

MATHEMATICS ACTIVITIES GRADE 2

SCHEME OF WORK FOR TERM 1

COMPETENCY BASED CURRICULUM

SCHEMES OF WORK FOR MATHEMATICS ACTIVITIES GRADE 2 TERM 1

SCHOOL	GRADE	LEARNING AREA	TERM	YEAR
	2	MATHEMATICS ACTIVITIES	1	

Wk	Lsn	Strand	Sub strand	Specific learning outcomes	Key inquiry questions	Learning experiences	Learning resources	Assessment	Remarks
1	1	Numbers	Number concept	By the end of the lesson the learner should be able to read 1-50 in symbols	Can we count parts of our fingers and toes?	learners to count their fingers and toes	JKF Primary Mathematics Learner's Activity Book 2 page 2	Observe learners count their fingers and toes	
	2	Numbers	Number concept	By the end of the lesson the learner should be able to read 1-50 in symbols	Can we count numbers from 1-50 in symbols?	Learners to read numbers from 1-50 in symbols from the charts and books	Chart JKF Primary Mathematics Learner's Activity Book 2 page 2	Oral exercise observation	
	3	Numbers	Number concept	By the end of the lesson the learner should be able to fill in number 1-50 in their work books	How can we find missing numbers?	Learners to fill missing number between 1-50	Chart Number cards JKF Primary Mathematics Learner's Activity Book 2 page 3	In class writing exercise	

	4	Numbers	Number concept	By the end of the lesson the learner should be able to read numbers 50-100 in	Can find number of objects from number50-100	Learner to read number names from 50-100 from the chart and books	JKF Primary Mathematics Learner's	Oral exercises In class writing exercise	
--	---	----------------	----------------	--	---	--	--	--	--

							Activity Book 2 page 4-5		
	5	Numbers	Number concept	By the end of the lesson the learner should be able to represent numbers 50 - 100 using concrete objects in the environment	What can we use to represent number 50-100?	Learners in pairs /groups to represent numbers from 50- 100 using safe concrete objects from the environment	Counters JKF Primary Mathematics Learner's Activity Book 2 page 6	Observation Writing exercises	
2	1	Numbers	Number concept	By the end of the lesson the learner should be able to fill in missing numbers from 50-100	How can we find missing numbers?	Learners to fill in missing numbers from 50-100	Charts Chalkboard JKF Primary Mathematics Learner's Activity Book 2 page 7	In class writing exercise	
	2	Numbers	Number concept	By the end of the lesson the learner should be able to play games involving filling in of missing numbers from 1-100 in their workbooks	Which is the missing number?	Learner in pair s/groups to play games of counting and filling of missing numbers from 1-100	Counting cards Charts JKF Primary Mathematics Learner's Activity Book 2 page 7	Oral exercise Writing exercise	
	3	Numbers	Number concept	By the end of the lesson the learner should be able to read and show numbers using objects from number 1-100	How many are they?	Learners to read and show objects that range from number 1-100	JKF Primary Mathematics Learner's Activity Book 2 page 8	Observation Writing exercise	
	4	Numbers	Number concept	By the end of the lesson the learner	can we sing from 1-100?	Learners to identify numbers from 1-	Charts JKF Primary	Oral exercises	

			should be able to sing song and rhymes that involves counting from 1-100		100	Mathematics Learner's Activity Book 2 page 8		
--	--	--	---	--	-----	---	--	--

