

FORM 3 - GEOGRAPHY

EXAM 1-9

EXAM 1

PAPER 1

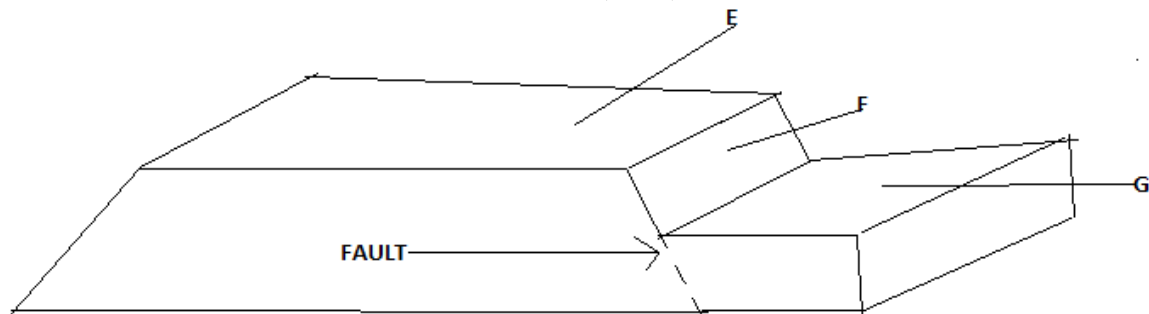

1. The diagram below shows the structure of the earth. use it to answer (a)

- (a) Name the parts marked E and F (2mks)
- (b) State three characteristics of the atmosphere (3mks)
- 2 (a) Identify two forms of rock metamorphism (2mks)
- (b) State the exclusive equivalent of the following intrusive igneous rocks
- (i) Granite (1mk)
- (ii) Diorite (1mk)
- (iii) Gabbro (1mk)
- 3 (a) What is a seismic wave? (2mks)
- (b) State three ways in which earth quakes affect human activities. (3mks)
4. (a) Differentiate between illuviation and salinization. (2mks)
- (b) State three importance of water as a soil property. (3mks)
- 5 (a) Identify two types of deltas. (2mks)
- (b) State three conditions ideal for the formation of a delta (3mks)
6. Study the data in the following table and answer questions (a) and (b). Kenyas leading imports by value (Ksh Million)

Crop/year	Wheat	Maize	Rice	Coca
2006	5400	4700	2000	700
2007	7200	3800	2600	420
2008	6400	1400	1900	580
2009	6800	4600	2400	800

- (a) Calculate the percentage increase in expenditure on importation of wheat in the year 2006 and 2007 (2mks)
- (b) (i) Draw a compound bar graph to represent the Kenya's leading import crops by value between 2006 and 2009 (8mks)
(ii) State two advantages of using compound bar graphs to represent data (2mks)
- (c) State four reasons why Kenya imports maize, wheat and rice and she still produces them? (4mks)
- c(i) State physical conditions favouring wheat growing in Kenya (3mks)
(ii) Explain three reasons why Canada produces more wheat than Kenya (2mks)
- 7 Differentiate between fissure and vent eruption (2mks)
- (b) Describe how the following features are formed
- (i) Batholiths (6mks)
(ii) Volcanic plug (5mks)
- (c) Explain three negative effects of volcanicity on human activities (6mks)
- (d) You are planning to carry out a field study on features formed by volcanicity on the landscape
- (i) Formulate two null hypotheses for the study (2mks)
(ii) Name two drainage features you are likely to study (2mks)
(iii) State two methods you would use to record information during the study. (2mks)
8. (i) What is reverse fault? (2mks)
(ii) The diagram bellow represents an area affected by faulting Name the parts marked E,F and G (3mks)

- b Describe the processes involved in the formation of the following features
- (i) Fault steps (5mks)
(ii) Rift valley by antidual arching
- c Explain four ways in which block mountains influence climate
9. Name two mountains in East Africa where congelifraction is common (2mks)
- (b) Describe the following types of weathering
- (i) Pressure release (5mks)
(ii) Hydration (4mks)
(iii) Oxidation (4mks)
- (c) Explain three ways in which plants cause weatherings (6mks)

- (d) What is an avalanche? (1mk)
 (ii) State three effects of avalanche (3mks)slope

PAPER 2

1. Name three patterns of human settlements. (3mks)
2. i) List any two products from Jua kali industry in Kenya exported to other countries. (2mks)
 ii) Name two renewable sources of energy used in Kenyan industries. (2mks)
3. a) Name three surfaces that are reclaimed in Kenya. (3mks)
 b) Identify the method of reclamation used in each surface mentioned in 3(a) (3mks)
4. Explain how the following practices help in soil conservation
 i) Mulching (2mks)
 ii) Terracing (2mks)
5. a) Describe how deep-shaft mining takes place. (5mks)
 b) Name three products from an oil refinery other than petrol. (3mks)

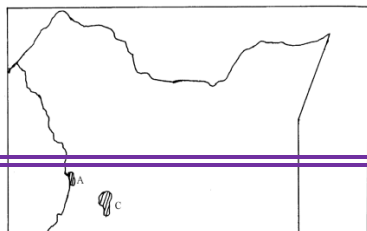

SECTION B

Answer question 6 and any other two questions in this section.

6. The table below shows milk yield in kilograms per dairy cow in Denmark between 1990 and 1995.

Year	1990	1991	1992	1993	1994	1995
Yields in kg	5243	6693	7398	7610	7792	7946

- (a) (i) Draw a divided circle of radius 3-5cm to represent the milk yield in Denmark, Show all your calculations (2mks)
 (ii) State two advantages of using the divided circle to represent data (2mks)
 (iii) Name two other methods, apart from the divided circle, that could be used to represent the above data. (2mks)
- (b) (i) Explain three physical factors that have favoured farming in Denmark (6mks)
 (ii) State three problems facing dairy farmers in Kenya (3mks)
- (c) Explain two reasons why beef farming is more developed in Argentina than in Kenya. (4mks)
- 7 (a) (i) State any two forms in which minerals occur (2mks)
 (ii) Name any three places where limestone is mined in Kenya (3mks)
 (b) Explain how the following factors influence the exploitation of a mineral
 (i) Market (2mks)
 (ii) The quality of ore (2mks)
 (iii) Technology (2mks)
 (c) (i) Name two provinces in south Africa where gold is mined (2mks)
 (ii) Explain three problems facing gold mining in south Africa (6mks)
 (d) Describe the processing of diamond in south Africa.
- 8 (a) (i) Apart from oil, name two sources of non-renewable energy. (2 mks)
 (ii) List three advantages of solar energy. (3 mks)
 (b) Explain four problems encountered in mineral exploitation in Kenya. (8 mks)
 (c) Explain the effects of over-reliance on oil as a source of energy. (8 mks)
 (d) State four methods the Government of Kenya uses to manage and conserve her energy resources. (4 mks)
- 9 a) i) define the term forestry. (1 mark)
 ii) Give three differences between natural forest and planted forests. (3 marks)
 b) Explain FOUR causes of forest depletion in Kenya today. (8 marks)
 c) i) From the map below, give the names of the forests marked A, B and C

ii) State FOUR measures that are being undertaken by the Kenya Government to conserve forests.

(4 marks)

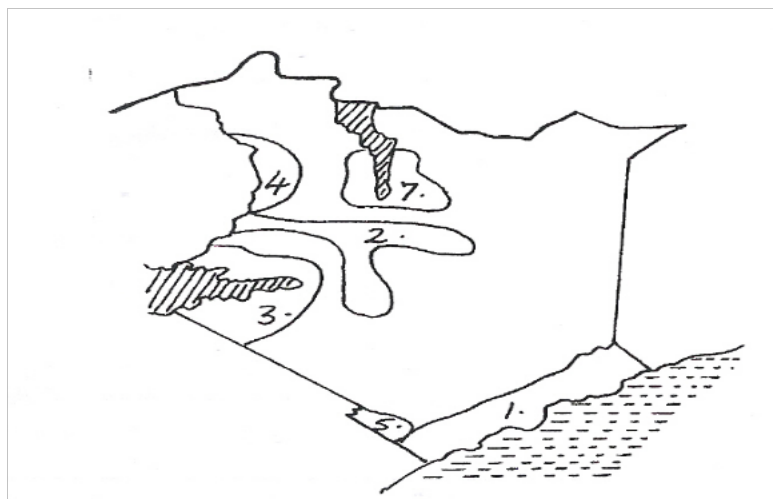

d) Explain THREE factors favouring the exploitation of softwoods in Canada (6mks)

EXAM 2
PAPER 1

SECTION A

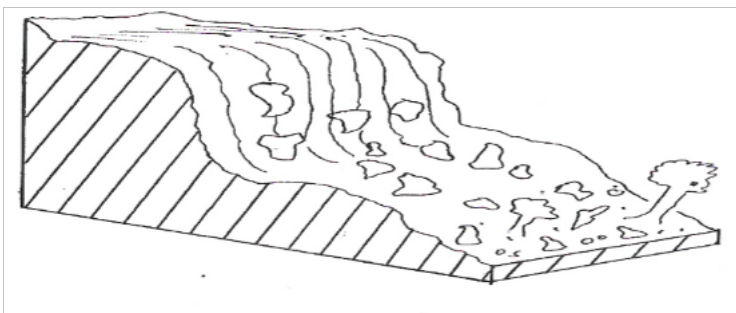

Answer **ALL** the questions in this section.

1.
 - a) Outline **two** ways through which the interior of the earth is studied. (2 marks)
 - b) State **three** natural causes of earthquakes. (3 marks)
2. a) The map below shows the climatic regions of Kenya. Use it to answer questions that follow

- a) Name the climatic regions marked 2 and 7. (2 marks)
- b) State **three** characteristics of climatic region marked 7. (3 marks)
3.
 - (a) Define continental drift (2 marks)
 - (b) Briefly explain **three** evidences that support the theory of continental drift. (3 marks)
4.
 - (a) In your answer booklet, **draw** a diagram to show a limestone cave and on it **mark** and **name**:
 - (i) A stalactite (1 mark)
 - (ii) A limestone pillar (1 mark)
 - (iii) Stalagmite (1 mark)
 - (b) State **two** conditions necessary for the development of Karst scenery. (2 marks)

5. a) The diagram below shows a type of mass movement.

- (i) movement is shown by
(ii) How occur?

(2 marks)

Which type of mass the diagram? (1 mark)
does such a movement

- (b) List **two** evidences of soil creep.

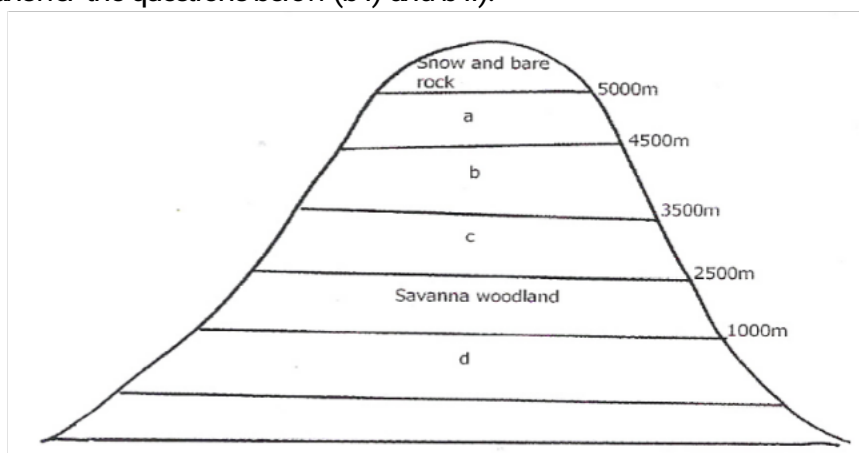

(2 marks)

Section B.

