CHAPTER TWO

LESSON TWO

MULTIPLE INTELLIGENCE

Unlocking Infinite Possibilities

Mount Kenya University

HOWARD GARDNER'S MULTIPLE INTELLIGENCE THEORY

Howard Gardner is a developmental psychologist best-known for this theory of multiple intelligences. He believed that the conventional concept of intelligence was too narrow and restrictive and that measures of IQ often miss out on other "intelligences" that an individual may possess.

His 1983 book *Frames of Mind*, outlined his theory and his eight major types of intelligence.

Gardner's theory had a particular impact in the field of education where it inspired teachers and educators to explore new ways of teaching aimed at these different intelligences.

Multiple intelligences

Unlocking Infinite Possibilities

Mount Kenya University

Howard Gardner's Multiple Intelligence Theory

- Gardner's theory (1983) states that learners possess different kinds of minds and therefore learn, remember, perform, and understand in different ways.
- His theory advances the view that individuals have different ways of demonstrating intellectual abilities.
- He identified eight (8) intelligences

Mount Kenya University

Howard Gardner's Multiple Intelligences

- a) *Logical-mathematical*
- b) *Visual/spatial*
- c) *Bodily-kinesthetic*
- d) *Verbal-linguistic*
- e) *Intra-personal*
- f) *Interpersonal*
- g) *Musical/rhythm*
- h) *Naturalist*

Howard Gardner's Multiple Intelligences

- a) *Logical-mathematical*
- b) *Visual/spatial*
- c) *Bodily-kinesthetic*
- d) *Verbal-linguistic*
- e) *Intra-personal*
- f) *Interpersonal*
- g) *Musical/rhythm*
- h) *Naturalist*

Mount Kenya University

MUSICAL/RHYTHM

- Musical smart individuals who show sensitivity to rhythm and sound.
- They love music, but they are also sensitive to sounds in their environments.
- They may study better with music in the background.
- They can be taught by turning lessons into lyrics, speaking rhythmically, tapping out time.
- Tools include musical instruments, music, radio, stereo, CD-ROM, multimedia

Unlocking Infinite Possibilities

Mount Kenya University

LOGICAL- MATHEMATICAL

- Reasoning, calculating and number smart individuals.
- Think conceptually, abstractly and are able to see and explore patterns and relationships.
- They like to experiment, solve puzzles, ask cosmic questions.
- They can be taught through logic games, investigations, mysteries.
- They need to learn and form concepts before they can deal with details.

Unlocking Infinite Possibilities

Mount Kenya University

VISUAL/SPATIAL

- Think in terms of physical space, as do architects and sailors.
- Very aware of their environments.
- They like to draw, do jigsaw puzzles, read maps, daydream.
- They can be taught through drawings, verbal and physical imagery.
- Tools include models, graphics, charts, photographs, drawings, 3-D modeling, video, videoconferencing, television, multimedia, texts with pictures/charts/graphs

Unlocking Infinite Possibilities

Mount Kenya University

BODILY-KINESTHETIC

- Body smart individuals who use the body effectively, like a dancer or a surgeon.
- Keen sense of body awareness.
- They like movement, making things, touching.
- They communicate well through body language and be taught through physical activity, hands-on learning, acting out, role playing.
- Tools include equipment and real objects.

Unlocking Infinite Possibilities

Mount Kenya University

VERBAL-LINGUISTIC

- Word smart individuals who use words effectively.
- These learners have highly developed auditory skills and often think in words.
- They like reading, playing word games, making up poetry or stories.
- They can be taught by encouraging them to say and see words, read books together.
- Tools include computers, games, multimedia, books, tape recorders, and lecture.

Unlocking Infinite Possibilities

Mount Kenya University

INTRA-PERSONAL

- Self smart individuals with clear understanding of one's own interests, goals.
- These learners tend to shy away from others.
- They're in tune with their inner feelings;
- They have wisdom, intuition and motivation, as well as a strong will, confidence and opinions.
- They can be taught through independent study and introspection.
- Tools include books, creative materials, diaries, privacy and time.
- They are the most independent of the learners.

Unlocking Infinite Possibilities

Mount Kenya University

INTERPERSONAL

- People smart individuals with clear understanding of others and able to interact with others effectively.
- These students learn through interaction.
- They have many friends, empathy for others, street smarts.
- They can be taught through group activities, seminars, dialogues.
- Tools include the telephone, audio conferencing, time and attention from the instructor, video conferencing, writing, computer conferencing, E-mail.

Mount Kenya University

NATURALIST

- Nature smart individuals keenly aware of their surroundings and changes in their environments, even if these shifts are at minute or subtle levels.
- They have highly-developed levels of sensory perception.
- They have heightened senses which enable them to notice similarities, differences, and changes in their surroundings more rapidly than others do.
- They often like to collect, classify, or read about things from nature — rocks, fossils, butterflies, feathers, shells, and the like.

IMPLICATION OF GARDNER'S THEORY TO TEACHERS'

- The theory states that all eight intelligences are needed to productively function in society.
- Teachers, therefore, should think of all intelligences as equally important. This is in great contrast to traditional education systems which typically place a strong emphasis on the development and use of verbal and mathematical intelligences.
- Thus, the Theory of Multiple Intelligences implies that educators should recognize and teach to a broader range of talents and skills.

Unlocking Infinite Possibilities

Mount Kenya University

Cont'd

- Another implication is that teachers should structure the presentation of material in a style which engages most or all of the intelligences. For example, when teaching about the revolutionary war, a teacher can show students battle maps, play revolutionary war songs, organize a role play of the signing of the Declaration of Independence, and have the students read a novel about life during that period.
- This kind of presentation not only excites students about learning, but it also allows a teacher to reinforce the same material in a variety of ways.
- This activates a wide assortment of intelligences, teaching in this manner can facilitate a deeper understanding of the subject material.

Mount Kenya University

Cont'd

- Everyone is born possessing all the intelligences. Nevertheless, learners will come into the classroom with different sets of developed intelligences.
- This means that each child will have his own unique set of intellectual strengths and weaknesses. These sets determine how easy (or difficult) it is for a student to learn information when it is presented in a particular manner. This is commonly referred to as a learning style.
- The teacher can show learners how to use their more developed intelligences to assist in the understanding of a subject which normally employs their weaker intelligences. For example, the teacher can suggest that an especially musically intelligent child learn about the revolutionary war by making up a song about what happened.

GROUP ACTIVITY

In base groups;

- Use the background information on Howard Garner's Multiple Intelligence Theory and then discuss and develop indicators of the 8 intelligences.
- Using the provided self-diagnostic tool, generate and identify personal multiple intelligence profile
- Discuss and develop lesson plan activities that integrate multiple intelligences in learning areas for diverse learners

Unlocking Infinite Possibilities

Mount Kenya University

GROUP PROCESSING

- Trainer to Think of one thing that each did well that contributed to the group's success and share that with your group.
- The trainees will share with their group one thing they learned and one thing they contributed to the group's success
