digital content which is available on the Digital Literacy Programme (DLP) devices.
- **Television** – audio-visual content that is mainly film and/or video based and disseminated through television and other electronic devices.

Note: Radio and TV programmes can be accessed from the teacher's laptops under the DLP or installed from external storage devices.

- **Kenya Education Cloud (www.kec.ac.ke)** – Content on the Kenyan Education Cloud includes Course Materials, Supplementary Materials and open educational resources in form of interactive digital content, radio and TV programmes, e-books, Apps and Platforms. This content is quality assured and can be accessed anywhere, anytime through any device as long as there is internet connection.

Factors to consider when selecting the ICT resources

The following are some of the factors to consider when using an ICT resource:

- Usability
- Conformity to the curriculum designs

- Relevance to the strand, learning outcomes and learning experiences
- Learners' entry behaviour
- Appropriateness for the learners' age
- Ability to cater for different learning styles and abilities
- Caters for diversity in gender, values and culture
- Use of language level suitable for the learner.
- Culturally and socially appropriate
- Adaptability to make the resource suitable for learners with special needs
- Learner-centeredness
- Ability to enhance problem-solving skills and collaborative learning?
- Availability and Accessibility
- Availability of relevant infrastructure and space.

Developing an ICT Integrated lesson plan

Activity

1. in groups, participants to develop a lesson plan in a learning area of their choice integrating ICT and use of assistive technologies.
2. Participants to present their lesson plan for critique

Implementing an ICT integrating lesson

Activity

3. In groups participants model an ICT integrated lesson.
4. The plenary to provide critique for possible improvement.

Sample lesson plan with ICT integration

SCHOOL	CLASS	DATE	TIME	ROLL
Bidii Primary School	Grade 1	xx/x/xxx	8.10-8.40 am	30

Strand: Care for the Environment

Sub-strand: Caring for plants-watering flower beds

Specific Learning Outcomes

By the end of the sub-strand, the learner should be able to:

- a) Identify when a flower bed should be watered to conserve water
- b) Water flower beds appropriately within the school compound.
- c) Demonstrate willingness to water flower beds appropriately at school

Key Inquiry questions

Why do we water flowers?

Learning Resources

- Watering can
- Sprinkler
- Hose pipe
- Improvised watering can
- Bucket
- Video clips on watering the flower bed
- Video clips on "the Garden song"

Core competences:

- Collaboration and communication as learners work in groups when watering flower beds
- Digital literacy as the learners record and watch videos on watering flowerbeds.

Values:

- Unity will be nurtured as learners work together harmoniously
- Responsibility will be nurtured as the learners care for the flower beds and the watering equipment.

Pertinent and contemporary issues

Safety to be observed as learners use watering equipment

Organization of learning

- The lesson will take place outside the classroom.
- Learner will work in groups.

Introduction

- Learners are guided to sing along "the Garden song" which is in form of a video clip to develop interest and curiosity in the lesson.

Lesson Development

Step 1: Learners discuss the key inquiry question and give their responses.

Step 2: Learners to watch or listen to a video clip on watering flowers to

Step 3: Learners participate in a demonstration on how to water flowers.

Step 4: Learners practice watering flowerbeds as they record videos.

Conclusion

- Learners carry out related activities in the workbook

Summary statement

Learners to write the summary statement in their note book.

- Some of the plants in our surroundings are flowers.
- Flowers need water to grow.
- We can take care of plants by watering the flowers.

Reflection on the lesson

How successful was the lesson? What could I have done to make it better?

SESSION 7: PROFESSIONAL DOCUMENTS (SCHEME OF WORK)

Session Outcomes

By the end of the session, the participant should be able to:

- a) explain the importance of professional documents in the learning process;
- b) develop professional documents to implement CBC;
- c) use professional documents in the learning process;
- d) appreciate the importance of professional documents in the implementation of CBC;

Key areas to be covered

- Schemes of Work
- Lesson Plans
- Record of work covered
- Learners progress record

Suggested Learning Experiences

- In pair participants buzz types of professional documents that they develop.
- In groups, participants discuss the importance of developing and keeping professional documents.
- In groups participants discuss the different components of the scheme of work. Using the curriculum designs, participants to develop a scheme of work for two weeks.
- In groups participant to describe the components of a lesson.
- Develop lesson plans from the scheme of work previously developed.