Answer question 6 and any other Two questions

6. Study the map of Migwani 1:50,000 (sheet 151/1) provided and answer the following questions.
- a) i) What is the four figure grid reference for Kangutheni school. (1 mark)
ii) Identify **three** manmade features in grid square 1276. (3 marks)
- b) i) What is the direction of Mboni dam in grid square 0878 from Mui dispensary in grid square 1276? (2 marks)
ii) Identify the district from which Migwani map was drawn. (1 mark)
iii) Identify the adjoining sheet to the South East of Migwani. (1 mark)
- c) Citing evidence from the map, state **three** economic activities found in the area covered by the map. (3 marks)
- d) i) Describe the drainage of the area covered by the map. (5 marks)
ii) Measure the distance in kilometres of the all weather road from the junction in grid square 0964 to the Southern end of the map. (2 marks)
- e) Your class carried out a field study on the long profile of river Ikoo.
i) Name **three** processes of river erosion you studied. (3 marks)
ii) State **three** follow up activities you had after the study (3 marks)
7. a) (i) Distinguish between vulcanicity and volcanicity. (2 marks)
(ii) Name **three** cycles of a volcano. (3 marks)
(iii) Identify **three** causes of vulcanicity. (3 marks)
- b) (i) Explain how a volcanic plug is formed. (6 marks)
(ii) Explain **three** ways in which vulcanicity may influence the climate of the surrounding areas. (6 marks)
- c) State **five** economic effects of vulcanicity to man. (5 marks)
8. a) State **two** agents of denudation. (2 marks)
b) Explain how the following factors affect the rate and character of weathering.
i) Nature of the rock (3 marks)
- ii) Plants and animals (3 marks)
- c) Explain **three** ways in which soil creep occurs. (6 marks)
- d) i) Define the term mass wasting. (1 mark)
ii) State **three** factors that influence mass wasting. (3 marks)
- e) Your class plans to carry out a field study on mass wasting around your school,
i) State **three** reasons why you require to carry out a pre- visit, (3 marks)
ii) List **two** secondary sources of data you are likely to use as you prepare for the field. (3 marks)
iii) State **two** methods you would use to collect data. (2 marks)

9. a) Describe how a river erodes its channel by the following processes
 i) Hydraulic action (4 marks)
 ii) Abrasion (4 marks)
- b) i) Explain **three** factors that lead to rejuvenation of a river (6 marks)
 ii) Describe the process of a river capture (4 marks)
- c) You have been asked to carry out a field study on features produced by rivers
 i) State **two** methods you would use to record your data (2 marks)
 ii) State **two** hypotheses you would set (2 marks)
 iii) Give **three** significance of the features produced by rivers they studied (3 marks)
10. (a) i) Name **two** types of vegetation. (2 marks)
 ii) Give **two** physiographic factors influencing vegetation distribution. (2 marks)
- (b) The diagram below shows vegetation zones of an East African mountain. Use it to answer the questions below (b i) and b ii).

- (i) Name the zones a, b, c, d. (4 marks)
- (ii) Give **one** reason why there is no vegetation cover on top of the mountain. (1 mark)
- (c)
 (i) State the names given to temperate grassland vegetation in:
 • North America (1 mark)
 • Argentina (1 mark)
- (ii) Explain **three** uses of Savanna vegetation. (6 marks)
- (d) Explain four characteristics of tropical desert vegetation. (8 marks)

PAPER 2

Section A

Answer All questions in this section

1. a) Name **two** commodities that are exported from Kenya. (2 marks)
 b) State **two** reasons where trade is important in Kenya. (3 marks)
2. a) Identify **two** international airports in Kenya. (2 marks)
 b) Give **three** problems of road transport in Kenya. (3 marks)
3. State **four** reasons why majority of people in Kenya move to settle in urban areas. (4 marks)

4. a) The population of Kenya was approximated at 36,500,000 people in 1999 and at 41,575,000 people in the year 2009. Calculate the percentage increase in Kenya's population between 1999 and 2009. (2 marks)
- b) State **four** problems associated with a rapidly increasing population. (4 marks)
5. a) Name **two** National Parks found in Kenya. (2 marks)
- b) State any **three** problems facing wildlife in Kenya. (3 marks)

Section B

Answer question 6 and any other two questions from this section

6. a) The table below shows mineral production (in tonnes) in Kenya in the year 2000. Use it to answer question a (i) and (ii)

Mineral	Mineral production (in tonnes)
Soda ash	238,250
Limestone	126,850
Fluorspar	100,200
Salt	442,450
Other	52,050
Total	959,800

- i) Using a radius of 4cm, draw a pie-chart to represent the above data. (7 marks)
- ii) Name **two** other statistical methods that can also be used to represent the above given data. (2 marks)
- iii) State **three** advantages of using a pie chart to represent data. (2 marks)
- b) i) Explain how the following factors have influenced the extraction of trona in Lake Magadi, Kenya
- i) Capital (2 marks)
- ii) Method of mining (2 marks)
- iii) Size of trona deposits (3 marks)
- c) i) Apart from land dereliction, state **four** other effects of mining and quarrying activities on the environment. (4 marks)
- ii) Give **four** methods a derelict land can be made to become useful. (4 marks)
7. a) i) Distinguish between indigenous forests and exotic forests. (2 marks)
- ii) Mention **four** indigenous hardwood varieties found in the Kenyan forests. (4 marks)
- b) Explain how the following factors have helped in the conservation of forests in Kenya.
- i) Legislation (Forest Act) (2 marks)
- ii) Creation of forest reserves (2 marks)
- iii) Setting up of Nyayo Tea Zones (2 marks)
- c) Explain **five** reasons why forests are important in Kenya. (10 marks)
- d) Name **three** forests found in Kenyan highlands. (3 marks)
8. a) List **four** major cash crops grown in Kenya. (4 marks)
- b) Briefly explain how the following factors influence agriculture activities in Kenya.
- i) Rainfall (2 marks)
- ii) Soils (2 marks)
- iii) Transport network (2 marks)
- iv) Labour services (2 marks)
- c) State **four** contributions of the agricultural sector in Kenya. (4 marks)
- d) Form **3** Geography students from your school are planning to carry out a field study on maize farming in your county.
- i) State a suitable hypothesis for your study. (2 marks)

ii) Give **three** reasons why the students would be required to carry a map of the county. (3 marks)

ii) State **four** methods, the students would use to collect data from the field. (4 marks)

9. a) Give the definitions of the following terms

i) Forest (2 marks)

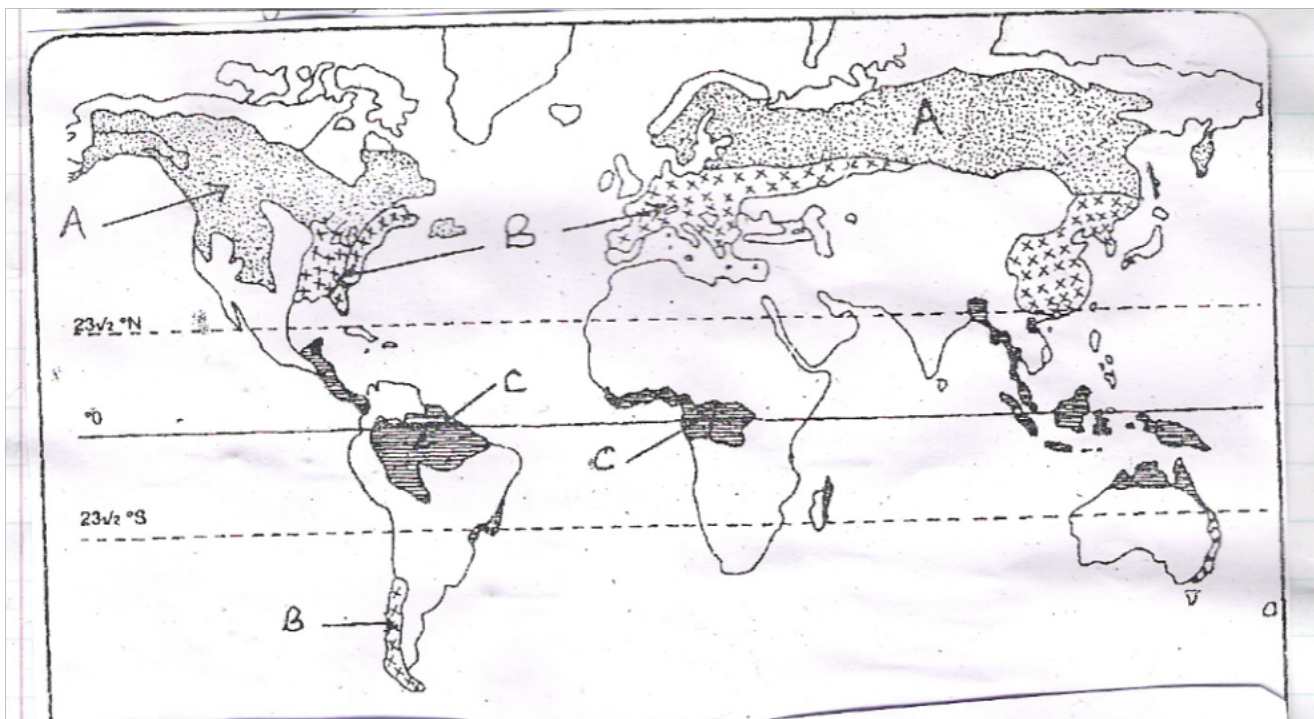

ii) Forestry (2 marks)

iii) Agroforestry (2 marks)

iv) Afforestation (2 marks)

v) Reforestation (2 marks)

b) The world map below shows, the major types of forests in the world

i) Name the forests marked A, B and C. (3 marks)

ii) State **four** characteristics of the forest marked. (4 marks)

c) State **four** characteristics that influence the growth of forests on the slopes of Mt. Kenya. (4 marks)

d) Outline **four** problems facing forestry in Kenya. (4 marks)

EXAM 3

PAPER 1

Section A

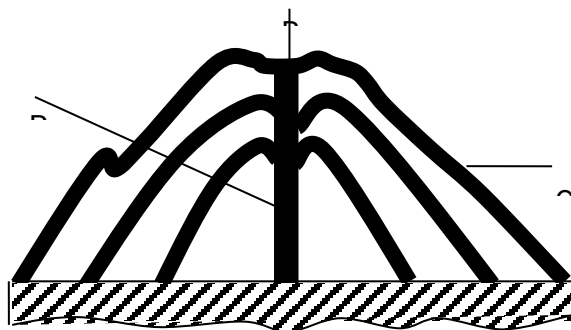

SECTION A (25 MARKS)

Answer **ALL** questions from this section

1. a) List **two** zones of transition in the atmosphere. (2marks)

b) Give **three** evidences that the interior of the earth is hotter. (3marks)

2. a) Define the following terms.
- i) River divide (1mark)
 - ii) A confluence (1mark)
 - iii) A river profile (1mark)
- b) List **three** factors that influence the formation of a river. (3marks)
3. How is an oasis formed? (4marks)
4. a). Distinguish a rock from a mineral (1 mark)
- b). Name three types of igneous rocks (3 marks)
5. The diagram below represents a composite volcano.

- (a) Name the features marked P, Q, and R? (3 marks)
- (b). State three causes of earthquakes (3 marks)

SECTION B

Answer Question six any other two questions in a separate answer booklet provided

6. Study the map of HomaBay (1:50,000) sheet 129/2 provided and answer the following questions.
- (a) (i) Name the province and county in which the area covered by the map extract is found (2marks)
 - (ii) What is the direction of Waiga school grid reference 547438 from Nyakayiamba school grid reference 501377 (2 marks)

(iii) Calculate the approximate height of the highest point of the hill at God Omako Koth at grid reference 5737 (2 marks)

(b) Draw a rectangle measuring 10cm by 15cm to represent the area to the west of Easting 54 covered by the map extract. (1 mark)

On the rectangle, mark and name the following

- Ruri Hills
- Olambwe Valley National Reserve
- The Road marked C19
- River Oseno
- Pump house

(5 marks)

(c) Describe Relief of the area covered by the Map (5 marks)

(d) Citing evidence from the map, give two social services offered in the area covered by the map extract (2 marks)

(e) Using evidence from the map, explain three factors that favour trading in Homabay municipality. (6 marks)

7. a). List;

i). **Three** factors which contribute to the development of deserts (3 marks)

ii). **Three** processes through which wind erodes a desert landscape (3 marks)

b). With the aid of labeled diagrams, describe how the following features are formed

i). Zeugen (6 marks)

ii). Rock pedestal (6 marks)

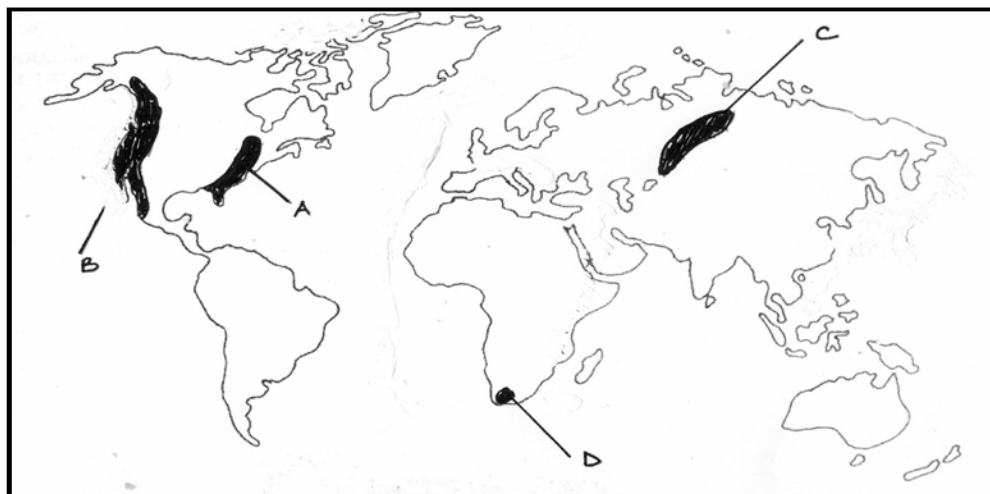

c). Suppose you are asked to carry out a field study on the action of water in a desert;

i). List **four** features you are likely to study (4 marks)

ii). State **three** problems you are likely to experience during the field study. (3 marks)

8. a) What is folding? (1 mark)

b) Study the world map below and answer the questions that follow.

