

HYGIENE & NUTRITION GRADE 2

SCHEME OF WORK FOR TERM 1

COMPETENCY BASED CURRICULUM

HYGIENE AND NUTRITION ACTIVITIES GRADE 2 TERM 1

SCHOOL	GRADE	LEARNING AREA	TERM	YEAR
	2	Hygiene & Nutrition Activities	1	

Wk	Lsn	Strand	Sub-strand	Specific Learning Outcomes	Key Inquiry Questions	Learning Experiences	Learning Resources	Assessment	Reflection
1	1	Health Practices	Importance of breakfast	By the end of the sub-strand, the learner should be able to: state the meaning of the word breakfast	What is breakfast	Learners are guided to brainstorm on the meaning of the word breakfast. Learners identify breakfast as a meal taken after a long period of not having eaten (at night).	Hygiene and nutrition Grade 2 page 3-5 Chart Pictures Colours Crayons computing devices	Observation oral questions	
	2	Health Practices	Importance of breakfast	By the end of the sub-strand, the learner should be able	What is breakfast	Learners name food items they eat and drink in the morning.	Hygiene and nutrition Grade 2 page 6-9	Observation oral questions	

				to: identify when breakfast is taken during the day name food items taken during breakfast		Learners are guided to tell the importance of eating breakfast as a healthy habit.	Chart Pictures Colours Crayons computing devices		
--	--	--	--	---	--	--	--	--	--

2	1	Health Practices	Importance of breakfast	By the end of the sub-strand, the learner should be able to: tell the importance of eating breakfast as a healthy habit, appreciate the importance of taking breakfast in the morning	Why is it important to eat and drink something in the morning?	Learners are guided to keep a daily record of foods they eat for breakfast. Learners draw and colour foods eaten for breakfast using pencils, papers, crayons and computing devices. Learners can type names of foods eaten for breakfast using computing devices.	Hygiene and nutrition Grade 2 page 6-9 Chart Pictures Colours Crayons computing devices	Observation oral questions	
	2	Health Practices	Oral hygiene	By the end of the sub-strand, the learner should be able to: identify good oral habits that promote development of healthy teeth,	What things do I do that are good for my teeth?	In groups learners share experiences on things they do with their teeth. Learners are guided to identify good oral habits (brushing teeth at least twice a day, eating foods that are good for healthy teeth and visiting a dentist at least twice a year) and bad oral habits (nail biting, pencil chewing, using tooth picks and finger sucking) using pictures, video clips and illustrations.	Hygiene and nutrition Grade 2 page 10-11 Oral dental hygiene practitioner pictures of teeth showing effects of good oral habits and poor oral habits video clips	Observation oral questions	
3	1	Health Practices	Oral hygiene	By the end of the sub-strand, the learner should be able to: identify harmful oral habits that damage teeth	What things do I do that are good for my teeth?	Learners are guided to identify good oral habits (brushing teeth at least twice a day, eating foods that are good for healthy teeth and	Hygiene and nutrition Grade 2 page 13-15 Oral dental hygiene practitioner	Observation oral questions	

						visiting a dentist at least twice a year) and bad	pictures of teeth showing effects of		
--	--	--	--	--	--	--	---	--	--

						oral habits (nail biting, pencil chewing, using tooth picks and finger sucking) using pictures, video clips and illustrations	good oral habits and poor oral habits video clips		
	2	Health Practices	Oral hygiene	By the end of the sub-strand, the learner should be able to: practise good oral habits to promote their well-being	What things do I do that are harmful for my teeth?	Learners are guided to keep a simple record on the number of times they brush their teeth in a day.	Hygiene and nutrition Grade 2 page 13-15 Oral dental hygiene practitioner pictures of teeth showing effects of good oral habits and poor oral habits video clips	Observation oral questions	
4	1	Health Practices	Oral hygiene	By the end of the sub-strand, the learner should be able to: appreciate good oral habits to promote their well being	How many times do I brush my teeth in a day?	Learners listen to a talk by a dental practitioner on good oral habits Learners watch videos that promote good oral habits.	Hygiene and nutrition Grade 2 page 13-15 Oral dental hygiene practitioner pictures of teeth showing effects of good oral habits and poor oral habits video clips	Observation oral questions	
	2	Health Practices	Use of different	By the end of the sub-strand, the learner	How many rooms/areas	Learners describe their house to each other and	Hygiene and nutrition Grade 2 page 16-17	Observation oral	

			rooms in a house	should be able to: name the various rooms in a house,	are in your house? Which are these	are guided to identify common areas/rooms in their houses. Learners state the use of different rooms in the house to maintain hygiene(	pictures of equipment used in various rooms in a house	questions	
--	--	--	------------------	--	---	---	--	-----------	--