Facilitators Notes

Professional Documents

These are the documents which are used by the teacher in the preparation, implementation and evaluation of learning. They are vital documents that a teacher must have to keep track of his or her work, that of the learners as well as to make learning more effective. They include:

- Scheme of work
- Lesson plans
- Record of work
- Progress reports
- Individualized Education Programme

Scheme of Work

A scheme of work is a document that a teacher develops from the curriculum design. A scheme of work shows how the planned curriculum content shall be distributed within the time allocated for the learning area.

A scheme of work helps the teacher to:

- plan on what resources will be required.
- decide on the methodology to be used.
- plan for assessment.

A scheme of work has several components which include; week, lesson, strand/theme, sub-strand/subtheme, specific learning outcomes, key inquiry question, suggested learning experiences, suggested learning resources, suggested assessment methods and reflection.

Sample Scheme of Work

Learning area: Environmental Activities

SCHOOL	PP/Grade	Learning area	Term	YEAR
XX	YY		Xx	WW

Week	Lesson	Strand	Sub-strand	Specific learning outcome (KSA)	Key Inquiry Question. (Key Inquiry questions should guide achievement of learning outcomes)	Learning experiences	Learning resource	Assessment	Reflection
1	1	Care for the environment	Caring for plants-watering flower beds	By the end of the sub-strand the learner should be able to: a) Point out when flower beds should be watered at school.	Why should we water flowerbeds	-Learners to suggest reasons for watering flowers -Learners are guided to watch age appropriate media on watering	Watering can Sprinkler Hose pipe Improvised watering can Bucket	Observing the procedure of watering flowers	

SESSION 7:PROFESSIONAL DOCUMENTS CONT'D (LESSON PLAN)

Sub-session outcomes

By the end of the sub-session the participants should be able to:

- a) Describe the components of a lesson plan for CBC
- b) Develop a lesson plan for implementation of the adapted and specialist curriculum designs

Key areas to be covered

- Components of lesson plan
- Developing a lesson plan

A lesson plan is an essential document for effective facilitation of the learning process. A well planned lesson plan helps the teacher to;

- organize the content to be taught in advance focusing clearly on the subject matter to be covered and how learning should take place avoiding vagueness and irrelevance.
- plan, prepare and assemble teaching/learning resources.
- present concepts and skills in a systematic manner using appropriate strategies to achieve the stated lesson outcomes.
- Manage time well during the lesson.
- select and design appropriate assessment methods to gauge achievement of the learning outcomes.
- make connections between various components of the lesson,

Components of the lesson plan

Organization of learning - This shows where learning will be taking place. It could be in the classroom, or outside the classroom or a visit to a nearby library or farm.

Introduction - The lesson should be introduced in an interesting and stimulating manner to arouse curiosity in the learners. It should Integrate the learners' related past experiences as much as possible, tapping into learners' prior knowledge to prepare them for additional content being introduced.

Lesson development - This is the actual delivery of the lesson. The subject matter is divided into steps. Each step should contain one main idea or experience. The teacher should explicitly outline the step in learners will be involved in the lesson to achieve the stated learning outcomes.

Conclusion

This step provides learners an opportunity for further practice of the knowledge and skills learnt during the lesson. Follow up activities may include: questioning to establish whether the lesson outcomes have been achieved, allowing learners to seek clarification, giving assignment or project for formative assessment.

Summary

This step summarizes the lesson by putting emphasis on important points/concepts covered. During this time a wrap up of the lesson is given to help learners organize the information into meaningful context.

Reflection: This is a critical analysis of the learning. The teacher is called upon to make an honest assessment of his/her performance and that of the learners during the lesson and give reasons for the success or failure of the lesson. Suggestions/remedies should be highlighted in this section.

Note: The Lesson plan should embed and infuse aspect of CBC such as core competences, Pertinent and Contemporary Issues, values, community service learning and non-formal learning activities.

Lesson Plan Template

SCHOOL	CLASS	DATE	TIME	ROLL

Activity

In groups develop a Lesson plan for an activity of choice from the adapted or specialised curriculum designs.