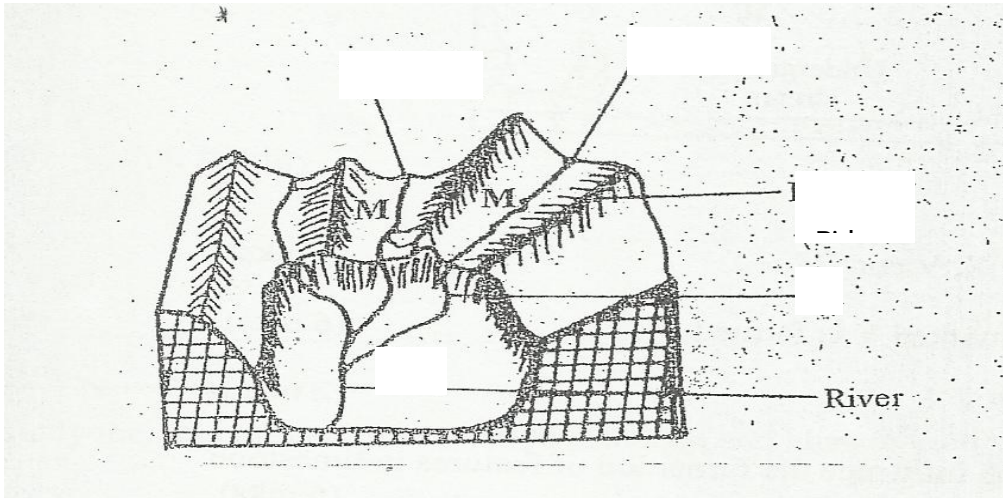

Name the Fold Mountains found in the area marked A, B, C, and D.

(4 marks)

- c) Describe the formation of Fold Mountain under the following theories
 - i) Contraction theory (3 marks)
 - ii) Convectional currents theory. (3 marks)
- d) Explain **three** significance of folding to both physical and human environment. (6 marks)
- e) Using diagrams describe the formation of rift valley by Tensional forces. (6 marks)
- f) Name **two** features resulting from faulting. (2 marks)

- 9
 - a.
 - i). Describe how ice is formed on a high mountain (3 marks)
 - ii). Differentiate an iceberg from an avalanche (2 marks)
 - b). Explain the movement of a valley glacier is influenced by the following factors:
 - i). Temperature (2 marks)
 - ii). Width of a glacier channel (2 marks)
 - c). Describe the distinctive characteristics of the following features resulting from glacial erosion:-
 - i). A corrie (3 marks)
 - ii). A pyramidal peak; (3 marks)
 - iii). A fiord (fjord) (3 marks)

- d).
 - i). The diagram below shows a glaciated upland area

Name the feature marked M, N and P (3 marks)

ii). Describe the process through which a crag and tail is formed (4 marks)

10. (a) Differentiate between plutonic and volcanic rocks. (4 marks)
- (b) Describe how a lava plateau is formed. (4 marks)
- (c) (i) Name **three** volcanic features found in the rift valley of Kenya. (3 marks)
- (ii) Explain **four** negative effects of vulcanicity in Kenya. (8 marks)
- (d) You intend to carry out a field study of a volcanic landscape.
 - (i) State **four** reasons why its necessary to conduct a reconnaissance of the area of study. (4 marks)
 - (ii) State why you would need the following items. (2 marks)
 - Hammer
 - Polythene bag

PAPER 2

SECTION A (25 MARKS)

Answer **ALL** questions from this section

1. (a) Define the term conservation. (1 mark)
- (b) Name **two** natural causes of forest depletion. (3 marks)
2. (a) Give **two** characteristics of panning as a method of mining. (2 marks)
- (b) State **four** problems of Diamond mining in South Africa. (4 marks)
3. (a) List three causes of air pollution (3 marks)
- (b) State four effects of air pollution on the environment (4 marks)
4. Identify **three** economic factors that influence agricultural activities in Kenya

(3 marks)

5. a) Distinguish between discrete and continuous data (2 marks)
b) State any **two** sources of statistical data. (2 marks)
c) Give the name of the chart on which data on wind direction is recorded. (1 mark)

SECTION B

Answer question 6 (compulsory) and any other two questions from the choices given.

- 6 Study the photograph provided and use it to answer the questions below.

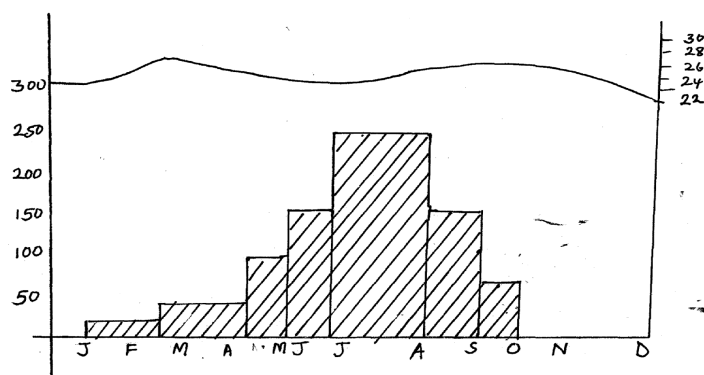

- a. i). Name the type of photograph given (1 mark)
ii). What activity is going on in photograph? (1 mark)
iii). Describe the method used in the activity going on in this area (3 marks)
- b). Draw a rectangle 15cm by 10cm to represent the photograph. On the rectangle mark and name the main features. (5 marks)
- c. i). Name **two** minerals that can be mined by using the method shown (2 marks)
ii). Citing evidence on the photograph, explain two reasons why this activity is suitable for the area shown (4 marks)
- d. i). Explain three problems that this activity could bring to this area (6 marks)
ii). State **three** economic significance of exploitation of Trona in L. Magadi (3 marks)
- 7 a) i) Name a country in Africa where temperate grassland is found. (1 mark)
ii) State **four** characteristics of temperate grasslands. (4 marks)

- b) Explain **four** ways trees in the coniferous forests have adapted to the environmental conditions of the region. (8 marks)
- c) You are required to carry a field study on a forest near your school. Describe the methods you would use to determine each of the following aspects of the trees in the forest.
- i) Age of the trees. (3 marks)
 - ii) Height of the trees. (3 marks)
 - iii) Tree species (3 marks)

8. (a) (i) Define fog. (1 mark)
- (ii) How is an advection fog formed? (4 marks)

- (b) The graph below represents the climate of station X. Use it to answer the questions that follow.

- (c) Describe characteristics of the climate represented. (6 marks)
- (c) Explain **three** ways in which vegetation in the station adapt to the climate. (6 marks)
- (d) Students carried out a field study on soils found on the station represented.
- (i) State **four** soil characteristics they would look for. (4 marks)
 - (ii) Explain how they would use the following methods to collect data.
 - Content analysis (2 marks)
 - Observation (2 marks)

9. Study the figures given below and answer the following questions.

YEAR	1986	1987	1988	1989
SISAL	280	270	300	310
TEA	250	240	260	280
COFFEE	130	100	100	110

(Kenya's export crops between 1986 – 1989 in 000' tonnes)

- a) i) Draw a comparative Bar graph to present the figures given. Use the scale 1cm rep 20,000 tonnes. (10 marks)
- ii) State **two** advantages of comparative graphs over other methods of data presentation. (2 marks)
- (b) State **four** climatic conditions favouring coffee growing on the Kenya highlands. (4 marks)

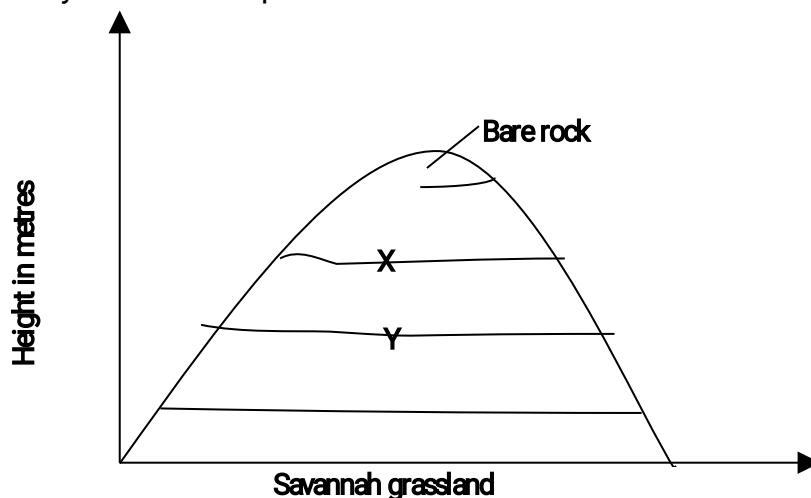

- (c) Explain the problems faced by sisal farmers in Kenya (4 marks)
 (d) Explain the causes of regular shortage of maize supply in Kenya. (5 marks).

10. a) i) Differentiate between intrazonal and azonal soils. (2 marks)
 ii) Give **three** examples of a zonal soils (3 marks)
 b) i) Explain **four** factors that influence soil formation. (8 marks)
 ii) Give **two** factors that determine the colour of soil (2 marks)
 c) i) What is soil erosion. (2 marks)
 ii) Explain **four** ways in which vegetation prevents soil erosion. (8 marks)

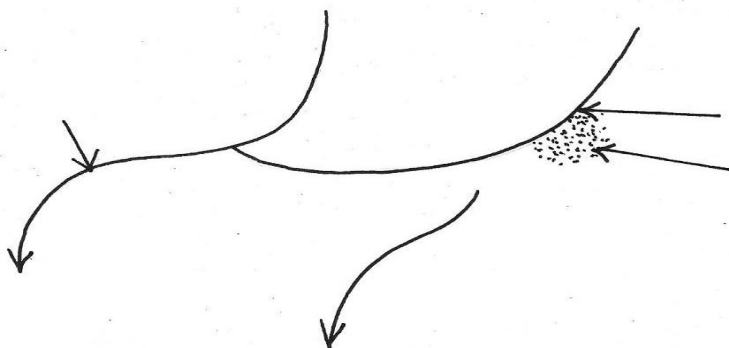

EXAM 4 PAPER 1

SECTION A

1. (a) Distinguish between an orbit and an axis. (2 mks)
 (b) State **three** proofs that the interior of the earth is hot. (3 mks)
2. (a) What is a **spring**? (1 mk)
 (b) State **four** ways in which a spring may develop. (4 mks)
3. (a) The diagram below represents zones of natural vegetation on a mountain within the tropical region.
 Study it and answer questions that follow:

- (a) Name the vegetation zones marked **X** and **Y**. (2 mks)
 (b) State **three** characteristics of Mediterranean types of vegetation. (3 mks)
4. (a) Give **two** processes of slow mass wasting. (2 mks)
 (b) State **three** physical conditions that may influence landslides. (3 mks)
5. (a) State **two** ways through which rivers transport its loads. (2 mks)
 (b) The diagram below represents a river captive.

Name the parts marked **A**, **B** and **C**.

(3 mks)

A

B

C

SECTION B.