	5	Numbers	Number concept	By the end of the lesson the learner should be able to work out problems that involve representing numbers 1-100	How many are they?	Learners to represent numbers 1-100 by objects from their boobs and charts	Charts JKF Primary Mathematics Learner's Activity Book 2 page 9	In class writing exercises	
3	1	Numbers	Whole Numbers	By the end of the lesson the learner should be able to count numbers forward and backward up to 100	Can we count from 1-100	Learners to practice to count from 1-100 without referring to any source	JKF Primary Mathematics Learner's Activity Book 2 page 9	Oral exercise	
	2	Numbers	Whole numbers	By the end of the lesson the learner should be able to count numbers forward and backward up to 100	How can we count in twos?	Learners in pairs/groups to count in 2's forward and backward starting from any point	JKF Primary Mathematics Learner's Activity Book 2 page 10 Charts	Oral exercise	
	3	Numbers	Whole numbers	By the end of the lesson the learner should be able to count numbers forward and backward up to 100	How can we count in 5's?	Learners in pairs/groups to count in 5's forward and backward starting from 1-100	Charts Chalkboard Mathematics Learner's Activity Book 2 page 10	Oral exercises	
	4	Numbers	Whole numbers	By the end of the lesson the learner should be able to count numbers forward and backward up to 100	How can we count in 10's?	Learners in pairs /groups to count their fingers and toes in 2's and 10's forward and backward starting at any point	Charts Mathematics Learner's Activity Book 2 page 10	Observation Writing exercises	
	5	Numbers	Whole	By the end of the	How can we	Learners in pairs	Charts	Oral exercises	

			numbers	lesson the learner should be able to count numbers forward and backward up to 100	count in 2's, 4's and 10's?	/groups to count objects in 2's, 4's, and 10's starting at any point	Chalkboard Mathematics Learner's Activity Book 2 page 10	observation	
--	--	--	---------	---	-----------------------------	--	--	-------------	--

4	1	Numbers	Whole numbers	By the end of the lesson the learner should be able to count backward from 100 to 1	How can we count backward from 100?	Learners to count backward from 1000-1	Charts JKF Primary Mathematics Learner's Activity Book 2 page 11	Oral exercise Writing exercise	
	2	Numbers	Whole numbers	By the end of the lesson the learner should be able to identify place value up to hundreds	How can we identify the place value of numbers?	Learners in pairs/groups to identify place value up to tens	Charts JKF Primary Mathematics Learner's Activity Book 2 page 16	Writing exercise	
	3	Numbers	Whole numbers	By the end of the lesson the learner should be able to identify place value up to hundreds	Can we find the ones and tens place value?	Learners to identify the place value of numbers in ones and tens	JKF Primary Mathematics Learner's Activity Book 2 page 17	Observation Writing exercise	
	4	Numbers	Whole numbers	By the end of the lesson the learner should be able to identify place value up to hundreds	Can we fill in the gaps involving place values?	Learners to fill in the gaps involving place value of ones and tens	JKF Primary Mathematics Learner's Activity Book 2 page 18	In class writing exercise	
	5	Numbers	Whole numbers	By the end of the lesson the learner should be able to read numbers from 1-100 in symbols	Can we read 1-100?	Learners in pairs/groups to read numbers 1-100	Charts	Oral exercises	
5	1	Numbers	Whole numbers	By the end of the lesson the learner should be able to read numbers from 1-100 in symbols	Can we read and write numbers in symbols?	Learners to read and write down numbers 1-100 in symbols in their working books	Exercise books	In class writing exercise	
	2	Numbers	Whole	By the end of the	How can we write	Learners to read	Chalkboard	Writing exercise	

			numbers	lesson the learner should be able to read	1-20 in words?	and write numbers 1-20 in words	Charts Working books		
--	--	--	---------	--	----------------	------------------------------------	-------------------------	--	--