Sample lesson plan

SCHOOL	CLASS	DATE	TIME	ROLL
Bidii Primary School	Grade 1	xx/x/xxx	8.10-8.40 am	30

Strand: Care for the Environment

Sub-strand: Caring for plants-watering flower beds

Specific Learning Outcomes

By the end of the sub-strand, the learner should be able to:

- d) identify when a flower bed should be watered to conserve water
- e) water flower beds appropriately within the school compound.
- f) demonstrate willingness to water flower beds appropriately at school

Key Inquiry questions

Why do we water flowers?

Learning Resources

- Watering can
- Sprinkler
- Hose pipe
- Improvised watering can

- Bucket
- Video clips on watering the flower bed
- Video clips on "the Garden song"

Core competences:

- Collaboration and communication as learners work in groups when watering flower beds
- Digital literacy as the learners record and watch videos on watering flowerbeds.

Values:

- Unity will be nurtured as learners work together harmoniously
- Responsibility will be nurtured as the learners care for the flower beds and the watering equipment.

Pertinent and contemporary issues

Safety to be observed as learners use watering equipment

Organization of learning

- The lesson will take place outside the classroom.
- Learner will work in groups.

Introduction

- Learners are guided to sing along "the Garden song" which is in form of a video clip to develop interest and curiosity in the lesson.

Lesson Development

Step 1: Learners discuss the key inquiry question and give their responses.

Step 2: Learners to watch or listen to a video clip on watering flowers to

Step 3: Learners participate in a demonstration on how to water flowers.

Step 4: Learners practice watering flowerbeds as they record videos.

Conclusion

- Learners carry out related activities in the workbook

Summary statement

Learners to write the summary statement in their note book.

- Some of the plants in our surroundings are flowers.
- Flowers need water to grow.
- We can take care of plants by watering the flowers.

Reflection on the lesson

How successful was the lesson? What could I have done to make it better?

Part 2: 2 hours

Session Outcomes

By the end of the session, the participant should be able to:

- a) develop teacher professional documents to implement CBC
- b) appreciate teacher professional documents in the implementation of CBC
- c) use professional documents in teaching and learning,
- d) develop tools for assessment of learning
- e) create assessment rubrics to assess learners achievement

Key Areas to be covered

Professional documents

- Record of Work
- Learner's Progress Records

Suggested Learning Experiences

- Participants brainstorm on what a record of work is and why it is important to keep the learners progress records.
- In groups as the participants to explore how they will assess the following task:
- Grade 1 teacher asked his learners to wash hands.

Note: The Groups should come up with the steps taken when washing hands.

Example: Folding the sleeves; Apply Soap; Scrubbing hands; Running water; assisting each other to water; Rinsing; Wiping

Guide participants to create a rubric on one assessment task

SESSION 8: PROFESSIONAL DOCUMENTS CONT'D (INDIVIDUALIZED EDUCATIONAL PLAN (IEP))

Sub-Session Outcomes

By the end of the session, the participant should be able to:

- a) Describe the components of an IEP for effective planning.
- b) Develop a sample IEP to address a special learning need of learner.

Key areas covered

1. Components of an IEP
2. Developing an IEP to address a special learning need of learner.
3. Discuss the importance of the record of work covered
4. Design a learner's progress report for effective communication of learners performance.

Learning experiences

- In groups participants brainstorm on the components of IEP
- In groups participants develop IEPs of learners with different special needs
- Record of work
- Progress report

Facilitator's Notes

An Individualized Educational plan (IEP) describes what the teacher and other professionals will do to meet the special needs of the learner. An IEP focuses on individual learners needs and allows each learner to acquire knowledge, skills, attitude and values at his/her own pace

Note: An IEP is a mandatory document in the education of learners with special needs.

Major Components of an IEP:

The learner's present level of performance.

The current level of performance of the learner is assessed to identify skills in which the learner has strengths and those that he/she has challenges. This can be done through observation, tests and interviews. For learning purposes, assessment should take place before instructions. Assessment results may then be used in deciding what to teach and how to teach it.