*Answer question 6 and any other **two** questions in this section.*

6. Study the map of Kitale (1: 50,000) sheet 75/3 provided and answer the following questions.

- a) (i) Name the relief feature found in grid **square 2823**. (1 mk)
- (ii) Determine the distance of road **B 10/2** from Knight's corner junction with **Road C 637** to Kitale. (2 mks)
- (iii) Find the area of **Kiptaberr Forest**. (2 mks)
- b) (i) Calculate the gradient of the slope between point **M** and **N**. (2 mks)
- (ii) Identify the highest point in the area covered by the map. (2 mks)
- c) Farmers at Delgany Farm carried out a study at their colleagues' farm of Longleat Estate.
 - (i) State **two** reasons why they would need the map of Kitale. (2 mks)
 - (ii) Mention **two** methods they would use to collect data. (2 mks)
 - (iii) Identify **three** data /information they would collect. (3 mks)
- d) (i) Describe the distribution of settlement in area covered by the map. (4 mks)
- (ii) Citing evidence from the map, identify **two** factors which have influenced the growth of forests in Kitale area. (2 mks)
- (iii) State **three** functions of Kitale town. (3 mks)

7. a) (i) What is a rock? (2 mks)
 (ii) Explain the process of formation of mechanically formed sedimentary rocks.(5 mks)
 b) Explain **three** ways in which rocks are significant to the economy of Kenya. (6 mks)
 c) Student from your school carried out a field study on the types of Rocks.
 One of the rock samples they collected was coral.
 (i) Give **three** uses of coral rock. (3 mks)
 (ii) Give **three** reasons why it was important for them to conduct reconnaissance.(3 mks)
 (iii) State **three** problems they are likely to have encountered during the field study.(3
8. a) (i) What are Earthquakes? 2 mks)
 (ii) Name **three** types of Earthquake waves. (3 mks)
 (iii) State **five** ways in which the Earth crust is affected by Earthquakes. (5 mks)
 b) (i) With the aid of a well-labelled diagram describe how the rift valley is formed by
 tensional forces. (8 mks)
 (ii) State **four** effects of faulting to human activities. (4 mks)
 (iii) Give **two** advantages of studying faulted landscape through field work.(2 mks)
9. a) Name **three** types of desert surfaces. (3 mks)
 b) Explain the following process of wind erosion
 (i) Abrasion (2 mks)
 (ii) Deflation (2 mks)
 (iii) Attrition (2 mks)
 c) With the aid of a diagram, describe how a rock pedestal is formed. (6 mks)
 d) Draw a diagram of an overhead view of a desert basin. On it mark and name the
 following features resulting from water action.
 (i) Alluvial
 (ii) Pediment
 (iii) Playa
 (iv) Bajada (5 mks)
10. a) (i) What is climate? (2 mks)
 (ii) Explain **two** effects of climate change on the physical environment. (4 mks)

b)(i) State **five** characteristics of Inter Tropical Convergence Zone. (ITCZ) (5 mks)

(ii) Describe how convectional rainfall is formed. (7 mks)

(iii) State **three** problems associated with convectional rainfall in the lake region of Kenya. (3 mks)

PAPER 2

SECTION A **Answer all questions in this section**

1. (a) State **three** ways in which minerals occur. (3 mks)
(b) Name **three** methods of mining. (3 mks)
2. (a) What is pastoralism? (3 mks)
(b) State any **three** measures being taken by the Kenya government to improve pastoral farming in Kenya. (3 mks)
3. (a) State **two** characteristics of horticulture farming in Kenya. (2 mks)
(b) State **two** factors that favor horticulture in Netherland. (2 mks)
4. (a) What is a photograph? (2 mks)
(b) Name **three** types of ground photographs. (3 mks)
5. (a) Outline **three** advantages of using a pie chart to represent data. (3 mks)
(b) Define statistical data. (1 mk)
6. The table below represents agricultural crops exported from Kenya between 1993 – 2003.

EXPORTS IN TONNES

Crop	1999	2000	2001	2002	2003
Horticulture	17641	21216	19846	28332	36485
Tea	33065	35150	34485	34376	33005
Coffee	12029	11707	7460	6541	6286

- (a) Using a scale of 1 cm rep. 2000 tonnes, draw a comparative line graph exports per crop between 1999 – 2003 (10 mks)
- (b) (i) Describe the trend in coffee earnings (1999 – 2003) (2 mks)
(ii) Give **four** possible reasons for the trend observed. (4 mks)

- (c) (i) Identify **three** counties producing coffee in Kenya. (3 mks)
- (ii) Outline **four** physical problems faced by farmers in Kenya in the recent past. (4 mks)
- (d) State any disadvantages of using comparative line graph to represent data. (2mks)
7. (a) (i) Name any **four** mineral mined in Kenya. (4 mks)
- (ii) Outline **three** methods of mining. (3 mks)
- (b) (i) List any **two** sea parts through which some of the minerals mined in East Africa are exported. (2 mks)
- (ii) State any **five** factors that influence exploitation of minerals. (5 mks)
- (c) Explain **three** ways in which soda ash contributes to the economy of Kenya. (6 mks)
- (d) Ways in which mining derelicts can be reclaimed. (5 mks)
8. (a) (i) Define Agro forestry. (2 mks)
- (ii) Outline **four** benefits of Agro forestry. (4 mks)
- (b) (i) List any **three** types of tropical hardwood species found in Kenya. (3 mks)
- (ii) Explain **three** problems hindering the exploitation of tropical hardwood forests. (6 mks)
- (c) State **four** measures that the Kenyan government is taking to conserve forest in the country. (4 mks)
- (d) Compare softwood in Kenya and Canada under the following sub-topics
- (i) Species (2 mks)
- (ii) Problems (2 mks)
- (iii) Marketing (2 mks)
9. (a) (i) Name **three** exotic dairy breeds reared in Kenyan highland. (3 mks)
- (ii) Name **two** products from milk. (2 mks)
- (b) Explain **four** importance of dairy farming in Kenya. (8 mks)
- (c) (i) What is beef farming? (2 mks)
- (ii) Explain **five** limitations of beef farming in Kenya. (10 mks)

EXAM 5 PAPER 1

SECTION A (25 MARKS)

Answer all the questions in this section in the spaces provided

1. (a) State **two** theories that explain the origin of the earth (2mks)

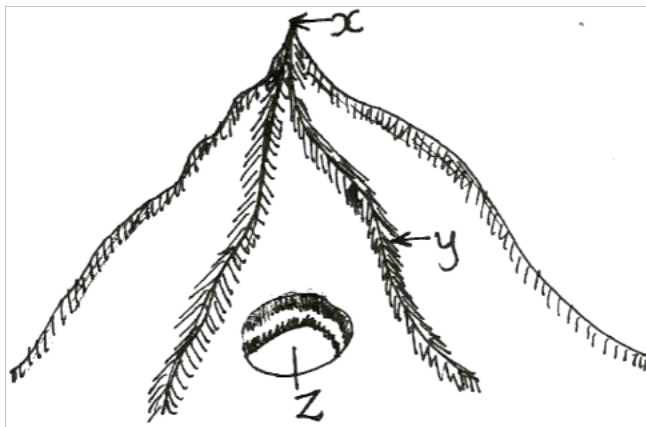

- (b) Mention **three** weaknesses of the theory of continental drift (3mks)
2. (a) Distinguish between absolute and relative humidity (2mks)
- (b) State **three** reasons why temperatures in the lower part of the troposphere are higher (3mks)
3. (a) Define the term derived vegetation (3mks)
- (b) State **three** characteristics of Mediterranean vegetation (3mks)
4. (a) Name **two** fold mountain systems found in North America (2mks)
- (b) List **three** negative effects of fold mountains to human activities (3mks)
5. (a) Mention **two** characteristics of basic lava (2mks)
- (b) Explain how geyser is formed (3mks)

SECTION B (75 MARKS)

Answer questions 6 and any other two questions from this section.

6. Study the map of Kitale 1:50,000 (sheet 75/3) provided and answer the questions that follow
- (a) (i) What is the approximate height of the dam at grid reference 365304 (2mks)
- (ii) Measure the length of the river Suwerwa. Give your answer in km (2mks)
- (iii) Mention **three** man-made features in the grid square 2732 (3mks)
- (b) Citing evidence from the map state **four** factors that have influenced establishment of plantations in the area covered by the map. (8mks)
- (c) (i) Using a vertical scale of 1cm to represent 20 meters, draw a cross section from grid reference 240210 to 280240 (4mks)
- (ii) Calculate the vertical exaggeration of the cross-section (2mks)
- (d) Citing evidence from the map, state two physical factors that have promoted growth of Kitale town (4mks)

7. The diagram below shows a glaciated area, use it to answer question a

(a) Name the features marked **x**, **y** and **z** (3mks)

(b) Describe how a U-shaped valley is formed (6mks)

(c) (i) State **three** reasons why there is a reduction in the amount of glacial cover over the Earth's surface (3mks)

(ii) Explain **three** negative effects of glaciation (6mks)

(d) You are required to carry out field work in a glaciated area

(i) State **three** disadvantages of using secondary sources of data (3mks)

(ii) What problems are you likely to encounter (4mks)

8. (a) Define;-

(i) Limestone caves (2mks)

(ii) Blind valley (2mks)

(b) Explain **three** factors influencing water action in limestone areas (6mks)

(c) Describe how the following features are formed

(i) Grikes (3 mks)

(ii) Uvala (3mks)

(d) (i) State the conditions favouring the location of an artesian well (4mks)

(ii) You intend to carry out a field study on features in a limestone area, what preparations would you make for the study. (5mks)

9. (a) (i) Name **four** instruments found in a weather station (4mks)

(ii) Describe how the following elements of weather are measured

▪ Maximum temperature (3mks)

▪ Rainfall (3mks)

(b) (i) What is an air mass (2mks)

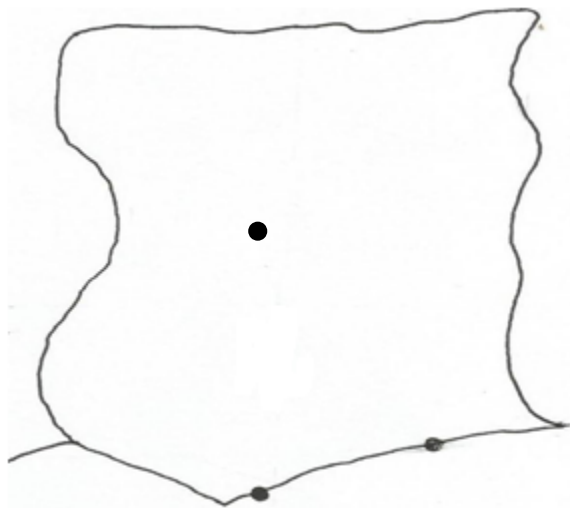

- (ii) Explain how air masses are classified (5mks)
- (c) Describe **four** ways in which air masses influence climate (8mks)
10. (a) (i) Name **two** features in arid areas that are associated with wind deposition (2mks)
- (ii) What factors determine wind deposition (5mks)
- (b) Using well labelled diagrams explain how a rock pedestal is formed (8mks)
- (c) Explain **three** significances of wind depositional features (6mks)
- (d) You have conducted a field study in desert areas what suggestions would you make to reduce wind erosion (4mks)

PAPER 2

SECTION A

Answer all questions in this section

1. (a) Name **two** types of waste lands that are reclaimed in Kenya (2mks)
- (b) Identify **three** methods used to reclaim land in Kenya (3mks)
2. (a) Define forestry? (2mks)
- (b) Explain **two** characteristics of soft wood forests in Canada (4mks)
3. The map below shows cocoa growing areas in Ghana. Use it to answer question 3a

- (a) Name the cocoa growing centres marked X and Y (2mks)
- (b) Give **three** human factors that are for cocoa growing in Ghana (3mks)
4. (a) Name **two** functional zones of Nairobi city. (2mks)
- (b) State **two** characteristics of Jua Kali industries in Kenya (2mks)
5. (a) Name any **two** exotic breeds of cattle reared in Kenya (2mks)
- (b) State **three** characteristics of nomadic pastoralism (3mks)

SECTION B

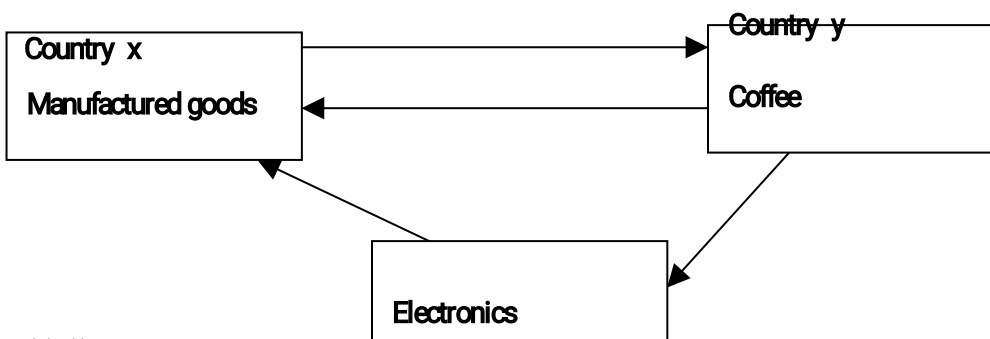

Answer question 6 and any other two questions from this section

Use the photograph below to answer question 6a

6. (a)(i) Identify the type of photograph shown (1mk)
(ii) Draw a rectangle measuring 10cm by 5cm to show the area covered by the photograph (1mk)
(iii) On the rectangle mark and label the **main** features on the photograph (3mks)
- (b)(i) Name **two** counties where coffee is grown on large scale in Kenya (2mks)
(ii) Describe how coffee is processed (6mks)
(iii) Explain **three** problems facing coffee farmers in Kenya (6mks)
- (c) (i) Define fertility rate (2mks)
(ii) State **four** causes of rapid population growth in Kenya (4mks)
7. (a)(i) Define fish farming (2mks)
(ii) Name **two** major fisheries in Tanzania (2mks)
(iii) Why is inland fishing more developed than sea fishing in Kenya. (4mks)
- (b) Explain how the following factors have influenced fishing in Japan
(i) Ocean currents (2mks)

- (ii) indented coastline (2mks)
- (iii) Technology (2mks)
- (c)(i) Apart from purse-seining name **two** other commercial methods of fishing (2mks)
- (ii) Describe how purse-seining is used to catch fish (6mks)
- (d) State **three** problems that face fishermen while fishing on Lake Victoria (3mks)
8. (a)(i) Differentiate between renewable and non-renewable sources of energy. (2mks)
- (ii) Give **three** examples of renewable energy (3mks)
- (b)(i) Define energy crisis (2mks)
- (ii) Explain **three** ways in which generation and use of energy leads to environmental Degradation. (6mks)
- (c) Explain **four** methods used to control floods in Kenya (4mks)
- (d) Students of Kwisero District went for a field study on River Nzoia on effects of flooding on the environment.
- Give **four** effects they saw (4mks)
9. Use the chart below to answer question 9a

