

THE KENYA NATIONAL EXAMINATIONS COUNCIL

▶ AUTHENTIC ASSESSMENT

► AREAS TO BE COVERED

1. Define authentic assessment
2. Differentiate between authentic and traditional assessment
3. Characteristics of authentic assessments
4. Give benefits of authentic assessment
5. Develop authentic assessments (tasks)

WHAT IS AUTHENTIC ASSESSMENT?

Is a form of Assessment in which learners are asked to perform real-world tasks that demonstrate meaningful application of essential knowledge and skills.

Example

The actual driving test is authentic assessment while a written test on driving is traditional assessment.

In Authentic assessment:

- a) learners create a response to a question.
- b) tests contain real-life tasks, performances or challenges that replicate the problems faced by an expert in a particular field.
- c) learners are given up-front, the criteria on which their work will be judged.
- d) learners demonstrate their control over the essential knowledge being taught by actually using the information in a way that reveals their level of understanding.

TRADITIONAL VERSUS AUTHENTIC ASSESSMENT

Traditional Assessment	Authentic Assessment
Requires learners to demonstrate knowledge by selecting a response to written tests	Requires learners to demonstrate proficiency by performing meaningful tasks that require application of what was learned.
Measures the learners knowledge of the content	Measures the learners ability to apply knowledge of the content in meaningful ways (real life situations)
Provides a teacher with a summary of what the learner knows (knowledge)	Provides teachers with a more complete picture of what the learners know and what they can do with what they know (apply knowledge)
Learners are required to recall knowledge that has been taught	Learners can construct new knowledge out of what has been taught
Provides limited ways for learners to demonstrate what they have learned	Provides multiple avenues for learners to demonstrate what they have learned

Traditional Assessment	Authentic Assessment
Focus is on the content	Focus is on the competences
Teacher centred	Learner centred.
Hides the test	Task and scoring rubric are provided to the learner in advance
Rigid and fixed	Flexible and provides multiple acceptable ways of constructing products or performances as evidences of learning
Standardized, valid and reliable	Requires well defined criteria/rubrics and standards to achieve reliability and validity
Focuses more on the product	Focuses on both the process and the product

BENEFITS OF AUTHENTIC ASSESSMENT

1. Uses tasks that reflect real life experiences
2. Focuses on high order thinking skills
3. Requires active performance to demonstrate understanding
4. Involve interesting and engaging assessment tasks
5. Teacher and the learner collaborate in determining the assessment
6. Ensures success for every child
7. Encourages the integration of learning and assessment

WHAT IS AN AUTHENTIC TASK?

- ❑ Is an assignment given to learners to assess their ability to apply knowledge and skills to solve real world problems or challenges.

STEPS OF CREATING AUTHENTIC ASSESSMENT

Sample Standard – Nutrition and Hygiene

Strand	Sub-strand	Specific Learning Outcomes (Standards)
Health practices	Healthy habits	The learner can.: a) mention healthy habits that promote our well-being, b) state the importance of practising health habits for our well-being, c) practice health habits that promote our wellbeing, d) appreciate the importance of observing health habits for our well-being.

Sample Standard – Mathematics

Strand L	Sub-strand	Learning Outcomes (Standards)
Numbers	Whole Numbers	The learner can, a) count numbers forward and backward from 1 – 1000 b) read numbers 1–1000 in symbols c) read and write numbers 1–1000 in words d) identify missing numbers in number patterns up to 1000
Measurement	Capacity	The learner can, a) measure capacity in litres

Sample Standard – Environmental Activities

Strand	Sub-strand	Standards (specific learning outcomes)
Environment and its resources	Weather Exploring unfavourable weather conditions	The learner can, a) describe unfavourable weather conditions b) observe the effects of unfavourable weather conditions for safety c) develop curiosity in identifying effects of weather conditions in the environment.
	Keeping safe from unfavourable weather conditions	The learner can. a) identify ways of keeping safe from unfavourable weather conditions b) keep safe from unfavourable weather conditions c) demonstrate knowledge of keeping safe from unfavourable weather condition.

CHARACTERISTICS OF AUTHENTIC TASKS

1. Have varied responses
2. Are deeply integrative-require many skills
3. Promote critical thinking and problem solving
4. Allow for differentiated learning
5. Involve planning, doing, revising and reflecting
6. Provide opportunity for peer collaboration
7. Encourage self-assessment and deep reflection
8. Require more time to complete

FORMAT OF AUTHENTIC TASK/PROBLEM/KIQ

1. **Action verb:** Addresses the Why and How
- Why leads to deeper learning.
2. **Object:** Should have an object
3. **Context:** Real world problem or challenge.
4. Does not have one correct answer.
5. Does not have a straight forward method
of working out the problem.

DEVELOPMENT OF AUTHENTIC TASKS

Authentic task/problem/KIQ

1. **Action verb:** Addresses the Why and How
- Why leads to deeper learning
2. **Object:** Should have an object
3. **Context:** Real world problem or challenge
4. Does not have one correct answer
5. Does not have a straight forward method
of working out the problem.

Target both the knowledge and the Core competence (skills)

Core competences/21st Century Skills/skills are 7

1. critical thinking and problem solving
2. Communication and collaboration
3. Creativity and imagination
4. Digital literacy
5. Learning to learn
6. Citizenship
7. Self-efficacy

1. but the stem of the question should (for now) target

Target both the knowledge and the Core competence (skills)

The stem of the question should target the critical core competences. E.g.

a) critical thinking and problem solving

- i. Information gathering
- ii. Planning a solution
- iii. Managing the information

b) Communication and collaboration

- i. Communication
- ii. Participation
- iii. Negotiation
- iv. Decision making

Note: The rest of the core should then be infused into the task

Target)

2. **Knowledge: As presented by** the learning area(s)/subjects/strand/sub-strand
 - a) Integrate different strands in a learning area
 - b) Integrate different learning areas

GROUP ACTIVITIES

1. In pairs, use the checklist provided to validate the task on nature walk (provided in the KNEC Training Manual for CBA page 22) to determine whether it qualifies to be an authentic task. Quote evidence from the task to support your decision and present to the other participants.
2. In groups of 4 participants, use the designs to develop an authentic task from a learning area of your choice. Exchange your with another group for validation using the checklist provided. After validation by the other group, present your final task to the other participants

Questions & Comments

Thank You