				and write numbers 1-20 in words					
	3	Numbers	Whole numbers	By the end of the lesson the learner should be able to read and write numbers 1-20 in words	How can we write 1-20 in words?	Learners in pair/groups to collect objects, count them and write their numbers in words	Working books	In class writing exercise Observation	
	4	Numbers	Whole numbers	By the end of the lesson the learner should be able to read and write numbers 1-20 in words	Can we write 1-20 in words?	Learners to get in pairs to write numbers from 1-20 in words in turns	Exercise books Charts	Observation	
	5	Numbers	Whole numbers	By the end of the lesson the learner should be able to work out missing numbers in number pattern up to 100	What is the next number?	Learners to play digital games involving whole numbers	JKF Primary Mathematics Learner's Activity Book 2 page 20	In class writing exercise	
6	1	Numbers	Whole numbers	By the end of the lesson the learner should be able to work out missing numbers in number pattern up to 100	How can we get the next number?	Learners to sing songs/ rhymes that requires one to identify the next number	Songs. JKF Primary Mathematics Learner's Activity Book 2 page 21	Oral exercise observation	
	2	Numbers	Whole numbers	By the end of the lesson the learner should be able to work out missing numbers in number pattern up to 100	What is the next number?	Learners to identify the next number from the given pattern	JKF Primary Mathematics Learner's Activity Book 2 page 21	In class writing exercise	
	3	Numbers	Whole numbers	By the end of the lesson the learner should be able to	What is the next number?	Learners to identify the next number in a given pattern by	Chalk board JKF Primary Mathematics	Writing exercise	

				work out missing numbers		either adding or subtracting	Learner's		
--	--	--	--	-----------------------------	--	---------------------------------	-----------	--	--

				in number pattern up to 100			Activity Book 2 page 21		
	4	Numbers	Whole numbers	By the end of the lesson the learner should be able to work out missing numbers in number pattern up to 100	How can we find the next number?	Learners in pairs/groups to make number patterns and share with other groups	JKF Primary Mathematics Learner's Activity Book 2 page 21	Exercise book Observation	
	5	Numbers	Whole numbers	By the end of the lesson the learner should be able to appreciate number patterns as they skip on the number line.	How do we identify patterns	Learner in groups/patterns to identify patterns and share with others	Roof patterns Window patterns JKF Primary Mathematics Learner's Activity Book 2 page 22	Observation	
7	1	Numbers	Fractions	By the end of the lesson the learner should be able to identify $\frac{1}{2}$ as a whole	What fraction do you get?	Learners in pairs to make circular paper cut-outs	Papers Pairs of scissors JKF Primary Mathematics Learner's Activity Book 2 page 22	Observation Oral exercises	
	2	Numbers	Fractions	By the end of the lesson the learner should be able to identify $\frac{1}{2}$ as a whole	How many $\frac{1}{2}$ do you get?	Learners in pairs/groups to cut different fruits into two each and find out how many halves they get	Oranges Tomatoes Knives JKF Primary Mathematics Learner's Activity Book 2 page 23	Observation Oral exercises	
	3	Numbers	Fractions	By the end of the lesson the learner	How many $\frac{1}{2}$ do you get?	Learners in pairs/groups to cut	Pencils Sugarcane piece	Observation Oral exercises	

				should be able to identify $\frac{1}{2}$ as a whole		out whole objects into two i.e. only concrete objects that doesn't lead to waste of resources	Sticks JKF Primary Mathematics Learner's Activity Book 2 page 23		
	4	Numbers	Fractions	By the end of the lesson the learner should be able to identify $\frac{1}{2}$ as a whole	How do we get $\frac{1}{2}$ of a whole?	Learners in pairs/groups to use circular objects to draw circles and draw a line to show two equal parts	Circular objects Rulers /pens JKF Primary Mathematics Learner's Activity Book 2 page 23	Observation In class writing exercise	
	5	Numbers	Fractions	By the end of the lesson the learner should be able to identify $\frac{1}{2}$ as a whole	How can we get $\frac{1}{2}$ of a whole?	Learners to draw lines to show two equal parts and colour each $\frac{1}{2}$ with different colours	Drawing books Colours JKF Primary Mathematics Learner's Activity Book 2 page 23	In class writing exercises	
8	1	Numbers	Fractions	By the end of the lesson the learner should be able to identify $\frac{1}{2}$ as a whole	How can we get $\frac{1}{2}$ of a whole?	Learners to identify a half of a whole and colour one of the $\frac{1}{2}$ part	Colours Drawing books JKF Primary Mathematics Learner's Activity Book 2 page 24	In class writing exercises	
	2	Numbers	Fractions	By the end of the lesson the learner should be able to identify $\frac{1}{4}$ as part of a whole	How can we get $\frac{1}{4}$ from a whole?	Learners to collect different fruits and cut each of them into 4 equal parts	Fruits Knives JKF Primary Mathematics Learner's Activity Book 2 page 24	Observation	
	3	Numbers	Fractions	By the end of the lesson the learner	How many $\frac{1}{4}$ do you get/	Learners in pairs/groups to	Fruits Knives	Observation	