- (a) (i) Name the type of trade shown in the chart above (1mk)
- (ii) Name the type of countries marked X and Y (2mks)
- (iii) State the problems country Y may face in trade with X (2mks)
- (b) (i) Name **three** members of Common Market for Eastern and Southern Africa countries (COMESA) who are also members of the East African community. (3mks)
- (ii) Give **five** benefits of COMESA to member states (5mks)
- (c)(i) Explain why most African countries suffer trade deficit (6mks)
- (ii) Explain **six** ways the government can take to improve balance of trade in Kenya (6mks)
10. (a)(i) Name three minerals recently discovered in Kenya (3mks)
- (ii) Give the **two** types of open cast mining (2mks)
- (b) Describe how deep shaft mining is done

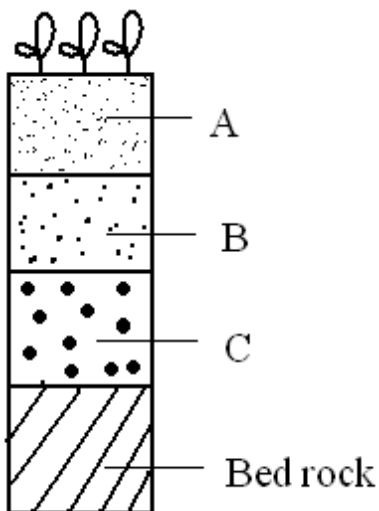

- (c) (i) Describe how mining contributes to the economy of Kenya (8mks)
 (ii) State **three** effects of mining on the environment (3mks)
 (iii) Give **three** ways in which mining derelicts can be rehabilitated (3mks)

EXAM 6 PAPER 1

SECTION A (25 MARKS)

Answer all the questions in this section.

1. (a) State **two** theories associated with the origin of the earth and solar system (2marks)
 (b) State **three** effects of the revolution of the earth (3marks)
2. (a) Give **two** components of soil (2marks)
 (b) The diagram below shows a simple soil profile. Name the horizontal A, B and C (3marks)

3. (a) Give **two** ways through which minerals occur (2marks)
 (b) Explain **two** factors influencing the exploitation of minerals (4marks)
4. (a) Give **three** processes through which the atmosphere is heated (3marks)
 (b) State **two** factors that influence insolation received by earth (2marks)
5. (a) Differentiate between **Earthquakes** and **Earth tremors** (2marks)
 (b) State **two** human causes of Earth quakes (2marks)

SECTION B

Answer questions 6 and any other 2 questions from this section.

6. (a) Study the map of Nkubu (1:50,000) sheet 1222/2 provided and answer the following questions:
 (i) Measure the length of Mitunguu – Meru all – weather (loose service) road in the North – East corner of the map. Give your answer in KMs. (2marks)

(ii) Calculate the area of the forest to the West of Easting 40. Give your answer in square KM. (2marks)

(iii) Give **two** man-made features found on Grid square 4186 (2marks)

(iv) Give **six** figure grid reference of a trigonometrical station (other) to the East of Rune swamp (2marks)

(b) Draw a rectangle measuring 12cm by 8cms to represent the area bounded by Easting 54 and 60 and Northings 95 and 99.

On it show the following features

- A swamp
- River Mariaria
- Quarry
- Meru – Mitunguu road

(5marks)

(c) (i) Citing evidence from the map. Give **three** economic activities carried out in the area covered by the map (3marks)

(ii) Explain **two** factors which have influenced the distribution of settlement in the area covered by the map (4marks)

(iii) Describe the relief of the area covered by the map (5marks)

7. (a) (i) Define **mass wasting** (2marks)

(ii) Name **three** forms of slow mass wasting (3marks)

(b) State **two** conditions which may influence occurrence of landslides (2marks)

(c) Explain **four** factors which cause soil creep (8marks)

(d) Explain **five** effects of mass wasting on physical and human environment (10marks)

8. (a) (i) Define term **Artesian basin** (2marks)

(ii) State **four** factors influencing the development of Karst scenery (4marks)

(b) (i) Give **four** underground features in Karst scenery (4marks)

(ii) Describe briefly how the following features in Karst scenery are formed:

- Polge (3marks)

- Doline (3marks)

(c) (i) Give **three** sources of ground water (3marks)

(ii) Explain **three** significance of resultant features in limestone areas to human activities (6marks)

9. (a) What is river capture? (2marks)

(b) (i) State **three** types of meanders at a lower course of a river (3marks)

(ii) State **three** factors influencing the rate of river erosion (3marks)

(c) (i) Give **three** processes of river erosion (3marks)

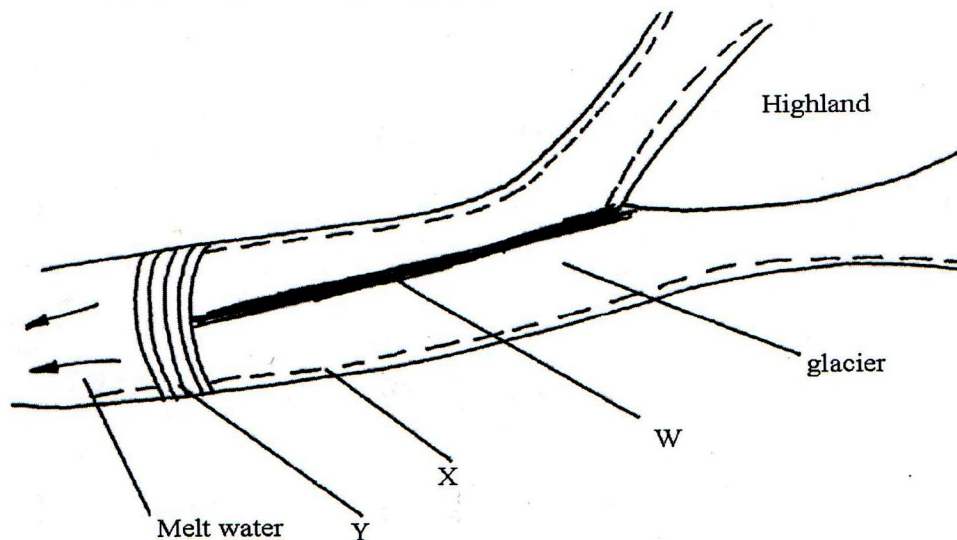

(ii) Describe **four** processes through which a river transports its load (8marks)

(d) Explain **three** negative influences of rivers on human activities (6marks)

10. (a) (i) Give **two** ways through which ice moves outwards from the area of accumulation (2marks)

(ii) State **three** factors influencing glacial erosion (3marks)

(b) (i) The diagram below shows types of moraine carried by glacier. Name the parts labeled W, X, Y. (3marks)

(ii) Describe **two** ways through which glacial erosion takes place (4marks)

(c) Explain **three** positive significance of glaciations to human activities (6marks)

(d) Students of Kusumek Sec. School are to carry out a field study on snowcapped Mt. Kenya

(i) State **two** ways in which the students would prepare themselves for the field study (2marks)

(ii) Give **three** methods of recording the data collected (3marks)

(iii) State **three** problems they are likely to face in the course of field study (2marks)

PAPER 2

SECTION A

Answer all questions in this section

1. (a) Define a breeze (1mark)

(b) Give reasons why water masses heat up more slowly than land masses (4marks)

2. (a) Name **three** types of vegetation (3marks)

(b) State **two** topographical factors that influence distribution of vegetation (2marks)

3. (a) Differentiate between a forest and forestry. (2marks)

(b) State the importance of forests and forest products to Kenya (3marks)

4. (a) What is a dead ground in photograph? (2marks)
(b) Give **three** disadvantages of photographs (3marks)
5. (a) What is land dereliction? (2marks)
(b) State the characteristics of derelict land (3marks)

SECTION B

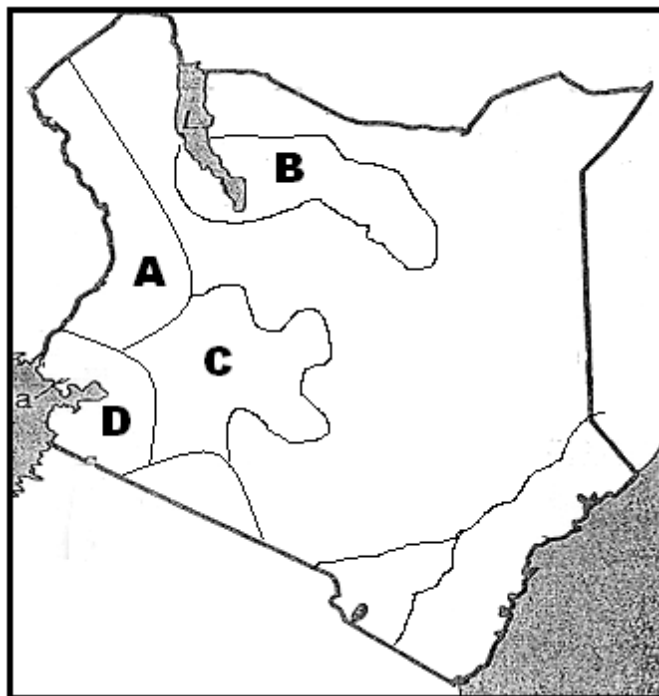

Answer questions 6 and any other two questions from this section

6. (a) The table below shows crop production in tones in Kenya between 2008 and 2012 .Study it and answer the questions that follows

Year/ crop	Tea	Coffee	Sisal	Maize
2008	3,500	1,200	700	500
2009	4,000	1,000	800	400
2010	4,200	1,800	400	5000
2011	5,000	1,100	300	600
2012	4,500	2,500	300	400

- (i) Using a vertical scale of 1cm represents 1000 tonnes, draw a compound bar graph to represent the above data (10marks)
- (ii) State four conclusions that can be derived from the graph that you have drawn (4marks)
- (b) State five ways in which maize is used in Kenya (5marks)
- (d) A field study was carried out on maize production in Kenya
- (i) Identify four pests that the study would have come across (4 marks)
- (ii) List two effects of stalk rot diseases on the maize the study would have established. (2marks)

7. Below is a map of Kenya, use it to label the different climatic regions

- (a) (i) Name the climatic regions marked A, B, C and D (4marks)
- (ii) State the characteristics of the climate marked B (4marks)
- (iii) Which two deserts are found in this region (B) (2marks)
- (b) (i) Why are Kenyan highlands most agriculturally productive areas of Kenya? (8marks)
- (ii) Differentiate between aridity and desertification (2marks)
- (c) Explain how people can influence climate (5marks)

8. (a)
- (i) Name four methods of mining (4marks)
- (ii) Minerals are divided into three main types, name them giving examples for each (3marks)
- (iii) Name three methods of underground mining (3marks)
- (b) (i) State the significance of soda ash mining in Kenya (6marks).
- (ii) Give the problems facing soda ash production in lake Magadi (4marks)
- (c) What are the problems facing mining industry in Kenya (5marks)

- 9.
- (a) State three physical conditions that favour coffee growing in the central highlands of Kenya (3marks)
- (b) Describe the stages involved in coffee production from picking to marketing (8marks)
- (c) Explain four problems facing coffee farming in Brazil (8marks)

- (d) Your geography class carried out a field study on a coffee farm.
(i) State four methods the class may have used to collect data (4marks)
(ii) During the field study, the class collected data on quantities of coffee produced from the farm in the last five years.
State two methods that the class may have used to present the data (2marks)
10. (a)
(i) Define the term dairy farming (1mark)
(ii) Describe **three** characteristics of dairy farming (6marks)
- (b) Describe how the following factors influence dairy farming in Denmark
(i) Government support factor (4marks)
(ii) Co-operative organization (4marks)
- (c) Compare dairy farming in Kenya and Denmark under the following subheadings
(i) Distribution of dairy farming (2marks)
(ii) Dairy feeds (2marks)
(iii) Contribution to the economy (2marks)
- (d) List four diseases that pose a major problem for dairy farmers in Denmark (4marks)

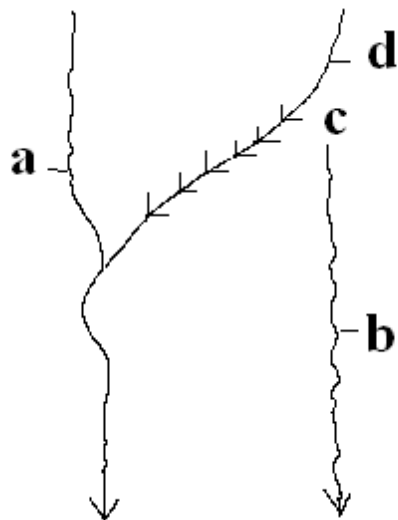

EXAM 7

PAPER 1

SECTION A (25 MARKS)

Answer the entire question in this section

1. (a) State two effects of the movement of the earth around the sun. (2marks)
(b) State any three characteristics of troposphere. (3marks)
2. (a) State two factors that influence the movement of a glacier. (2marks)
(b) Describe the formation of a crag and tail. (3marks)
3. (a) The diagram below shows sections of a river. Study it and answer the questions that follow.