				mention the use of the various rooms in a house	Different rooms/areas in your home?	kitchen for cooking, bedroom for sleeping, dining for eating, Living room for socializing, and bathroom for bathing).	computing devices pencils papers crayons		
	1	Health Practices	Health Practices	Use of different rooms in a house	What are the main activities carried out in these rooms/ areas?	Learners are guided to sort out equipment for different rooms in a house based on the activities that are carried out in those rooms using pictures (jiko, utensils, chairs, tables, bed bucket/basins, sofa sets, wardrobe, knife, spoons).	Hygiene and nutrition Grade 2 page 18-19 pictures of equipment used in various rooms in a house computing devices pencils papers crayons	Observation oral questions	
	2	Health Practices	Use of different rooms in a house	By the end of the sub-strand, the learner should be able to: Name equipment and furniture used in the various rooms in a house.	Which equipment is found in these rooms/areas?	Learners are guided to mention the importance of keeping the various rooms in a house clean and tidy. Learners draw and colour pictures of equipment used in different rooms in a house.	Hygiene and nutrition Grade 2 page 18-19 pictures of equipment used in various rooms in a house computing devices pencils	Observation oral questions	

							papers crayons		
	1	Health Practices	Use of different	By the end of the sub- strand, the learner should be able to:	Why is it important to	Learners play games by placing different equipment	Hygiene and nutrition Grade 2 page 18-19	Observation oral questions	

			rooms in a house	mention the importance of keeping the various rooms in a house clean and tidy	keep the house clean	in their respective rooms using computing devices.	pictures of equipment used in various rooms in a house computing devices pencils papers crayons		
5	1	Health Practices	Cleaning of utensils	By the end of the sub-strand, the learner should be able to: mention reasons for cleaning utensils at home	Why do we clean utensils?	Learners mention reasons for clean utensils at home	Hygiene and nutrition Grade 2 page 26-27 realia (utensils and cleaning materials) computing devices papers pencils crayons	Observation oral questions	
	2	Health Practices	Cleaning of utensils	By the end of the sub-strand, the learner should be able to: identify materials used for cleaning utensils at home,	What do we use to clean the utensils?	Learners identify materials for cleaning utensils at home using realia (soap and soap dish, sponge/sisal fibre/piece of cloth, drying rack).	Hygiene and nutrition Grade 2 page 28-29 realia (utensils and cleaning materials) computing devices	Observation oral questions	

[illegible]

6	1	Health Practices	Cleaning of utensils	By the end of the sub-strand, the learner should be able to: clean, dry and store the utensils used at home.	How do we clean the utensils?	In groups learners practise cleaning, drying and storing the utensils (cup, plate, bowl/basin spoon, jug and sufuria).	Hygiene and nutrition Grade 2 page 28-29 realia (utensils and cleaning materials) computing devices papers pencils crayons	Observation oral questions	
	2	Health Practices	Cleaning of utensils	By the end of the sub-strand, the learner should be able to: Appreciate the importance of cleaning the utensils at home.	How do we dry and store the utensils?	Learners peer teach on how to clean, dry and store utensils	Hygiene and nutrition Grade 2 page 28-29 realia (utensils and cleaning materials) computing devices papers pencils crayons	Observation oral questions	
7	1	Health Practices	Dangers of second hand smoke	By the end of the sub-strand, the learner should be able to: mention substances that people smoke that are harmful to our health	Which are the Harmful substances that people smoke?	learners brainstorm on substances that people smoke and are harmful to our health (tobacco and cigarette	Hygiene and nutrition Grade 2 page 30-31 Flash cards Posters	Observation	

							Pictures computing devices		
	2	Health Practices		By the end of the sub- strand, the learner should be able to:	Which places/areas	learners mention the areas/places where	Hygiene and nutrition Grade 2 page 33-34	oral questions	

				mention the places where people smoke these substances, tell that a person has been smoking	do people smoke from? How can you tell that a person has been smoking ?	people smoke these substances learners share experiences on how they have encountered a person smoking	Flash cards Posters Pictures computing devices		
8	1	Health Practices		By the end of the sub-strand, the learner should be able to: state the meaning of the word second hand smoke	What is second hand smoke?	learners are guided to tell that a person has been smoking learners are guided to explain the meaning of the word second hand smoke	Hygiene and nutrition Grade 2 page 335-36 Flash cards Posters Pictures computing devices	Observation	
	2	Health Practices		By the end of the sub-strand, the learner should be able to: Tell the effects of second hand smoke on health, develop self-efficacy in avoiding second hand smoke	Why is it important to keep off second hand smoke?	Learners tell the effects of second hand smoke on health	Hygiene and nutrition Grade 2 page 35-36 Flash cards Posters Pictures computing device	oral questions	
9	1	Health Practices	Keeping water safe from contaminatio	By the end of the sub-strand, the learner should be able to:	What is water contamination	Learners are guided to brainstorm on the meaning of contaminated water	Hygiene and nutrition Grade 2 page 38-39 Charts	Observation	