Long term and short term outcomes

After collecting information on the learner's strengths and weaknesses, a

statement describing what is expected in each area of special learning needs is made. This statement is referred to as a long term outcome. This is the overall aim of the IEP. Long term outcomes give direction for an IEP. It states what is expected to be achieved within a specified period of time, for example one month. The long term outcome is then broken into short term outcomes. These are competencies that should be mastered to achieve the long term outcomes.

Initiation and termination dates

The implementation of the IEP should be commenced after assessment has been done to determine the present level of performance. The duration of implementation will depend on the achievement of the stated outcomes. Reviews should be carried out regularly during the term and at the end of the term.

Assessment procedure

This step describes how progress will be measured and specifies how well the learner is expected to perform. Assessment criteria must define the standards that are to be used to measure progress or success. It is necessary to evaluate progress after a specific content has been covered.

Related specialized services

The IEP must be clear in listing related specialized services required by the learner. The services identified may be addressed by the relevant service providers. This should be specified as to who, when and where these may be provided. These services may include physiotherapy, occupational therapy, speech and language therapy, guidance and counselling among others.

Implementation

The IEP statement must give the date when the programme will start and the length of time it should take. It can be one year, a term or a month, depending on the skill area and the learner's level of ability. The review date should also be stated.

Sample Individualized Education Programme (IEPs)

Personal details of the learner

Name _____

Date of birth_____

Parent/guardian Name _____

Occupation_____

Address _____

Telephone/Mobile number _____

Occupation _____

Address_____

Telephone/ Mobile number _____

Date of initiation of IEP_____

Date of termination of IEP _____

Summary of strengths, weaknesses and initial recommendations

Learning area/skill assessed	Present level of performance		
	Strengths	weaknesses	Initial recommendation
Observation	---- can observe the sky ---- can grasp	- -- has difficulties in drawing the sky (sun, moon, clouds and stars).	---should be able to observe and draw sun, moon, clouds and stars.

After establishing the present level of performance of the learner, the teacher should develop long term and short-term learning outcomes.

Long term learning outcomes

These describe what the learner is expected to achieve and learn by the end of a given period of time. The long term learning outcomes are written for each area then area of focus in line with the learner's present level of performance.

Short term learning outcome

These describe what the learner is expected to achieve by the end of a short period of.

Long term and short learning outcome

Learning area	Learning outcomes			
	Long term	Short term	Assessment modes	
Observing the Sky	By the end of the term, the learner should be able to: Observe, draw and colour the sun, moon, clouds and stars	By the end of lesson one , the learner should be able to observe the sun	Observation	

Progress record

Date Assessment	Skills Area	Comment
xx/xx/xx	Observing the sky	John could observe and identify the sun and clouds

The record shows the learner's progress and is made continuously during the learning process.

Conclusion and final recommendations

These come at the end of the implementation period. -----

Activity: develop a sample individualized education programme

SESSION 7: PROFESSIONAL DOCUMENTS CONT'D (RECORD OF WORK)

A Record of Work is a document kept by the teacher showing the work that has been done at the end of every lesson, strand or sub-strand. the entries are made daily by the teacher.

A record of work helps in:

- accountability and transparency of work covered by the teacher
- the continuity of facilitation of learning
- that a new teacher has an idea of where to start teaching a class
- the assessment of coverage of the scheme of work after a period
- providing uniformity of content coverage in case of several streams

The record tracks the achievement of learning outcomes and the competencies acquired by the learner. The record can be used to show the teacher whether their teaching has been effective in addressing the learning needs of individual learners. It therefore acts as a guide for the teacher to be able to give the required attention to individual learners to ensure the desired outcomes as stated in the curriculum designs are portrayed by all the learners. The progress record can also be used to give the learner and the parents/guardians information about the learner's progress.

Components of a Record of Work

Time Frame: There should be an indication of the day, date, week and lesson when the work was covered.

Work done: Strand and sub-strand as derived from the specific learning outcome(s)

Remarks: The remarks column should have statement(s) specifying the success and or challenges of that lesson and recommendations.

Details of The Teacher: include the name, signature or initials of the implementing teacher for accountability.

The school management should also regularly sign the record of work.

Activity

Develop a sample record of work