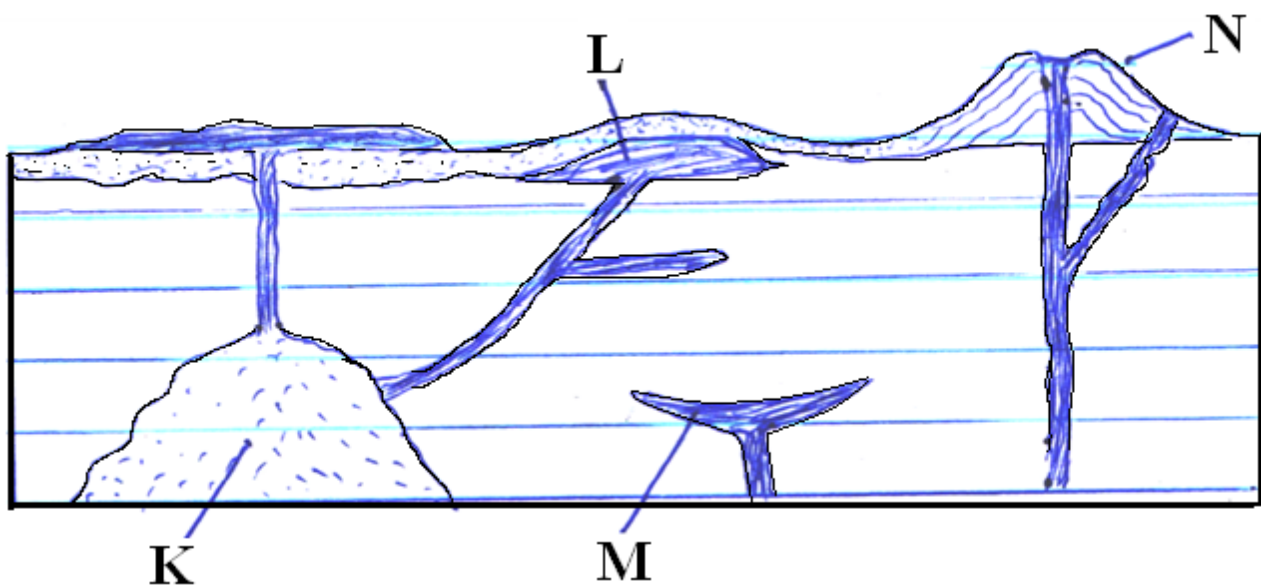

- (a) Name the process illustrated in the diagram. (1mark)
- (b) Name the parts marked a,b,c and d. (4marks)
4. (a) Define the term epicenter. (1mark)
- (b) Explain how the following factors can influence the occurrence of earthquakes.
- (i) Magma movement. (2marks)
- (ii) Gravitative pressure. (2marks)
- 5 (a) State the two ways in which a spring may be formed. (2marks)
- (b) Name three surface features found in a limestone area. (3marks)

SECTION B

Answer question 6 and any other two questions from this section

6. Study the map of Kitale 1:50,000 (sheet 75/3) provided and answer the following questions.
- (a) (i) Convert the scale of the map into a statement scale. (2marks)
- (ii) Name two ways in which relief has been shown on the map. (2marks)
- (iii) Calculate the area of Kapolet forest. (2marks)
- (b) (i) Give the direction of the Air photo principal point at grid square 4015 from the Air photo principal point at grid square 3516. (2marks)
- (ii) Measure the distance of the dry weather road from the Junction at grid reference 303227 to the point at grid reference 347270. Give your answer in kilometers. (2marks)

- (c) Draw a rectangle measuring 14cm by 10cm to represent the area enclosed by the Eastings 23 and 30 and Northings 13 and 18. (2marks)
- On the rectangle, mark and name the following features;
- (i) Kitale town. (1mark)
 - (ii) Koitobos River. (1mark)
 - (iii) All weather road, loose surface. (1mark)
 - (iv) Seasonal swamp. (1mark)
- (d) (i) Describe the drainage of the area covered by the map. (5marks)
- (ii) Citing evidence from the map, give two economic activities carried out in the area covered by the map other than cattle keeping. (4marks)
7. (a) (i) Differentiate between volcanicity and vulcanicity. (2marks)
- (ii) Name two types of volcanic eruptions. (2marks)
- (b) The diagram below represents features of vulcanicity. Use it to answer questions that follow.

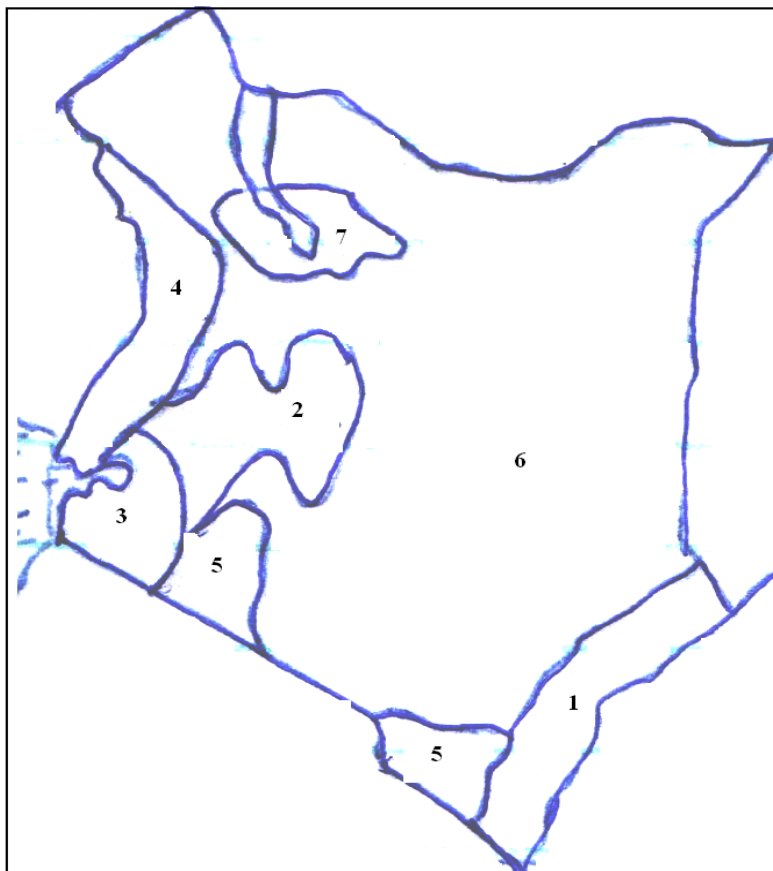

- (i) Name the features K, L and M. (3marks)
 - (ii) Give two examples of the features labeled N in East Africa. (2marks)
- (c) Describe how an explosion caldera is formed. (4marks)
- (d) Explain two ways in which geysers and hot springs at Olkaria are of significance to the economy of Kenya. (4marks)
- (e) Students from Kisumu girls intend to conduct a field study on volcanic features in the rift valley of Kenya.

- (i) Other than Olkaria, name two other places they are likely to visit for the study. (2marks)
- (ii) State two methods of data recording they are likely to use during the study. (2marks)
- (iii) What problems are they likely to encounter during the study. (2marks)
8. (a) (i) What is the difference between weathering and mass wasting? (2marks)
- (ii) Name three factors affecting the rate of weathering. (3marks)
- (b) (i) Describe how weathering breaks down rocks through exfoliation. (6marks)
- (ii) Describe the carbonation process of chemical weathering. (4marks)
- (c) (i) State any three conditions that facilitate down wash. (3marks)
- (ii) Name any three forms of landslides. (3marks)
- (d) State any four positive effects of mass wasting on the environment. (4marks)
9. (a) (i) What is a lake? (2marks)
- (ii) Name three ways through which lakes are formed. (3marks)
- (iii) List three sources of lake water. (3marks)
- (b) By use of a diagram, describe how Lake Victoria was formed. (5marks)
- (c) Explain two reasons why some lakes in the Rift valley have fresh water. (4marks)
- (d) State three economic significances of lakes. (3marks)
- (e) Students from your school intend to carry out a field study on lakes;
- (i) State one objective for their study. (1mark)
- (ii) Identify two methods they will use to record the data collected. (2marks)
- (iii) Which human activity might they have found to be affecting the lakes? (2marks)

10. (a) (i) What is climate? (2marks)
- (ii) Name two instruments found in a Stevenson's Screen. (2marks)

(b) The diagram below shows the climatic regions of Kenya.

(i) Name the climatic regions 1,2,5 and 7.

(4marks)

(ii) Explain four climatic characteristics of the region marked 3.

(4marks)

(c) (i) Describe the characteristics of desert type of climate.

(4marks)

(ii) Explain any three consequences of climatic change.

(6marks)

(iii) Name three countries that experience tropical monsoon type of climate outside Africa. (3marks)

PAPER 2

SECTION A

Answer ALL the questions in this section.

1. (a) Give three reasons why it is important to study Geography.

(3marks)

(b) How is Geography related to Biology?

(2marks)

2. (a) What is pastoral farming?

(2marks)

(b) Name three districts in Kenya where pastoralism is carried out.

(3marks)

3. (a) What is a photograph?

(2 mks)

(b) Name **three** types of ground photographs.

(3 mks)

4. (a) Outline **three** advantages of using a pie chart to represent data. (3 mks)
- (b) Define statistical data. (1 mk)
5. (a) What is soil conservation? (2marks)
- (b) State three farming practices that assist in soil conservation. (3marks)

SECTION B

Answer question 6 and any other two questions from this section

6. The table below shows five principal crops produced in Kenya in the year 2008 and 2009. Use it to answer questions (a)

Crop	Amount in metric tones 2008	Amount in metric tones 2009
Wheat	70	130
Maize	200	370
Coffee	95	55
Tea	240	295
Others	80	100

- (a) (i) Using a radius of 5cm, draw a pie chart to represent the crops produced in Kenya in 2008. (8marks)
- (ii) What was the difference in the amount of maize produced in Kenya in the period of 2008 and 2009. (2marks)
- (b) Name three districts in Kenya where maize is grown in large scale. (3marks)
- (c) State five problems facing maize farmers in Kenya. (5marks)
- (d) Your Geography class visited a tea factory for a field study on tea processing.
- (i) Outline four stages of tea processing that the class may have observed. (4marks)
- (ii) Apart from observation name three methods that the class may have used in collecting data. (3marks)
7. (a) (i) Define a forest. (2marks)
- (ii) Name two indigenous softwood timber in Kenya (2marks)
- (b) (i) Explain three advantages of planted softwood forests in Kenya. (6marks)
- (ii) Explain four problems facing commercial exploitation of tropical hardwood forests. (8marks)

- (c) Compare softwood forests in Kenya and those in Canada under the following headings.
- (i) Type of trees. (2marks)
 - (ii) Method of exploitation. (2marks)
- (d) State three ways through which the government of Kenya has conserved the Mau forest. (3marks)
8. (a) (i) What is mining? (2marks)
- (ii) Describe how deep-shaft mining is carried out. (4marks)
- (b) (i) Name the method used in mining trona on lake magadi in Kenya. (1mark)
- (ii) Give three uses of soda ash. (3marks)
 - (iii) Explain three ways in which Trona mining contributes to the economy of Kenya. (6marks)
- (c) (i) Name three oil producing countries in the middle East. (3marks)
- (ii) Explain three negative effects of mining on the environment. (6marks)
9. (a) Name three breeds of cattle reared in Kenya. (3marks)
- (b) State four factors that favour dairy farming in Denmark. (4marks)
 - (c) State five problems faced by dairy farmers in Kenya. (5marks)
 - (d) State five factors that favour beef farming in Argentina. (5marks)
 - (e) Explain four ways in which the government of Kenya could assist nomadic pastoralists improve the quality of their livestock. (8marks)
10. (a) Name two cocoa varieties grown in the world. (2marks)
- (b) Name the three towns that form the cocoa triangle. (3marks)
 - (c) Explain four physical conditions required for the growth of cocoa in Ghana. (8marks)
 - (d) Explain four problems facing cocoa farming in Ghana. (8marks)
 - (e) Identify four economic significance of cocoa in Ghana. (4marks)

EXAM 8

PAPER 1

SECTION A (25 MARKS)

Answer all questions in this section.

1. (a) List **two** main branches of geography. (2mks)
- (b) Give **three** reasons why the interior of the earth is still very hot. (3mks)
2. (a) Define the term hydrological cycle. (1mk)
- (b) Identify **four** process involved in the hydrological cycle. (4mks)
3. (a) Give **three** types of igneous rocks. (3mks)
- (b) State **two** characteristics of sedimentary rocks (2mks)
4. (a) Differentiate between Aridity and desertification. (2mks)
- (b) State **three** effects of aridity and desertification. (3mks)
5. (a) What is weathering? (1mk)

(b) State **four** factors that influence the rate of weathering.

