

Workshop Management and Facilitation

WHY ARE WE HOLDING THE WORKSHOP

From hoping it will happen to making it happen

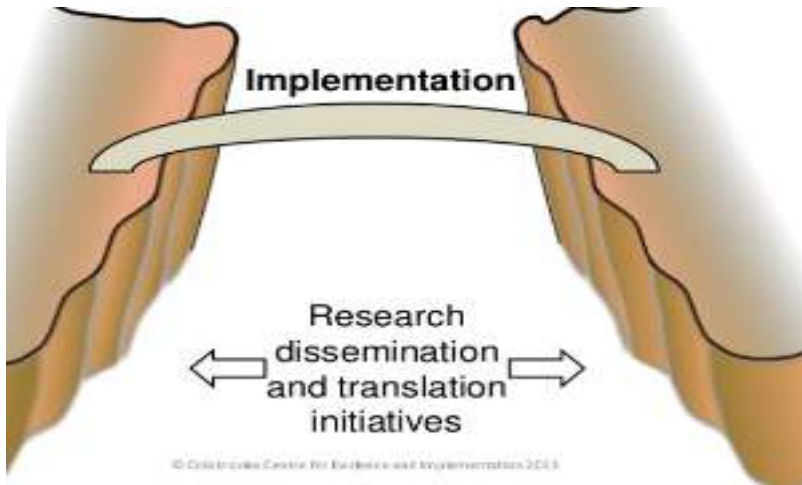

- **Don't engage in the training as a procedure**
- **Implementation Quality** is the key to better results
- **Effective Implementation** involves:
 - identifying approaches that work; and
 - delivering **them** sustainably, at scale,
 - in ways that maximise their effectiveness
- **Implementation Support** involves
 - Identifying all bottlenecks and mitigating
 - in a tailored 'hands-on' way
 - to deliver reforms aspirations

The Implementation Gap

The Implementation Gap is the gap between

- What is proposed **but not adopted into practice**
- What is adopted into practice **but not practised as intended (fidelity)**
- What is practised as intended **but not practised at scale or sustained**

The key to bridging the gap is ensuring research informed:

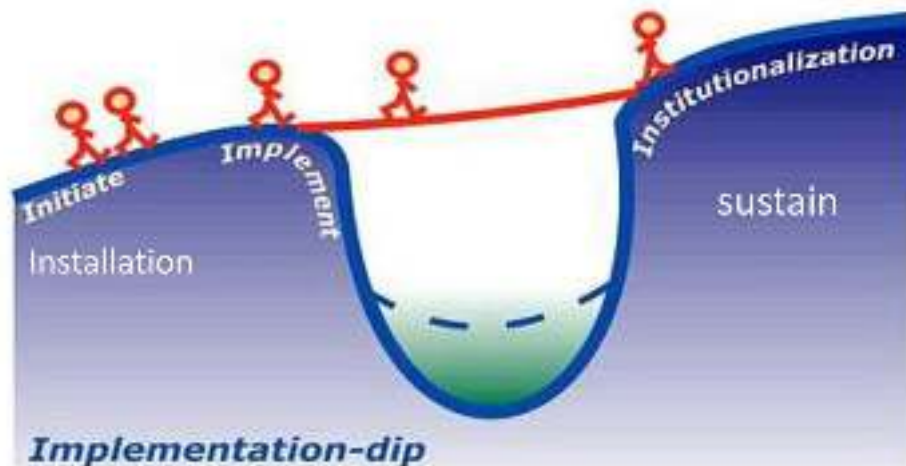

- **Opportunity to practice**
 - Sustained and embedded **capacity-building**
 - Sustained and embedded **Resources**
 - **Sufficient time** to translate initiative to scale & make it sustainable.
-

WORKSHOP MANAGEMENT

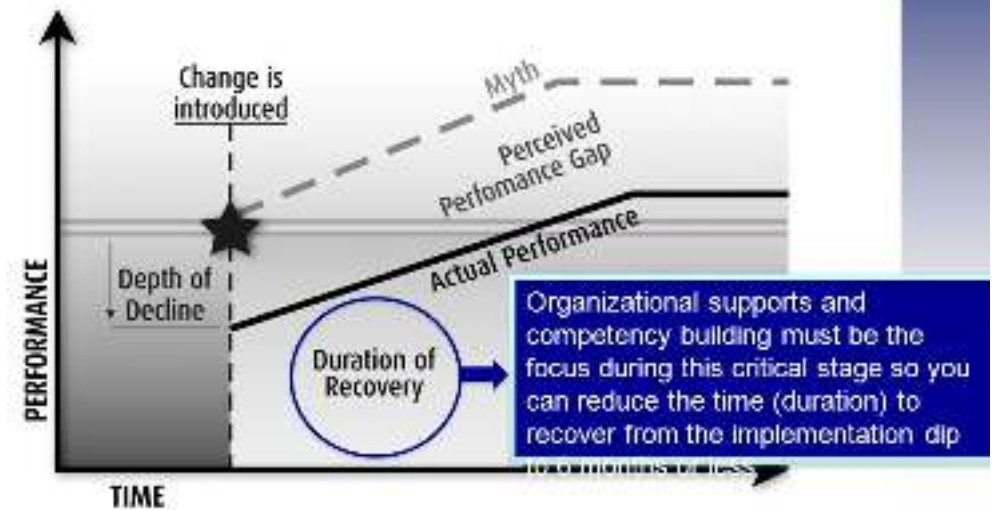

Pre-Workshop Preparations	• Familiarity with target group to be trained (CSO & CBC Tr. Champion) • Preparation of training materials; programmes; registration forms; venue; etc • Consultation with venue hosts
Setting the workshop climate	• Daily registration • Opening, introductions and forming groups • Appointment of group leaders, time keepers etc
Ensure full participation and interaction	Engage all participants through group tasks
Monitoring and evaluation	Hold daily review of What Worked? And What Needs to be Improved?

Minimize the Implementation Dip

Honor the Implementation Dip

- What should leaders do to fix the dip?

(Herold & Fedor, 2008, cited in Fullan, 2010)
