

SECTION A (30 marks)

Answer **all** the questions in this section on the answer sheet provided.

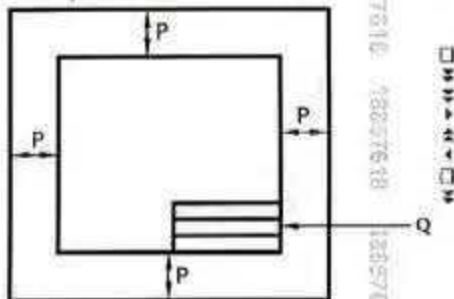

1. A person who repairs motor vehicles is known as a
A. repairer
B. mechanic
C. engineer
D. designer.
2. Learners should observe safety measures in a learning environment in order to
A. avoid occurrence of accidents
B. improve their understanding
C. maintain clean workshop areas
D. keep the learners healthy.
3. Drawings as means of communication are categorised into different types. Identify the type of drawing shown.

- A. Artistic
B. Technical
C. Freehand sketch
D. Rectangular block
4. Halima collected a certain material to use in improvising a basin. Which of the following materials did she collect?
A. Plastic
B. Rubber
C. Timber
D. Leather

5. A learner wants to measure the external diameter of a pipe. Which of the following tools is the **most** appropriate to use?
A. Tape measure
B. Steel tape
C. Vernier calliper
D. Ruler
6. A pile of firewood caught fire in the school kitchen. A cook tried to put out the fire by removing the pieces of burning firewood from the fire. Identify the method of extinguishing fire which the cook used.
A. Cooling
B. Smothering
C. Starving
D. Interrupting

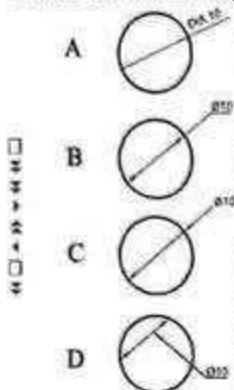

A teacher was showing learners how to layout their technical drawing papers as illustrated in the following drawing. Use the drawing to answer question 7 and 8.

7. The distance marked P all round is known as
A. draft
B. drift
C. outline
D. margin.
8. The area marked Q is the
A. title margin
B. title block
C. title layout
D. name block.

9. A learner drew a circle of diameter 10 mm. Which of the following is the correct method for dimensioning the circle?

10. Scales are important aspects of technical drawing. Which of the following statements describes what a scale is?
- Type of the required drawing.
 - Ratio of the dimensions of a drawing.
 - Size of the drawing in relation to the actual object.
 - Angle of the drawing in relation to the actual object.
11. Safety has to be observed when using raised platforms. Identify one source of risk associated with working on raised platforms.
- Using unstable platform.
 - Leaving the platform unattended.
 - Using a new platform.
 - Taking long to complete tasks.
12. Which of the following correctly describes an oblique drawing?
- All lines of the object are at 30° angle.
 - Lines on one side lie on the horizontal axis resting at 30° angle.
 - Lines on the front face lie on the horizontal axis and rest at 45° angle.
 - Lines on the side are at 45° angle and the rest at 30° angle.

13. Teacher Sadia provided learners with a vice to carry out a certain task. The learners must have used the vice to
- stop the work-piece from cracking.
 - ensure the work-piece is held firmly.
 - hold the work-piece after working on it.
 - prevent the work-piece from splitting.
14. A learner noticed that a desk was fastened with a bolt and a nut. Which appropriate tool was used to tighten the nut?
- Pliers
 - Spanner
 - Pincers
 - Screw driver
15. Kwame mobile phone retailers are strategically located in town. Which of the following factors least affected the selection of its location?
- Competition in town.
 - Weather and climate.