(4mks)

SECTION B(75 MARKS)

Answer question 6 and any other two question from this section.

6. Study the map Kitale 1:50,000 (sheet 75/3) provided and answer questions that follows.

(a) (i) Identify **two** methods used to show relief of the area covered by the map. (1mk)

(ii) Give the **four** figure grid reference of Kipsain Police Post. (1mk)

(iii) Measure the length of the dry-weather road c 637 from the junction at 2528 to the junction at Dafina Estate. Give your answer in Kilometers. (2mks)

(iv) Find the bearing of Kapolet fishing Hut from Rogurr hill (∇ 75S7) (2mks)

(b) The rectangle below represent Eastings 33 to 39 and Northings 17 to 21 . Use it to answer the questions that follow.

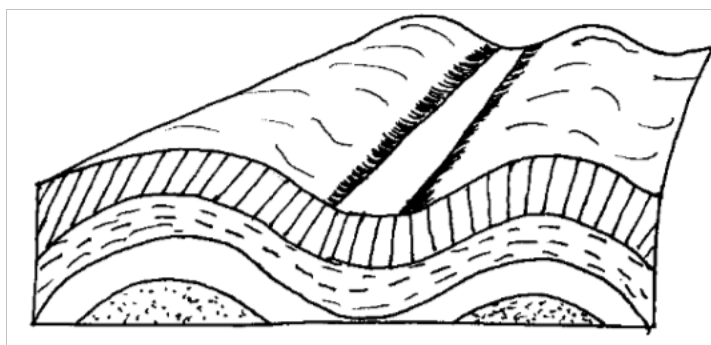

(i) Identify the features marked **P,R,S,T** (3mks)

(ii) Calculate the new scale of the rectangle above. (3mks)

c) Describe the vegetation in the area covered by the map. (5mks)

d) Citing evidence from the map, list **three** functions of Kitale town. (6mks)

7 (a) (i) Name **two**

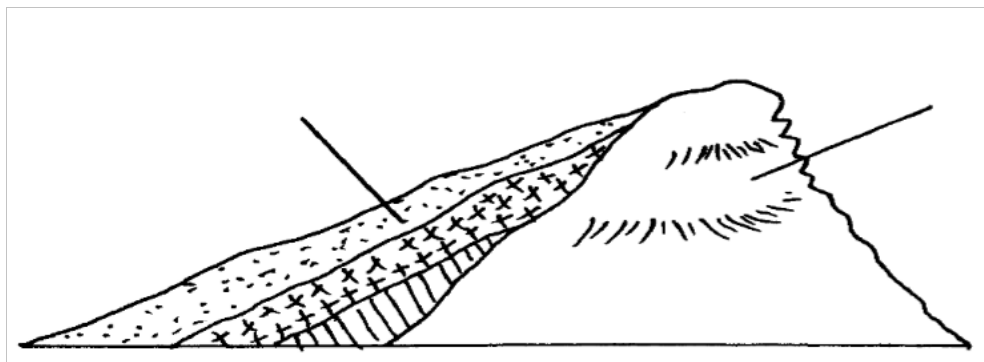

types of folds.

(b) The diagram with folding.

(2mks)
below shows features associated

- (ii) Name the parts marked **a**, **b** and **c** (3mks)
- (iii) Give **two** factors that influence the magnitude folding. (2mks)
- c) (i) Mention **three** fold-mountain forming periods. (3mks)
- (ii) Differentiate between a Recumbent fold and Over thrust fold. (2mks)
- d) (i) Using a well-labelled diagram, describe the formation of a fold mountain. (6mks)
- (iii) State **three** significance folding to man and the environment. (3mks)
- e). Suppose you carried out a field study in an area effected by folding.
- (i) List **two** methods you used to collect data. (3mks)
- (ii) State **two** importance route-map in filed study. (2mks)
8. (a) (i) What is a river? (1mk)
- (ii) Differentiate between a river regime and river competence. (2mks)
- (b) (i) Identify three features associated with the youthful stage of a river. (3mks)
- (ii) Explain **three** factors that influence the rate of river erosion. (6mks)
- (c) (i) Using a well labeled diagram describe the development of an ox-bow lake (6mks)
- (ii) Give **two** examples of ox bow lakes in Kenya (2mks)
- d) Explain **five** benefits of rivers to human activities. (5mks)
- 9 (a) (i) What is glacier. (1mk)
- (ii) State **two** condition that favour the formation of a glacier. (2mks)
- (b) (i) Describe plucking as a process in glacial erosion. (4mks)
- (ii) Explain **three** factors that influence the rate of glacial erosion. (6mks)
- (c) The diagram below shows a feature resulting from glacial erosion.

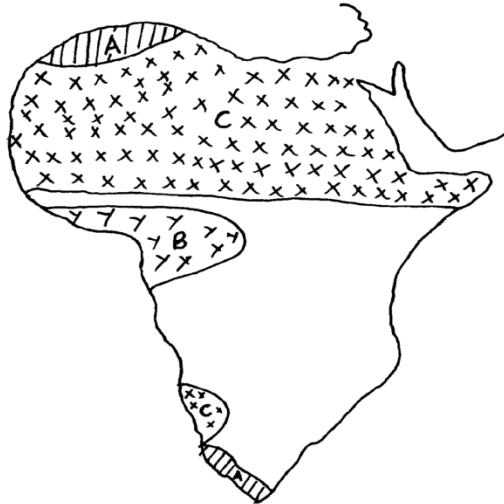

- (i) Name the parts marked **A** and **B** (2mks)
- (ii) Describe how the feature shown above is formed (4mks)
- (d) Explain three significance of glaciated upland features to human activities. (6mks)

10. (a) Explain how the following factors would influence the climate of an area

- (i) Latitude (2mks)
- (ii) Ocean currents (2mks)
- (iii) Distance from the sea. (2mks)

(b) The map below represents the climatic regions of Africa.

- (i) Name the regions marked **A, B, C** (3mks)
- (ii) Describe the climatic characteristics of the region marked **A** (5mks)
- (c) You have been asked to carry out a field study on the climate of L. Victoria Region.
 - (i) Name **two** factors modifying the climate of the region. (2mks)
 - (ii) Formulate **three** objectives for your study. (3mks)
 - (iii) Outline **three** effects of climate change in this region. (6mks)

PAPER 2

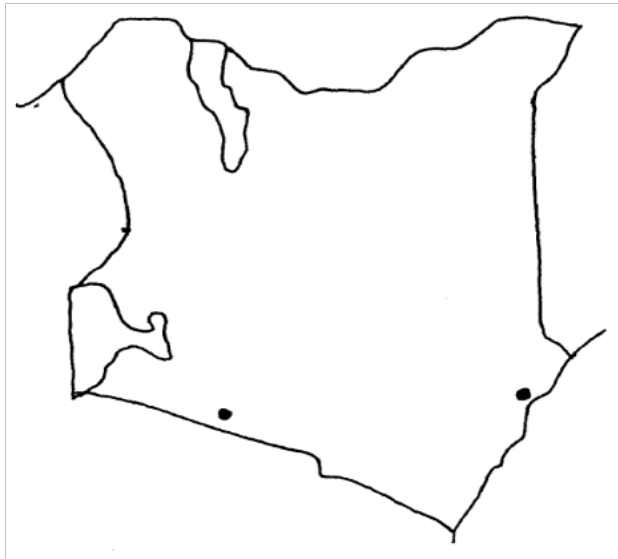

1. (a) What is a forest. (1mk)
- (b) State any **two** characteristics of the tropical hard wood forests. (2mks)
- (c) Name **two** species of indigenous softwood trees in Kenya. (2mks)
2. (a) What is the relationship between Geography and Economics? (2mks)
- (b) State three reasons why it is necessary to study geography (3mks)
3. (a) What is nomadic pastoralism? (2mks)

(b) State **three** characteristics of nomadic pastoralism in Kenya. (3mks)

4. (a) Name **two** types of ground photographs. (2mks)

(b) State **three** uses of photographs in the study of human and economic activities. (3mks)

5.

The given map above shows distribution of two minerals in Kenya.

(a) Name the minerals mined at A and B (2mks)

(b) State **three** uses of the mineral mined at A. (3mks)

SECTION B(75 MARKS)

Answer question 6 and any other two questions from this section.

6. The table below shows horticultural crop production in Kenya from the year 2000 to 2001

Crop	Quantity in tonnes		
	2000	2001	2002
Flowers	42,500	53,000	56,500
Oranges	22,600	23,500	24,000
Tomatoes	20,300	21,500	26,000
Carrots	15,000	15,400	16,000

(a) (i) Draw a comparative bar graph to represent the horticultural crop production in Kenya from the year 2000 to 2003. Use scale of 1cm to represent 10,000 tonnes (8mks)

(ii) State **three** advantages of using comparative bar graphs to represent geographical data. (3mks)

(b) (ii) State **three** reasons why growing of flowers under green houses is preferred in Kenya. 3mks)

(c) Mention three benefits of horticultural farming to the economy of Kenya. (3mks)

7. (a)(i) Name **two** major towns found in the oil palm growing areas in Nigeria. (2mks)

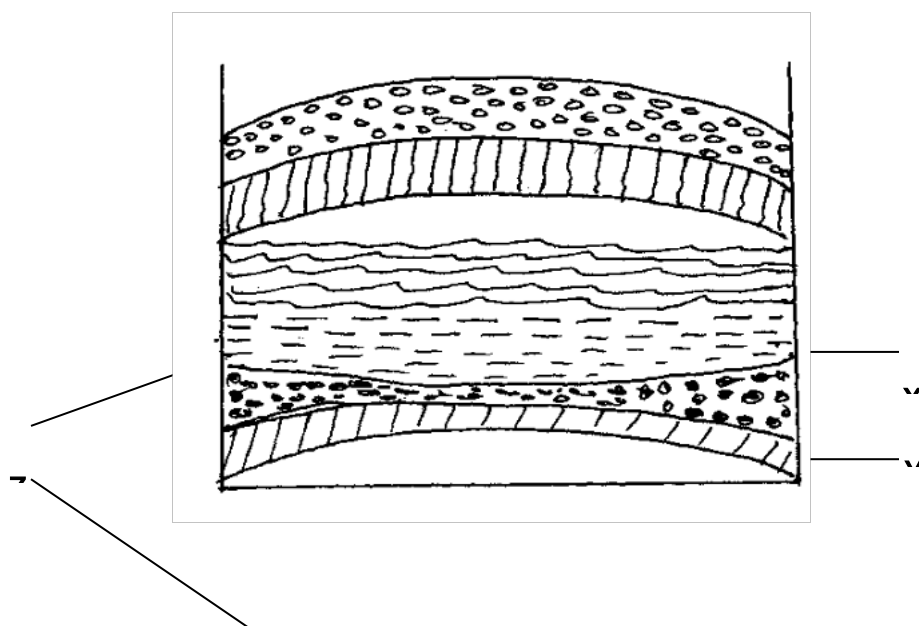

(ii) Explain **four** physical factors favouring oil palm growing in Nigeria. (8mks)

(b) Describe the steps involved in the processing of oil palm from the time it is harvested to marketing. (8mks)

(c) (i) State **four** problems facing oil palm farmers in Nigeria. (4mks)

(ii) List **three** uses of oil palm. (3mks)

8. a) The diagram below is an illustration of the occurrence of petroleum in rocks.

- (i) Name the parts labelled in letters **X,Y,Z** (3mks)
(ii) Describe how petroleum is formed (3mks)
- (b) (i) Outline stages involved in the processing of petroleum (3mks)
(ii) Name **three** by-products of petroleum. (3mks)
(iii) Name **two** leading petroleum producing countries in the middle East. (3mks)
- (c) Explain **three** contributions of petroleum mining to the economy of the middle East. (6mks)
(d) State **three** problems arising from the petroleum industry in the middle East. (3mks)
- 9.(a) (i) What is agroforestry? (1mk)
(ii) Give **three** reasons why agroforestry is encouraged in Kenya. (3mks)
- (b) (i) Name **two** examples of hardwoods exploited for commercial purposes in the tropical rain forest. (2mks)
(ii) Explain **five** factors that Limit the exploitation of tropical rain forests in Africa. (10mks)
- (c) (i) Give **three** ways in which logs are transported in Canada. (3mks)
(ii) Explain **three** reasons why softwood forests in Canada are more developed than in Kenya. (6mks)
- 10.(a) (i) State **three** characteristics of dairy breeds. (3mks)
(ii) Name any **three** breeds of dairy cattle that are reared in Kenya. (3mks)
- (b) (i) Explain **three** physical factors that favour dairy farming in Kenya. (6mks)
(ii) Name **three** products which are made after fresh milk has been processed. (3mks)
- (c) State **four** similarities of dairy farming in Kenya and Denmark. (4mks)
(d) Explain **three** measures which have been taken to improve dairy farming in Kenya. (6mks)

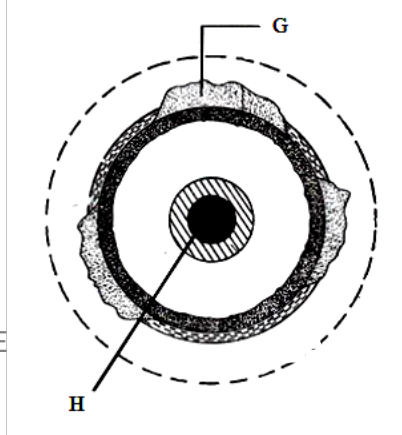

EXAM 9

PAPER 1

SECTION A

Answer **ALL** the questions in this section.