				should be able to identify $\frac{1}{4}$ as part of a whole		divide fruits into four equal sizes and count the number of $\frac{1}{4}$ they get from different numbers of fruits	JKF Primary Mathematics Learner's Activity Book 2 page 24	Writing exercises	
	4	Numbers	Fractions	By the end of the lesson the learner should be able to identify $\frac{1}{4}$ as part of a whole	How do we get $\frac{1}{4}$ from a whole?	Learners to draw circles, rectangles and squares and divide them into $\frac{1}{4}$	Working books JKF Primary Mathematics Learner's Activity Book 2 page 24	In class writing exercises	
	5	Numbers	Fractions	By the end of the lesson the learner should be able to identify $\frac{1}{4}$ as part of a whole	How do we get $\frac{1}{4}$ from a whole?	Learners to draw different shapes and divide them into $\frac{1}{4}$	Drawing books charts JKF Primary Mathematics Learner's Activity Book 2 page 24	Observation In class writing exercises	
9	1	Numbers	Fractions	By the end of the lesson the learner should be able to identify $\frac{1}{4}$ as part of a whole	How do we get a $\frac{1}{4}$ of a whole?	Learners to identify $\frac{1}{4}$ of a whole and colour each part using a different colour	Colours Drawing books JKF Primary Mathematics Learner's Activity Book 2 page 25	In class writing exercises	
	2	Numbers	Fractions	By the end of the lesson the learner should be able to identify $\frac{1}{4}$ as part of a whole	How do we get $\frac{1}{4}$ from $\frac{1}{2}$	Learners to get $\frac{1}{2}$ of a whole and cut the $\frac{1}{2}$ into another $\frac{1}{2}$ to get $\frac{1}{4}$	JKF Primary Mathematics Learner's Activity Book 2 page 26	Writing exercise	
	3	Numbers	Addition	By the end of the lesson the learner should be able to add a 2-digit number to 1-digit number without	How can we align a 2-digit and 1-digit number vertically in order to add?	Learners in pairs/groups to write addition sentences given in horizontal form	Charts Chalkboard JKF Primary Mathematics Learner's	In class writing exercise	

				any regrouping with sum not exceeding 100		vertically according to the place value	Activity Book 2 page 29		
	4	Numbers	Addition	By the end of the lesson the learner should be able to add a 2-digit number to 1-digit number without any regrouping with sum not exceeding 100	How can we add a 2-digit to 1-digit number horizontally?	Learners to add 2-digit numbers to 1-digit numbers horizontally in their work books	Work books Chalk board Charts JKF Primary Mathematics Learner's Activity Book 2 page 29	Written exercise	
	5	Numbers	Addition	By the end of the lesson the learner should be able to add a 2-digit number to 1-digit number without any regrouping with sum not exceeding 100	Can we add vertically?	Learners to practice adding 2-digit numbers to 1-digit numbers vertically	JKF Primary Mathematics Learner's Activity Book 2 page 30	In class writing exercises	
10	1	Numbers	Addition	By the end of the lesson the learner should be able to add a 2-digit number to 1-digit number without any regrouping with sum not exceeding 100	Can we add without regrouping?	Learners in pairs/groups to add 2-digit numbers to 1-digit numbers without and with regrouping	JKF Primary Mathematics Learner's Activity Book 2 page 31 Chalk board	Observation Written exercises	
	2	Numbers	Addition	By the end of the lesson the learner should be able to add a	When do we regroup?	Learners to add 2-digit number to a 1-digit number	Counters Charts Chalk board	Observation Written exercises	