			n	tell what is water contamination,		Learners are guided to carry out a simple experiment to illustrate how water is contaminated	Pictures computing devices		
		Health Practices	Keeping water safe from	By the end of the sub-strand, the	How is water Contaminated	Learners carry out an experiment that will	Hygiene and nutrition Grade 2 page 40-41	oral questions	

			contaminatio n	learner should be able to: carry out experiment to demonstrate water contamination,		enable them observe physical changes that occur in contaminated water (change of colour, smell, presence of foreign substances)	Charts Pictures computing device		
10	1	Health Practices	Keeping water safe from contaminatio n	By the end of the sub- strand, the learner should be able to: mention changes in water that is contaminated, state ways in which we can prevent water contamination	What happens when water is contaminated?	Learners are guided to tell how they can prevent contamination of water for drinking at home and school Learners open and play a video on activities to prevent water contamination	Hygiene and nutrition Grade 2 page 40-41 Charts Pictures computing device	observation, oral questions	
	2		Re-using water and soap at home	By the end of the sub- strand, the learner should be able to: explain the meaning of word reusing,	What do we use water and soap for?	Learners brainstorm on the meaning of the word re- using	Hygiene and nutrition Grade 2 page 44-45 Charts Pictures computing device	observation, oral questions	
11	1		Re-using water and soap at home	By the end of the sub- strand, the learner should be able to: mention ways of re- using water and soap in the home	How can we re- use water and soap?	Learners are guided to tell activities at home that use water or soap (washing clothes, washing dishes, washing hands, washing fruits and vegetables).	Hygiene and nutrition Grade 2 page 46-47 Charts Pictures computing device	observation, oral questions	

							realia (bottles, soap flakes from left over soap, water)		
--	--	--	--	--	--	--	--	--	--

	2		Re-using water and soap at home	By the end of the sub-strand, the learner should be able to: make a soap gel from left over soap	How do we make a soap gel?	Learners are guided to state how else the water from those activities can be re-used (watering plants using water that washed fruits and vegetables; cleaning the house/toilets and sprinkling on earthen surfaces to reduce dust using water that washed clothes and hands)	Hygiene and nutrition Grade 2 page 48-49 Charts Pictures computing device realia (bottles, soap flakes from left over soap, water)	Observation oral questions	
12	1		Re-using water and soap at home	By the end of the sub-strand, the learner should be able to: appreciate re-using water and soap to minimize wastage in the home.	Why do we re-use water and soap?	Learners observe a demonstration on how to make a soap gel using left over soap from home Learners practice how to make the soap gel and use it for hand washing	Hygiene and nutrition Grade 2 page 50-51 Charts Pictures computing device realia (bottles, soap flakes from left over soap, water)	Observation oral questions	
	2	Personal Hygiene	Use and care of personal items	By the end of the sub-strand, the learner should be able	What items do we use for personal	Learners brainstorm on items they use for personal cleanliness.	Hygiene and nutrition Grade 2 page 53-54	Observation oral questions	

				to: a) identify the items used for personal cleanliness	cleanliness?		Realia cleaning materials water soap computing devices		
--	--	--	--	--	--------------	--	--	--	--

13	1	Personal Hygiene	Use and care of personal items	By the end of the sub-strand, the learner should be able to: identify the items used for personal cleanliness	How do we clean personal items?	In groups, provide learners with a variety of materials used in personal hygiene (examples: combs, toothbrush, face towel, handkerchief, socks and shoes, towel, body lotion/jelly, nail cutter, cotton buds, toothpaste) for learners to identify which are their personal items.	Hygiene and nutrition Grade 2 page 53-54 Realia cleaning materials water soap computing devices	observation, oral questions	
	2	Personal Hygiene	Use and care of personal items	By the end of the sub-strand, the learner should be able to: give reasons why we should not share personal items	Why should we not share personal items?	Learners are guided to identify personal items and give reasons why they should not be shared	Hygiene and nutrition Grade 2 page 54-55 Realia cleaning materials water soap computing devices	observation, oral questions