1. (a) What is the relationship between Geography and Chemistry? (2 marks)
(b) The diagram below shows the internal structure of the earth.

(i) Name the parts marked **G** and **H**.

(2 marks)

(ii) Name the dominant mineral in the mantle.

(1 mark)

(c) Apart from the effects of longitude on time, state two other effects of longitudes.

(1 mark)

2. (a) If a given parcel of air at 35°C contains 15.5 gm/m^3 of moisture and the given air can hold a maximum of 20 gm/m^3 at the same temperature, calculate the relative humidity. (2 marks)

(b) Draw a well labelled diagram to illustrate a mercury Barometer.

(3 marks)

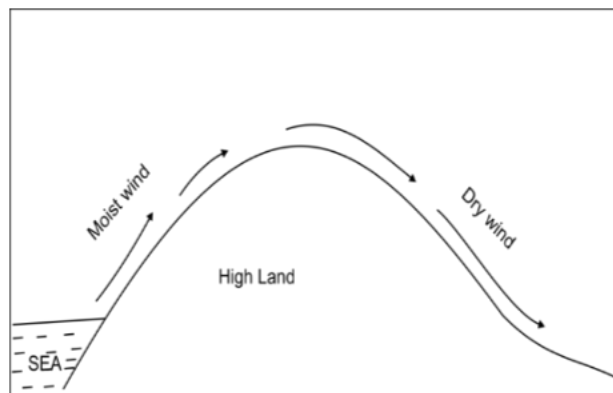

3. (a) State **three** causes of the earth movements.

(3 marks)

(b) List **two** features resulting from horizontal earth movements.

(2 marks)

4. Use the diagram below to answer the question that follows.

Outline the process through which moist winds shown above go through to eventually become dry winds.

(5 marks)

5. (a) Differentiate between secondary vegetation and planted vegetation.

(2 marks)

(b) State **three** characteristics of Mediterranean type of vegetation.

(3 marks)

SECTION B: MAPWORK

6. (a) Study the map of Migwani (1:50,000) provided and answer the questions.

(i) Give the location of Nzeluni Dispensary using latitudes and longitudes.

(2marks)

(ii) State **two** methods used to represent relief in the area covered by the map.

(2marks)

(iii) Name **three** man-made features in arid and square 9980.

(3marks)

(b) Measure the length of the all-weather road bound surface from grid square 9077 to 9073. Give your answer in kilometres and meters. (2marks)

(c) Draw a frame 15cm by 10cm to represent the area bound by grid by references 0080 to 1380 and references 0070 to 1370; on it mark and name

(i) River 1400

(ii) Dam

(iii) A dry weather road

(iv) Conical hill (5marks)

(d) Describe the distribution of settlement in the area covered by the map. (6marks)

(e) Describe the drainage of the area covered by the map. (6marks)

7. a) i) Name **three** types of tides. (3marks)

ii) Describe **two** processes by which waves erode. (4marks)

b) Using well labelled diagrams, explain how each of the following features is formed.

i) A spit (5marks)

ii) A blow hole (5marks)

c) Some students carried out a field study on coastal features found along the coast of Kenya.

i) List **three** features formed as a result of coastal emergence that they are likely to have studied.

(3marks)

ii) State **three** methods the students may have used to record their data.

(3marks)

iii) Describe **two** ways in which features resulting from coastal emergence are of significance to Kenya.

(2marks)

8. a) Name **three** types of desert landscape. (3marks)

b) Explain **three** ways through which the wind carries out erosion in the desert. (6marks)

c) With the aid of a well labelled diagram, describe how a rock pedestal is formed. (8marks)

d) State **two** factors which influence the transportation of material by wind in desert. (2marks)

- e) Explain **three** ways through which desert influence human activities. (6marks)
9. a) List **two** external land forming processes that may lead to the formation of lakes. (2marks)
- b) Identify **three** sources of water found in a lake. (3marks)
- c) Give three ways in which lakes may influence the natural environment in which they are found. (6marks)
- d) i) State **three** characteristics of lakes formed due to faulting. (3marks)
- ii) Explain **three** reasons why some rift valley lakes are drying up. (6marks)
- e) You intend to carry out a field study of Lake Kanyaboli in Siaya County.
- i) Design a working schedule you will use for your study. (3marks)
- ii) Why would it be important to hold group discussion during breaks in the process of data? (2marks)
10. a) i) What is a rock? (2 marks)
- ii) Explain the process of formation of mechanically formed sedimentary rocks. (5 marks)
- iii) Give **three** types of mechanically formed sedimentary rocks. (3 marks)
- b) Explain **three** ways in which rocks are significant to economy of Kenya. (6 marks)
- c) Students **from** your school carried out a field study on the type of rocks.
- i) One of the rock samples they collected in coral. Give three uses of this type of rock. (3 marks)
- ii) Give **three** methods of data collection they may have used during their study. (3 marks)
- iii) State **three** problems they are likely to have encountered during the field study. (3 marks)

PAPER 2

Answer all questions in this section

1. a) i) What is air pollution. (1 mark)
- ii) List **two** air pollutants (2 marks)
- b) State **two** problems arising from air pollution. (2 marks)
2. a) Name **two** exotic dairy breeds in Kenya. (2 marks)
- b) State **three** Problems facing dairy farmers in Kenya. (3 marks)
3. a) Name **two** main fresh water fishing ground in Tanzania. (2 marks)

(b) State **three** measures that the government of Kenya is undertaking to encourage fish farming.

(2 marks)

4. (a) Define the term animal sanctuary.

(2 marks)

(b) Name any three marine parks in Kenya.

(3 marks)

5. (a) Differentiate between transport and communication.

(2 marks)

(b) State **three** causes of the decline of the letter writing as a means of communication in Kenya.

(3 marks)

SECTION B

Answer question 6 and any other **two** questions in this section.

6. The table below shows the total number of horticultural crops exported from Kenya in 2008 and 2009. Use it to answer question a (i) and a (ii) below.

Crop	Total number of horticultural crops	
	2008	2009
Oranges	942,000	965,000
Tomatoes	120,000	154,000
French beans	97,000	128,000
Passion fruits	94,000	103,000
Onions	19,000	24,000
Flowers	29,000	41,000
Total	1,301,000	1,415,000

(a) (i) Identify the crop which had the highest increase in the number of export in Kenya between 2008 and 2009 and indicate the change.

(2 marks)

(ii) Calculate the percentage increase of onions between 2008 and 2009.

(3 marks)

(iii) Draw a divided rectangle 15cm long and 5cm wide to represent the horticultural export from Kenya in 2009. Show your calculations.

(10 marks)

(b) Name **three** types of flowers grown in Kenya.

(3 marks)

(c) Explain how the following factors influence horticultural farming in the Netherlands.

(i) Technology.

(2 marks)

(ii) Marketing systems.

(2 marks)

(d) State **three** reasons why horticultural crops are transported by air.

(3 marks)

7. a) i) Define the term forestry.

(1 mark)

ii) Give three differences between natural forest and planted forests.

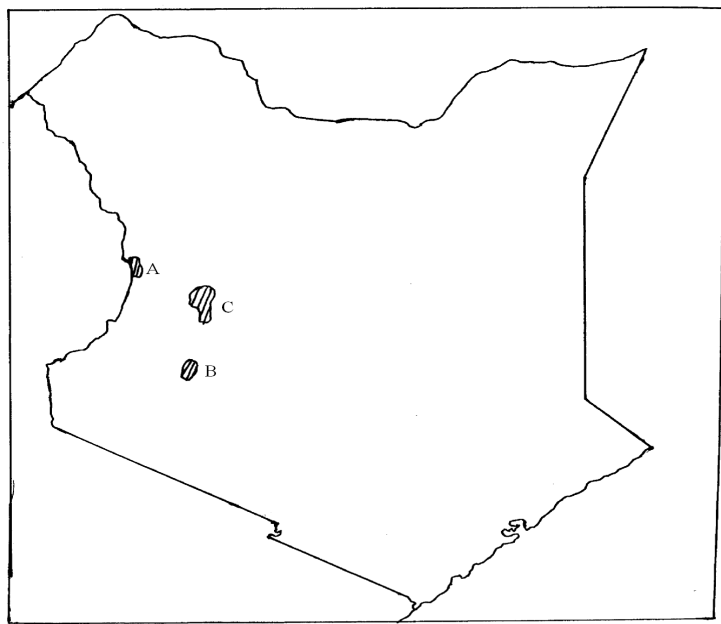

(3 marks)

b) Explain FOUR causes of forest depletion in Kenya today.

(8 marks)

c) i) From the map below, give the names of the forests marked A, B and C.

(3 marks)

ii) State **four** measures that are being undertaken by the Kenya Government to conserve forests.

(4 marks)

d) Explain three factors favouring the exploitation of softwoods in Canada.

(6 marks)

8. (a) Define the term wildlife.

(2 marks)

b) Explain **four** physical factors that influence the distribution of wildlife in east Africa.

(8 marks)

c) What are the problems facing wildlife in Kenya.

(8 marks)

d) Students of Katu high school intend to visit a National park near their school.

i) Outline the objectives for the visit.

(4 marks)

ii) Identify the methods they could use to collect the data.

(3 marks)

9. a) (i) State any **two** forms in which minerals occur

(2 marks)

(ii) Name any **three** places where limestone is mined in Kenya

(3 marks)

(b) Explain how the following factors influence the exploitation of a mineral

(i) Market

(2 marks)

(ii) The quality of ore

(2 marks)

(iii) Technology

(2 marks)

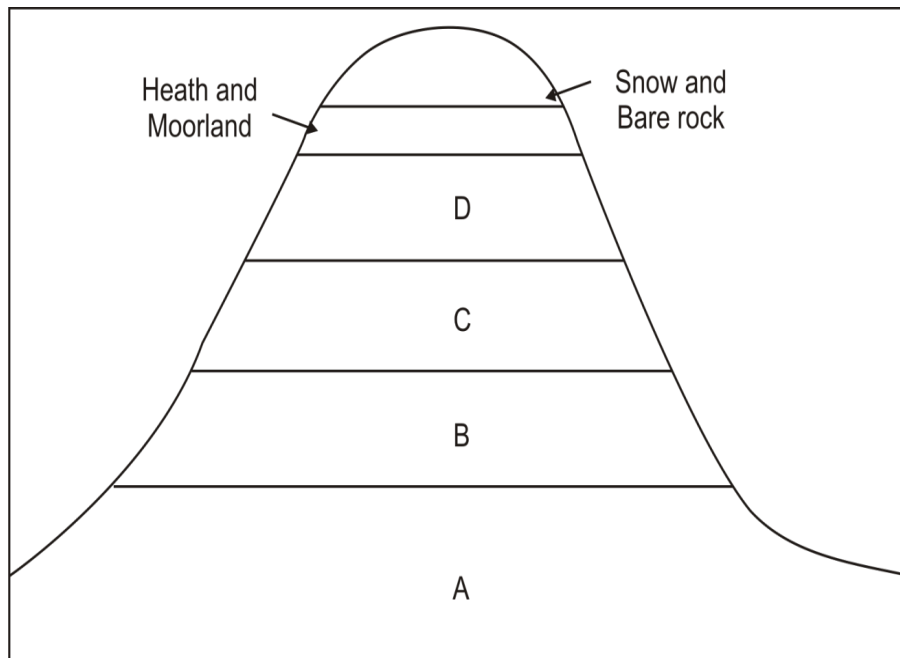

(c) (i) Name **two** provinces in South Africa where gold is mined

(2 marks)

(ii) Explain **three** problems facing gold mining in South Africa

(6 marks)

10. (d) Describe the processing of diamond in South Africa. (6 marks)
- a) (i) Name three types of vegetation (3 marks)
- (b) Use the diagram below of a mountain vegetation zone of a mountain in Kenya to answer the following questions.

- i) Name vegetation zones A, B, C and D. (4 marks)
- ii) Explain **three** importance of vegetation in zone C. (6 marks)
- iii) What is the Government doing to ensure that vegetation in zone B is not destroyed? (6 marks)
- (c) You are required to carry out a field study on vegetation zone C.
- (i) State any **three** methods you would use to collect your data. (3 marks)
- (ii) Explain why it is important to have a working schedule. (3 marks)