				2-digit number to 1-digit number without any regrouping with sum not exceeding 100		without regrouping	JKF Primary Mathematics Learner's Activity Book 2 page 31		
	3	Numbers	Addition	By the end of the lesson the learner should be able to add a	Which word means same as addition?	Learners to understand other	Counters JKF Primary Mathematics	Observation Written exercise	

				2-digit number to 1-digit number without any regrouping with sum not exceeding 100		words that means same as addition	Learner's Activity Book 2 page 31		
	4	Numbers	Addition	By the end of the lesson the learner should be able to add 3 single digit number up to a sum of 20	How do we add 3-single digit numbers?	Learners in pairs /groups to collect 3 different items and use them in addition of 3-single digit numbers Learners to add 3-single digit numbers	Working books Concrete objects within the class JKF Primary Mathematics Learner's Activity Book 2 page 32	Written exercise observation	
	5	Numbers	Addition	By the end of the lesson the learner should be able to add 3 single digit number up to a sum of 20	How do we add 3-single digit numbers horizontally?	Learners to add 3-single digit numbers horizontally	JKF Primary Mathematics Learner's Activity Book 2 page 32	In class writing exercise	
11	1	Numbers	Addition	By the end of the lesson the learner should be able to add 3 single digit number up to a sum of 20	How do we add 3-single digit numbers vertically?	Learners to practice adding 3-digit single numbers vertically in their work books according to their place value	JKF Primary Mathematics Learner's Activity Book 2 page 32-33 Chalkboard	Observation Written exercises	
	2	Numbers	Addition	By the end of the lesson the learner should be able to add 3 single digit number up to a sum of 20	How do we arrange numbers when working with 3-digit numbers?	Learners should be able to arrange numbers either vertically or horizontally in addition of 3-single	Charts Exercise books JKF Primary Mathematics Learner's Activity Book 2	Observation In class writing exercises	

						digit numbers	page 32-33		
	4	Numbers	Addition	By the end of the lesson the learner should be able to add 3	Can we add 3-single digits in a song/game?	Learner to sing songs that involves addition of 3-single digit numbers	Songs/rhymes Counting games JKF Primary Mathematics	Observation Oral exercises	

				single digit number up to a sum of 20		Learners in pairs/groups to play games that involves addition of 3-single digit numbers	Learner's Activity Book 2 page 32-34		
	5	Numbers	Addition	By the end of the lesson the learner should be able to add 3 single digit number up to a sum of 20	Can we add without regrouping	Learners to add 3-single digit numbers without regrouping and with regrouping	JKF Primary Mathematics Learner's Activity Book 2 page 35	Written exercises	
12	1	Numbers	Addition	By the end of the lesson the learner should be able to carry out addition of 3-single digit numbers using a number line	How do we use a number line when counting?	Learners to practice addition of 3-single digit numbers using a number line	JKF Primary Mathematics Learner's Activity Book 2 page 35 Chalk board Charts	Observation In class writing exercise	
	2	Numbers	Addition	By the end of the lesson the learner should be able to break numbers apart to make 10	When do you break numbers apart to make 10?	Learner to break numbers apart to make 10	Work books JKF Primary Mathematics Learner's Activity Book 2 page 36	Written exercise	
	3	Numbers	Addition	By the end of the lesson the learner should be able to add a 2-digit number to a 2-digit number without and with regrouping, with sum not	When do we regroup?	Learners in pairs/groups to come up with different ways of adding two 2-digit numbers without and with	Charts Working books JKF Primary Mathematics Learner's Activity Book 2 page 36	Observation Written exercises	

				exceeding 100		regrouping			
	4	Numbers	Addition	By the end of the lesson the learner should be able to add a 2-digit number to a 2-digit number without	How do we add two 2-digit numbers vertically?	Learners to practice align two 2-digit numbers to add them according to their place value	Work books JKF Primary Mathematics Learner's	Observation Written exercises	

[illegible]
